# Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new subindex – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

<b>FOOD AND NON-ALCOHOLIC BEVERAGES</b>	 Food	 Bread and cereals	 Meat	 Fish	 Milk, cheese and eggs	 Oils and fats
	 Fruit	 Vegetables	 Potatoes, Yam & other tubers	 Food products n.e.c	 Coffee, tea and cocoa	 Soft drinks

<b>ALCOHOLIC BEVERAGES, TOBACCO AND KOLA</b>	 Spirits	 Wine	 Tobacco	 Narcotics
--	--	---	--	--

<b>CLOTHING AND FOOTWEAR</b>	 Clothing materials, other articles of clothing	 Garments	 Cleaning, repair and hire of clothing	 Shoes and other footwear	 Repair and hire of footwear
----------------------------------	---	---	--	--	---

## HOUSING, WATER, ELECTRICITY, GAS

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

Solid fuels

## FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

## HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services

## TRANSPORT

Motor cars

Motor cycles

Bicycles

Vehicle spare parts

Fuels and lubricants for personal transportation

Maintenance and repair of personal transport

Passenger transport by road

Passenger transport by air

Passenger transport by sea and inland waterways

## COMMUNICATION

Postal services

Telephone and telefax  
equipment

Telephone and telefax  
services

## RECREATION AND CULTURE

Audio-visual,  
photographic  
and information  
processing equipment

Hairdressing salons  
and personal  
grooming  
establishments

Appliances,  
articles and products  
for personal care

Jewellery, clocks  
and watches

Insurance

Other services

# All Item Index

The consumer price index, (CPI) which measures inflation increased by 11.85 percent (year-on-year) in November 2019. This is 0.24 percent points higher than the rate recorded in October 2019 (11.61) percent.

Increases were recorded in all COICOP divisions that yielded the Headline index.

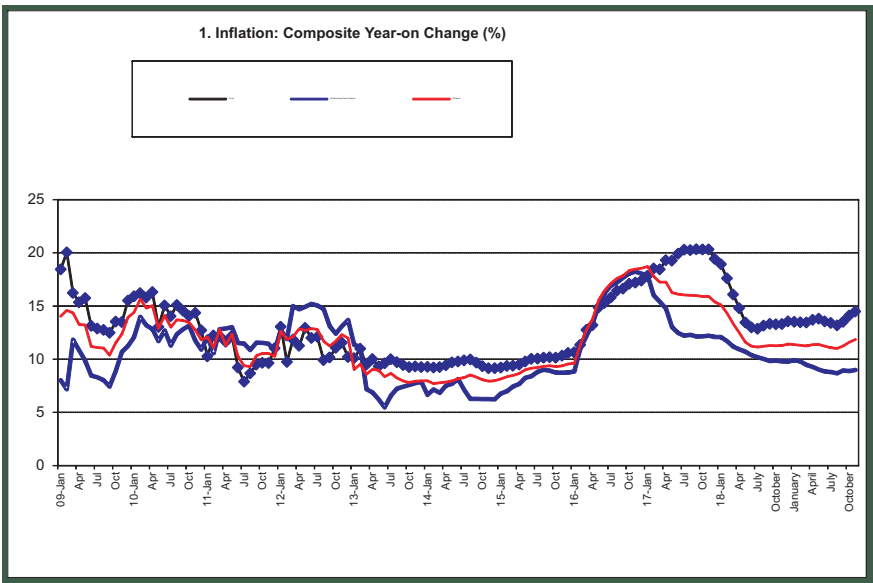

On month-on-month basis, the Headline index increased by 1.02 percent in November 2019, this is 0.05 percent rate lower than the rate recorded in October 2019 (1.07) percent.

The percentage change in the average composite CPI for the twelve months period ending November 2019 over the average of the CPI for the previous twelve months period was 11.35 percent, representing a 0.05 percent point from 11.30 percent recorded in October 2019.

The urban inflation rate increased by 12.47 percent (year-on-year) in November 2019 from 12.20 percent recorded in October 2019, while the rural inflation rate increased by 11.30 percent in November 2019 from 11.07 percent in October 2019.

On a month-on-month basis, the urban index rose by 1.07 percent in November 2019, down by 0.08 from 1.15 percent recorded in October 2019, while the rural index also rose by 0.98 percent in November 2019, down by 0.01 from the rate recorded in October 2019 (0.99) percent.

The corresponding twelve-month year-on-year average percentage change for the urban index is 11.75 percent in November 2019. This is higher than 11.68 percent reported in October 2019, while the corresponding rural inflation rate in November 2019 is 10.98 percent compared to 10.95 percent recorded in October 2019.

4. Inflation -Urban All Items (%)

# Food Index

The composite food index rose by 14.48 percent in November 2019 compared to 14.09 percent in October 2019.

This rise in the food index was caused by increases in prices of Bread, Cereals, Oils and fats, Meat, Potatoes, Yam and other tubers, and Fish.

On month-on-month basis, the food sub-index increased by 1.25 percent in November 2019, down by 0.08 percent points from 1.33 percent recorded in October 2019.

The average annual rate of change of the Food sub-index for the twelve-month period ending November 2019 over the previous twelve-month average was 13.65 percent, 0.11 percent points from the average annual rate of change recorded in October 2019 (13.54) percent.

# All Items Less Farm Produce

The "All items less farm produce" or Core inflation, which excludes the prices of volatile agricultural produce stood at 8.99 percent in November 2019, up by 0.11 percent when compared with 8.88 percent recorded in October 2019.

On month-on-month basis, the core sub-index increased by 0.79 percent in November 2019. This was up by 0.05 percent when compared with 0.74 percent recorded in October 2019.

The highest increases were recorded in prices of Cleaning, Repair and hire of clothing, Hospital services, Hairdressing saloons and personal grooming establishment, Glassware, tableware and household utensils, Vehicle spare parts, Repair and hire of footwear, Shoes and other footwear, Clothing materials, other articles of clothing and clothing accessories, Medical services and Passenger transport by air.

The average 12-month annual rate of change of the index was 9.19 percent for the twelve-month period ending November 2019; this is 0.06 percent points lower than 9.25 percent recorded in October 2019.

# State Profiles

In analysing price movements under this section, note that the CPI is weighted by consumption expenditure patterns which differ across states. Accordingly, the weight assigned to a particular food or non-food item may differ from state to state making interstate comparisons of consumption basket inadvisable and potentially misleading.

## All Items Inflation

In November 2019, all items inflation on year on year basis was highest in Kebbi (15.40%), Sokoto (14.58%) and Niger (14.15%), while Imo (10.43%), Abuja (10.30%) and Kwara (9.70%) recorded the slowest rise in headline Year on Year inflation.

On month on month basis however, November 2019 all items inflation was highest in Ebonyi (2.20%), Bayelsa (2.48%) and Niger (2.39%), while Abuja, Adamawa, Bauchi, Benue and Ondo recorded price deflation or negative inflation (general decrease in the general price level of food or a negative food inflation rate).

## Food Inflation

In November 2019, food inflation on a year on year basis was highest in Sokoto (18.77%), Kebbi (18.08%) and Ekiti (17.18%), while Katsina (12.61%), Bayelsa (12.50%) and Bauchi (12.44%) recorded the slowest rise.

On month on month basis however, November 2019 food inflation was highest in Kwara (2.92%), Sokoto (2.72%) and Bayelsa and Edo (2.66%), while Nasarawa (0.31%) recorded the slowest rise with Lagos and Ondo recording price deflation or negative inflation (general decrease in the general price level of food or a negative food inflation rate).
