The National Bureau of Statistics publishes this Trade statistics report on quarterly basis. Trade statistics compilation by NBS is largely from secondary data sources.

Data Sources:

The data sources for the compilations include; The Nigerian Customs Service (NCS) through the Nigerian Integrated Customs Information System (NICIS), Nigerian National Petroleum Corporation (NNPC) and Various oil companies in the upstream and downstream sectors of the oil industry, Nigerian Ports, Petroleum Products Pricing and Regulatory Agency (PPPRA), Nigeria Liquefied Natural Gas Ltd (NLNG), Central Bank of Nigeria (CBN), Cobalt International Services Ltd, Carmine Assayer Ltd Inspection Services, Neroli Technology, Nigerian Export Processing Zone Agency (NEPZA), Oil and Gas Free Zone Agency (OGFZA) Nigerian Electricity Regulatory Commission (NERC), Federal Airports Authority of Nigeria (FAAN), Nigeria Civil Aviation Authority (NCAA) and Nigerian Ports Authority (NPA).

Validation & Quality Assurance:

After collecting data from the above stated sources, they're screened and verified for outliers. Data validation is undertaken through a sample of the various Nigerian Customs Service outposts in Nigeria. Weight harmonization is also carried out through the various entry ports in Nigeria.

Processing/Analysis:

Data processing is done using the Global Eurotrace software and the processed data is banked in the trade database. Standard International Trade Classification (SITC) is used to classify and categorize trade items.

Definitions:

- **Domestic exports** - These are goods grown, extracted or manufactured in Nigeria and are sold in another country
- **Re-export** - These are goods of foreign origin which entered Nigeria to be consumed but are subsequently sold to another country without any substantial transformation. In other words, they are exported in the same condition as imported.
- **Raw material goods** - These refers to products of Agriculture, forestry, fishing and any other mineral that are in its natural form or which has undergone the minimal transformation required to prepare it for international marketing.
- **Agricultural goods** - These are goods that come from the planting of crops and/or rearing of animals.
- **Solid minerals** - These are elements found in the earth. These are naturally organic substances that are solid like precious stones, kaolin etc.
- **Energy goods** - These only refers to fuel woods in logs, for example hard wood, char-coal, coniferous wood in chips or particles etc.
- **Manufactured goods** - These are tangible goods created from the conversion of raw materials into consumable or useful products.
- **Other Petroleum products** - these consists of mineral fuels like Natural gas, oil, Bituminous coal etc.
- **Crude oil** - These are naturally occurring, unrefined petroleum products composed of hydrocarbon deposits and other organic materials.
- **Trade Intensity Index** - The trade intensity index is used to determine whether the value of trade between two countries is greater or smaller than would be expected based on their importance in world trade. It is defined as the share of one country's exports going to a partner divided by the share of world exports going to the partner.
