## Methodology

States IGR data is computed by the National Bureau of Statistics and the Joint Tax Board from official records and submissions by the 36 State Boards of Internal Revenue. These submissions are then validated and authenticated by the Joint Tax Board which is chaired by the Federal Inland Revenue Service and has the National Bureau of Statistics and the 36 State Boards of Internal Revenue as members.

## MDAs Revenues

These relate to revenues generated administratively by State MDAs during the course of providing various services to residents in the State

## Direct Assessment

Direct Assessment may relate to a form of personal income tax used to assess tax for self employed individuals.
