Trade Intensity in Q2 2021

Export Intensity Index with Five Major Trading Partners

The export intensity index compares the share of exports to each country in Nigeria's total exports, with the share of world exports going to that country, and therefore gives a measure of the importance of that country to Nigeria as an export destination. A higher number denotes a stronger relationship, and an index of one indicates that exports to that country are what would be expected given global trade patterns.

During the months of the Second quarter 2021 (April, May and June), Nigeria had intense export trade with India (6.52, 6.25, 6.89), Spain (4.55, 3.74, 4.30) and Canada (2.35, 2.56, 1.94). This is shown by the higher index recorded during the quarter. However, the available record showed lower export intensities for United States (0.26, 0.54, 0.06). During the quarter, Netherlands registered higher export intensities for April (2.0) and June (1.79) but a lower export intensity for May (0.18)

Import Intensity Index with five Major Trading Partners

During the quarter, the import intensity of Nigeria with the top importing partners (China, India, Netherlands and Russia) were higher in all the months. China recorded (1.75, 1.12 and 1.23) in April, May and June. Higher index was also recorded for India (5.17, 3.34 and 2.76 for April, May and June 2021) and Netherlands (1.60 and 1.36) in May and June but 0.86 in April. Other major trading partners were Russia which recorded (1.68, 1.22, and 1.20 for April, May and June) while United States recorded lower import intensities of 0.51, 0.46 and 0.52 during the months of Q2, 2021.

Trade by Mode of Transport

The majority of commodity exported out of Nigeria were transported via water. This was reflected in the value of exports by water in Q2, 2021. Water transport accounted for N5,033.37 billion or 99.09% of total exports. Air transport contributed N31.71 billion or 0.62%. Road transport was valued at N14.36 billion or 0.28%.

Similarly for imports, most goods brought into the country arrived via water transportation means. Water transport accounted for N6,508.63 billion or 93.65% of the value of total imports. Another mode of transport used were Air and road valued at N359.70 billion or 5.18% and N81.87 billion or 1.18%.

Trade by Custom Ports and Post

In Q2, 2021, the bulk of export transactions was conducted through Apapa port, valued at N4,727.95 billion or 93.08% of total exports, followed by Port Harcourt (3) which recorded N165.85 billion or 3.27%. while Tin Can Island recorded N123.49 billion or 2.43%.

In terms of imports, Apapa Port also recorded the highest transactions valued at N3,598.68 billion or 51.78% of total imports. This was followed by Tin Can Island N1,202.55 billion or 17.30%, Port Harcourt (3) N686.43 billion or 9.88% While Tin Can bonded warehouse recorded N429.96 billion or 6.19%.

METHODOLOGY

The National Bureau of Statistics publishes this Trade statistics report on quarterly basis. Trade statistics compilation by NBS is largely from secondary data sources.

Data Sources:

The data sources for the compilations include; The Nigerian Customs Service (NCS) through the Nigerian Integrated Customs Information System (NICIS), Nigerian National Petroleum Corporation (NNPC) and Various oil companies in the upstream and downstream sectors of the oil industry, Nigerian Ports, Petroleum Products Pricing and Regulatory Agency (PPPRA), Nigeria Liquefied Natural Gas Ltd (NLNG), Central Bank of Nigeria (CBN), Cobalt International Services Ltd, Carmine Assayer Ltd Inspection Services, Neroli Technology, Nigerian Export Processing Zone Agency (NEPZA), Oil and Gas Free Zone Agency (OGFZA) Nigerian Electricity Regulatory Commission (NERC), Federal Airports Authority of Nigeria (FAAN), Nigeria Civil Aviation Authority (NCAA) and Nigerian Ports Authority (NPA).

Validation & Quality Assurance:

After collecting data from the above stated sources, they're screened and verified for outliers. Data validation is undertaken through a sample of the various Nigerian Customs Service outposts in Nigeria. Weight harmonization is also carried out through the various entry ports in Nigeria.

Processing/Analysis:

Data processing is done using the Global Eurotrace software and the processed data is banked in the trade database. Standard International Trade Classification (SITC) is used to classify and categorize trade items.

Definitions:

- **Domestic exports** - These are goods grown, extracted or manufactured in Nigeria and are sold in another country
- **Re-export** - These are goods of foreign origin which entered Nigeria to be consumed but are subsequently sold to another country without any substantial transformation. In other words, they are exported in the same condition as imported.
- **Raw material goods** - These refers to products of Agriculture, forestry, fishing and any other mineral that are in its natural form or which has undergone the minimal transformation required to prepare it for international marketing.
- **Agricultural goods** - These are goods that come from the planting of crops and/or rearing of animals.
- **Solid minerals** - These are elements found in the earth. These are naturally organic substances that are solid like precious stones, kaolin etc.
- **Energy goods** - These only refers to fuel woods in logs, for example hard wood, char-coal, coniferous wood in chips or particles etc.
- **Manufactured goods** - These are tangible goods created from the conversion of raw materials into consumable or useful products.
- **Other Petroleum products** - These consists of mineral fuels like Natural gas, oil, Bituminous coal etc.
- **Crude oil** - These are naturally occurring, unrefined petroleum products composed of hydrocarbon deposits and other organic materials.
- **Trade Intensity Index** - The trade intensity index is used to determine whether the value of trade between two countries is greater or smaller than would be expected based on their importance in world trade. It is defined as the share of one country's exports going to a partner divided by the share of world exports going to the partner.
