PREFACE

The need for credible and timely socio-economic data in Nigeria has continued to be of growing interest, given that the country is a huge destination for investment. Also, the current socio-economic challenges being faced by the country has made it imperative for quantitative socio-economic data to be generated on regular basis.

As the coordinator of the National Statistical System (NSS) and the authoritative source of all official statistics in Nigeria, the National Bureau of Statistics; herein referred as the Bureau, ensures collaborations across all tiers of governments and civil societies organisations in statistical delivery on all facets of human endeavours towards meeting the data demands of policymakers and users both within and outside the country.

This publication is in the league of the Bureau's specific mandate of collecting, collating, processing, analysing and disseminating statistical information on all facets of the Nigerian economy as well as coordinating the production of relevant official statistics at all levels of governance in Nigeria.

The Social Statistics Report 2020 is a compilation of data on the contemporary social situations in Nigeria. The report presents a variety of social and economic statistics that measure the quality of life. The data for this publication was mainly sourced by administrative means from relevant Federal Government Ministries, Departments and Agencies (MDAs).

The Social Statistics Report is an annual publication with 3 years information across several indicators. The information presented in this report spans from 2017 to 2019, which serves as an estimate for measuring the social and economic conditions of the citizenry of Nigeria. This report has been divided into thirteen chapters and each chapter discussed a sector of the economy; the sectors covered in the report

include Anti-Corruption, Education, Health, Humanitarian Service, Security, Justice, Energy, Tourism, Transportation and Water Resources.

I wish to acknowledge the support of the Planning, Research and Statistics Departments of the relevant Federal MDAs who supplied data for the compilation of this report. I seek for further support from these agencies to assist the Bureau in data gathering for future publications.

This report will go a long way in meeting the needs of policymakers, researchers, students, social advocates and other relevant stakeholders to formulate policies and strategies in Nigeria. It is, therefore, my pleasure to present this edition of Social Statistics Report 2020 to all users.

CHAPTER ONE

ANTI-CORRUPTION

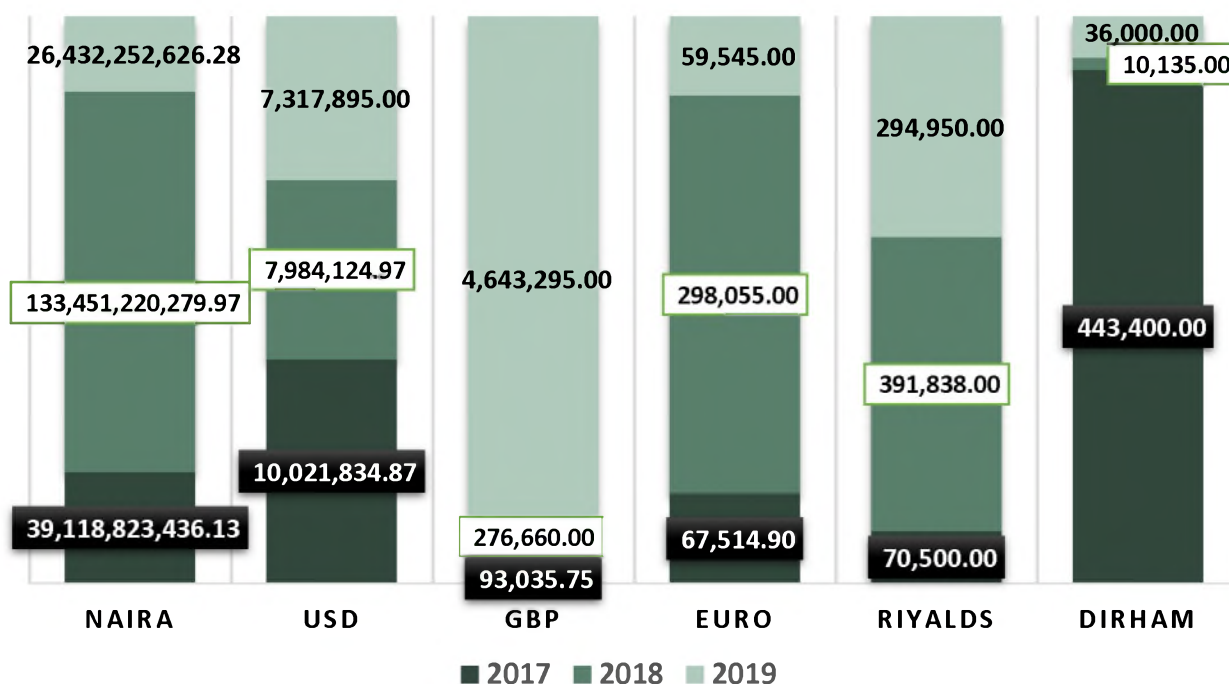

Corruption is an adverse global phenomenon. It has persistently become a major challenge especially in developing economies like Nigeria. It destabilizes society, endangers the rule of law, undermines the institutions and values of democracy, and threatens sustainable economic development. Unfortunately, the poor are most affected because they depend largely on public resources and social security.

The negative impact of corruption necessitated the emergence of anti-corruption campaigns. The Sustainable Development Goals (SDGs) Agenda 2030 emphasises the importance of transparency, accountability and anti-corruption for sustainable development. It also states that there is a direct link between corruption, peace, justice and inclusive society. This chapter deals with corruption-related data in Nigeria, reported by Independent Corrupt Practices and Other Related Offences Commission (ICPC) and Economic Financial Crimes Commissions (EFCC).

1.1 Economic and Financial Crime

Figure 1: shows the total value of money recovered through internal and external sources from 2017 to 2019. Moreover, in 2017 the amount recovered in Dollar was \$10.02million, which declined in 2018 and 2019 with \$7.98 million and \$7.32 million respectively. CHAPTER TWELVE

TRANSPORTATION

Transportation is an essential part of human activity, and in many ways forms the basis of all socio-economic interactions. Indeed, no two locations will interact effectively without a viable means of movement. Transportation is the movement of goods and persons from one point to another. Thus, a good transport system is essential to support economic growth and development. Transport statistics are grouped into four basic categories, namely, Rail, Road, Water and Air transportation.

12.1 Air Transport

Data from the Federal Airport Authority of Nigeria reveals that a total of 12,791,639 passengers travelled domestically in 2018 while 14,083,408 travelled in 2019. Lagos State airport recorded the highest number of travellers in 2018 and 2019 with 4,245,147 and 4,422,023 respectively. Also, Zaria airport has the least in 2018 with 219 while Eket airport has the least in 2019 with 105. (See Table 12.1).

Figure 65: Domestic Air Passenger Movement

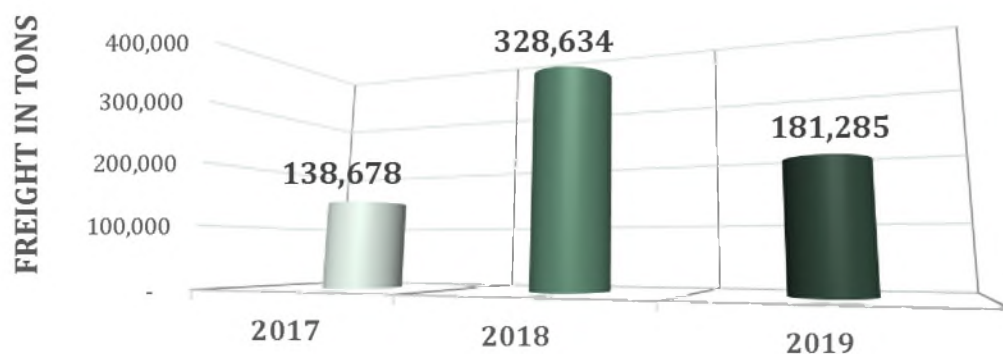

Similarly, the passengers that travelled overseas in 2018 were 4,438,799 while 4,654,909 passengers travelled in 2019. (See Table 12.3). In 2018 and 2019 a total of 164,938,399.43kg and 174,880,619.14kg loads were transported respectively.

(See Table 12.5a.). Also, in 2018, a total of 47,318,518.13kg mails were transported while in 2019, it increased to 55,625,908.06kg. (See Table 12.6).

12.2 Rail Transport

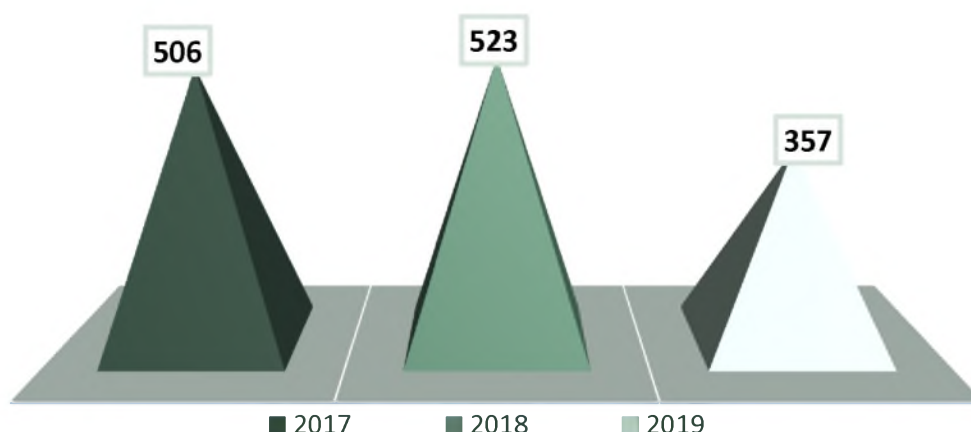

The Nigerian Railway Corporation data shows that a total of 2,593,744 passengers travelled in 2017, while 3,019,761 in 2018 and 2,925,342 in 2019. (See Table 12.8.) Fig. 66 shows that 138,678 metric tons of goods were moved in 2017 while 328,634 and 181,285 were moved in 2018 and 2019 respectively.

Figure 66: Annual Freight Volume

Train accidents that occurred in 2017 were 506, while in 2018, the number of accidents increased to 523 and declined in 2019 to 357.

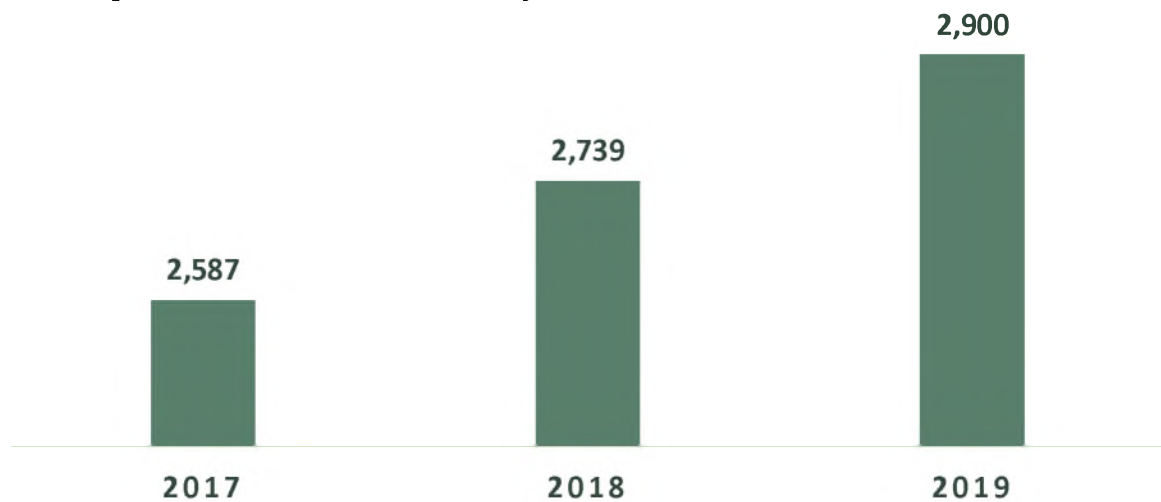

Figure 67: Total Train Accident by Year

12.3 Road Transport

The number of reported fatal road traffic crashes in 2017 was 2,587 while in 2018 and 2019 it recorded 2,739 and 2,900 respectively.

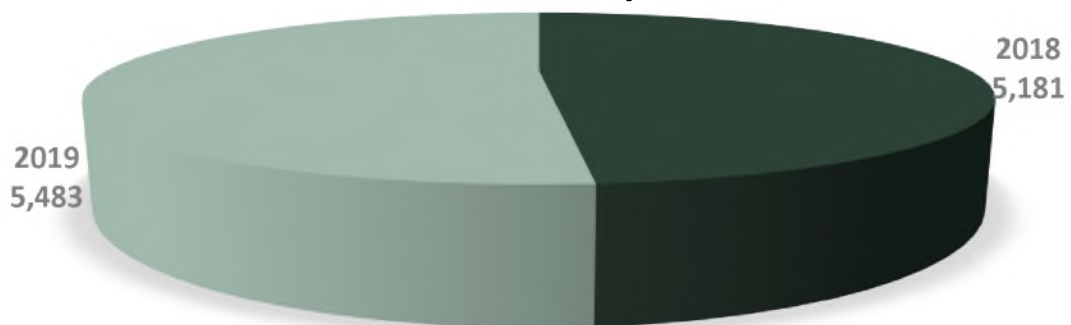

Figure 68: Reported Fatal Road Crashes by Year

In 2017, the total number of reported road crashes in Nigeria was 9,423, this increased in 2018 and 2019 to 9,741 and 11,072 respectively. Meanwhile, out of the total crashes, those reported with serious and light injuries in 2017, 2018 and 2019 were 5,456, 5,849 and 6,911 respectively. (See Table 12.11 and 12.12)

The number of persons killed in road traffic crashes in 2018 was 5,181, this increased in 2019 to 5,483.

Figure 69: Number Killed In Road Traffic Crashes by Year

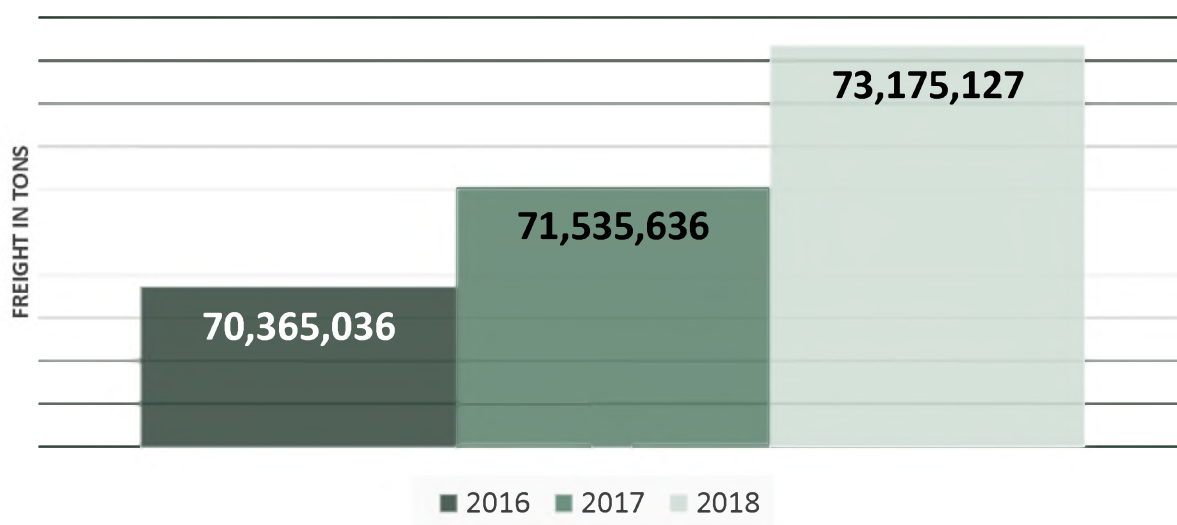

Similarly, Kaduna state recorded the highest number of deaths from road traffic crashes in 2019 with 484; followed by Ogun State with 364, while Bayelsa state recorded the least with 6 deaths. (See Table 12.15).

Also, the total number of national driver licenses processed in 2019 was 791,627; Lagos state recorded the highest with 791,627, followed by FCT with 84,147 while Kebbi state recorded the least with 1,894. (See Table 12.29).

12.4 Water Transport

The total volume of freight moved through the Nigeria seaports in 2016 was 70,365,036 metric tons, this increased in 2017 and 2018 to 71,535,636 and 73,175,127 respectively.

Figure 70: Freight Volumes (Metric Tonnes) by Nigeria Seaport

Similarly, freight volume data shows that Onne port in Rivers state recorded the highest with 75,918,403 metric tons, followed by Lagos port complex with 57,439,817 while the least was Calabar port in Cross River State with 6,770,685 metric tons. (See Table 12.36).

CHAPTER THIRTEEN

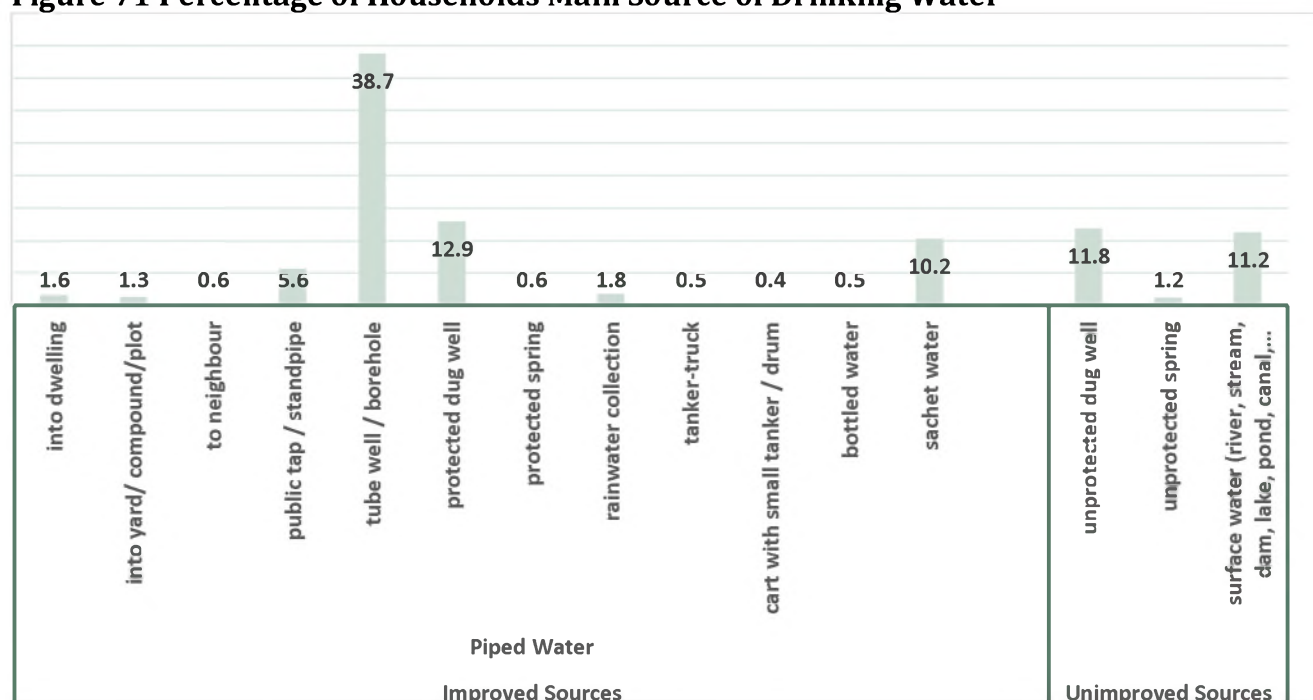

WATER RESOURCES

Water has a profound effect on human health both as a means to reduce disease and as a medium through which disease-causing agents may be transmitted". Water quality is, therefore, a key determinant of public health because many life-threatening diseases such as cholera, diarrhoea, dysentery, gastroenteritis and other water-transmitted diseases are ultimately linked to putrid water. Access to safe clean water for all and sound management of freshwater ecosystems are essential to human health, environmental sustainability and economic prosperity.

13.1 Sources of Drinking Water

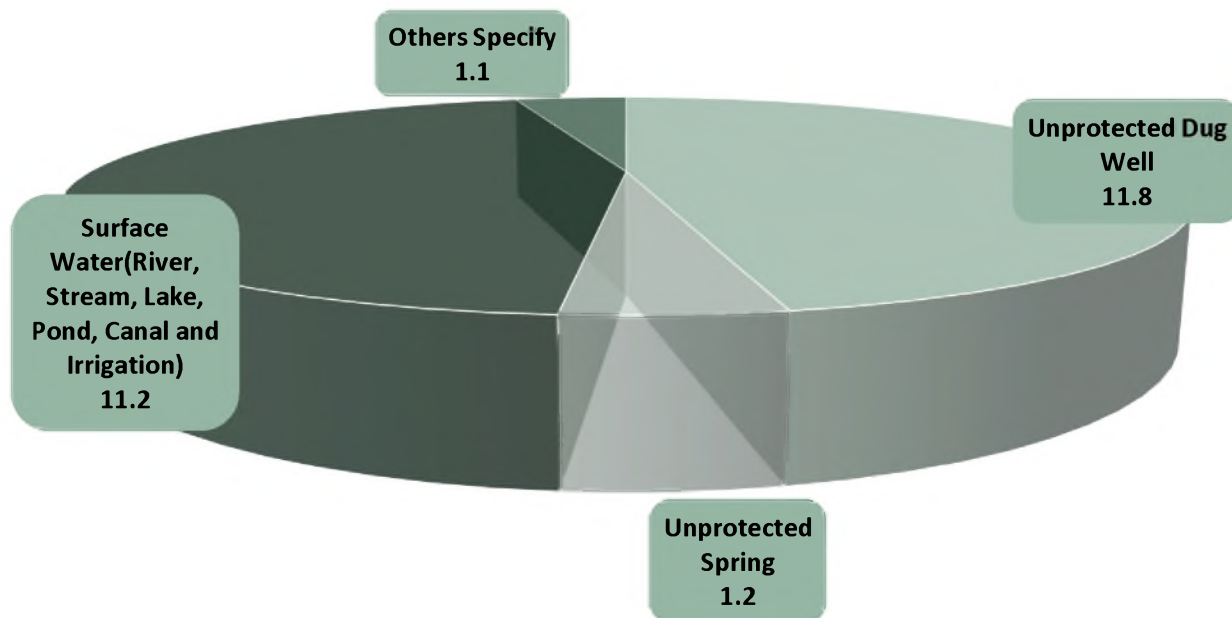

The households (HHs) that have their water piped into their dwelling in 2019 constitutes 1.6 per cent. Also, the improved water sources that are commonly used by households, tube/borehole has the highest with 38.7 per cent while cart with small tanker/drum has the least with 0.4 per cent.

Figure 71 Percentage of Households Main Source of Drinking Water

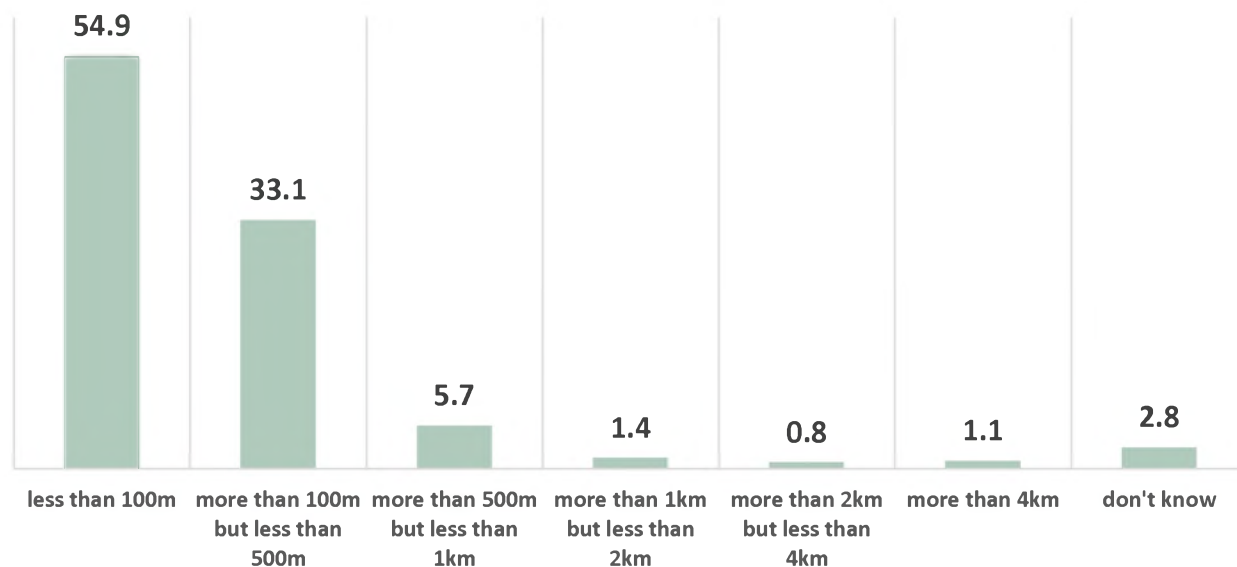

In addition, the households that are using unimproved water sources have unprotected dug well as the highest with 11.8 per cent, while the least was other sources with 1.1 per cent.

Figure 72: Percentage of Households that are using Unimproved Sources of Drinking Water (2019)

Similarly, households whose sources of drinking water was less than 100m in 2019 were 54.9 per cent, while those with sources more than 4km away were 1.1 per cent.

Figure 73: Distance Covered to Source for Drinking Water

13.2 Time-Use for Fetching Water

Nationally, in 2019 the average time household spent fetching water for drinking was 19 minutes, with an average of 5 trips. (See Table 13.4).

Also, the number of households that improved their water quality for safe drinking in 2019 was 63.7 per cent, and those who do not improve at all was 36.3 per cent. The majority of the households (62.8 per cent) practice the “let it stand and settle” approach for safe drinking water. North-west was the highest zone to improve their water quality for safe drinking with 76.3 per cent while the least was South-West with 50.2 per cent. (See Table 13.8).

Generally, 29.9 per cent of households contributed cash for the construction of the water facility they are using, while 18.6 per cent contributed in kind and 9.3 per cent contributed in both cash and kind.
