SECTION ONE

HEALTH ESTABLISHMENTS, REGISTERED PHARMACIES AND PATENT MEDICINE STORES

This Section presents data on the Number of Health Establishments by Type of Ownership, Number of Private Hospitals/Clinics and also the Number of Registered Private Pharmacies and Patent Medicine Stores in Akwa Ibom State. The number of Health Establishments in the State in 2012 including Registered Private Hospitals/Clinics was 659. Out of this number, Uyo Local Government Area had 100 Health Establishments while Eket Local Government Area had 48 and Eastern Obolo had the least Number of Health Establishments in the State which was 6.

The total number of Registered Private Pharmacies and Patent Medicine Stores in the State in 2008, 2009, 2010 and 2011 was 260, 83, 296 and 286 respectively. The reason for the low registration in 2009 was due to conflict between the State and Federal Ministry of Health on who should be responsible for the registration of Pharmacies and Patent Medicine Stores.

SECTION TWO

NUMBER OF HEALTH WORKERS AND ATTENDANCE IN HOSPITALS

IN AKWA IBOM STATE

This Section provides information on the number of Doctors and other Health Workers working in Public Hospitals in Akwa Ibom State. The Section also presents the Number of In and Out-Patients Attendance in Public Hospitals. Furthermore, the Number of Doctors in Public Hospitals in Akwa Ibom State including those from the University of Uyo Teaching Hospital (UUTH) was 317 in year 2011 and 317 in 2012.

There was a drop in In-Patients and Out-Patients attendance in 2010. Perhaps, this was due to frequent strike action by Health Workers.

SECTION SIX

FAMILY PLANNING ACCEPTORS AND NUMBER OF PATIENTS TESTED FOR HUMAN IMMUNO-DEFICIENCY VIRUS (HIV)

This section provides information on the number of Family Planning Acceptors from year 2008 to year 2012. Information on Human Immuno-Deficiency Virus (HIV) is presented in two categories namely: Prevention of Mother to Child Transmission (PMTCT) which is for pregnant women; and, HIV counselling and Test (HCT) which excludes pregnant women.

The total number of pregnant women who tested positive to HIV was on the increased from 2007 to 2011 but decreased drastically in 2012. Also the number of HIV positive individuals increased between 2009 and 2010 but decreased from 2011 to 2012. The decrease in the Number of Cases of PMTCT and HCT may have been caused by the level of HIV awareness by the General Population and Preventive Measures put in place by the State Government.
