

Annual Abstract of Statistics, 2012

NATIONAL BUREAU OF STATISTICS

Federal Republic of Nigeria

PREFACE

The world as we know it today is driven by an increasing premium on reliable data which constitutes an integral part of policy formulation. Governments across the globe like never before, have come to appreciate the undeniable role that reliable data plays in national development. In Nigeria, the case is not different. At the National Bureau of Statistics, which is Nigeria's custodian of all official statistics on socio-economic and macro-economic indicators, various machinery and tools have been brought to bear in improving the efficiency and reliability of official statistics.

The Annual Statistical Abstract encapsulates updated information on the Nigerian society. This publication is significant and wide reaching as it affords stakeholders such as the government, academics, researchers and donors with relevant information as compiled administratively by the National Bureau of Statistics. In addition to the data produced by the National Bureau of Statistics (NBS), the publication remains a rich source of statistical information as it also contains data obtained from government ministries, the public sector as well as the private sector.

In this edition, the tables, charts, and graphs provide relevant information that cuts across key sectors of the Nigerian economy. Some of which include the emerging trends in poverty across Nigeria, up to date information on households statistics in Nigeria, living standards, the health sector, education sector, information and telecommunications technology sector, the banking sector, insurance as well as the general elections in Nigeria.

Furthermore, as with errors that emanate from statistical computations, this publication is a product of data that has been obtained from different sources. It is pertinent to note that the authenticity of the data used during the compilation of this publication was carefully validated to ensure that issues related to errors are brought to the barest minimum. Some of the sources of data used for this publication include the following; data from administrative records, surveys and censuses all of which are subject to errors arising from a number of factors such as sampling variability, reporting errors for individual units, incomplete coverage, non-response and imputations.

The publication is available online and in the form of CD-ROM, making it more easily accessible and user-friendly to various stakeholders. The National Bureau of Statistics (NBS) website, www.nigerianstat.gov.ng, also contains an electronic version of this edition.

We at the National Bureau of Statistics, also wish extend our sincere thanks to all those who have provided valuable information for the publication of this edition. Users of this **publication** are welcomed to make their data needs known to the NBS for consideration in planning future editions. Suggestions and comments towards improving the coverage and presentation of data should be sent to the National Bureau of Statistics at Plot 762, Independence Avenue, Central Business District, P.M.B 127, Garki, Abuja, Nigeria.

Dr. Yemi Kale
Statistician General/CEO
National Bureau of Statistics

CHAPTER 1

AREA AND CLIMATE

The Federal Republic of Nigeria, with an area of 923,769 square kilometers (made up of 909,890 square kilometres of land area and 13,879 square kilometres of water area), is situated between 3° and 14° East Longitude and 4° and 14° North Latitude. The longest distance from East to West is about 767 kilometres, and from North to South 1,605 kilometres. The country is bordered on the west by the Republics of Benin and Niger; on the east by the Republic of Cameroon; on the north by Niger and Chad Republics and on the south by the Gulf of Guinea. Land is 910,768sq km while water is 1,300sq km. The countries along Nigeria's borders are Benin 773km, Cameroon 1,690km, Chad 87km, Niger 1,497km, coastline is 853km.

Geographical features in Nigeria include the Adamawa highlands, Mambilla plateau, Jos plateau, and Obudu plateau, the Niger River, River Benue and Niger Delta. Nigeria's most extensive topographical region is that of the valleys of the Niger and Benue River valleys (which merge into each other and form a 'Y' shaped confluence at Ilo-Ilo). The Niger Delta is located in the southern part of Nigeria. It is one of the world's largest accurate fan shaped river deltas.

In addition, Nigeria is also covered by three types of vegetation; Forest (where there is significant tree cover), Savannahs – (insignificant tree cover with grasses and flowers located between trees) and Montane land (The latter is the least common, and is mainly found in the mountains near the Cameroonian border).

Nigeria is blessed with natural resources, one of which include the following; Natural gas, crude oil, tin, iron ore, coal, limestone, niobium, lead, zinc, arable land., 31.29% constitutes Arable land, while permanent crops account for 2.96%, others constitute 65.75% as at 2001. Irrigated land is 2,330sq km (1998 estimates). Nigeria also experiences periodic hazards as a result of droughts, and flooding.

Current environmental related issues in Nigeria include; degradation, rapid deforestation, urban air and water pollution, desertification, oil pollution. In Nigeria, the air, water and soil have suffered serious damage from oil spills, resulting in the loss of arable land, and rapid urbanization.

It is worth noting that Nigeria is Africa's most populous country, and is comprises of more than 250 ethnic groups. The major languages spoken in Nigeria include English (official) Hausa, Yoruba, Ibo, Fulani, and more than 200 others.

Nigeria is also blessed with favourable and varied climatic conditions. The climate is equatorial and semi-equatorial in nature, characterized by high humidity and substantial rainfall. There are two seasons – the wet and dry seasons. The wet season lasts from April to October, while the dry season lasts from November through March.

CLIMATE

Nigeria has a tropical Climate with is made up of rainy and dry seasons. This depends essentially on the location. It is mostly hot and wet during the year in the Southeast but dry in the southwest and farther inland. In the northern part of the country, the climate is characterised by wet and dry seasons as well as in the west while a steppe climate with little precipitation is usually the case in the far North.

The length of the rainy season decreases from the south to the north. In the south the rainy season lasts from March to November, whereas in the far north it lasts only from mid-May to September. A marked interruption during the rainy season occurs in August in the southern part of the country, resulting in a short dry season often referred to as the "August break".

Precipitation is heavier in the south, especially in the southeast which receives more than 120 inches (3,000mm) of rain a year, compared with about 70 inches (1,800mm) in the southwest. Rainfall decreases progressively away from the coast, with the north receiving not more than 20inch (500mm) a year.

Temperature and humidity remain relatively constant all through the year in the south while the seasons vary considerably in the north, during the dry season. The daily temperature range during this time increases as well. On the coast, the mean monthly maximum temperatures are steady throughout the year remaining at about 90°f (32°C) in Lagos and about 91°f (33°C) in Port Harcourt, while the mean monthly minimum temperatures are approximately 72°f (22°C) for Lagos and 68°f (20°C) for Port Harcourt.

The mean maximum temperature is usually higher in the north, with a lower mean minimum temperature. In the North East (Maiduguri), the mean monthly maximum temperature may exceed 100°f (38°C) during the hot months of April and May, while in the same season there is the likelihood of frost at night. Humidity is generally high in the north, but it falls during harmattan (the hot dry northeast trade wind) which blows for more than 3 months in the north but rarely for more than 2 weeks along the coast.

TABLE 4: ANNUAL RAINFALL IN NIGERIA BY STATE, 2005 – 2009

CHAPTER 2 POPULATION

The constitution of Nigeria mandates the National Population Commission (NPopC) to carry out population census in the country and provide accurate and reliable census results. The primary objective of the census results is to assist the country in capturing accurate and reliable information on the population size, its composition and distribution. The population figures and characteristics arising out of the census exercise helps the country to meet its developmental, administrative and political needs and ensuring planning for improving the quality of life of the country's citizens.

Accordingly, the population and housing census of 2006 was carried out from the 21st to 25th March, 2006 and extended by two days to facilitate enumeration of population on a de-facto basis. It was followed by the Post Enumeration Survey (PES) in June, 2006. Population census gives information on age structure, demographic subjects, social household, Economic and housing data, marriage, migration etc.

Economic measures designed to raise the overall standard of living of Nigerians had to take into account the pluralistic nature of the society. Nigeria has between 250 and 400 ethnic groups (depending on the way they are defined), speaking about 400 languages. Of these, the Hausa are the dominant group in the northern area, followed by the Kanuri; the Nupe and Tiv dominating in the middle belt. In the South, the major groups being the Yoruba are concentrated in the southwest and the Igbo in the southeast. Whereas 80 percent of Nigeria's population in 1990 lived in farming villages, the country experienced perhaps the fastest growing urbanization in the world in the 1970s and had the largest total urban population of any state in sub-Saharan Africa. The search for employment drew males to the cities, leaving most rural areas with a population composed largely of women, children, and the elderly.

Education, too, has followed a varied pattern. By 1992, Nigeria had a nationwide indigenous system in which English had come to be the language of instruction beyond primary school; traditional Qu'ranic schools, both in the rural and urban areas of the north; and private and parochial schools in the cities, which provided a European-style education.

TABLE 12: POPULATION OF NIGERIA BY STATE AND SEX, 1991 AND 2006

State	Number

CHAPTER 3

HOUSEHOLD STATISTICS

This chapter presents data on socio-economic indicators of households in Nigeria. Household indicators are derived from the regular surveys of the National Bureau of Statistics (NBS). The General Household Survey is one of the surveys which provides a robust data on socio-economic statistics of Nigeria

The harmonized Nigerian Living Standard Survey is also another NBS Survey which provides consumption and expenditure statistics on Nigeria. However, Data collected through NBS regular surveys in addition to the system of administrative are a vital source of statistical evidence on ground reflecting in all aspects of the people lives and the state of our country.

In addition, this report also presents statistical tables reflecting the spread and trends in poverty levels in Nigeria. For many years, poverty was defined in terms of lack of income necessary to ensure access to a set of basic needs. Over the years, the concept was redefined to mean not only the lack of income but also the lack of access to health, education and other services.

TABLE 81: HOUSEHOLD SAMPLE SIZE FOR PART A AND PART B NLSS

	NLSS 2003-04		HNLSS 2009-10			
			Part A (non-expenditure module)		Overall effective sample with Part A and Part B	
National	18,932		73,287		34,804	
Rural	14,395	76.04	53,260	72.67	25,476	73.2
Urban	4,537	23.96	20,027	27.33	9,328	26.8

Note: The sample size for 2003-04 was 19,158 households while for 2009-10 was 77,400 households for Part A and about 38,000 for Part B. The effective sample sizes are shown below (households with food expenditure not equal to zero or missing).

Table 82: Mean Consumption Expenditure 2003 - 04 & 2009 -10

	2003-04			2009-10		
	Household size	Total HH consumption expenditure (₦)	Per capita HH consumption expenditure (₦)	Household size	Total HH consumption expenditure (₦)	Per capita HH consumption expenditure (₦)
National	4.3	14,281.3	4,029.7	4.0	22,265.5	7,212.3
Rural	6.5	10,141.5	1,782.0	5.9	19,737.8	4,088.9
Urban	3.6	11,619.4	3,715.4	3.4	20,312.0	7,625.7

Note: - Household sizes have fallen since 2003.

Rural households size still larger than urban (3 more persons in rural households) for both years. However, households spending is 1.5 times higher in 2009-10 compared to 2003-04.

TABLE 83: EXPENDITURE SHARES OF HOUSEHOLD SPENDING

	2003-04						2009-10					
	Share to total food		Share to total household consumption (food and non-food)				Share to total food		Share to total household consumption (food and non-food)			
	Purchase	Own food	Total food	Education	Health	Total non-food	Purchase	Own food	Total food	Education	Health	Total non-food
National	74.4	25.6	51.4	4.8	7.9	48.6	73.6	26.4	57.2	1.7	7.8	42.8
Rural	67.4	32.6	56.5	2.8	8.2	43.5	61.0	39.0	61.0	1.2	8.7	39.0
Urban	83.0	17.0	45.1	7.3	7.6	54.9	92.8	7.2	51.4	2.5	6.5	48.6

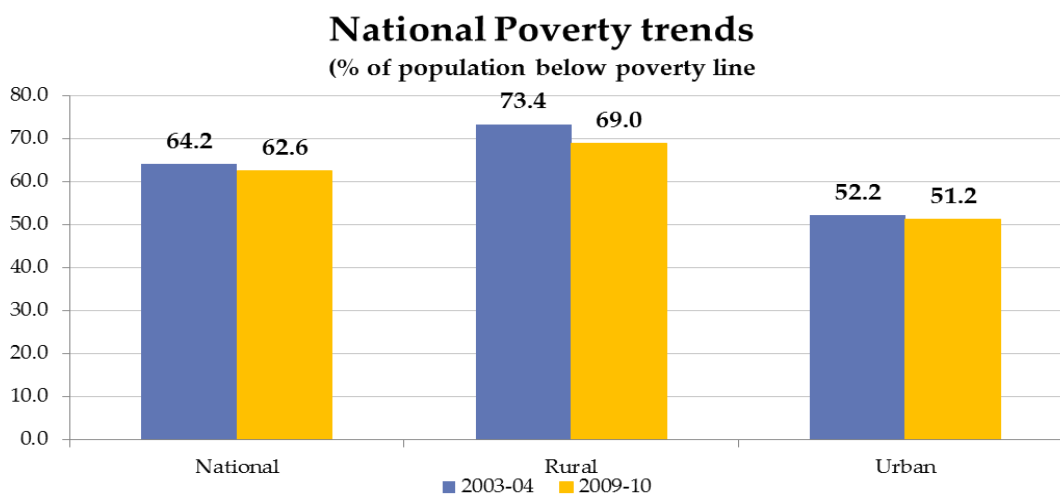

Note:- Households spending more on food compared to 2003-04: 51.4 percent in 2003-04 vs. 57.2 percent in 2009-10.

TABLE 84: THE ABSOLUTE POVERTY LINE IN NIGERIA

	2003-04	2009-10
Food poverty line	20,335.3	38,947.5
Absolute poverty line	28,836.7	55,235.2

Note;- In 2003-04, the threshold below which one was considered poor was: Naira 28,836.7 per person per year.
 In 2009-10: The poverty line was defined at Naira 55,235.2 per person per year.
 The 2009-10 poverty line is adjusted for inflation using 2003-04 poverty line as the reference.

CHART 3: NATIONAL POVERTY TRENDS

Note:- There was slight decline of poverty of 2.4 percent since 2003-04.
 - Overall poverty incidence was 62.6 percent in 2009-10.
 - This is a slight improvement over the 2003 poverty rate, when the population below the poverty line was estimated at 64.2 percent.
 - Rural poverty declined faster than urban
 - In addition to the headcount poverty, other measures of poverty have also declined

CHART 4: STATE RANKING BY ABSOLUTE POVERTY 2003 -04

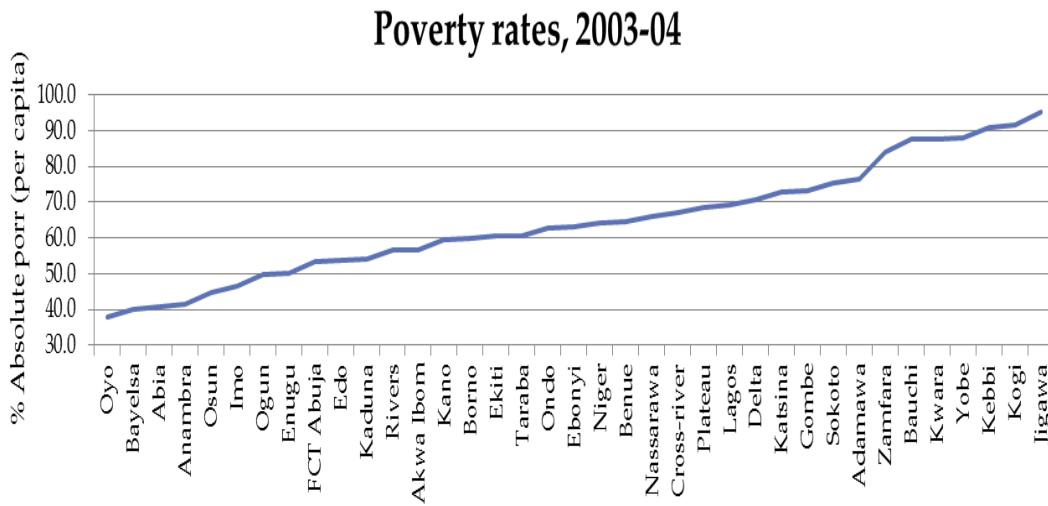

CHART 5: STATE RANKING BY ABSOLUTE POVERTY 2009 -10

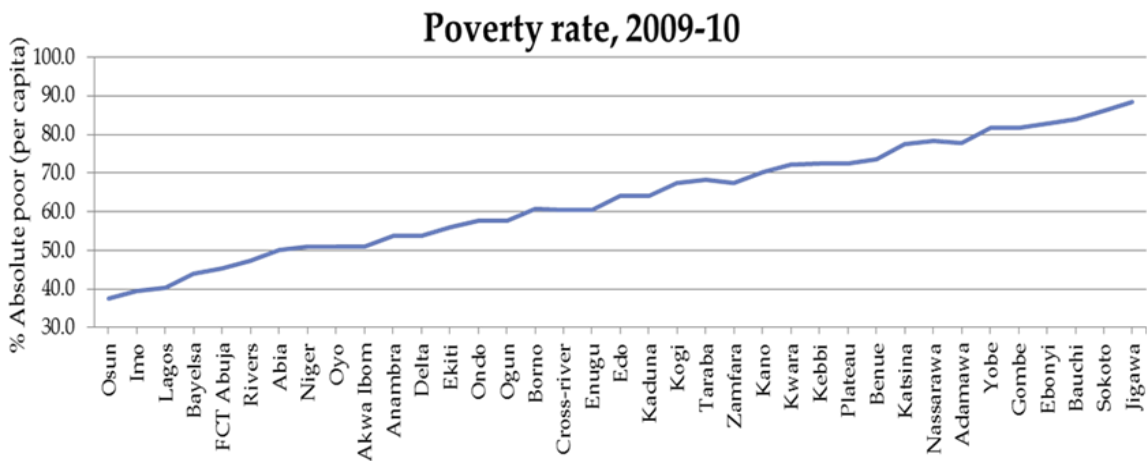

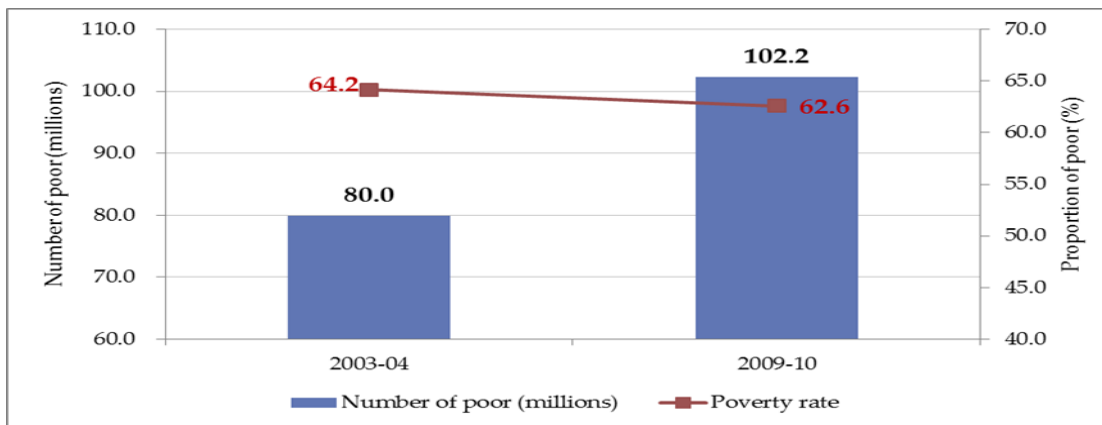

CHART 6: POVERTY RATE

Note:- Poverty declined by 2.4 percent
 : Number of poor increased by 27 percent.
 Poverty going down but number of poor increasing tremendously

TABLE 85: POVERTY GAP 2003 -04 & 2009 – 10

Resource Transfers Required to Eliminate Absolute Poverty

	2003-04	2009-10
Monthly absolute poverty line (₦)	2,403.06	4,675.67
Poverty gap (%0	27.36	26.24
Total population (millions)	124.65	163.40
Total resources to eliminate absolute poverty (millions, ₦)	81,957.06	200,497.10
Absolute poverty rate (%)	64.15	62.56
Number of poor (millions)	79.97	102.23
Resources required by each poor person (₦ per month)	1,024.89	1,961.27

Note:- The poverty gap adds up the extent to which individuals on average fall from the poverty line, and expressed as a percentage of the poverty line. Slightly better off than 2003-04 but still large. Overall 4.1 percent decline

TABLE 86: POVERTY GAP (RURAL & URBAN)

	2003-04	2009-10	Percent change since 2003-04
National	0.3898	0.4161	6.8
Rural	0.3727	0.4070	9.2
Urban	0.3835	0.4100	6.9

Note: - Inequality increased both in rural and urban areas
Larger increase in rural areas

CHAPTER 4 HEALTH

This chapter presents statistics on health delivery services in the country. The federal and State Governments are the major providers of basic health facilities and services in Nigeria. The Government relies on adequate health statistics for planning and monitoring its relevant health programmes, in doing so, reliable data is needed to estimate health statistical indicators which are required for making geographical (inter-regional and international) comparisons of the health situation in Nigeria.

- Promotive
- Protective
- Preventive
- Restorative
- Rehabilitative

It is also geared towards ensuring that every citizen of the country, which includes individuals and communities are assured of productivity, social well-being and improved living standards

There is a three (3) tiers system of healthcare in Nigeria. These are:

- Primary Health care
- Secondary Health Care
- Tertiary Healthcare

The key statistical tables include:

Fertility:

The table on fertility shows age-specific fertility rates for women by five-year age groups and the current fertility for the three-year period preceding the 2008 National Demographic Health Survey (NDHS). Age-specific and total fertility rates were calculated directly from data on the history of births.

Family Planning:

Family planning refers to a conscious effort by a couple to limit or space the number of children they want to have through the use of contraceptive methods. Information on the knowledge and use of family planning methods was obtained from female respondents by asking them to mention any ways or methods by which couples could delay or avoid pregnancy.

Maternal Care:

Proper care during pregnancy and delivery is important for both the mother and the baby. In the 2008 NDHS, women who had given birth in the five years preceding the survey were asked a number of questions about maternal care. The report shows the percentage of women who had a live birth in the five years preceding the survey who received antenatal care from a health professional for the last live birth and whose live birth was protected against neonatal tetanus.

Breastfeeding:

The Breastfeeding of a child is important in the first six month of life. The key tables in this report are data on children under three years living with their mothers, the percentage distribution by breastfeeding status and the percentage of those currently breastfeeding.

Nutritional Status of children:

Anthropometric indicators for young children were collected in the 2008 NDHS to provide outcome measures of nutritional status. The indices in this table are expressed as a standard deviation unit from the median for the reference group. Children who fall below minus two standard deviation (-2 SD) from the median of the reference population, are regarded as moderately malnourished while those who fall below minus three standard deviations (-3 SD), from the median of the reference population are considered to be severely malnourished.

Early Childhood Mortality

The Estimates of childhood mortality are based on information collected in the birth history section of the questionnaire administered to individual women. The infant and child mortality estimates in this report, based on data from the 2008 NDHS. The rates are estimated directly from the birth history information on the child's birth date, survivorship status, and the age at death for children who died.

Ownership of Mosquito Nets

The statistics on ownership of Mosquito Nets shows the percentage of households with at least one and more than one mosquito net (treated or untreated), and the percentage of households that have at least one or more than one Insecticide Treated Net (ITN), collected in NDHS 2008.

Malaria Indicators

The key data in this report are on possession and use of mosquito nets, preventive Malaria treatment during pregnancy and treatment of children with fever with anti malaria drugs.

TABLE 167: MALARIA INDICATORS, 2008

Malaria Indicators	Urban		Rural		Total	
	Percentage	Number	Percentage	Number	Percentage	Number
Mosquito Nets						
Percentage of household with at least one mosquito net (treated or untreated)	14	12,443	18.6	21,627	16.9	34,070
Percentage of household with at least one insecticide treated net (ITN) ¹	8.6	12,443	7.6	21,627	8	34,070
Percentage of Children under 5 who slept under mosquito net the night before the survey.	10.5	8,023	12.7	17,761	12	25,783
Percentage of Children under 5 who slept under insecticide treated net (ITN) the night before the interview ¹ .	6.5	8,023	5	17,761	5.5	25,783
percentage of pregnant women age 15-49 who slept under a mosquito net the night before the interview	8.9	1,071	13.2	3,327	11.9	4,397
percentage of pregnant women age 15-49 who slept under an insecticide treated net (ITN) the night before the interview ¹	4.7	1,071	4.9	2,327	4.8	3,397
Preventive Malaria Treatment During Pregnancy						
percentage of last birth in the 5 years preceding survey for which the mother took anti-malarial drugs for prevention during the pregnancy	44.8	5,424	28.5	12,210	33.5	17,635
percentage of last birth in the 5 years preceding survey for which the mother got Intermittent Preventive Treatment (IPT) during an antenatal visit ²	10.2	5,424	4.9	12,210	6.5	17,635
Treatment of fever						
Among children under age 5 with fever in the two weeks preceding the survey, percentage who took anti-malaria drugs	42.4	1,011	30.2	2,956	33.3	3,968
Among children under age 5 with fever in the two weeks preceding the survey, percentage who took anti-malaria drugs the same day/next day after developing fever	19.9	1,011	13.7	2,956	15.3	3,968

Source: National Population Commission, NDHS

Note: ¹ An Insecticide Treated Net (ITN) is a permanent net that does not require any treatment, a pretested net obtained within the last 12 months, or a net that has been soaked with insecticide within the past 12 months

² Intermittent Preventive Treated Net (IPT) is a preventive treatment with at least two doses of SP/Fansidar/Amalar/Maloxine during antenatal visit.

CHAPTER 5 JUSTICE AND SECURITY

The data on prisons are sourced from the Nigeria Prisons Service. The statistical tables include the number and capacity of prisons by gender, prison admission by type of offence, admission by religion and inmate population.

The Nigerian Police Force (NPF) has staff strength of about 350,000 serving Police Officers distributed across the 774 LGAs. Some of the police officers are on international assignments like Peace-keeping activities. Male to female ratio is about 3:1. This makes the NPF a predominantly male occupation. Entry age is between 18-25 years and retirement age is at 60 years or 35 years of service. Educational status is generally lower among the rank and file as compared to the superior and senior officers. Of these, the rank and file constitutes most of the workforce.

Superior police officer – 7.4% (ASP – IGP)

Inspectorate Cadre – (14.9%)

Rank and File cadre – (77.9%) (Constable – Sergeant)

The data on public order are sourced from the Nigeria Police Force, Federal Road Safety Corps. They cover crimes, road accident cases and casualties, armed robbery cases and involvement, vehicles stolen and recovered, court Cases, juvenile cases and bank frauds.

CHAPTER 6 EDUCATION

This chapter presents data on formal education at various levels in Nigeria. The educational system in the country is 6-3-3-4 system, that is, 6 years of primary, 3 years of junior secondary, 3 years of senior secondary school and 4 years of university or undergraduate education leading to the award of a degree. This system is designed to produce people that are employable and who can be self-reliant. It is also to encourage vocational and technical education that would be relevant to the needs of the society. The junior secondary school is both pre-vocational and academic. At the senior secondary level, technical, commercial and other vocational courses are included to make the school leavers employable and relevant.

Colleges of Education are responsible for the training of middle-level manpower in teaching education. Students are trained for three years, on completion of which they are awarded the Nigeria Certificate in Education (NCE). As professional teachers, they can teach in primary, Junior Secondary (JS) or Senior Secondary (SS) schools, depending on their areas of specialization.

Polytechnics and Colleges of Technology are mainly to produce middle-level technical manpower at the sub-professional level of two categories: National Diploma (ND) and Higher National Diploma (HND). These institutions are supervised by the National Board for Technical Education (NBTE).

Universities constitute the third tier of higher education in Nigeria. Admissions into first degree courses are through tests conducted by the Joint Admissions and Matriculation Board (JAMB) or by direct entry with the Higher School Certificate or its equivalent. The basic admission requirement is Senior School Certificate with a minimum of five credits, including English Language, Mathematics and other subjects relevant to the proposed course of study.

This chapter also presents data on admission into Nigeria Civil Aviation School, as well as membership of the Teachers Registration Council of Nigeria (a professional body) and Education Trust Fund Intervention in Educational Institutions. The data cover enrolment, number of schools, student out-turn, manpower, funding, among other statistics.

CHAPTER 7 EMPLOYMENT

This chapter presents data on employment in selected sectors of the economy and on unemployment. Unemployment estimation adopted by Nigeria is based on 40 hours of work in a week, rather than the International Labour Organisation (ILO) definition of one-hour work in a week.

Other data in this report cover employment creation programmes undertaken by the National Directorate of Employment, employment data in civil service, registered unemployment and vacancies declared, trade disputes, among others.

TABLE 319: TOTAL EMPLOYMENT BY ECONOMIC ACTIVITY, 2005 - 2009

Description	Number				
	2005	2006	2007	2008	2009
Agricultural Hunting Forestry and Fishing	28,633,653	28,936,534	29,049,058	29,484,557	29,664,365
Mining and Quarrying	69,001	72,962	81,045	81,002	81,705
Manufacturing industries	907,877	859,990	821,256	799,215	735,345
Production and Distribution of Electricity and Water	426,642	451,132	389,016	367,207	343,161
Building and Construction	273,049	288,723	329,583	356,407	359,502
Commercial Repairs of Auto and Domestic Art.	103,847	109,808	140,478	151,203	152,516
Hotels & Restaurants	96,370	101,901	129,672	145,803	163,410
Transport, Storage and Communication	415,988	439,866	807,615	885,617	904,202
Finance Intermediation (include insurance)	280,948	297,074	302,568	307,806	310,479

CHAPTER 8 AGRICULTURE

This chapter presents agricultural statistics on crop, livestock, fishery and forestry sub-sectors.

Estimates of crop in hectare, yield and production by National Bureau of Statistics are based on sample survey data obtained from farming households. Annual inventory of livestock and estimates of livestock and poultry production were prepared by the Livestock Department of Federal Ministry of Agriculture and Rural Development (FMARD) and National Bureau of Statistics based on information from farmers and Agricultural Sample Surveys.

The principal source of data on fishery is from Fisheries Department of the Federal Ministry of Agriculture and Rural Development (FMARD). The key data include quantity of fish caught annually by species within the waters of the maritime and inland States, production of fish by sectors, imports and estimated numbers of fishing craft and fishermen.

The data on forestry show the area of reserves and plantations by State.

CHAPTER 9

MANUFACTURING, PRODUCTION AND CONSUMPTION

This chapter presents data on manufacturing, mining, iron & steel, electricity production and consumption.

The **manufacturing** tables show the production and value of selected items, distribution of establishments by activity, group and size, type of ownership, number of workers engaged, VAT registration and distribution of establishments by State and size.

Nigeria is endowed with different types of mineral resources. The relevant statistical tables in this report are on solid minerals, crude oil, gas, refinery output and finished products and consumption of finished petroleum products.

The **iron and steel** statistical tables provide information on installed plants by type and capacity, consumption of raw materials and production.

The Electricity statistical tables provide information on generation by type of fuel, capacity of generating plants and consumption.

CHAPTER 10 TRANSPORTATION AND COMMUNICATIONS

This chapter presents data on length of Federal Highways, National Uniform Licensing Scheme production statistics, rail transportation (passenger and cargo), railway accidents, assets and freight operations.

There are also statistics on civil air transportation (passenger and cargo), aircraft movement, (international and domestic), ocean-borne commerce, cargo and vessel tonnages, crude petroleum oil shipped at crude oil terminals, container traffic, etc.

Data are presented on Nigerian Postal Service (NIPOST), which provides mail processing and delivery within Nigeria as well as total number of Post Office Boxes and Private Mail Bags available by State.

CHAPTER: 11

FOREIGN TRADE STATISTICS

Foreign trade statistics are data on Nigeria's merchandise imports and exports. They are compiled from declarations in Automated System for Custom Data (ASYCUDA) files which are captured at Customs entry points throughout the country. Since the mid-1970s, monthly returns of oil producing companies on crude oil lifting have also been used. Nigeria's trade is recorded according to the 'general system' principle.

Total imports comprise goods entered for warehousing and goods (other than those in transit) subsequently re-exported. Imports are valued through cost of commodities, freight and insurance (C.I.F) charges and expenses as well as the cost packages, coverings, wrappings or other purchasing materials and preparation of goods for shipment. These do not include duties and surcharges payable in Nigeria.

Total exports consist of domestic exports and re-exports. Domestic exports include mineral, agricultural and manufactured products from Nigeria. Exports are valued free on board (FOB), which is the cost of the goods to the purchaser abroad, including packaging and all other relevant charges up to the time of their delivery on board the exporting vessel.

Re-exports cover imported goods (other than goods declared 'In Transit' or for trans-shipment subsequently re-exported ex-warehouse).

Commodities are classified according to the harmonized system code.

The following goods are excluded from merchandise imports and exports:

- Monetary gold or silver.
- Goods consigned by the Nigerian Government to her missions stationed abroad.
- Goods intended for exhibitions, commercial samples and gifts in kind.
- Goods in transit.

TABLE 462: VALUE OF FOREIGN TRADE AND VISIBLE BALANCE, 2007- 2011

Year	Merchandise Imports (C.I.F.)	Total Exports (F.O.B)	N'million
			Visible Balance

CHAPTER 12: BALANCE OF PAYMENTS:

The external sector of the Nigeria economy has undergone profound changes in recent years particularly in the rapid depreciation of the Naira, the accumulation of payments arrears, the external debt problem etc. These changes along with other aspects of international economic transactions are captured in the Balance of Payments Statistics.

The Balance of Payments (BOP) is defined as a systematic record of economic and financial transactions for a given period between residents of an economy and non-residents (the rest of the world). These transactions involve the provision and receipts of real resources – goods, services and income – and changes in claims on, and liabilities to, the rest of the world.

Specifically, the BOP records transactions in goods, services and income; changes in ownership and in an economy's holding of monetary gold, Special Drawing Rights (SDRs) and claims on and liabilities to the rest of the world.

It also records unrequited or unilateral transfers – the provision or receipt of an economic value without the acceptance or relinquishing of something of equal value (or quid pro quo). General transactions involving payments to a country by non-residents are classified as "credit" entries, while those involving payments by the country to non-residents are "debit" entries.

The Balance of Payments is not concerned with actual payment made and received by an economy but rather with transactions and the table is usually structured into three sections: Current Account, Capital Account and Reserves.

The Current Account comprises the visible and invisible. The visible account consists of exports and imports which are tangible physical commodities, the movement of which constitutes merchandise trade. Exports are "credit" entries as non-residents acquiring goods have to pay for the exporting country. Imports are "debit" entries as the importer has to use his stock of foreign currencies to pay for imports.

The value of exports and imports is recorded "free-on-board" (FOB) to show the actual costs of the goods without insurance and freight, both of which are treated in the invisible section of the current account. The invisibles include services and income account. The services covers freight, insurance and other distributive services involved in international transportation of goods (which represents non-factor services).

Entries will either be credit or debit depending on whether the charges are received or paid by the reporting economy.

The Capital and Financial account records change in a country's foreign assets and liabilities, capital movements and changes in international investment position. Capital may be long or short-term, and private or public (government). Investment, as a major component of financial account is "direct" if it creates or establishes a permanent interest in an enterprise. However, investment in long-term bonds and corporate equity constitutes "portfolio investment".

Capital movements may take place between a reporting economy and the rest of the world by injection of new loans and investments into the reporting economy by foreigners. This movement may take the form of increases in foreign-owned deposits in the banks of the domestic (reporting) economy. The latter may decide to recover its loans and investments as well as bank deposits abroad. These are examples of credit entries. Capital flows through new loans, and increases in deposits in foreign banks by the reporting economy, constitute "debit" entries. The capital transfers component of unrequited transfers is included in the capital account of the balance of payments

It should be noted that, in conformity with international standards, the balance of payments' statistics is currently undergoing a comprehensive revision to capture major non-residents' transactions with the aim of tracking down the huge inflows of capital and expand coverage.

CHAPTER: 13

WAGES, PRICES AND PRICE INDICES

This chapter presents statistics on real take-home salaries in the public sector, housing construction index, summary of value indices of ordinary shares listed on the Nigerian Stock Exchange, Consumer Price Index and average manufacturing and capacity utilization rates.

Real take-home monthly wages are used to determine the impact of inflation on nominal wages. This is also a good indication of the level of erosion of the purchasing power of the local currency. The lower, middle and upper income wage earners, especially in the public sector are represented by grade levels 01, 08 and 15.

Generally, a price index is the measure of the proportionate or percentage changes in a set of prices over time. Similarly, consumer price index measures changes in the prices of consumer goods and services acquired by households over time.

The conceptual and practical difficulties involved in measuring “uses” or “consumption” has made the adoption of the “acquisition approach” common for Consumer Price Index (CPI) compilation. Only household expenditures involving monetary transactions are utilized for weight derivation. However, prices can be imputed for non-monetary consumptions like rent for owner-occupied accommodation as well as remuneration in kind and own produce.

Retail prices of consumption goods and services are used in the computation of CPI. As prices of different goods and services do not all change at the same rate, a price index can only reflect their average movement.

The CPI changes purely in response to price changes, while the quantities of the goods and services in the basket remain fixed. It is compiled using Laspeyres or Paasche index formula.

TABLE 475: REAL TAKE-HOME WAGES AND SALARIES IN PUBLIC SECTOR, 2005 - 2009

Year	Naira Per Month

Note: Real-take home monthly wages and salaries in the public sector reflect the amount realized by deflating nominal salaries/wages with the Consumer Price Index (CPI May 2003 = 1000). Wages and Salaries include basic salary and all allowances, less taxes and other deductions. Real-take home wages /salaries is a milestone for understanding the full impact of inflation on the purchasing power of the local currency.

* = Provisional

CHAPTER 14 NATIONAL ACCOUNTS

The National Accounts data are classified into twenty-one items. In principle, the accounts cover the full set of integrated economic accounts and balance sheet as stated in the United Nations System of National Accounts (SNA 93). The procedure used for the estimation of Gross Domestic Product (GDP) is based on the production and expenditure approach to estimation of GDP which is internationally accepted.

Gross Domestic Product (GDP) (expenditure approach) represents expenditure against the gross domestic products, and grasps from the side of final demand, the way the goods and services (value added) produced by domestic productive activities are consumed or used including international trade.

On the other the Gross Domestic Product (GDP) (production approach) is an aggregate of value added deductions intermediate input such as raw material, etc. from the output of goods and services attributable to domestic productive activities.

This full set of accounts is sub-divided into two parts:

- (1) Production Accounts
- (2) Expenditure Accounts

Data for analysis were derived from three main sources, namely:

- (i) Survey of socio economic activities conducted jointly by National Bureau of Statistics (NBS), Central Bank of Nigeria (CBN) and National Communications Commission (NCC)
- (ii) System of Administrative Statistics (SAS) by the National Accounts Division (NBS).
- (iii) Input-Output relations established from the previous GDP estimation by the National Accounts Division (NBS).

The estimation of intermediate consumption, compensation of employees, capital consumption allowance, indirect taxes and subsidies were independently produced for the survey results.

The following are some of the terms used:

Operating Surplus

The operating surplus measures the surplus or deficit accruing from production before taking account of any interest, rent or similar charges payable on financial or tangible non-produced assets borrowed or rented by the enterprise, or any interest, rent or similar receipts received on financial or tangible non-produced assets owned by the enterprise. It should be noted that for unincorporated enterprises owned by households, the component is called mixed income.

Capital Transfers

These are transactions in which the ownership of an asset (other than cash or inventories) is transferred from one institutional unit to another, in which cash is transferred to enable the

recipient to acquire another asset or in which the funds are realised by the disposal of another asset transferred.

Compensation of Employee

This is income received as remuneration for work. It includes the total remuneration, in cash or in kind, payable by an enterprise to an employee in return for work done by the latter during the accounting period. It includes not only wage and salary disbursements but also supplements to wages and salaries consumption of fixed capital.

Consumption of Fixed Capital

This term is a measure of the decline in the current values of the stock of fixed assets owned and used by producers as a result of physical deterioration, normal obsolescence, and accidental damages during the accounting period.

Current Transfers

Current transfers consist of all transfers that are not of capital, which directly affect the level of disposable income and should influence the consumption of goods or services.

Export of Goods and Services

A transaction of goods and services (sales, barter, grants) from residents of an economic territory.

Factor Cost

Gross value added at factor cost is not a concept used explicitly in the system but it can easily be derived by subtracting the value of any taxes, less subsidies, on production payable out of gross value added.

Government Final Consumption Expenditure

This consists of expenditure, including imputed expenditure incurred by general government on both individual consumption of goods and services and collective consumption of services.

Gross Domestic Product at Constant Prices

This is the estimate of the value of goods and services produced in an economy at a base year price (real GDP)

Gross Domestic Product at Current Basic Price

This is the amount receivable by the producer from the purchaser for a unit of goods or services produced as an output minus intermediate which includes tax payable, subsidy receivable on that unit as a consequence of its production or sale. It excludes any transport charges incurred separately by the producer

Gross Fixed Capital Formation

Gross fixed capital formation is measured by the total value of a producer's acquisitions, less disposals of fixed assets during the accounting period plus certain additions to the value of non-produced assets (such as sub-soil assets or major improvement in the quantity, quality or productivity of land) realised by the productive activity of institutional units.

Gross National Disposable Income

This is derived by adding all current transfers in cash or kind receivable by resident institutional units from non-resident institutional units and subtracting all current transfers in cash or kind payable by resident institutional units to non-resident institutional units.

****Note****

Following the rebasing of GDP, the 2010 and 2011 information have been revised. The estimates in the following tables are based on the old base year (1990) and the old economic classification

CHAPTER 15

PUBLIC FINANCE

This chapter presents data on public finance. The key data are on revenue, expenditure and public debts (domestic and external) of the Federal, State and Local Governments.

What is Revenue?

Revenue is an inflow of resources or money into the government sector from other economic units/sectors. It includes all non-payable receipts and grants. Grants are non-compulsory, non-repayable unrequited receipts from other governments and international institutions, and are divided into current and capital. While current revenue comprises tax and non-tax receipts within the fiscal year, capital revenue covers receipts from non-financial assets used in production process for more than one year.

What is Expenditure?

Expenditure is an outflow of resources from government to other sectors of the economy, whether required or unrequited. It is divided into recurrent and capital expenditures. Recurrent expenditures are payments for non-repayable transactions within one year, whereas capital expenditures are payments for non-financial assets used in production process for more than one year.

What is Fiscal Deficit?

Fiscal deficit is the difference between government payments for expenditure, net lending and total receipts from revenue, grants and loan repayments. It indicates that payments are higher than total receipts within the fiscal year. When payments are less than total receipts, the fiscal operations of government result in fiscal surplus.

CHAPTER 16

BANKING

The Central Bank of Nigeria (CBN) is the apex regulatory authority of the Nigerian Financial System; established in 1958 and commencing operations on the 1st of July, 1959.

Among its primary functions, the CBN promotes and maintains monetary stability and a sound and efficient financial system in the country. It also issues legal tender currency notes and coins; maintains Nigeria's external reserves to safeguard the national value of the currency; and formulates and implements the monetary and exchange rate policies of the country.

The Bank is a banker and financial adviser to the Federal Government and lender of the last resort to other banks. Similarly, it promotes the growth and development of other financial institutions.

The legal bases of the Central Bank's authority are the CBN Decree (Act) No 24 of 1991 (amended in 1997, 1998 and 1999) and the Banks and Other Financial Institutions Decree (Act) No. 25 of 1991 (amended in 1997, 1998 and 1999), which supersede the CBN Act of 1958 and the Banking Decree of 1996 and later amendments. The current laws generally give the CBN more flexibility in regulating and supervising the banking sector (as well as other financial institutions, which hitherto operated outside any regulatory framework. These include Primary Mortgage Institutions, Finance Companies, Community Banks and Development Financial Institutions). The key data on banking sector include financial institutions, money and credits, securities, etc

CHAPTER 17 INSURANCE

The Insurance companies in Nigeria are classified into Life and General, and the industry is regulated by the National Insurance Commission. Insurance policy guidelines are issued annually as part of the regulatory and supervisory tools of the Commission.

The Nigerian insurance sector comprises

- Reinsurance Companies
- Insurance Companies
- Insurance Brokers
- Loss Adjusters
- Agents

The life and general insurance business is categorized as follows:

LIFE INSURANCE BUSINESS

- Individual life insurance business
- Group life insurance business
- Health insurance business

GENERAL INSURANCE BUSINESS

- Fire insurance
- General accident insurance
- Motor vehicle insurance
- Marine and aviation insurance
- Oil and gas insurance
- Engineering insurance
- Bonds, credit guarantee and suretyship insurance
- Miscellaneous insurance

CHAPTER 18

GENERAL ELECTIONS AND POLITICAL OFFICE HOLDERS

The Federal Republic of Nigeria has been practising the presidential system of Government involving three arms: the Executive, Legislature and Judiciary since May 1999. Also, there are three tiers of governance, namely Federal, State and Local.

Each of the three tiers is headed by an elected executive: President, Governor and Chairman respectively. Also elected are members of the National Assembly, State Houses of Assembly and the Local Councils. The National Assembly is constituted by a Senate (109 members) and a House of Representatives (360 members). The legislatures at all tiers have the primary responsibilities of making laws and exercising oversight functions over the respective executives.

Under the present system, there have been four General Elections (1999, 2003, 2007 and 2011) conducted by the Independent National Electoral Commission (INEC). The Local Government elections are conducted by the various State Independent Electoral Commissions (SIECs).
