

CONSUMER PRICE INDEX

(BASE PERIOD NOVEMBER 2009 = 100)

No. 507
May 2012

NATIONAL BUREAU OF STATISTICS

BRIEF METHODOLOGY

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprises of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item according to sector across the state. Next step is to use the average price to calculate basic index for each commodity: The current year price of each commodity are compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute aggregated index for each class (which has a multitude of commodities which have similar consumption purpose): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions and then the derived:

1. The country composite index
2. The Urban Composite index
3. The Rural Composite index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. All of these indices will yield the same price change for any commodity group contained in all the series. A new sub index - Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 COICOP functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON ALCOHOLIC BEVERAGES

- Food
 - Bread and cereals
 - Meat
 - Fish
 - Milk, cheese and eggs
 - Oils and fats
 - Fruit
 - Vegetables
 - Potatoes, Yam & other tubers
 - Food products nec
 - Coffee, tea and cocoa
 - Soft drinks

ALCOHOLIC BEVERAGES, TOBACCO AND KOLA

- Spirits
- Wine
- Tobacco
- Narcotics

CLOTHING AND FOOTWEAR

- Clothing materials, other articles of clothing
- Garments
- Cleaning, repair and hire of clothing
- Shoes and other footwear
- Repair and hire of footwear

HOUSING, WATER, ELECTRICITY, GAS

- Actual and imputed rentals for housing
- Water supply
- Miscellaneous services relating to the dwelling
- Electricity
- Gas
- Liquid fuel
- Solid fuels

FURNISHINGS, HOUSEHOLD EQUIPMENT

- Furniture and furnishings
- Carpets and other floor coverings
- Repair of Furniture
- Household textiles
- Major household appliances whether electric or not

Repair of household appliances
Glassware, tableware and household utensils
Non-durable household goods
Domestic services and household services

HEALTH

Pharmaceutical products
Medical services
Dental services
Paramedical services
Hospital services

TRANSPORT

Motor cars
Motor cycles
Bicycles
Vehicle spare parts
Fuels and lubricants for personal transportation
Maintenance and repair of personal transport
Passenger transport by road
Passenger transport by air
Passenger transport by sea and inland waterways

COMMUNICATION

Postal services
Telephone and telefax equipment
Telephone and telefax services

RECREATION AND CULTURE

Audio-visual, photographic and information processing equipments
Photographic development
Musical instrument
Recreational and sporting services
Games of chance

EDUCATION

Books & stationery

RESTAURANTS AND HOTELS

Catering services
Accommodation services

MISCELLANEOUS GOODS AND SERVICES

Hairdressing salons and personal grooming establishments
Appliances, articles and products for personal care
Jewellery, clocks and watches
Insurance
Other services.

ALL ITEMS INDEX

The Composite Consumer Price Index (CPI) which measures inflation rose to 12.7 percent year-on-year in May 2012. The high year-on-year change could be partly attributable to persistent increase in the prices some farm produce due to the farming season, for example vegetables which are typically in short supply at this time of the year. Other notable increases were in catering services as well as the cost of some miscellaneous services, such as appliances, articles and products for personal care. However, while these items were responsible for the largest price rises, their contribution to the overall index is minimal given their relatively smaller weights in the index.

On a monthly basis, the composite CPI was higher by 0.75 percent in May 2012 when compared with April 2012.

The urban inflation rate was recorded at 14.1 percent year-on-year while the rural inflation rate was 11.7 percent for May 2012. The urban All Items index increased by 0.8 percent on a month-on-month basis, while the rural index increased by 0.7 percent, when compared with the preceding month.

The percentage change in the average composite CPI for the twelve-month period ending May 2012 over the average of the CPI for the previous twelve-month period was 11.1 percent, the same as the previous month. The corresponding 12-month year-on-year average percentage change for urban and rural indices was 10.5 and 11.6 respectively.

FOOD INDEX

In May 2012, the level of the Composite Food Index was higher than the corresponding level a year ago by 12.9 percent. On a month on month basis, average monthly food prices rose in May 2012 by 1.2 percent. The rise in the food index was mainly from increase in the prices of vegetables (in particular), potatoes, yam and other tubers, and bread and cereals. Farm produce prices have been higher as stocks have been drawn down from earlier harvests and farmers are in the peak of the farming season, using up part of their stocks in the farming process. The average annual rate of rise of the index remained at 10.4 percent (year-on-year) for the twelve-month period ending May 2012.

ALL ITEMS LESS FARM PRODUCE

The "All items less Farm Produce" index which excludes the prices of volatile agricultural products rose by 14.9 percent year-on-year, while the average 12 month annual rate of rise of the index was 12.4 percent for the twelve-month period ending May 2012. On a month-on-month basis, the core index increased by 1.1 percent in May 2012. The rise in the "Core" index could be attributable to higher price levels in divisions that compose the index, such as clothing and footwear, gas and other fuels, transportation, and other class items such as carpets and floor coverings, and education materials.

For more enquiries relating to the CPI revision contact kocimo@nigerianstat.gov.ng

Table 1 Composite Consumer Price Index (Base November 2009 = 100)
