Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new sub index – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON-ALCOHOLIC BEVERAGES	 Food	 Bread and cereals	 Meat	 Fish	 Milk, cheese and eggs	 Oils and fats
	 Fruit	 Vegetables	 Potatoes, Yam & other tubers	 Food products n.e.c	 Coffee, tea and cocoa	 Soft drinks
ALCOHOLIC BEVERAGES, TOBACCO AND KOLA	 Spirits	 Wine	 Tobacco	 Narcotics		

CLOTHING AND FOOTWEAR					
	Clothing materials, other articles of clothing	Garments	Cleaning, repair and hire of clothing	Shoes and other footwear	Repair and hire of footwear
HOUSING, WATER, ELECTRICITY, GAS					
	Actual and imputed rentals for housing	Water supply	Miscellaneous services relating to the dwelling	Electricity	
FURNISHINGS, HOUSEHOLD EQUIPMENT					
	Gas	Liquid fuel		Solid fuels	
					
	Furniture and furnishings	Carpets and other floor coverings	Repair of Furniture	Household textiles	
HEALTH					
	Major household appliances whether electric or not	Repair of household appliances	Glassware, tableware and household utensils	Non-durable household goods	Domestic services and household services
					
Pharmaceutical products	Medical services	Dental services	Paramedical services	Hospital services	

TRANSPORT				
	Motor cars	Motor cycles	Bicycles	Vehicle spare parts
				
	Fuels and lubricants for personal transportation	Maintenance and repair of personal transport	Passenger transport by road	Passenger transport by air
				
				Passenger transport by sea and inland waterways

COMMUNICATION			
	Postal services	Telephone and telefax equipment	Telephone and telefax services
RECREATION AND CULTURE			
	Audio-visual, photographic and information processing equipment	Photographic development	Musical instrument
			
			Recreational and sporting services
			
			Games of chance

EDUCATION	
	Books & stationery
RESTAURANTS AND HOTELS	

MISCELLANEOUS
GOODS AND
SERVICES

Catering services

Hairdressing salons
and personal
grooming
establishments

Appliances, articles
and products for
personal care

Jewellery, clocks and
watches

Accommodation services

Insurance

Other services

All Items Index

The Consumer Price Index (CPI) which measures inflation increased by 16.01 percent (year-on-year) in August 2017. This was 0.04 percent points lower than the rate recorded in July (16.05) percent making it the seventh consecutive decline in the rate of headline year on year inflation since January 2017.

Increases were recorded in all COICOP divisions that yield the Headline Index.

On a month-on-month basis, the Headline index increased by 0.97 percent in August 2017, 0.24 percent points lower from the rate of 1.21 percent recorded in July.

The percentage change in the average composite CPI for the twelve-month period ending in August 2017 over the average of the CPI for the previous twelve-month period was 17.33 percent, 0.14 percent point lower from 17.47 percent recorded in July 2017.

The Urban index rose by 16.13 percent (year-on-year) in August 2017, down by 0.09 percent point from 16.04 percent recorded in July, and the Rural index increased by 15.91 percent in August from 16.08 percent in July.

On month-on-month basis, the urban index rose by 0.99 percent in August 2017, down by 0.26 percent point from 1.25 percent recorded in July, while the rural index rose by 0.95 percent in August 2017, down by 0.23 percent point from 1.18 percent in July.

The corresponding twelve month year-on-year average percentage change for the urban index increased from 18.43 percent in July to 18.15 percent in August, while the corresponding rural index also increased from 16.60 percent in July to 16.58 percent in August.

All Items Less Farm Produce (core) Index

On a month-on-month basis, the Core sub-index increased by 0.93 percent in August, 0.07 percent points lower from 1.00 percent recorded in July. The highest increases were recorded in clothing materials and articles of clothing, garments, passenger transport by air, motorcycles, shoes and other footwear, furniture and furnishing, books and stationary, non-durable household goods, pharmaceutical products and maintenance, repair of personal transport equipment and glassware, tableware & household utensils.

The average 12-month annual rate of rise of the index was recorded at 15.37 percent for the twelve-month period ending in August 2017, 0.43 percent points lower from the twelve month rate of change recorded in July.

HEADLINE CPI IN AUGUST 2017 ROSE BY

16.01%

YEAR-ON-YEAR
(FROM 16.05% IN JULY 2017)

0.97%

MONTH-ON-MONTH
(FROM 1.21% IN JULY 2017)

HIGHEST INCREASE RECORDED IN

Meat

Oil & Fats

Milk, Cheese and Egg

Bread and Cereals

Coffee, Tea & Cocoa
