Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new subindex – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON-ALCOHOLIC BEVERAGES						
	Food	Bread and cereals	Meat	Fish	Milk, cheese and eggs	Oils and fats
ALCOHOLIC BEVERAGES, TOBACCO AND KOLA						
	Fruit	Vegetables	Potatoes, Yam & other tubers	Food products n.e.c	Coffee, tea and cocoa	Soft drinks
CLOTHING AND FOOTWEAR						
	Clothing materials, other articles of clothing	Garments	Cleaning, repair and hire of clothing	Shoes and other footwear	Repair and hire of footwear	

HOUSING, WATER, ELECTRICITY, GAS

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

Solid fuels

FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services

TRANSPORT

Motor cars

Motor cycles

Bicycles

Vehicle spare parts

Fuels and lubricants for personal transportation

Maintenance and repair of personal transport

Passenger transport by road

Passenger transport by air

Passenger transport by sea and inland waterways

COMMUNICATION

Postal services

Telephone and telefax equipment

Telephone and telefax services

RECREATION AND CULTURE

Audio-visual, photographic and information processing equipment

Photographic development

Musical instrument

Recreational and sporting services

Games of chance

EDUCATION

Books & stationery

RESTAURANTS AND HOTELS

Catering services

Accommodation services

MISCELLANEOUS GOODS AND SERVICES

Hairdressing salons and personal grooming establishments

Appliances, articles and products for personal care

Jewellery, clocks and watches

Insurance

Other services

All Items Index

The Consumer Price Index (CPI) which measures inflation increased by 15.91 percent (year-on-year) in October 2017. This was 0.07 percent points lower than the rate recorded in September (15.98) percent making it the ninth consecutive disinflation (slowdown in the inflation rate though still positive) in headline year on year inflation since January 2017.

Increases were recorded in all COICOP divisions that yield the Headline Index.

While average headline year on year inflation for the first five months of the year (January to May 2017) stood at 17.45 percent, average headline year on year inflation for the next five months of the year (June to October 2017), stood at 16.01 percent indicating disinflation from June to date, compared to from January to May 2017.

On a month-on-month basis, the Headline index increased by 0.76 percent in October 2017, 0.02 percent points lower from the rate of 0.78 percent recorded in September. This represents the fifth consecutive month on month contraction in headline inflation since May 2017.

While average headline month on month inflation for the first five months of the year (January to May 2017) stood at 1.54 percent, average headline month on month inflation for the next five months of the year (June to October 2017), stood at 1.06 percent indicating disinflation from June to date compared to from January to May 2017.

This indicates that while prices have remained high in 2017, they have tended to slow down their pace of increase since May 2017 both on a year on year and month on month basis.

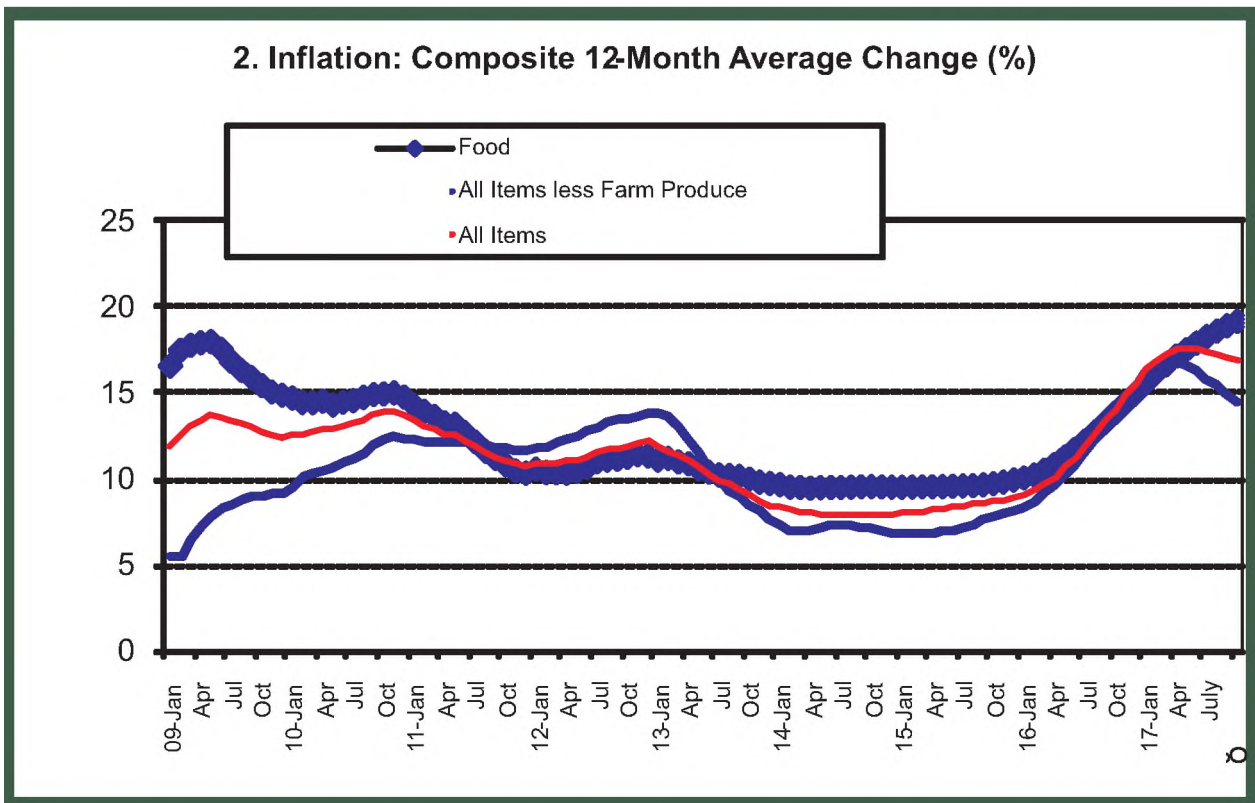

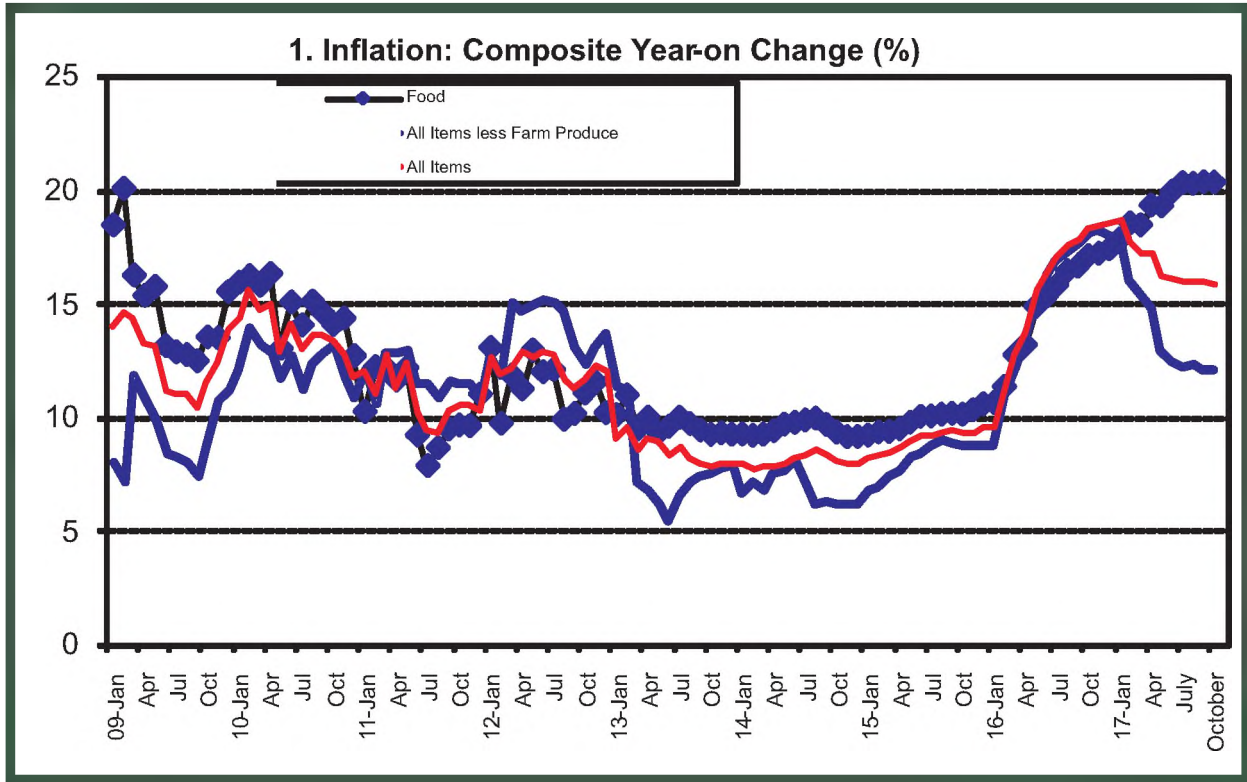

The percentage change in the average composite CPI for the twelve-month period ending in October 2017 over the average of the CPI for the previous twelve-month period, which has also trended downwards since May 2017 was 16.97 percent, showing 0.2 percent point lower from 17.17 percent recorded in September 2017.

The Urban index rose by 16.19 percent (year-on-year) in October 2017, up by 0.01 percent point from 16.18 percent recorded in September and the Rural index increased by 15.67 percent in October 2017 down from 15.81 percent in September 2017.

On month-on-month basis, the urban index rose by 0.82 percent in October 2017, down from 0.84

percent recorded in August, while the rural index rose by 0.72 percent in October 2017, down from 0.74 percent in September.

The corresponding twelve-month year-on-year average percentage change for the urban index was 17.57 percent in October. This was less than 17.87 percent reported in September 2017, while the corresponding rural inflation rate in October was 16.41 percent compared to 16.52 percent recorded in September 2017.

Food Index

High food price and food price pressure continued into September though generally at a slower pace.

The Food Index increased by 20.31 percent (year-on-year) in October, down marginally by 0.01 percent points from the rate recorded in September (20.32 percent).

While average year on year food inflation for the first five months of the year (January to May 2017) stood at 18.67 percent, average year on year food inflation for the next five months of the year (June to October 2017), was higher at 20.22 percent indicating higher food price inflation on average in the second five months of the year compared to the first five months.

On a month-on-month basis, the Food sub-index increased by 0.85 percent in October, down from 0.87 percent recorded in August. This represents the fifth consecutive disinflation in month on month inflation since a 2017 high of 2.57% in May 2017. October 2017 also represents the lowest recorded month on month inflation since September 2016.

While average month on month food inflation for the first five months of the year (January to May 2017) stood at 2.01 percent, average month on month food inflation for the next five months of the year (June to October 2017), stood at 1.27 percent indicating a general slow-down in the rise in food prices from June to date compared to from January to May 2017, though the rate of price increases has remained generally higher on a year on year basis.

The average annual rate of change of the Food sub-index for the twelve-month period ending in October 2017 over the previous twelve month average was 19.14 percent, 0.26 percent points from the average annual rate of change recorded in September (18.88) percent

The rise in the food index, in October 2017 was caused by increases in prices of bread and cereals, meats, oils and fats, coffee tea and cocoa, milk cheese and eggs vegetables and fish.

All Items Less Farm Produce/core Inflation

The "All Items less Farm Produce" or Core sub-index, which excludes the prices of volatile agricultural, stood during the month of October at 12.14 percent points from 12.12 percent recorded in September as all key divisions which contributes to the index increased.

While average year on year core inflation for the first five months of the year (January to May 2017) stood at 15.41 percent, average year on year core inflation for the next five months of the year (June to October 2017), was lower at 12.24.

On a month-on-month basis, the Core sub-index increased by 0.76 percent in October, lower from 0.80 percent recorded in September.

While average month on month core inflation for the first five months of the year (January to May 2017) stood at 1.07 percent, average month on month core inflation for the next five months of the year (June to October 2017), stood at 0.96 percent.

The average 12 month annual rate of change of the index was 14.41 percent for the twelve-month period ending in October 2017; this is 0.49 percent points lower than 14.90 percent recorded in September.

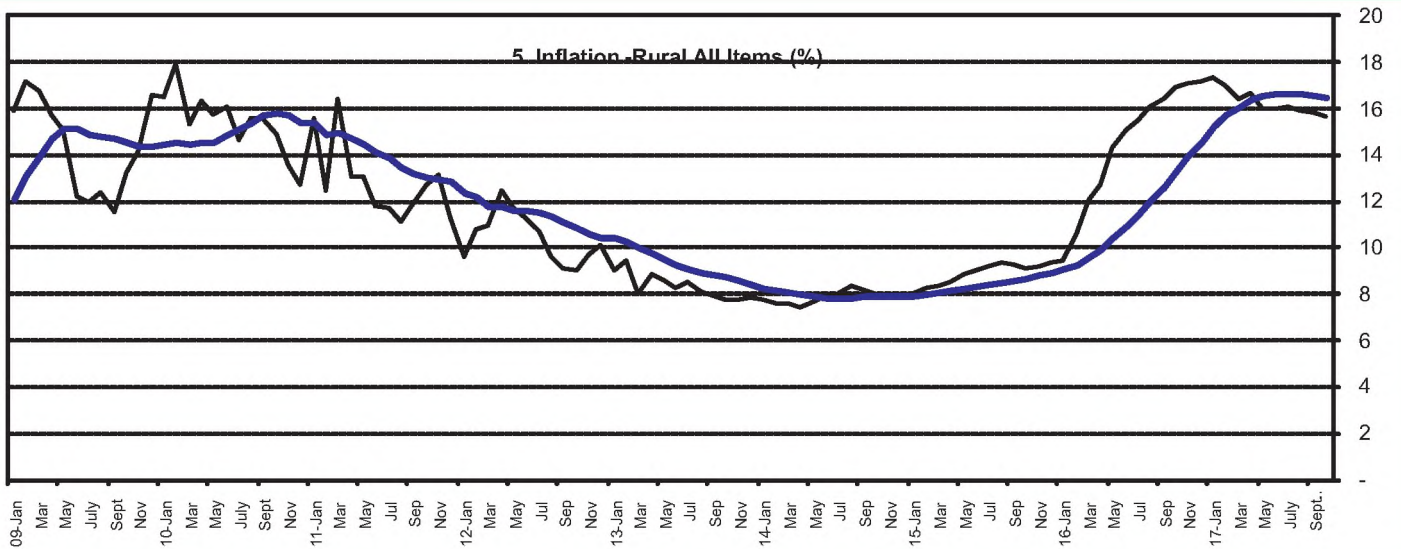

The highest increases were recorded in prices of maintenance and repair of personal transport equipment and other services related to personal transport equipment, air transport, Vehicle spare parts, carpets and other floor coverings, furniture and furnishings and repair of furniture, solid and liquid fuels ,Shoes and other foot ware and Garments, clothing materials, other articles of clothing and clothing accessories.

4. Inflation -Urban All Items (%)

5. Inflation -Rural All Items (%)

State Profiles

In analyzing price movements under this section, note that the CPI is weighted by consumption expenditure patterns which differ across States. Accordingly, the weight assigned to a particular food or non-food item may differ from State to State making inter State comparisons of consumption basket inadvisable and potentially misleading

All Items Inflation

In October 2017, all times inflation on a year on year basis was highest in Bauchi (23.87%), Nasarawa (20.23%) and Kebbi (19.17%), while Kogi (9.83%), Abuja/FCT (13.23%) and Edo (13.42%) recorded the slowest rise in headline inflation.

On a month on month basis however, October 2017 all items inflation was highest in Bauchi (1.6%), Jigawa (1.45%) and Benue (1.35%), while Sokoto (-0.43%) and Abia (-0.33%) which recorded price deflation or negative inflation (general decrease in the general price level of goods and services or a negative inflation rate) in October as well as Akwa Ibom (0.20%) recorded the lowest all item inflation in October 2017

Food Inflation

In October 2017, food inflation on a year on year basis was highest in Kwara (26.27%), Nasarawa (26.18%) and Kano (24.70%), while Kogi (11.61%), Bauchi (14.41%) and Benue (16.21%) recorded the slowest rise in food inflation.

On a month on month basis however, October 2017 food inflation was highest in Kwara (2.38%), Benue (1.93%) and Edo (1.77%), while Abia (-0.69%), Sokoto (-0.53%), Cross River (-0.22%) and Enugu (-0.16%) which recorded food price deflation or negative inflation (general decrease in the general price level of goods and services or a negative inflation rate) in October recorded the lowest food inflation in October 2017

Note: Indices may not be used for inter-state price comparison because market baskets differ from state to state

(FROM 0.87% IN SEPTEMBER 2017)

HIGHEST INCREASE RECORDED IN

The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation.

CORE SUB-INDEX IN OCTOBER 2017 ROSE BY

12.14%

**YEAR-ON-YEAR
(FROM 12.12% IN SEPTEMBER 2017)**

0.76%

**MONTH-ON-MONTH
(FROM 0.80% IN SEPTEMBER 2017)**

HIGHEST INCREASE RECORDED IN

**MAINTENANCE AND
REPAIR OF PERSONAL
TRANSPORT
EQUIPMENT**

**OTHER SERVICES
RELATED TO
PERSONAL TRANSPORT
EQUIPMENT**

**AIR
TRANSPORT**

**VEHICLE
SPARE PARTS**

**CARPETS AND
OTHER FLOOR
COVERINGS**

**FURNITURE AND
FURNISHING
AND REPAIR
OF FURNITURE**

**SOLID AND
LIQUID FUEL**

**SHOES AND
OTHER
FOOTWEAR**

The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation rate.

URBAN INDEX IN OCTOBER 2017 ROSE BY

16.19%

YEAR-ON-YEAR
(FROM 16.18% IN SEPTEMBER 2017)

0.82%

MONTH-ON-MONTH
(FROM 0.84% IN SEPTEMBER 2017)

RURAL INDEX IN OCTOBER 2017 ROSE BY

15.67%

YEAR-ON-YEAR
(FROM 15.81% IN SEPTEMBER 2017)

0.72%

MONTH-ON-MONTH
(FROM 0.74% IN SEPTEMBER 2017)

The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation rate.
