# Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new subindex – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

<b>FOOD AND NON-ALCOHOLIC BEVERAGES</b>	 Food	 Bread and cereals	 Meat	 Fish	 Milk, cheese and eggs	 Oils and fats
	 Fruit	 Vegetables	 Potatoes, Yam & other tubers	 Food products n.e.c	 Coffee, tea and cocoa	 Soft drinks

<b>ALCOHOLIC BEVERAGES, TOBACCO AND KOLA</b>	 Spirits	 Wine	 Tobacco	 Narcotics
--	--	---	--	--

<b>CLOTHING AND FOOTWEAR</b>	 Clothing materials, other articles of clothing	 Garments	 Cleaning, repair and hire of clothing	 Shoes and other footwear	 Repair and hire of footwear
----------------------------------	---	---	--	--	---

## HOUSING, WATER, ELECTRICITY, GAS

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

Solid fuels

## FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

## HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services

## TRANSPORT

Motor cars

Motor cycles

Bicycles

Vehicle spare parts

Fuels and lubricants for personal transportation

Maintenance and repair of personal transport

Passenger transport by road

Passenger transport by air

Passenger transport by sea and inland waterways

## COMMUNICATION

Postal services

Telephone and telefax  
equipment

Telephone and telefax  
services

## RECREATION AND CULTURE

Audio-visual,  
photographic  
and information  
processing equipment

Photographic  
development

Musical  
instrument

Recreational  
and sporting  
services

Games of  
chance

## EDUCATION

Books & stationery

## RESTAURANTS AND HOTELS

Catering services

Accommodation services

## MISCELLANEOUS GOODS AND SERVICES

Hairdressing salons  
and personal  
grooming  
establishments

Appliances,  
articles and products  
for personal care

Jewellery, clocks  
and watches

Insurance

Other services

# All Items Index

The Consumer Price Index (CPI) which measures inflation increased by 15.90 percent (year-on-year) in November 2017. This was 0.01 percent points lower than the rate recorded in October (15.91) percent making it the tenth consecutive disinflation (slowdown in the inflation rate though still positive) in headline year on year inflation since January 2017.

Increases were recorded in all COICOP divisions that yield the Headline Index.

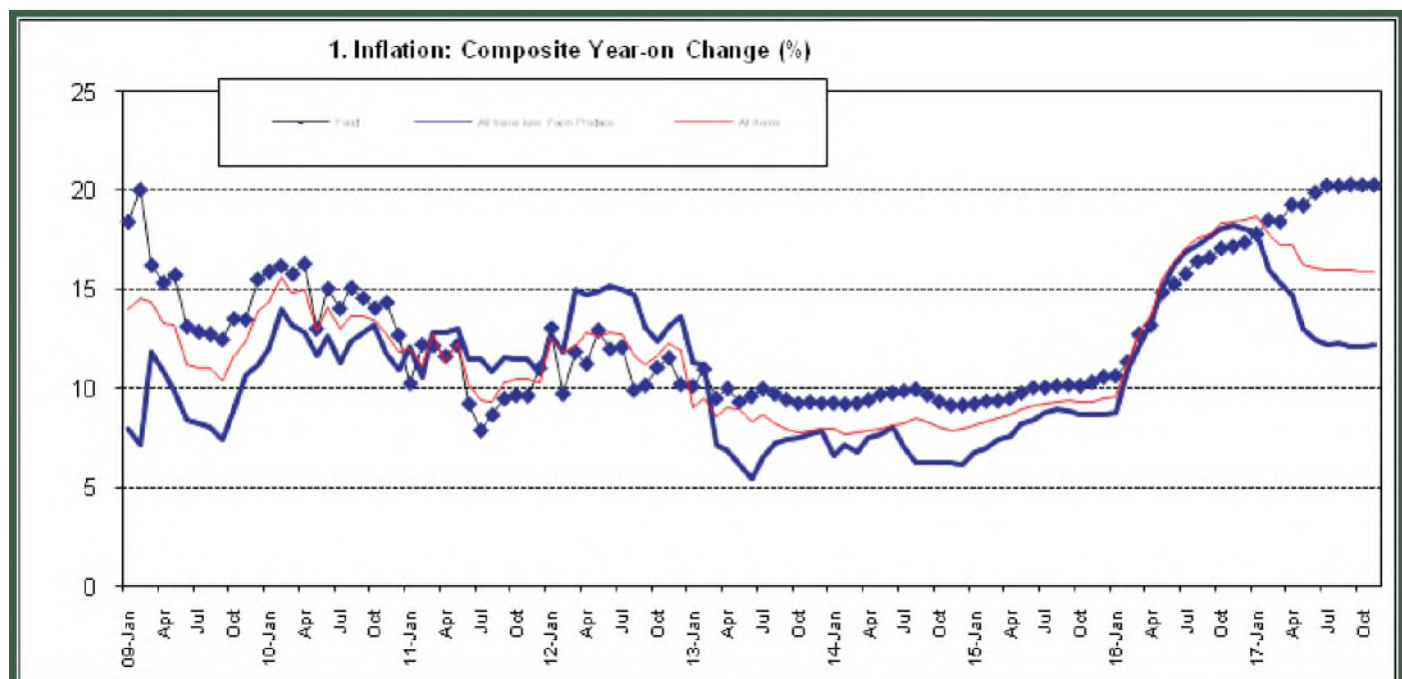

On a month-on-month basis, the Headline index increased by 0.78 percent in November 2017, 0.02 percent points higher from the rate of 0.76 percent recorded in October. This represents the first rise in month on month inflation following five consecutive months on month contraction in headline inflation since May 2017.

The percentage change in the average composite CPI for the twelve month period ending in November 2017 over the average of the CPI for the previous twelve month period was 16.76 percent, showing 0.21 percent point lower from 16.97 percent recorded in October 2017.

The Urban inflation rate rose by 16.27 percent (year-on-year) in November from 16.19 percent recorded in October, while the Rural inflation rate also eased by 15.59 percent in November from 15.67 percent in October.

On month-on-month basis, the urban index rose by 0.85 percent in November, up by 0.03 from 0.82 percent recorded in October, while the rural index rose by 0.724 percent in November, up by 0.009 when compared with 0.715 percent in October.

The corresponding twelve month year-on-year average percentage change for the urban index is 17.26 percent in November. This is less than 17.57 percent reported in October 2017, while the corresponding rural inflation rate in November is 16.29 percent compared to 16.41 percent recorded in October 2017.

## 2. Inflation: Composite 12-Month Average Change (%)

## 3. Inflation -Composite All Items (%)

# Food Index

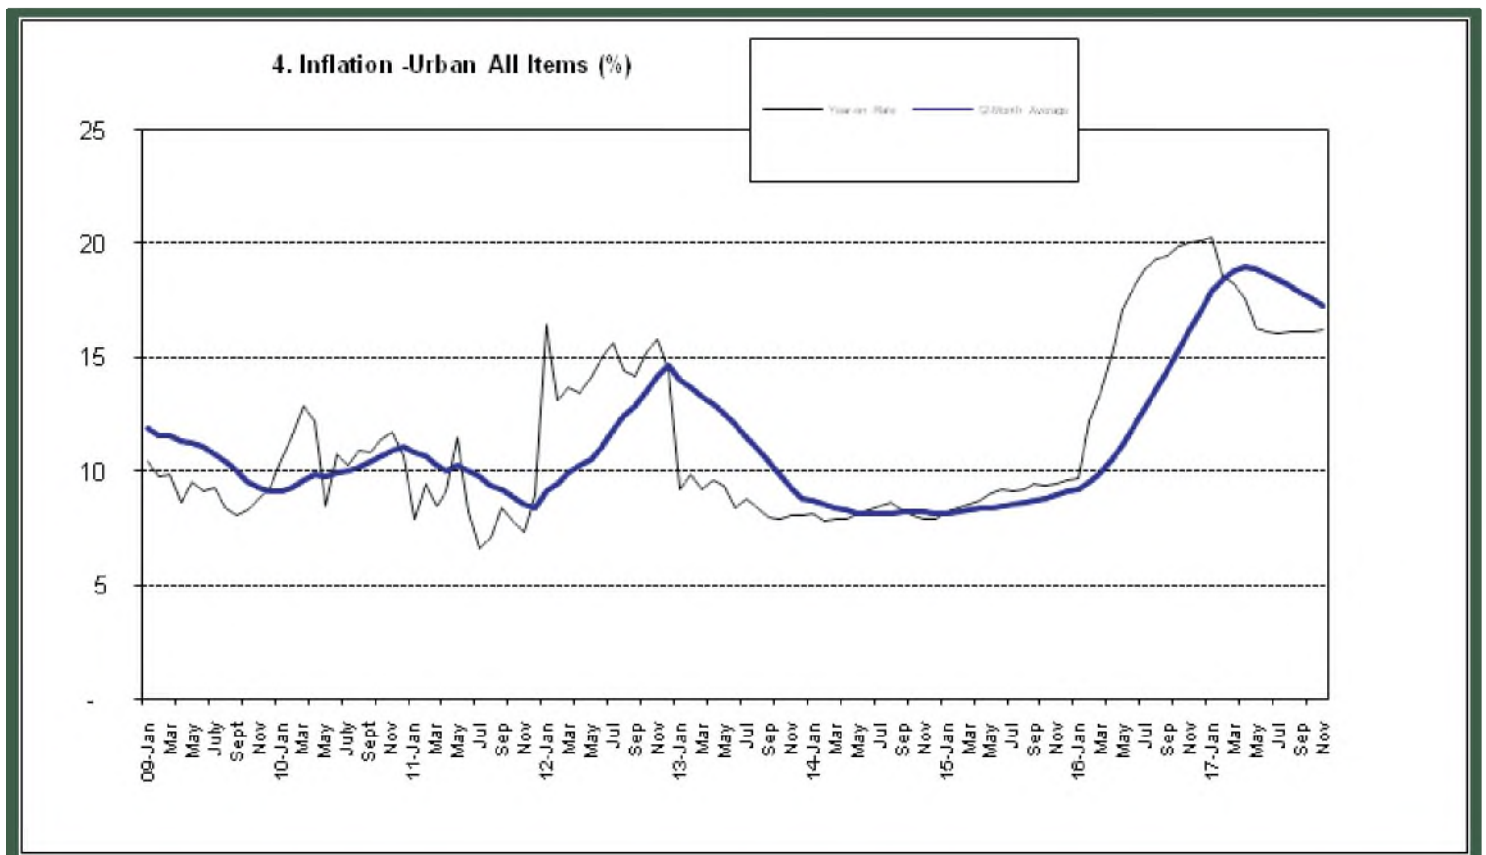

High year on year food prices and food price pressure continued into November though consistently at a slower pace month on month.

The Food Index increased by 20.30 percent (year-on-year) in November, down marginally by 0.01 percent points from the rate recorded in October (20.31 percent).

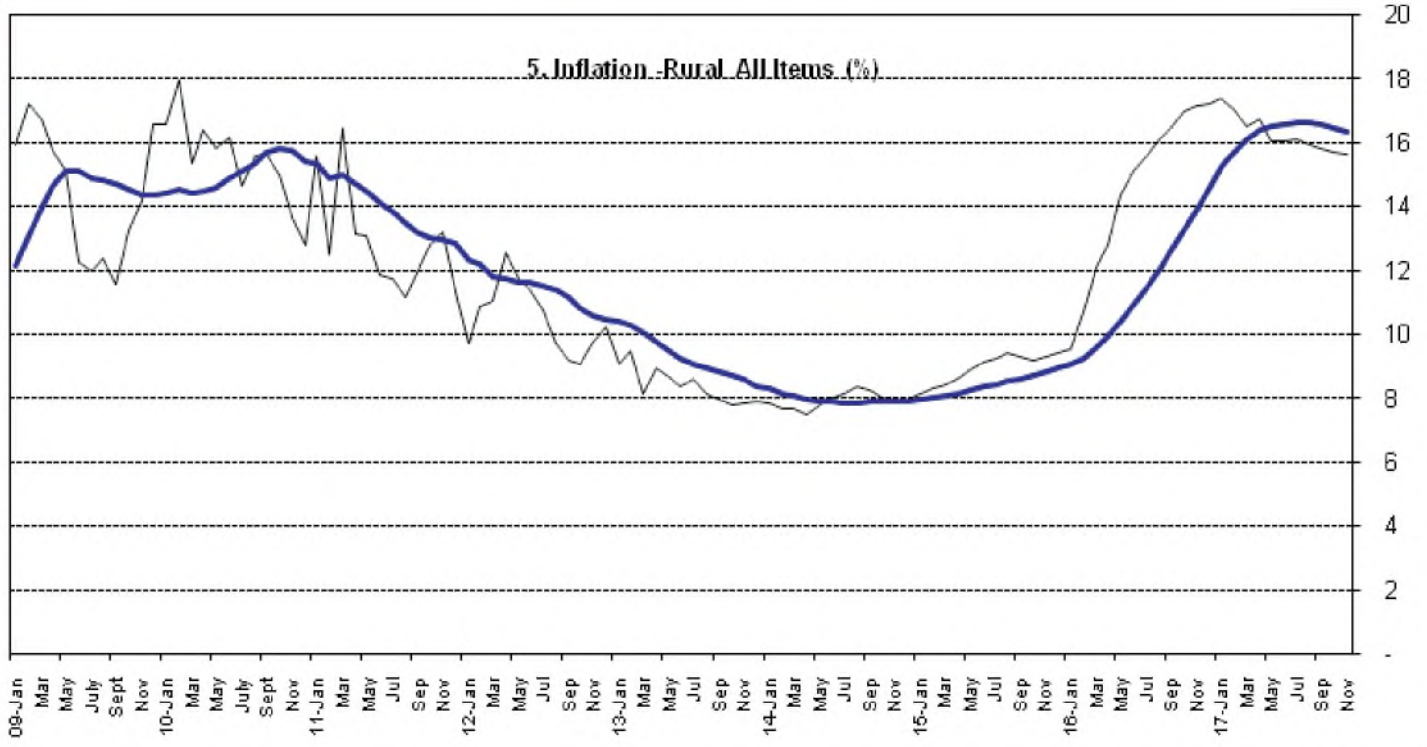

On a month-on-month basis, the Food sub-index increased by 0.88 percent in November, up by 0.03 percent from 0.85 percent recorded in October. This represents the first rise in months on month rise following five consecutive disinflation in month on month inflation since a 2017 high of 2.57% in May 2017.

The average annual rate of change of the Food sub-index for the twelve-month period ending in November 2017 over the previous twelve month average was 19.39 percent, 0.25 percent points from the average annual rate of change recorded in October (19.14) percent.

The rise in the index was caused by increases in prices of bread and cereal, milk, cheese, eggs, coffee, tea, cocoa, fish and Oil and fats.

5. Inflation -Rural All Items (%)

# All Items Less Farm Produce/Core Inflation

The "All Items less Farm Produce" or Core sub-index, which excludes the prices of volatile agricultural, stood during the month of November at 12.20 percent points, up from 12.14 percent recorded in October as all key divisions which contributes to the index increased.

On a month-on-month basis, the Core sub-index increased by 0.77 percent in November, higher from 0.76 percent recorded in October.

The average 12 month annual rate of change of the index was 13.93 percent for the twelve-month period ending in November 2017; this is 0.48 percent points lower than 14.41 percent recorded in October.

The highest increases were recorded in prices of motorcycles, bicycles, glassware and tableware, hospital and medical services, spirits, household textiles, insurance, accommodation services, maintenance and repair of personal transport equipment, Vehicle spare parts, Other services in respect of personal transport equipment, and Fuel and lubricants for personal transport equipment.

# State Profiles

*In analyzing price movements under this section, note that the CPI is weighted by consumption expenditure patterns which differ across States. Accordingly, the weight assigned to a particular food or non-food item may differ from State to State making inter State comparisons of consumption basket inadvisable and potentially misleading*

## All Items Inflation

In November 2017, all items inflation on a year on year basis was highest in Bauchi (23.63%), Nasarawa (19.90%) and Kebbi (19.22%), while Kogi (11.27%), Edo (13.11%) and Delta States (13.75) recorded the slowest rise in headline Year on Year inflation.

On a month on month basis however, November 2017 all items inflation was highest in Bauchi (1.6%), Katsina (1.44%) and Oyo (1.43%), while Plateau (0%), Edo (0.07%) Benue (0.21%) recorded the lowest month on month all item inflation in November 2017

## Food Inflation

In November 2017, food inflation on a year on year basis was highest in Kwara (28.11%), Ebonyi (25.03%) and Nasarawa (24.95%) while Kogi (13.25%), Benue (15.19%) and Bauchi (15.42%) and recorded the slowest rise in food inflation.

On a month on month basis however, November 2017 food inflation was highest in Oyo and Ebonyi (1.96%), and FCT/Abuja (1.93%), while Akwa Ibom (-0.69%), Plateau (-0.13%), and Benue (-0.06%) which recorded food price deflation or negative inflation (general decrease in the general price level of goods and services or a negative inflation rate) in November recorded the lowest food inflation in November 2017

Note: Indices may not be used for inter-state price comparison because market baskets differ from state to state

# HEADLINE CPI IN NOVEMBER 2017 ROSE BY

**15.90%**

**YEAR-ON-YEAR  
(FROM 15.91% IN OCTOBER 2017)**

**0.78%**

**MONTH-ON-MONTH  
(FROM 0.76% IN OCTOBER 2017)**

## HIGHEST INCREASE RECORDED IN

**Oil & Fats**

**Milk, Cheese and Egg**

**Bread and Cereals**

**Coffee, Tea & Cocoa**

**Fish**

The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation rate

# FOOD SUB-INDEX IN NOVEMBER 2017 ROSE BY

**20.30%**

**YEAR-ON-YEAR**  
**(FROM 20.31% IN OCTOBER 2017)**

**0.88%**

**MONTH-ON-MONTH**  
**(FROM 0.85% IN OCTOBER 2017)**

## HIGHEST INCREASE RECORDED IN

**OILS AND  
FATS**

**MILK, CHEESE  
AND EGGS**

**BREAD AND  
CEREALS**

**COFFEE, TEA  
& COCOA**

**FISH**

*The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation.*

# CORE SUB-INDEX IN NOVEMBER 2017 ROSE BY

**12.20%**

**YEAR-ON-YEAR  
(FROM 12.14% IN OCTOBER 2017)**

**0.77%**

**MONTH-ON-MONTH  
(FROM 0.76% IN OCTOBER 2017)**

## HIGHEST INCREASE RECORDED IN

**MOTORCYCLES**

**BICYCLES**

**GLASSWARE  
AND  
TABLEWARE**

**HOSPITAL  
AND MEDICAL  
SERVICES**

**SPIRITS**

**HOUSEHOLD  
TEXTILES**

**INSURANCE**

**ACCOMMODATION  
SERVICES**

*The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation rate.*

## URBAN INDEX IN NOVEMBER 2017 ROSE BY

**16.27%**

YEAR-ON-YEAR  
(FROM 16.19% IN OCTOBER 2017)

**0.85%**

MONTH-ON-MONTH  
(FROM 0.82% IN OCTOBER 2017)

## RURAL INDEX IN NOVEMBER 2017 ROSE BY

**15.59%**

YEAR-ON-YEAR  
(FROM 15.67% IN OCTOBER 2017)

**0.724%**

MONTH-ON-MONTH  
(FROM 0.715% IN OCTOBER 2017)

The CPI (Consumer Price Index) measures the average change over time in prices of goods and services consumed by people for day-to-day living i.e it measures the inflation rate.
