Brief Methodology

The CPI measures the average change over time in prices of goods and services consumed by people for day-to-day living. The construction of the CPI combines economic theory, sampling and other statistical techniques using data from other surveys to produce a weighted measure of average price changes in the Nigerian economy. The weighting occurs to capture the importance of the selected commodities in the entire index. The production of the CPI requires skills of economists, statisticians, computer scientists, data collectors and others.

Key in the construction of the price index is the selection of the market basket of goods and services. Every month, 10,534 informants spread across the country provide price data for the computation of the CPI. The market items currently comprise of 740 goods and services regularly priced.

The first stage in the calculation of the CPI is the collection of prices on each item (740 goods and services) from outlets in each sector (rural or urban) for each state. Prices are then averaged for each item per sector across the state. The next step is to use the average price to calculate the basic index for each commodity: The current year price of each commodity is compared with a base year's price to obtain a relative price.

Next we use the Laspeyres formula to compute an aggregated index for each class (which has a multitude of commodities which have similar consumption purposes): Here the sum of the product of weights (obtained from the expenditure survey) and relative prices for each item is divided by the sum of the weight of the items in that class, and the result multiplied by 100 gives the required index number. This index number is still classified according to the urban or rural classification sector for each of the 36 states and the FCT. This yields 85 classes then 48 groups which are then reclassified into 12 Divisions to derive:

1. The country composite index
2. The Urban National index
3. The Rural National index
4. The Combined Urban and Rural State Composite index

The survey methodology generates 3774 all items indices for all states and the FCT.

This edition of the Statistical News contains the revised Consumer Price Index (CPI) based on Nigeria Living Standard Survey (NLSS) 2003/2004. The consumption expenditure data were re-valued to November 2009, which is the base period for the revised CPI.

The May 2003 and September 1985 based indices are being continued using factors derived from the new CPI. These indices will yield the same price change for any commodity group contained in all the series.

A new subindex – Imported Food Index- is available in the revised CPI.

Note: The urban and rural indices were weighted with the ratio of their populations to the national i.e. 0.455 and 0.545 respectively to compute the composite indices at the 12 Classification of Individual Consumption by Purpose (COICOP) functions and all items levels. This may cause variance between a recalculated all items index using the weights published on table 2 and the published all items index because the published weights were computed only from consumption expenditure survey result. The following breakdown highlights a non-exhaustive list of the components of the current CPI:

The following breakdown highlights a non-exhaustive list of the components of the current CPI:

FOOD AND NON-ALCOHOLIC BEVERAGES	 Food	 Bread and cereals	 Meat	 Fish	 Milk, cheese and eggs	 Oils and fats
	 Fruit	 Vegetables	 Potatoes, Yam & other tubers	 Food products n.e.c	 Coffee, tea and cocoa	 Soft drinks

ALCOHOLIC BEVERAGES, TOBACCO AND KOLA	 Spirits	 Wine	 Tobacco	 Narcotics
--	--	---	--	--

CLOTHING AND FOOTWEAR	 Clothing materials, other articles of clothing	 Garments	 Cleaning, repair and hire of clothing	 Shoes and other footwear	 Repair and hire of footwear
----------------------------------	---	---	--	--	---

HOUSING, WATER, ELECTRICITY, GAS

Actual and imputed rentals for housing

Water supply

Miscellaneous services relating to the dwelling

Electricity

Gas

Liquid fuel

Solid fuels

FURNISHINGS, HOUSEHOLD EQUIPMENT

Furniture and furnishings

Carpets and other floor coverings

Repair of Furniture

Household textiles

Major household appliances whether electric or not

Repair of household appliances

Glassware, tableware and household utensils

Non-durable household goods

Domestic services and household services

HEALTH

Pharmaceutical products

Medical services

Dental services

Paramedical services

Hospital services

TRANSPORT

Motor cars

Motor cycles

Bicycles

Vehicle spare parts

Fuels and lubricants for personal transportation

Maintenance and repair of personal transport

Passenger transport by road

Passenger transport by air

Passenger transport by sea and inland waterways

MISCELLANEOUS GOODS AND SERVICES

Hairdressing salons and personal grooming establishments

Appliances, articles and products for personal care

Jewellery, clocks and watches

Insurance

Other services

All Item Index

The consumer price index, (CPI) which measures inflation increased by 11.37 percent (year-on-year) in January 2019. This is 0.07 percent points lower than the rate recorded in December 2018 (11.44) percent.

Increases were recorded in all COICOP divisions that yielded the Headline index.

On month-on-month basis, the Headline index increased by 0.74 percent in January 2019, same rate as was recorded in December 2018 (0.74) percent.

The percentage change in the average composite CPI for the twelve months period ending January 2019 over the average of the CPI for the previous twelve months period was 11.80 percent, showing 0.3 percent point from 12.10 percent recorded in December 2018.

The urban inflation rate increased by 11.66 percent (year-on-year) in January 2019 from 11.73 percent recorded in December 2018, while the rural inflation rate increased by 11.11 percent in January 2019 from 11.18 percent in December 2018.

On a month-on-month basis, the urban index rose by 0.77 percent in January 2019, up by 0.01 from 0.76 percent recorded in December 2018, while the rural index also rose by 0.71 percent in January 2019, down by 0.01 percent from the rate recorded in December 2018 (0.72) percent.

The corresponding twelve-month year-on-year average percentage change for the urban index is 12.20 percent in January 2019. This is less than 12.51 percent reported in December 2018, while the corresponding rural inflation rate in January 2019 is 11.46 percent compared to 11.75 percent recorded in December 2018.

4. Inflation -Urban All Items (%)

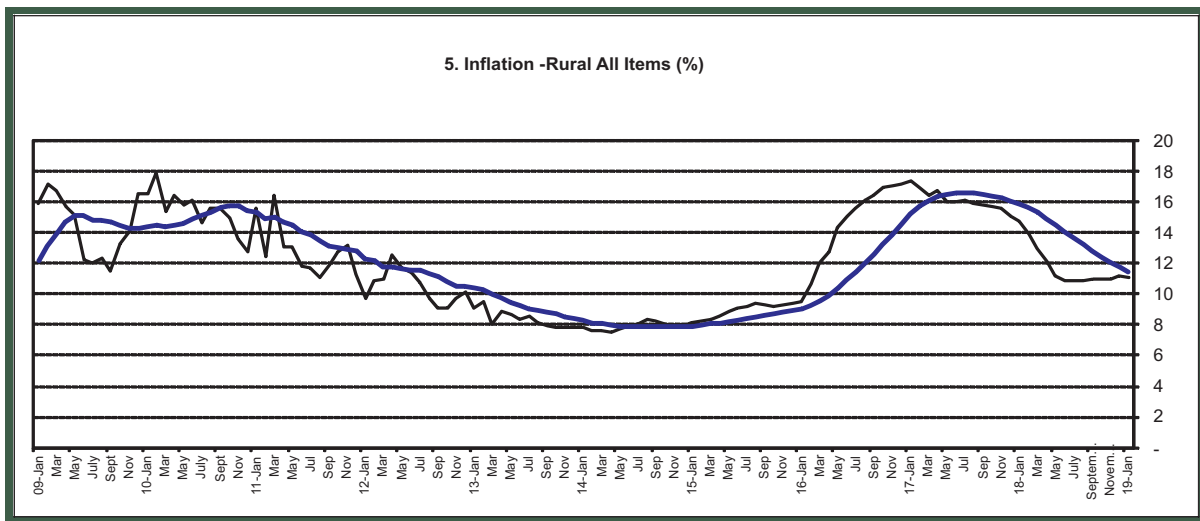

Food Index

The composite food index rose by 13.51 percent in January 2019 compared to 13.56 percent in December 2018.

This rise in the food index was caused by increases in prices of Fish, Bread and cereals, Vegetables, Meat, Fruits, Potatoes, yam and other tubers, oils and fats, soft drinks.

On month-on-month basis, the food sub-index increased by 0.83 percent in January 2019, up by 0.02 percent points from 0.81 percent recorded in December 2018.

The average annual rate of change of the Food sub-index for the twelve-month period ending January 2019 over the previous twelve-month average was 13.93 percent, 0.42 percent points from the average annual rate of change recorded in December 2018 (14.35) percent.

All Items Less Farm Produce

The "All items less farm produce" or Core inflation, which excludes the prices of volatile agricultural produce stood at 9.9 percent in January 2019, up by 0.1 percent when compared with 9.8 percent recorded in December 2018.

On month-on-month basis, the core sub-index increased by 0.81 percent in January 2019. This was up by 0.31 percent when compared with 0.50 percent recorded in December 2018.

The highest increases were recorded in prices of Domestic services and household services, Tobacco, major household appliances whether electronic or not, Medical and Dental services, Garments, Narcotics, Cleaning, repair and hire of clothing, Carpet and other floorings.

The average 12-month annual rate of change of the index was 10.34 percent for the twelve-month period ending January 2019; this is 0.17 percent points lower than 10.51 percent recorded in December 2018.

State Profiles

In analysing price movements under this section, note that the CPI is weighted by consumption expenditure patterns which differ across states. Accordingly, the weight assigned to a particular food or non-food item may differ from state to state making interstate comparisons of consumption basket inadvisable and potentially misleading.

All Items Inflation

In January 2019, all items inflation on year on year basis was highest in Kebbi (14.64%), Bauchi (13.79%) and Jigawa (13.17%), while Kwara (9.28%) Cross River (9.24%) and Ogun (9.01%) recorded the slowest rise in headline Year on Year inflation.

On month on month basis however, January 2019 all items inflation was highest in Delta (1.66%), Ondo (1.55%), and Borno (1.44%), while Ekiti, Nasarawa and Osun recorded negative inflation or price deflation (general decrease in the general price level of goods and services or a negative inflation rate) in January 2019.

Food Inflation

In January 2019, food inflation on a year on year basis was highest in Kebbi (16.45%), Delta (16.27%) and Ondo (15.63%), while Plateau (11.83%), Enugu (11.64%) and Ogun (10.99%) recorded the slowest rise in food inflation.

On month on month basis however, January 2019 food inflation was highest in Delta (2.73%), Kwara (2.50%) and Ondo (2.22%), while Anambra, Ekiti, Enugu, Imo, Nasarawa, Osun and Zamfara all recorded food price deflation or negative inflation (general decrease in the general price level of goods and services or a negative inflation rate) in January 2019.
