# Executive Summary

GDP of an economy, including at State level, is a measure in monetary terms of production of all goods and services during a period. Like the compilation at the national level, State accounts statistics are based on the guidelines and recommendations set out in the System of National Accounts 2008 (SNA 2008). The System of National Accounts provides an internationally-recognised framework and a comprehensive set of concepts, definitions and classifications for national accounting. Additionally, other relevant guidelines adopted are the International Standard Industrial Classification of all Economic Activities (ISIC) as well as the Central Product Classification (CPC) system.

States GDP compilation is important and useful for various purposes. First, it provides important information to support evidence-based policymaking. It also helps to identify key drivers of economic growth in each state and assess the performance of the state economy. Further, by revealing the structure of the state economy, the contribution of each state to the national output can be determined.

Methodologically, National/State accounts describe all flows within a period between the economic units constituting the national /state economy and their stocks. As such, the States accounts can follow national accounts as long as one can clearly define and delineate a state, and its resident units in terms of institutional units, production units, consumer units within it. In short, SGDP is the sum of gross value added of all resident producer units (industries) within the economic borders of the state during a given period of time including taxes, less subsidies, on products.

The institutional units / sectors in the States include: Non-financial corporations (Flour Mills, Nestle, etc), Financial corporations (Banks, Insurance etc), State governments, Non-profit institutions serving households (NPISH) in the state, and Households. In compilation of SGDP, residence is not based on birth or legal criteria. Instead, an institutional unit is classified as resident if it has a centre of economic interest in the economic territory of a state. Certain activities cut across state boundaries, and thus their economic contribution cannot be assigned to any one state eg telecommunication, Railway line, Transportation, Banking & Insurance. Other activities like Defence, paramilitary, border security force, high sea drilling etc are kept outside the purview of the state GDP. Key data sources included in SGDP compilation include secondary/administrative data, surveys, financial statements, audited State government accounts and VAT returns, among others.

In practice, the compilation of Gross Domestic Product (GDP) estimates for sub-national units of the Federation has been a phased exercise at the National Bureau of Statistics since 2013. In the first phase, estimates for eleven (11) States – Akwa Ibom, Bayelsa, Cross River, Delta, Kaduna, Kano, Ogun, Osun, Oyo, Rivers and Zamfara – were published in October 2018, providing estimates for states GDP for the five-year period covering 2013-2017. The completion of this initial phase of the SGDP compilation exercise revealed new insights regarding the structure of sub-national economies, while also demonstrating an improvement in statistical capacity for producing both national and state accounts.

This report provides estimates for the second phase of the States GDP compilation exercise covering an additional 10 states - Anambra, Bauchi, Ebonyi, Edo, Ekiti, Gombe, Jigawa, Kogi, Niger, Ondo - and the Federal Capital Territory (FCT). Thus, the results for all 22 states are provided and analysed in this report. This is expected to inform policymakers at all levels regarding absolute and relative magnitudes of economic activities in the reporting States, even as NBS continues efforts to complete the last phase of compilation for the remaining 15 States.

## Summary of findings

- i. In 2017, the nominal gross domestic product for the 22 states (for which data is currently available) stood at N63.8trillion, or 56% of Nigeria's nominal gross domestic product in that year.
- ii. By sector, the 22 states accounted for 57%, 77% and 48% of agriculture, industry and services GDP at the national level respectively. Among the 22 states, however, services sector accounted for 67%, while agriculture accounted for 22% and industry, 11%.
- iii. Among the 22 states, FCT had the highest gross domestic product at N10.6 trillion, or 17% of total states GDP. This was followed by Akwa-Ibom and Rivers States, each with 8% of total states GDP.
- iv. In the FCT, services accounted for 81% of GDP while industry and agriculture accounted for 18% and 10% respectively. In Akwa-Ibom, however, industry accounted for 65% while services and agriculture accounted for 19% and 16% respectively.
- v. Across the 22 states, the non-oil sector represented 98% of total states GDP while the oil sector accounted for only 2%.
- vi. The 6 states with the highest nominal GDP in 2017 – FCT, Akwa-Ibom, Rivers, Delta, Bayelsa, Anambra – accounted for about 50% of the total states GDP, or 27% of Nigeria's nominal GDP, in 2017.

# State GDP Methodology

The methodology adopted for the computation of State GDP by the output approach is similar to the one used to compute GDP on a national scale (although with slight differences) which relies on the System of National Accounts 2008 on an industry by industry basis covering the 46 economic activities covered during the national GDP estimation.

The basic information used in computing the Accounts includes the following

- i. Censuses of agriculture, mining, manufacturing, construction, wholesale and retail trade;
- ii. Annual reports of various economic sectors and non-profit organizations within the State;
- iii. Household consumer expenditure survey;
- iv. Estimates of output, wages and salaries from employment, government expenditure;
- v. Data from administrative records.

State Data is accordingly reconciled in line with SNA 2008 national accounts definitions and classifications.

For the purpose of computation, a Hybrid approach was adopted. This is a combination of a Top down approach and a Bottom up approach. The bottom up approach Builds up states' estimates from local enterprise data by Directly measuring local activities of enterprises and building up state accounts from this information, thereby linking the activities of enterprises within a state to the growth of that state. The top down approach on the other hand, involves the distribution of a national figure (national GDP) among States by means of a distribution ratio. This ratio can be determined by various formulas agreed by the States and the NBS. An example is household survey data on employment or value-added tax by State for a specific industry. The Hybrid approach used here therefore combines the two approaches above by using Bottom Up where clear disaggregated sector data exists for Industries and States and Top Down where data at a bottom up cannot easily be separated for eg road transport.

Data was collected from each state but where state level data cannot be collected or where an economic activity cannot be assigned to one state alone e.g. FG central administration (military and police expenditure), banking (wages versus total bank revenue), communications, federal roads, railways a distribution ratio will be used to distribute to states. It is important to stress that GDP uses the process of sampling to estimate economic activity. It is not a census of all economic activity business and industries in every state across the country. Rather a representative sample of a master frame which contains all the businesses and industries operating in the country is selected. The sample you select will mirror this structure of businesses to ensure every activity is covered and represents the true image of the whole. To properly capture the states, each state will have a different selected sample mirroring the structure of the state as described by the master sample for each state. To ensure the sample is truly representative of the current status of economic activity in the state we start with a listing to update/harmonise the frame and to ensure that all economic activities are fully captured.

# State GDP Methodology

## 1. AGRICULTURE

Under Section A, Division 01-03 of ISIC rev 4, Agriculture is divided into four main activities.

### 1.1 CROP PRODUCTION

Section A, Division 01 of ISIC Rev 4

Gross Output: Quantities produced multiplied by farm gate price, less losses (wastages).

Intermediate consumption: Seeds, fertilizer, pesticides, hire of farm implements and simple farm tools that are used up in one farming season.

### 1.2 LIVESTOCK PRODUCTION

Section A, Division 01 of ISIC Rev 4

Gross Output is calculated using the following Live animals and their produce + imports = animals slaughtered and their produce - animals which died of natural causes + exports + change in animal stock.

Intermediate Consumption: Value of animal feeds as input in the production of livestock and livestock products (such as broiler starter concentrate, breeder concentrate, ground cake, guinea corn etc.)

### 1.3 FORESTRY

Section A, Division 02 of ISIC Rev 4

Gross Output: Value and quantity of timbers of various types (firewood, charcoal, uncultivated materials gathered). Other forest products obtained using expenditure approach. Sawn-logs, and other wood products categories are obtained using the production method, whereby, the quantity of logs produced is multiplied by the price per cubic of log.

Intermediate consumption: Expenditure on seeds and sapling, fuel oils, lubricants, feed, hand tools and spare parts, payments for contract work and other services.

### 1.4 FISHING

Section A, Division 03 of ISIC Rev 4

Gross Output: Measured by multiplying quantity in kilogram by the average price to obtain the value of production.

Intermediate consumption: Intermediate consumption here is captured according to expenditure on fingerlings, nets, feeds and other operating expenses.

## 2. MINING AND QUARRYING

Section B, Division 05-09 of ISIC Rev 4.0

### 2.1 CRUDE PETROLEUM AND NATURAL GAS

Section B, Division 06 of ISIC Rev 4

Gross Output: Quantity of crude petroleum produced (barrels) and Natural gas in million cubic feet (mcf) multiplied by the average price in domestic currency (equivalent of the price in dollar during the account period).

Intermediate Consumption: Includes purchase of consultancy services, Transportation, Electricity Bills, Water bills, Cost of Fuel used, Minor Repairs and Maintenance, Medical expense to staff, License & Registration fees, Travelling allowance, Staff Uniform, Rents on machinery & buildings, Spare Parts etc.

### 2.2 COAL MINING

Section B, Division 05 of ISIC Rev 4

Gross Output: Quantity produced multiplied by the average price.

Intermediate Consumption: Cost of raw materials used; both imported and Local, purchase of consultancy services,

# State GDP Methodology

transportation, electricity bills, water bills, cost of fuel used, minor repairs and maintenance, medical expense to staff, royalty, travelling allowance, special clothing use at work, rents on machinery & buildings, Spare Parts etc.

## 2.3 METAL ORES

Section B, Division 07 of ISIC Rev 4

Gross Output: Quantity produced multiplied by the average price

Intermediate Consumption: Cost of raw materials used; both imported and Local, purchase of consultancy services, transportation, electricity bills, water bills, cost of fuel used, minor repairs and maintenance, medical expense to staff, royalty, travelling allowance, special clothing used at work, rents on machinery & buildings, Spare Parts etc.

## 2.4 QUARRYING AND OTHER MINING

Section B, Division 08 of ISIC Rev 4

Gross Output: Quantity produced multiplied by the average price

Intermediate Consumption: Cost of raw materials used; both imported and local, purchase of consultancy services, transportation, electricity bills, water bills, cost of fuel used, minor repairs and maintenance, medical expense to staff, royalty, travelling allowance, special clothing used at work, rents on machinery & buildings, Spare Parts etc.

## 3. MANUFACTURING

Section C, Division 10-33 of ISIC Rev 4.

Gross output = Revenue from sales of goods + Revenue from sales of goods bought for resale (trade margin) + Revenue from rendering services to other + Closing stock of finished goods - Opening stock of finished goods + Closing stock of work-in-progress - Opening stock of work-in-progress

Intermediate consumption = Purchases of raw materials and supplies + Purchases of goods bought for resale + Purchases of packaging materials + Fuels and lubricants + Electricity + Water and Sewerage + Repair and Maintenance + Freight charges and transport + Closing stock of raw materials and supplies - Opening stock of raw materials and supplies + Insurance premium + All other costs and expenses for goods and services

## 4. ELECTRICITY, GAS, STEAM AND AIR CONDITIONING SUPPLY

Section D, Division 35 of ISIC Rev 4.

Gross Output: The value of output is the amount of gas and electricity paid for. Hence, value added is the output less intermediate consumption.

Intermediate Consumption = other cost of sales + Indirect expenses

## 5. WATER SUPPLY, SEWERAGE, WASTE MANAGEMENT AND REMEDIATION

Section E, Division 36 of ISIC Rev. 4

Gross output = Water revenue + Sewage revenue + New connections

Intermediate Consumption = other cost of sales + Indirect expenses

## 6. TRADE

Section G, Divisions 45 to 47 of ISIC Rev. 4.

Gross Output: This is equal to the trade margin, i.e. the difference between the revenue of goods sold and the value of the goods purchased for resale.

Intermediate Consumption: Goods and services needed to run the trading establishment, such as packaging materials, electricity, office supplies, and rentals.

# State GDP Methodology

## 7. CONSTRUCTION

Section F, Division 41 to 43 of ISIC Rev 4.

Gross Output: Value of work done and other incomes.

Intermediate Consumption: This comprises cement, blocks, metals/iron bars, sand, stone, wood, gravel, other construction inputs, and cost of fuel used by generator, water bills and expenses on internet services/telephone/postage bills during the construction period.

## 8. ACCOMODATION AND FOOD SERVICES

Section I, Division 55 to 56 of ISIC Rev. 4.

Gross Output: Income generated from Accommodation, Catering, Restaurants, Beverage Service activities, Other income

Intermediate Consumption includes expenses incurred in running the businesses.

## 9. TRANSPORTATION AND STORAGE

This industry broadly categorized under ISIC Rev. 4, Section H, division 49-53. The sector is divided into 6 subeconomic activities.

### 9.1 ROAD TRANSPORT

Section H, Division 49 of ISIC Rev 4

Gross Output: The output of road transport is the revenue generated for the period under consideration.

Intermediate Consumption: Intermediate consumption consists of fuels and lubricants used electricity bills, water bills, office supplies, and rentals.

### 9.2 RAIL TRANSPORT AND PIPELINES

Section H, Division 49 of ISIC Rev 4

Gross Output: Receipts from passengers, goods traffic and subventions from Federal Government. The Petroleum Pipeline Product income is from the transportation of the petroleum products and crude oil to designated depots and refineries in Nigeria.

Intermediate Consumption: This consists of the summation of all expenses incurred in the production process such as fuels and lubricants used, electricity bills, water bills, office supplies, and rentals.

### 9.3 WATER TRANSPORT

Section H, Division 50 of ISIC Rev 4

Gross Output: Receipts from passengers and goods traffic.

Intermediate Consumption: Fuels and lubricants used electricity bills, water bills, office supplies, and rentals.

### 9.4 AIR TRANSPORT

Section H, Division 51 of ISIC Rev 4

Gross Output: Receipts from passengers and Cargoes (goods traffic).

Intermediate Consumption: Fuels and lubricants used, electricity bills, water bills, office supplies, and rentals, Spare parts, Consultancy, Audit fees.

### 9.5 TRANSPORT SERVICES

Section H, Division 52 of ISIC Rev 4

Gross Output: Receipts from services for storage and transportation activities.

Intermediate Consumption: Fuels and lubricants used, transportation cost, electricity bills, water bills, office supplies, and rentals.

# State GDP Methodology

## 9.6 POST AND COURIER SERVICES

Section H, Division 53 of ISIC Rev 4

Gross Output: Receipts from services rendered on number of mails and parcels handled.

Intermediate Consumption: Fuels and lubricants used, transportation cost, electricity bills, water bills, office supplies, and rentals.

## 10. INFORMATION AND COMMUNICATION

Categorized under ISIC Rev. 4, Section J, Division 58-63, the sector is divided into 4 economic activities:

### 10.1 TELECOMMUNICATION AND INFORMATION SERVICES

Section J, division 61 to 63 of ISIC Rev 4.

Gross Output: Revenue from telephone, telex, Facsimile, telegraph, and other income from satellite and internet services.

Intermediate consumption: Transit fees, operational expenditure, minor repairs and maintenance and other expenses.

### 10.2 PUBLISHING

Section J, Division 58 of ISIC Rev 4

Gross Output: Revenue from publishing services.

Intermediate consumption: This includes details of the cost structure including transportation fees, operational expenditure, minor repairs etc.

### 10.3 MOTION PICTURE AND SOUND RECORDING

Section J, Division 59 of ISIC Rev 4.

Gross Output: Revenue generated/total sales from the number of movies and sound recordings produced including revenue generated from TV rights, royalties and fees.

Intermediate consumption: Detail on the cost structure of operating firms including transportation fees, operational expenditure, minor repairs and maintenance, and other administrative expenses.

### 10.4 BROADCASTING

Section J, Division 60 of ISIC Rev 4

Gross Output: Public corporation data derived from Accountants General's reports, while private component relies on revenue generated from services rendered e.g. advertisement.

Intermediate consumption: Details of the cost structure of market participants which include transportation fees, operational expenditure, minor repairs and maintenance

## 11. ARTS ENTERTAINMENT AND RECREATION

Section R, division 90-93 of ISIC Rev 4.

Gross Output: Revenue generated was estimated in two categories: one as a market output and the second as non-market output (public establishments)

Intermediate consumption: Details of the cost structure were obtained from the financial reports of firms.

## 12. FINANCE AND INSURANCE SERVICES

Section k, Division 64-66 of ISIC Rev 4, Finance and Insurance Services is divided into two (2) sectors.

### 12.1 FINANCIAL INSTITUTIONS

Section K, Division 64 of ISIC Rev 4

# State GDP Methodology

Gross Output: Gross output for financial services are measured by Financial Services Indirectly Measured (FISIM).

Gross Output = Implicit service charges (FISIM) + Explicit service charges.

Intermediate Consumption: Details of the cost structure are extracted from the data supplied such as; Currency Issue Expenses, Administrative Expenses, Repairs and Maintenance, Consultancy Fees, Bank Charges, Audit fees, Directors related expenses

## 12.2. INSURANCE

Section K, Division 65 of ISIC Rev 4

Gross Output:

Output of life insurance: Output = Actual premiums earned + Plus Premium supplements - Benefits due - Minus Increases (plus decreases) in life insurance technical reserves

Output of non-life (General) insurance: Output = Actual premiums earned + Premium supplements - Adjusted claims incurred

Output of funded pension fund: Output = Actual pension contributions + Supplementary contributions - Benefits due + Plus Change in the actuarial reserves + Property income

Intermediate consumption: consists of the cost structure (operating expenses) from the annual reports of institutions.

## 13. REAL ESTATE

Section L, Division 68 of ISIC Rev 4

Gross Output: Sum of fees and commissions receivable for the services rendered.

Intermediate consumption: Details of the cost structure including transportation fees, operational expenditure, minor repairs and maintenance etc.

## 14. PROFESSIONAL SCIENTIFIC AND TECHNICAL SERVICES

Section M, Division 69-75 of ISIC Rev 4.

Gross Output: Sum of revenues receivable for the services rendered.
