Overview

ABSTRACT

The Lagos Household Survey 2006, also referred to as service delivery assesment survey, was the first Baseline Survey under the World Bank assisted Lagos Metropolitan Development and Governance Projects (LMDGP) which started a year earlier in 2005. The household survey was a key component of the Baseline Projects which also consisted of five major economic surveys.

The survey's objectives was to provide reliable data on a timely basis for monitoring changes in the welfare status by local government areas in the State, provides estimates at local government level , assess the social and economic situation in the State and provides relevant data required to monitor growth and development in the state ,as well as building the socio-economic database.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Individuals, households, and communities.

Scope

NOTES

The scope of the survey describes the modules in the questionnaire and include:

Household characteristics and household listing

Type of Housing

Land and Tenure

Access to infrastructure-Storm water drainage

Sanitation

Water supply

Solid waste removal

Energy and Electricity

Telephone

Transportation and local roads

Education

Health

Emergency and Policing services

Community preference

Household income and expenditure.

Sampling

Sampling Procedure

A sample of 6000 respondents were selected using a combination of probability proportional to size and equal size sample i.e (mix Design) in appreciation of the spread and peculiarities of the state inhabitants and landscapes.

The entire twenty (20) Local government Areas (LGAs) in the state was divided into two Zones: (North comprising 9 LGAs and South having 11 LGAs) with sample size of 3052 respondents and 2948 respondents respectively.

The first level of stratification comprised the Local Government Areas, with each of them divided into Political Wards (between 10 and 25).

These wards formed the second level of stratification.

Deviations from Sample Design

No deviation from sample design

Response Rate

At both levels of stratification ie Local government Areas (LGAs) and Political Wards, the Response Rates were 100 percent respectively.

Weighting

No weight computed for this version

Questionnaires

Overview

The Questionnaire was made up of fifteen (15) modules namely,

- Section 1: Household characteristics and household listing
- Section 2: Types of Housing
- Section 3: Land and Tenure
- Section 4: Access to Infrastructure - Stormy Water Drainage
- Section 5: Access to Infrastructure - Sanitation
- Section 6: Access to Infrastructure - Water
- Section 7: Access to Infrastructure - Solid Waste Removal
- Section 8: Access to Infrastructure - Energy and Electricity
- Section 9: Access to Infrastructure - Telephone
- Section 10: Transportation & Local Roads
- Section 11: Education
- Section 12: Health
- Section 13: Emergency and policing Services
- Section 14: Community Preferences
- Section 15: Household income and expenditure.

The questionnaire was published in English language and was based on the generic one prepared by the world bank but modified to suit the Nigeria/ Lagos state environment. The head of the household was the key respondent in the households , individual members and community level information are included in the instrument.
The questionnaires is provided as external resources.

Data Collection

Data Collection Dates

Start	End	Cycle
2005-06-06	2005-09-02	60 days

Data Collection Mode

Face-to-face [f2f]

DATA COLLECTION NOTES

The Field training on the use of palm top PC loaded questionnaire and pre-test for the survey took place from June 12, 2005 - June 17, 2005 and included 10 supervisors and 50 interviewers for the main survey. Also in attendance were 10 staff from office of statistics. The World Bank officials on IT Messrs. Pim Kimenta and Virgine Boucard were on ground to take the fieldworkers through.

Each consulting firm provided 5 supervisors and 25 interviewers and each interviewing team comprised of 5 interviewers (male of female) together with a field editor who also doubled as the supervisor. The supervisors were specially trained tn the use of Global Positioning System (GPS) to capture Data collection took place over a period of about 4 weeks from July 6, 2005 until September 2nd , 2005.

Interviewing took place everyday throughout the fieldwork period, although interviewing teams were permitted to take one day off per week. Interviews averaged 50 minutes for the household questionnaire and were conducted primarily in English and translated to pidgin English as well as Yoruba native language by interviewer.

Data Collectors

SUPERVISION

Senior management teams of the two consulting outfits provided overall fieldwork coordination and supervision. The Office of Statistics too was on the field to stricktly monitor the field excercise for compliance and logistic assistance. GPS capture to determine the GIS information of the respondents location were also carried out by the supervisors in addition to field editing of the survey instrument on palmtop for effective performance. The directors In the Office office of Statistics also visited the fieldm on periodic basis during the excercise.

The supervisor is also responsible for the uploading of the completed questionnaires into the designated laptop

Each interviewer covered average of 3 households per day, thus each team could complete 75 households (i.e. one zone) per day. An interviewer therefore covered a maximum of 18 households per week, assuming 6 effective working days per week. Hence the sample size of 6000 households were covered within 4 weeks.

Data Processing

Data Editing

The Perseus Software Solution 6 Software which was used to upload survey instruments into the palmtop had in built capacity to download the completed questionnaire from the palmtop into the designated laptop for the survey through microsoft active synching.

No data entry involved. however the downloaded dataset are then edited for cleaning and quality checks.

The data set was later transfered/exported to SPSS for more robust analysis.

Other Processing

Survey methodology used a technique of hand-held pocket computer where interviewers entered responses of the heads of households while on the field. Before the commencement of the fieldwork, the pockets PCs were loaded with the copy of the final questionnaire using the Perseus Survey Solutions 6 software which was used to design the questionnaire.

The software was used to automate the entire process of data capture, evaluation, validating and storage of the data. It permitted fast processing of data and timely release of results. Data were synchronizing from Pocket PC to laptop every day of the survey week. As part of data quality control, editing was carried out to ensure that the household name, address and Questionnaire number was correct. Also automatic correction was done for some selected fields by the Perseus Survey Solutions application based on some validation rules within the system.

The dataset were later transfered /exported to SPSS format in order to allow for disaggregated analysis at Local government and ward level. Frequency tables and some list of crosstabulation were generated

The Frequency tables and some list of crosstabulations were generated

Data Appraisal

Estimates of Sampling Error

Not calculated

Other forms of Data Appraisal

Some indicators such as average Household size, room density, access to portable water.

Literal question

Number of children [general question: what is the total number of children (under the age of 15) living in this household]

How many adults (over the age of 15) (Q1)

File: HH DATASET 05

Overview

Type: Continuous	Valid cases: 6001
Format: numeric	Invalid: 0
Width: 8	Minimum: 1
Decimals: 0	Maximum: 10
Range: 1-10	Mean: 2.6
Invalid: 99999999, -9	Standard deviation: 1.3

Literal question

How many adults (over the age of 15) have lived here for more than 9 months?

How many children (under the age of 15) (Q2)

File: HH DATASET 05

Overview

Type: Continuous	Valid cases: 6001
Format: numeric	Invalid: 0
Width: 8	Minimum: 1
Decimals: 0	Maximum: 11
Range: 1-11	Mean: 2.4
Invalid: 99999999, -9	Standard deviation: 1.3

Literal question

How many children (under the age of 15) have lived here for more than 9 months?

Gender (Q3a)

File: HH DATASET 05

Overview

Type: Discrete	Valid cases: 6001
Format: numeric	Invalid: 0
Width: 8	Minimum: 1
Decimals: 0	Maximum: 2
Range: 1-2	
Invalid: 99999999, -9	

Literal question

What is your gender?

Age group (Q3b)

File: HH DATASET 05

Age group (Q3b)

File: HH DATASET 05

Overview

Type: Discrete	Valid cases: 6001
Format: numeric	Invalid: 0
Width: 8	Minimum: 1
Decimals: 0	Maximum: 2
Range: 1-2	
Invalid: 99999999, -9	

Literal question

What is your age?

Relation (Q3c)

File: HH DATASET 05

Overview

Type: Discrete	Valid cases: 6001
Format: numeric	Invalid: 0
Width: 8	Minimum: 1
Decimals: 0	Maximum: 14
Range: 1-14	
Invalid: 99999999, -9	

Literal question

What is your relation to head of household?

Literacy level (Q3d)

File: HH DATASET 05

Overview

Type: Discrete	Valid cases: 6001
Format: numeric	Invalid: 0
Width: 8	Minimum: 1
Decimals: 0	Maximum: 3
Range: 1-3	
Invalid: 99999999, -9	

Literal question

What is your literacy level?

Highest level of education (Q3e)

File: HH DATASET 05

Overview

Type: Discrete	Valid cases: 6001
Format: numeric	Invalid: 0
Width: 8	Minimum: 1
Decimals: 0	Maximum: 9
Range: 1-9	
Invalid: 99999999, -9	

Literal question

What is your highest education level?

Other, please specify (F18)

File: HH DATASET 05

Overview

Type: Discrete

Format: character

Width: 255

Valid cases: 6001

Invalid: 0

Literal question

Other, please specify [general question: what is your highest education level?]

Main activity (Q3f)

File: HH DATASET 05

Overview

Type: Discrete

Format: numeric

Width: 8

Decimals: 0
