Overview

ABSTRACT

The objective of the Nigeria NLPS Phase 2 is to monitor in real-time how the Nigerian households are coping with national and global crises and their effects on the welfare and livelihoods of the households. The households in the Phase 2 are drawn from the sample of households interviewed in GHS-Panel 2018/19 including those interviewed during the Phase 1. This survey has become a flexible tool that contributes to filling critical gaps in information that could be used by the Nigerian government and stakeholders to help design policies to mitigate the negative impacts of the COVID-19 pandemic, the oil prices crises, inflation and global value chain crises, among others. The Nigeria NLPS Phase 2 is designed to accommodate the evolving nature of the crises, including revision of the questionnaire on a bi-monthly basis.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

- Households

- Individuals

Scope

NOTES

The Nigeria National Longitudinal Phone Survey 2021-2022 covered the following topics:

- Household Roster (Rounds 1, 2, 3, 4, 5)
- Access to Health Services (Rounds 1, 3, 4, 5)
- Employment (respondent) (Rounds 1, 2, 3, 4, 5)
- Employment (selected household members) (Round 3)
- Non-Farm Enterprise (Round 1)
- COVID Vaccination (Rounds 1, 3, 5)
- Migration (Round 2)
- Household Migrants Roster (Round 2)
- Job History (Round 3)

- Credit (Round 4)
- Economic Sentiments (Rounds 4, 5)
- Petrol (Round 4)
- Farmer Screening (Round 5)

Sampling

Sampling Procedure

BASELINE (ROUND 1): Wave 4 of the GHS-Panel conducted in 2018/19 served as the frame for the Nigeria NLPS surveys. The GHS-Panel sample includes 4,976 households that were interviewed in the post-harvest visit of the fourth wave in January/February 2019. This sample of households is representative nationally as well as across the 6 geopolitical Zones that divide up the country. In every visit of the GHS-Panel, phone numbers are collected from interviewed households for up to 4 household members and 2 reference persons who are in close contact with the household in order to assist in locating and interviewing households who may have moved in subsequent waves of the survey. This comprehensive set of phone numbers as well as the already well-established relationship between NBS and the GHS-Panel households made this an ideal frame from which to conduct the NLPS in Nigeria.

Among the 4,976 households interviewed in the post-harvest visit of the GHS-Panel in 2019, 4,934 (99.2%) provided at least one phone number. Around 90 percent of these households (4,440) provided a phone number for at least one household member while the remaining 10 percent only provided a phone number for a reference person. For the second phase of the NLPS, all 4,440 GHS-Panel households with household member contact details were included in the sample to be contacted. This included the sample of households from the first phase of the NLPS who had household member contact details (2,701 of 3,000). Based on the response rate in the first phase of the NLPS of 65 percent, this was expected to yield an interviewed sample of nearly 2,900 households that is both nationally representative as well as representative of urban and rural areas of the country.

ROUND 2: Interviewers attempted to contact and interview all 2,922 households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2. The second round of the NLPS Phase 2 also included individual-level data collection on the migration history of household members. For the migration module, information on adult (15 years or older) members of the household was targeted, including respondents that fall into this age range. However, information was not captured for all adult members. In order to limit the burden for respondents and interviewers in cases where the number of adult members is large, a maximum of 6 household members were selected (in addition to the main respondent) to capture information on migration. Therefore, for households with less than 6 adult members, all eligible members were included. However, 93 percent of interviewed households had 6 or less adult members and only 7 percent had more than six. For the 7 percent with more than 6 adult members, 6 members were randomly selected from among the pool of eligible members. The selection was stratified by sex with an equal split of 3 male and 3 females was targeted, depending on the pool of eligible males and females. However, the application of selection as relatively rare.

ROUND 3: Interviewers attempted to contact and interview all 2,811 households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2, excluding 41 households that refused in Round 2. The third round of the NLPS Phase 2 also included individual-level data collection on employment and job history of household members. For the employment and job history modules, information on adult (15 years or older) members of the household was targeted, including respondents that fall into this age range. However, information was not captured for all adult members. In order to limit the burden for respondents and interviewers in cases where the number of adult members is large, a maximum of 4 household members were selected (in addition to the main respondent) to capture information on employment and job history. Therefore, for households with less than 4 adult members, all eligible members were included.

However, 90 percent of interviewed households had 4 or less adult members and only 10 percent had more than four. For the 10 percent with more than 4 adult members, 4 members were randomly selected from among the pool of eligible members. The selection was stratified by sex with an equal split of 2 male and 2 females was targeted, depending on the pool of eligible males and females. The selection of eligible household members in Round 3 was conditional to the selection conducted in Round 2 for the migration module. In that round, up to 6 household members were selected (15 years or older) to answer the migration module. However, the application of selection as relatively rare.

ROUND 4: Interviewers attempted to contact and interview all 2,852 households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2, excluding 70 households that refused in previous rounds of the survey.

ROUND 5: Interviewers attempted to contact and interview 2,824 households consisting of households that were successfully interviewed in the baseline (round 1) of the NLPS Phase 2 excluding 98 households that refused in previous rounds of the survey.

Response Rate

BASELINE (ROUND 1): All 4,440 households were contacted in the first round of this second phase of the NLPS. 71 percent of sampled households were successfully contacted. Of those contacted, 93 percent or 2,922 households were fully interviewed. These 2,922 households constitute the final successful sample and will be contacted in subsequent rounds of the survey. Among those household that were contacted, only 121 refused to be interviewed (about 4% of successfully contacted households). Among the sample of households who were not successfully contacted, the predominant reason for noncontact was that the phone was switched off at every attempt (18% of all households). Wrong numbers and non-existent numbers were also present but less common affecting only 4.8 and 2.5 percent of sampled households while for 2.6 percent of households the phone was ringing (and thus an active line and phone) but no one was answering.

ROUND 2: 2,797 households (95.7% of the 2,922 attempted) were contacted and 2,750 (94.1%) were successfully interviewed in the second round. Of those contacted, 36 households refused outright to be interviewed and 10 were partially interviewed. For the individual-level data collection, of 7,653 adult members of the household in round 2 (excluding the main respondent), information was collected on 7,058 or about 92.2 percent of eligible individuals. In addition, 2,750 main respondents were interviewed bringing the final sample of adult members with migration information to 9,808. Although interviewers made attempts to collect migration information directly from each individual selected, it proved exceedingly difficult to do so. As a result, only 34.6% of individual responses were obtained from the actual individual in question with the remaining 65.4% being collected via proxy (typically provided by the main respondent).

ROUND 3: 2,694 households (93.5% of the 2,881 attempted) were contacted and 2,647 (91.9%) were successfully interviewed in the third round. Of those contacted, 21 households refused outright to be interviewed and 22 were partially interviewed. Of the 2,647 successfully interviewed households, 2,575 were households that have been successfully interviewed in all three rounds of the phase 2 survey so far. The third round of the NLPS Phase 2 also included individual-level data collection on employment and job history of household members. For the individual-level data collection, of 7,887 adult members of the household in round 3 (excluding the main respondent), information was collected on 5,942 or about 75.3 percent of eligible individuals. In addition, 2,665 main respondents were interviewed bringing the final sample of adult members with employment information to 8,597.

ROUND 4: 2,646 households (92.8% of the 2,852 attempted) were contacted and 2,605 (91.3%) were successfully interviewed in the fourth round. Of those contacted, 25 households refused outright to be interviewed and 8 were partially interviewed. Of the 2,605 successfully interviewed households, 2,431 were households that have been successfully interviewed in all four rounds of the phase 2 survey so far.

ROUND 5: 2,610 households (92.4% of the 2,824 attempted) were contacted and 2,574 (91.1%) were successfully interviewed in the fifth round. Of those contacted, 25 households refused outright to be interviewed and 5 were partially interviewed. Of the 2,574 successfully interviewed households, 2,319 were households that have been successfully interviewed in all five rounds of the phase 2 survey so far. These are the households that form a complete panel across the five rounds.

Weighting

BASELINE (ROUND 1): In order to produce national estimates from the successfully interviewed sample, weights must be applied to the information provided by sampled households. Weights for the GHS-Panel serve as the basis for the Nigeria NLPS surveys, but the weights must be adjusted to reflect the selection and interviewing process. The weights for the Nigeria NLPS were calculated in several stages.

1. Begin with the GHS-Panel full sample household weights.
2. Apply an adjustment factor for the selection into the frame (GHS-Panel households that have contact details for a household member). A ratio adjustment was applied at the Zone-level (the strata for the GHS-Panel) to preserve the sum of household weights within each Zone between the full GHS-Panel sample and the NLPS frame.
3. Apply an adjustment for selection into the NLPS sample. The adjustment is a simple expansion factor that is the inverse of the selection probability from the frame for each sampled unit.
4. Apply an adjustment factor for non-contact of sampled households. This was again performed with a ratio adjustment at the Zone-level.
5. Apply an adjustment factor for non-response of contacted households through a ratio adjustment at the Zone-level.
6. Calibrate the weights (following adjustments 2-5) according to the properties of the full weighted GHS-Panel sample. This calibration step adjusts the weights such that the estimates obtained from the final NLPS sample will match the weighted means of the full GHS-Panel sample for specified characteristics. The calibration was performed using only information obtained from the GHS-Panel interview and thus will only reflect changes in the sample composition and not changes over time. The calibration applied here aims to correct for selection bias that is introduced at any point between identification of the frame and the final successfully interviewed sample. Selection bias is of particular concern in phone surveys since some segment of the population does not have access to a phone and there are more difficult barriers to successfully reach and

interview households over the phone. The calibration was applied using the ReGenesees package in R. The characteristics included in the calibration were numerous, reflecting different dimensions of household socioeconomic status that were correlated with nonresponse. Characteristics include consumption expenditure, household size sex of household head, marital status of the household head, age of the household head, education of the household head, working status of the household head, asset ownership, access to electricity, improved water source, improved sanitation facilities, access to financial services, land ownership, agricultural activities, as well as demographic breakdown according to sex and 8 age groups (0-6, 7-14, 15-24, 25-34, 35-44, 45-54, 55-64, and 65 years and older). The weights were also applied to the total number of households in the population given by the GHS-Panel weights.

7. Trim the weights. Outlier weights were trimmed at the 1st and 99th percentiles using the ReGenesees package in R which adjusts the weights to given bounds while minimizing the deviation from the estimates obtained from the calibration in step 6.

In subsequent rounds of the survey, steps 4, 5, and 6 will be applied to the final baseline weights.

The baseline (round 1) weights are located in the household-level data file (p2r1_sect_a_2_5_6_9a_12.dta) under the variable name wt_p2round1.

ROUND 2: In Round 2, several different weights are provided: one at the household-level and three at the individual-level. The household weights are the same as was provided in previous round. For the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in Round 1 (steps 4, 5 and 6). The round 2 household weights can be found in the household-level data file (p2r2_sect_a_2_2a_2b_6_12) in the variable named wt_p2round2.

Given the focus on individual migration information in round 2 and the selection steps outlined above for the sample of adult members, an additional three individual-level weights were calculated and provided in the round 2 data. The individual weights for the migration module were calculated according to:

$$w_{ish} = w_h \times (n_{hs}/N_{hs})^{(-1)}$$

Where w_{ih} is the sampling weight for individual i who is sex s (male or female) in household h , w_h is the final household level weight (i.e., wt_p2round2), N_{hs} is the total number of eligible adult household members (15 years or older) of sex s in household h and n_{hs} is the equivalent number of selected eligible individuals in the household. The individual weights were then calibrated to correspond to the sex and age distribution of the total adult population according to the post-harvest visit of the GHS-Panel. The age groups considered in the calibration were 15-24, 25-34, 35-44, 45-54, 55-64, and 65 years or older, all further disaggregated by sex (male/female).

The basic individual weight described above is the cross section individual weight that considers all individuals that migration information was collected on. This weight is called wt_migr_p2r2 and can be found in the individual-level data file (p2r2_sect_2_2a). However, an additional two weights are provided for the panel of individuals interviewed in the GHS-Panel wave 4 and round 2 of the NLPS Phase II (i.e., excluding individuals added in any round of the NLPS). The first weight (wt_migr_p2r2_pp_panel) contains the weight for individuals interviewed in the post-planting visit of the GHS-Panel wave 4 and the second (wt_migr_p2r2_ph_panel) contains the weight for individuals interviewed in the post-harvest visit of the GHS-Panel wave 4.

ROUND 3: In Round 3, several different weights are provided: two at the household-level and three at the individual-level. The two household weights provided are cross section and panel weights. The cross section weights are applicable to the entire round 3 sample while the panel weights are only applicable to round 3 sample households that have been successfully interviewed in all three rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 3 household weights can be found in the household-level data file (p2r3_sect_a_2_5_6_9a_12.dta) with the cross section weights in the variable named wt_p2round3 and the panel weights in the variable named wt_p2round3_panel.

Given the focus on individual employment and job history information in round 3 and the selection steps outlined above for the sample of adult members, an additional three individual-level weights were calculated and provided in the round 3 data. The individual weights for the employment and job history modules were calculated according to:

$$w_{ish} = w_h \times (n_{hs}/N_{hs})^{(-1)}$$

Where w_{ih} is the sampling weight for individual i who is sex s (male or female) in household h , w_h is the final household level weight (i.e., wt_p2round3), N_{hs} is the total number of eligible adult household members (15 years or older) of sex s in household h and n_{hs} is the equivalent number of selected eligible individuals in the household. The individual weights were

then calibrated to correspond to the sex and age distribution of the total adult population according to the post-harvest visit of the GHS-Panel (The age groups considered in the calibration were 15-24, 25-34, 35-44, 45-54, 55-64, and 65 years or older, all further disaggregated by sex (male/female)).

The basic individual weight described above is the cross section individual weight that considers all individuals that migration information was collected on. This weight is called `wt_emp_p2r3` and can be found in the individual-level data file (`p2r3_sect_2_6b_6c.dta`). However, an additional two weights are provided for the panel of individuals interviewed in the GHS-Panel wave 4 and round 2 of the NLPS Phase II (i.e., excluding individuals added in any round of the NLPS). The first weight (`wt_emp_p2rr_pp_panel`) contains the weight for individuals interviewed in the post-planting visit of the GHS-Panel wave 4 and the second (`wt_emp_p2r3_ph_panel`) contains the weight for individuals interviewed in the post-harvest visit of the GHS-Panel wave 4.

ROUND 4: In Round 4, two different household weights are provided: cross section and panel weights. The cross section weights are applicable to the entire round 4 sample while the panel weights are only applicable to round 4 sample households that have been successfully interviewed in all four rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 4 household weights can be found in the household-level data file (`p2r4_sect_a_2_5_5g_6_11a_11b_12.dta`) with the cross section weights in the variable named `wt_p2round4` and the panel weights in the variable named `wt_p2round4_panel`.

ROUND 5: In Round 5, two different household weights are provided: cross section and panel weights. The cross section weights are applicable to the entire round 5 sample while the panel weights are only applicable to round 5 sample households that have been successfully interviewed in all five rounds of phase 2 of the survey so far. For both of the household weights, the baseline (round 1 of phase 2) weights were adjusted for noncontact and nonresponse as well as calibrated following the same procedures outlined in section 2.2 (steps 4, 5 and 6). The round 5 household weights can be found in the household-level data file (`p2r5_sect_a_2_5_6_9a_11b_13_12.dta`) with the cross section weights in the variable named `wt_p2round5` and the panel weights in the variable named `wt_p2round5_panel`.

Questionnaires

Overview

BASELINE (ROUND 1): One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; employment and non-farm enterprise; and COVID-19 vaccine.

ROUND 2: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; migration; employment; and household migrants.

ROUND 3: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; employment; job history; and COVID-19 vaccine.

ROUND 4: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; petrol; employment; credit; and economic sentiments. While the Household Questionnaire was administered to all the sample households, economic sentiments questions were asked to only half of the sample households (randomly selected).

ROUND 5: One questionnaire, the Household Questionnaire, was administered to all households in the sample. The Household Questionnaire provides information on demographics; access to health services; employment; COVID-19 vaccine; economic sentiments; and farmer screening. While the Household Questionnaire was administered to all the sample households, economic sentiments questions were administered to only half of the sample households (those that were not selected to answer these questions in Round 4).

Data Collection

2022-07-30	2022-08-16	Round 5

Data Collection Mode

Computer Assisted Telephone Interview [cati]

DATA COLLECTION NOTES

ORGANIZATION OF FIELDWORK: Data were collected by trained NBS interviewers who individually made phone calls either from a dedicated call center established in NBS headquarters or from their respective homes. Interviewers were allowed to make calls from home due to capacity constraints in the call center as well as social distancing measures undertaken in the office. While interviewers would occasionally meet in the office, most correspondence with the interviewers was made through WhatsApp, phone and emails.

GIFTS TO HOUSEHOLD: As a show of appreciation for the households' participation, all households that gave consent to be interviewed, were transferred 1000 Naira credit to their phones (even if their interviews are only partially completed). The transfers are made to successfully interviewed households in every round. Since some of the sampled households do not have personal phone numbers, they were interviewed via a reference person's phone. These reference persons were also credited 1000 Naira credit to their phones when the households are successfully interviewed via their phones.

PRE-LOADED INFORMATION: Basic information on every household was pre-loaded in the CATI assignments for each interviewer. The information was pre-loaded to (1) assist interviewers in calling and identifying the household and (2) ensure that each pre-loaded person is properly addressed and easily matched to the most recent interviews. Basic household information (location, household head name, phone number, etc.) was pre-loaded. The list of individuals from the previous interview and their basic characteristics were uploaded. This helped maintain the panel of individuals and ensured the status of each individual in the subsequent round of the survey.

RESPONDENTS: Each round of the Nigeria NLPS Phase 2 has ONE RESPONDENT per household. The respondent was the household head or a knowledgeable adult household member. The respondent must be a member of the household. Interviewers were instructed to make every effort to reach the same respondent in subsequent rounds of the survey, in order to maintain the consistency of the information collected. However, in cases where the previous respondent was not available, interviewers would identify another knowledgeable adult household member to interview.

DATA MONITORING AND EVALUATION: As an additional aid to ensuring good quality data, extensive monitoring was performed throughout the fieldwork for each round of the survey. Two monitoring exercises were implemented during data collection. First, Survey Solutions' audio recording functionality was activated for 25 percent of the sample. These interview recordings were audited by 3 trained monitors, though not all recorded interviewers were able to be reviewed due to personnel constraints. On a daily basis, the monitors will listen to these recordings and fill in a structured questionnaire with their observations on interviewer performance. The feedback from these audio audits are then filtered to the respective interviewers.

The second quality check implemented were call backs to contacted households. The call backs were conducted by trained interviewers who are not part of the main data collection interviewers. Each day, up to 36 households that were contacted by the interviewing team are called by these call back interviewers. The call back interviewers conduct a short interview with the household to confirm that the interviewer did indeed conduct the interview, that certain key elements were clearly stated to the respondent, that the interviewer conducted themselves in a professional manner, and other details on the interview process. Further, the call back team asked several time-invariant questions of the respondent to further confirm the interview was fully conducted and the interviewer captured the information correctly. Feedback from call backs were routed to the respective interviewers to improve on identified areas. Further, the call back interviewers also called households that were not successfully contacted by the main interviewer. In some cases, the call back interviewer was able to reach the household. In such cases, the case was sent back to the interviewer to conduct the interview.

As a result of these quality checks, some of the interviewers were dropped from participating in the survey. There were also

regular check-ins to address questions and issues the interviewers might have.

V830	s11aq8	Was the application for the loan approved?	discrete	numeric	
V831	s11aq9	What was the main reason why the application to the loan was refused?	discrete	numeric	
V832	s11aq9_os	Specify other reason	discrete	character	
V833	s11aq10	Approximately when is the final payment of the loan due?	discrete	numeric	
V834	s11aq11	How worried are you that your household will not be able to repay the loan?	discrete	numeric	
V835	s11aq12	In the last 12 months, have you or any member of your household missed a payment	discrete	numeric	
V836	s11aq13	What was the main reason why the household did not have enough money to repay	discrete	numeric	
V837	s11aq13_os	Specify other reason	discrete	character	
V838	s11aq14	Did your household need a loan in the last 12 months?	discrete	numeric	
V839	s11aq15	Main reason why your household did not attempt to borrow	discrete	numeric	
V840	s11aq15_os	Specify other reason	discrete	character	
V841	s11aq16	Do you or others in HH currently have outstanding loans that HH has to repay	discrete	numeric	
V842	s11aq17	From whom did you borrow money for the outstanding loan	discrete	numeric	
V843	s11aq17_os	Specify other source	discrete	character	
V844	s11aq18__1	What was the purpose for the loan?:BUY LAND	discrete	numeric	
V845	s11aq18__2	What was the purpose for the loan?:BUY LIVESTOCK	discrete	numeric	
V846	s11aq18__3	What was the purpose for the loan?:BUY FARM TOOLS/IMPLEMENTS	discrete	numeric	
V847	s11aq18__4	What was the purpose for the loan?:BUY FARM INPUTS (SEEDS, FERTILIZER)	discrete	numeric	
V848	s11aq18__5	What was the purpose for the loan?:PURCHASE OF INPUTS/ WORKING CAPITAL FOR NONFA	discrete	numeric	
V849	s11aq18__6	What was the purpose for the loan?:HOUSE CONSTRUCTION/PURCHASE/ REPAIRS/IMPROVEM	discrete	numeric	
V850	s11aq18__7	What was the purpose for the loan?:BUY FOOD STUFF	discrete	numeric	
V851	s11aq18__8	What was the purpose for the loan?:PAY FOR EDUCATION EXPENSES	discrete	numeric	
V852	s11aq18__9	What was the purpose for the loan?:PAY FOR HEALTH EXPENSES	discrete	numeric	
V853	s11aq18__10	What was the purpose for the loan?:PAY FOR CEREMONIES EXPENSES	discrete	numeric	
V854	s11aq18__11	What was the purpose for the loan?:BUY OTHER NON-FOOD CONSUMPTION GOODS/SERVICES	discrete	numeric	

ID	Name	Label	Type	Format	Question
V855	s11aq18__12	What was the purpose for the loan?:REPAY OTHER DEBTS	discrete	numeric	
V856	s11aq18__13	What was the purpose for the loan?:PAY HOUSE RENT	discrete	numeric	
V857	s11aq18__14	What was the purpose for the loan?:VEHICLE REPAIR, MAINTENANCE OR PURCHASE	discrete	numeric	
V858	s11aq18__15	What was the purpose for the loan?:HOLIDAYS	discrete	numeric	
V859	s11aq18__16	What was the purpose for the loan?:PAYMENT FOR RANSOM	discrete	numeric	
V860	s11aq18__96	What was the purpose for the loan?:OTHER (SPECIFY)	discrete	numeric	
V861	s11aq18_os	Specify other purpose	discrete	character	
V862	s11aq19__1	Which household member(s) received the loan (MEMBER 1)	discrete	numeric	
V863	s11aq19__2	Which household member(s) received the loan (MEMBER 2)	discrete	numeric	
V864	s11aq19__3	Which household member(s) received the loan (MEMBER 3)	discrete	numeric	
V865	s11aq20	Approximately when is the final payment of the loan due?	discrete	numeric	
V866	s11aq21	How worried are you that your household will not be able to repay the loan?	discrete	numeric	
V867	s11aq22	In the last 12 months, have you or any member of your household missed a payment	discrete	numeric	
V868	s11aq23	What was the main reason why the household did not have enough money to repay	discrete	numeric	
V869	s11aq23_os	Specify other reason	discrete	character	
V870	s11bq1	Would you say that you and your household are financially better off	discrete	numeric	
V871	s11bq2	Do you think that a year from now you and your household will be better off	discrete	numeric	
V872	s11bq3	How do you think the general economic situation in the country has changed	discrete	numeric	
V873	s11bq4	How do you expect the general economic situation in this country to change	discrete	numeric	
V874	s11bq5	Do you think prices in general have...	discrete	numeric	
V875	s11bq7	How do you expect that prices in general will change	discrete	numeric	
V876	s11bq8	Was the application for the loan approved?	discrete	numeric	
V877	s11bq9	How likely is it that extreme weather events will negatively affect you	discrete	numeric	
V878	s11bq10__1	Events you expect will negatively affect you:Drought conditions (no rain)	discrete	numeric	
V879	s11bq10__2	Events you expect will negatively affect you:Delayed rains	discrete	numeric	
V880	s11bq10__3	Events you expect will negatively affect you:Floods	discrete	numeric	
V881	s11bq10__4	Events you expect will negatively affect you:Very high/hot temperatures (extreme)	discrete	numeric	
V882	s11bq10__5	Events you expect will negatively affect you:Storms/Coastal storms	discrete	numeric	
V883	s11bq10__96	Events you expect will negatively affect you:Other (SPECIFY)	discrete	numeric	
V884	s11bq10_os	Specify other event	discrete	character	
V885	s12q3__0	What day of the week will be best to reach you?:ANY DAY	discrete	numeric	
V886	s12q3__1	What day of the week will be best to reach you?:MONDAY	discrete	numeric	
V887	s12q3__2	What day of the week will be best to reach you?:TUESDAY	discrete	numeric	
V888	s12q3__3	What day of the week will be best to reach you?:WEDNESDAY	discrete	numeric	
V889	s12q3__4	What day of the week will be best to reach you?:THURDAY	discrete	numeric	

ID	Name	Label	Type	Format	Question
V890	s12q3__5	What day of the week will be best to reach you?:FRIDAY	discrete	numeric	
V891	s12q3__6	What day of the week will be best to reach you?:SATURDAY	discrete	numeric	
V892	s12q3__7	What day of the week will be best to reach you?:SUNDAY	discrete	numeric	
V893	s12q4__0	What time of the day would be best to call you?:ANY TIME OF THE DAY	discrete	numeric	
V894	s12q4__1	What time of the day would be best to call you?:MORNING	discrete	numeric	
V895	s12q4__2	What time of the day would be best to call you?:AFTERNOON	discrete	numeric	
V896	s12q4__3	What time of the day would be best to call you?:EVENING	discrete	numeric	
V897	s12q5	WHAT IS THE RESULT OF THE INTERVIEW?	discrete	numeric	
V898	s12q9	WHO WAS THE MAIN RESPONDENT?	discrete	numeric	
V899	s12q10	IN WHICH LANGUAGE DID YOU MAINLY CONDUCT THE INTERVIEW?	discrete	numeric	
V900	s12q10_os	SPECIFY OTHER LANGUAGE	discrete	character	
V901	s12q11	WHICH PHONE NUMBER DID YOU REACH THE RESPONDENT ON?	discrete	numeric	
V902	s12q14	END TIME FOR THE INTERVIEW	discrete	character

In which STATE does your household currently live in? (s2aq0b)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 1-37

Valid cases: 0
 Invalid: 0

Was [NAME] born in Nigeria? (s2aq3)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Was [NAME] born in Nigeria? (s2aq3)

File: p2r2_sect_a_2_2a_2b_6_12

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 1-2

Valid cases: 0
 Invalid: 0

Where was name born? (s2aq4)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 1-96

Valid cases: 0
 Invalid: 0

Specify other country (s2aq4_os)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
 Format: character
 Width: 7

Valid cases: 0
 Invalid: 0

Has [NAME] lived in [CURRENT STATE] since birth? (s2aq5)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 1-2

Valid cases: 0
 Invalid: 0

How many years has [NAME] lived in [CURRENT STATE]? (s2aq6)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Continuous
 Format: numeric
 Width: 2
 Decimals: 0
 Range: 0-70

Valid cases: 0
 Invalid: 0

Was [NAME] living abroad (outside Nigeria) before relocating to [CURRENT STATE]? (s2aq7)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Was [NAME] living abroad (outside Nigeria) before relocating to [CURRENT STATE]? (s2aq7)

File: p2r2_sect_a_2_2a_2b_6_12

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 0
Invalid: 0

In which country was [NAME] living? (s2aq8)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-96

Valid cases: 0
Invalid: 0

Specify other country (s2aq8_os)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
Format: character
Width: 11

Valid cases: 0
Invalid: 0

Name of STATE [NAME] lived in before moving to [CURRENT STATE] (s2aq9)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-37

Valid cases: 0
Invalid: 0

What was the main reason for [NAME] to move to [CURRENT STATE]? (s2aq10)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
Format: numeric
Width: 2
Decimals: 0
Range: 1-96

Valid cases: 0
Invalid: 0

Specify other reason (s2aq10_os)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
 Format: character
 Width: 48

Valid cases: 0
 Invalid: 0

Did [NAME] have any other reasons to move to [CURRENT STATE]? (s2aq11)

File: p2r2_sect_a_2_2a_2b_6_12

Overview

Type: Discrete
 Format: numeric
 Width: 1
 Decimals: 0
 Range: 1-2

Valid cases: 0
 Invalid: 0

What were the other reasons?:PARENTS MOVED (s2aq12__1)

File: p2r2_sect_a_2_2a_2b_6_12
