Overview

ABSTRACT

The National Bureau of Statistics (NBS) has enhanced its methodology of collecting labour market data through the Nigeria Labour Force Survey (NLFS) in line with International Labour Organisation (ILO) guidelines. The data collection for the revised NLFS is based on a sample of 35,520 households nationwide of which 8,880 were selected quarterly. It is conducted continuously throughout the year, with national-level results produced quarterly and state-level results at the end of a full year.

About three-quarter of working-age Nigerians were employed - 73.6% in Q4 2022. This shows that most people were engaged in some type of jobs for at least one hour in a week, for pay or profit. About one-third (36.4% in Q4 2022) of employed persons worked less than 40 hours per week in this quarter. This was most common among women, individuals with lower levels of education, young people, and those living in rural areas. Underemployment rate which is a share of employed people working less than 40 hours per week and declaring themselves willing and available to work more was 13.7% in Q4 2022. The share of wage employment was 13.4% in Q4 2022. Most Nigerians operate their own businesses or engaged in farming activities with 73.1% in Q4 2022.

Furthermore, 10.7% in Q4 2022 were engaged helping (without pay or profit) in a household businesses. In Q4 2022, 2.6% were engaged as Apprentices/Interns. Unemployment stood at 5.3% in Q4 2022 and this aligns with the rates in other developing countries where work, even if only for a few hours and in low-productivity jobs, is essential to make ends meet, particularly in the absence of any social protection for the unemployed. 22.3% of the working age population were out of labour force in Q4 2022 while the rate of informal employment among the employed Nigerians was 93.5%.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Individual

Scope

NOTES

The Scope of the Nigeria Labour Force Survey includes:

SECTION A: IDENTIFICATION

SECTION B: DEMOGRAPHIC CHARACTERISTICS

SECTION C: EDUCATION (FOR THREE YEARS OR OLDER)

SECTION D1: EMPLOYED AT WORK (ATW)

SECTION D2: TEMPORARY ABSENCE (ABS)

SECTION D3: AGRICULTURAL WORK AND MARKET ORIENTATION (AGF)

SECTION E: CHARACTERISTICS OF MAIN AND SECONDARY JOB, WORKING TIME AND INCOME

SECTION F: UNEMPLOYMENT AND OUT OF LABOUR FORCE

Sampling

Sampling Procedure

The National frame of EAs demarcated for the forthcoming Housing and Population Census was used to select the study units. A household listing exercise was carried out on quarterly basis to update the sampling frame from which households were selected for interview. A two-stage cluster sampling design was adopted for this survey. The first was the selection of Enumeration Areas while, the second was the selection of households.

First Stage Selection Ninety Six (96) EAs was selected in each State in which 24 EAs was canvassed quarterly in each State. Nationally, a total of 3,552 EAs was covered in the 36 States of the Federation and FCT.

For the Second Stage Selection, 10 HHs were systematically selected per EA. In each State, 240 HHs were interviewed in every quarter. Nationally, a total of 35,520 HHs will be covered while 8,880 were covered quarterly. All eligible household members aged 15 years and above were interviewed.

Deviations from Sample Design

No Deviations

Response Rate

The household response rate is 98.9%.

Weighting

The weighting was computed, normalised and attached to the dataset.

Questionnaires

Overview

A structured questionnaire was used for NLFS. A household questionnaire was administered in each household, which collected various information on Identification, Demographic Characteristics, Education, Employed at work, Temporarily absence, Agricultural work and Market Orientation, Characteristics of main and secondary job, Unemployment and out of labour. Some of the questions were administered at household level while others were at individual level.

DATA COLLECTION NOTES

Two (2) teams were constituted in each state and FCT. Each team consists of two (2) persons making four (4) Enumerators per state .Also,One (1) Supervisor were engaged in each state. Each team covered 4 EAs every month translating to 12 EAs in each quarter.In each EA,Ten (10) HHs were interviewed and Fieldwork lasted for 22 days per month.

Data Collectors

SUPERVISION

The interview was conducted by teams of interviewers and each interviewing team comprised of a Supervisor.

The roles of the Supervisor includes:

- Contacted local authority officials in the areas assigned to a team to gain their cooperation.
- Located the clusters or EAs for the team and assigning work to enumerators.
- Checked the quality of the work of each enumerator through skim and spot checks.
- Maintained the morale of the enumerators so that they can work in a cheerful atmosphere.
- Observed some of the enumerators' interviews to ensure questions are properly and politely asked and interpreted correctly.
- Helped enumerators resolve problems encountered in the field, including in terms of locating households and with difficult respondents.
- Met with each enumerator on a daily basis to discuss performance and future assignments.
- Verified the completeness of all questions before leaving the locality.
- Wrote a comprehensive report of the data collected in their team.

Data Processing

Data Editing

Real - Time data editing took place at different stages throughout the processing which includes:

- 1) Data editing and cleaning
- 2) Structure checking and completeness
- 3) Secondary editing
- 4) Structural checking of data files

Other Processing

The questionnaire was digitized into CAPI using Survey Solutions. Real time online Checks were done by dedicated team of Data Editors who checked for any errors in the data downloaded from the server and communicated any corrections or clarifications to the enumerators.

Data was cleaned prior to its analysis and exported from Survey Solutions to SPSS format.

Data Appraisal

Estimates of Sampling Error

The margin of error of each quarter is 1% for national estimates.

Other forms of Data Appraisal

A series of data quality tables and graphs are available in the reports.

File Description

Variable List

NLFS_2022Q4_HOUSEHOLD IDENTIFICATION

Content	This file contains household identification data as well as administrative data as regards administering and managing the questionnaire.
