Overview

ABSTRACT

This report contains findings from the Nigeria Labour Force Survey (NLFS) for the second quarter of 2023 (Q2 2023). This is the third quarter of results since the National Bureau of Statistics (NBS) revised and improved its methodology for collecting labour market statistics in Nigeria; the new methodology is now aligned with internationally agreed standards and guidelines. Labour market statistics are among the most important economic indicators and this makes the regular conduct of NLFS crucial. The NLFS is designed to gather key labour market statistics to support government policies and programmes for more effective planning. The survey provides up-to-date information on the dynamics of the labour market in the country.

Moreover, reliable labour market data can provide valuable insights about the economy for businesses and investors and can help in the design of sound economic policies to address the challenge of creating productive jobs and eliminating poverty. This can ultimately enhance the overall stability of the economy. Labour is one of the most important factors of production and is a major determinant of the economic system globally. That is why it is imperative to know whether people are working or not, how long they work, and the nature of the jobs they are engaged in. The NLFS enables key labour market statistics and the employment situation to be monitored periodically in Nigeria. The indicators include the labour force participation rate, employment-to-population ratio, and unemployment rate, as well as time-related underemployment, self-employment, labour underutilisation, and several other key job characteristics. The NLFS aims to provide insight into the Nigerian economy, indicators for policy formulation and a base for international comparison.

The results presented here are based on the resolutions concerning statistics of work, employment, and underutilisation from the 19th International Conference of Labour Statisticians (ICLS 2013). The labour force participation rate among the working-age population remained high at 80.4% in Q2 2023. The employment-to-population ratio was 77.1% in Q2 2023. The combined rate of unemployment and time-related underemployment as a share of the labour force population (LU2) was 15.5% in Q2 2023. Most workers (around 88.0%) were in self-employment in Q2 2023. The proportion of workers in Wage Employment in Q2 2023 was 12%. The unemployment rate in Q2 2023 was 4.2%, this is an increase of 0.1% from the figure recorded in Q1 2023 (4.1%). The rate of unemployment among persons with post-secondary education was 8% in Q2 2023. The Unemployment rate among youth aged (15-24 years) in Q2 2023 was 7.2% having been at 6.9% in Q1 2023. The Unemployment rate in urban areas was 5.9% in Q2 2023, an increase from 5.4% in Q1 2023. Time-related underemployment in Q2 2023 was 11.8%. 4.8% of the working-age population were in subsistence agriculture. Informal employment rate in Q2 2023 was 92.7%. Percentage of youth Not in Employment, Education nor Training (NEET Rate) was 13.8%.

KIND OF DATA

Sample survey data [ssd]

UNITS OF ANALYSIS

Individual

Scope

NOTES

The Scope of the Nigeria Labour Force Survey includes:

SECTION A: IDENTIFICATION

SECTION B: DEMOGRAPHIC CHARACTERISTICS

SECTION C: EDUCATION (FOR THREE YEARS OR OLDER)

SECTION D1: EMPLOYED AT WORK (ATW)

SECTION D2: TEMPORARY ABSENCE (ABS)

SECTION D3: AGRICULTURAL WORK AND MARKET ORIENTATION (AGF)

SECTION E: CHARACTERISTICS OF MAIN AND SECONDARY JOB, WORKING TIME AND INCOME

SECTION F: UNEMPLOYMENT AND OUT OF LABOUR FORCE

Sampling

Sampling Procedure

The Nigeria Labour Force Survey adopts a continuous data collection approach where NBS' field teams are continuously collecting data, allowing for quarterly national-level estimates.

The target sample for the entire year is 35,520 households divided across 12 months, meaning the target sample for each quarter is 8,880 households. After small levels of non-response and replacement, the final sample for Q2 2023 is 8,836 households across the 36 states including the FCT.

Deviations from Sample Design

No Deviations

Response Rate

The household response rate is 100%.

Weighting

The weighting was computed, normalised and attached to the dataset.

Questionnaires

Overview

A structured questionnaire was used for NLFS. A household questionnaire was administered in each household, which collected various information on Identification, Demographic Characteristics, Education, Employed at work, Temporarily absence, Agricultural work and Market Orientation, Characteristics of main and secondary job, Unemployment and out of labour. Some of the questions were administered at household level while others were at individual level.

Data Collection

Data Collection Dates

Start	End	Cycle
2023-05-31	2023-08-28	12 Weeks

Data Collection Mode

Face-to-face [f2f]

DATA COLLECTION NOTES

Two (2) teams were constituted in each state and FCT. Each team consists of two (2) persons making four (4) Enumerators per state .Also,One (1) Supervisor were engaged in each state. Each team covered 4 EAs every month translating to 12 EAs in each quarter.In each EA,Ten (10) HHs were interviewed and Fieldwork lasted for 22 days per month.

The team composition makes the data collection easier to manage, combined with constant fieldwork monitoring and coordination by NBS headquarters staff. It also help to identify and fix any data issues in real time and improve fieldwork and data quality as the survey progresses.

Each team spends one week in each EA and interviews take place between Wednesdays to Sundays. This reduces the use of proxy response, as it gives enumerators time to interview the eligible respondents in person. Those respondents not available for interview weekdays may likely be available on weekends. Reducing the number of proxy response improves data quality.

Data Collectors

Name	Abbreviation	Affiliation
National Bureau of Statistics	NBS	Federal Government of Nigeria (FGN)

SUPERVISION

The interview was conducted by teams of interviewers and each interviewing team comprised of a Supervisor.

The roles of the Supervisor includes:

- Contacted local authority officials in the areas assigned to a team to gain their cooperation.
- Located the clusters or EAs for the team and assigning work to enumerators.
- Checked the quality of the work of each enumerator through skim and spot checks.
- Maintained the morale of the enumerators so that they can work in a cheerful atmosphere.
- Observed some of the enumerators' interviews to ensure questions are properly and politely asked and interpreted correctly.
- Helped enumerators resolve problems encountered in the field, including in terms of locating households and with difficult respondents.
- Met with each enumerator on a daily basis to discuss performance and future assignments.
- Verified the completeness of all questions before leaving the locality.
- Wrote a comprehensive report of the data collected in their team.

Data Processing

Data Editing

Real - Time data editing took place at different stages throughout the processing which includes:

- 1) Data editing and cleaning
- 2) Structure checking and completeness
- 3) Secondary editing
- 4) Structural checking of data files

Other Processing

The questionnaire was digitized into CAPI using Survey Solutions. Real time online Checks were done by dedicated team of Data Editors who checked for any errors in the data downloaded from the server and communicated any corrections or clarifications to the enumerators.

Data was cleaned prior to its analysis and exported from Survey Solutions to SPSS format.

Data Appraisal

Estimates of Sampling Error

The margin of error of each quarter is 1% for national estimates.

Other forms of Data Appraisal

A series of data quality tables and graphs are available in the reports.

File Description

Variable List

NLFS_2023Q2_HOUSEHOLD IDENTIFICATION

Content	This file contains household identification data as well as administrative data as regards administering and managing the questionnaire.
Cases	8836
