Overview

Type	Agricultural Census [ag/census]
Identification	NGA-NASCPILOT-CROP-2007-v1.0
Version	Production Date: 2009-10-20 Version 1.0 (October, 2009) Notes Version 1.0: Data used to generate the tables and the report (June, 2007) Further editing on the data set released for public use(October, 2009)
Series	Nigeria conducted the last round of the Agricultural Census in 1993/94. Since 1993/94 the Agricultural data situation in Nigeria has slid backward and can best be described as weak. There was lack of inter-censual surveys to update the census, hence the need to address the weak agricultural situation in the country. There is a strong need to collect current base-line data on the structure and character of agriculture in Nigeria and to disaggregate agricultural data to address planning on the various Governments reform agenda on agriculture, poverty and food security. The NASC will address the weakness in Agricultural Statistics production in Nigeria. National Agricultural Sample Census (NASC) will also cover the 36 States including the FCT Abuja and the 774 LGAs.

Abstract
The main objective of the Pilot Survey was to test the adequacy of the survey instruments, equipments and administration of questionnaires, data processing arrangement and report writing. The Pilot survey conducted in July 2007 covered the two NBS survey system-the National Integrated Survey of Households (NISH) and National Integrated Survey of Establishment (NISE). The survey instruments were designed to be applied using the two survey systems while the use of Geographic Positioning System (GPS) was introduced as additional new tool for implementing the project.

The programme for the World Census of Agriculture 2000 is the eighth in the series for promoting a global approach to agricultural census taking. The first and second programmes were sponsored by the International Institute for Agriculture (IITA) in 1930 and 1940. Subsequent ones up to 1990 were promoted by (FAO). Food and Agriculture Organization of the United Nations recommends that each country should conduct at least one agricultural census in each census programme decade and its programme for the World Census of Agriculture 2000 for instance corresponds to Agricultural Census to be undertaken during the decade 1996 to 2005. Many countries do not have sufficient resources for conducting an agricultural census. It therefore became an acceptable practice since 1960 to conduct agricultural census on sample basis for those countries lacking the resources required for a complete enumeration.

 In Nigeria's case, a combination of complete enumeration and sample enumeration is adopted whereby the rural (peasant) holdings are covered on sample basis while the modern holdings are covered on complete enumeration. The project named "National Agricultural Sample Census" derives from this practice. Nigeria through the National Agricultural Sample Census (NASC) participated in the 1970's, 1980's, 1990's programmes

of the World Census of Agriculture. Nigeria failed to conduct the Agricultural Census in 2003/2004 because of lack of funding.

The NBS regular annual agriculture surveys since 1996 had been epileptic and many years of backlog of data set are still unprocessed. The baseline agricultural data is yet to be updated while the annual regular surveys suffered set back. There is an urgent need by the Governments (Federal, State, LGA), sector agencies, FAO and other International Organizations to come together to undertake the agricultural census exercise which is long overdue. The conduct of 2006/2008 National Agricultural Sample Census Survey is now on course with the pilot exercise carried out in the third quarter of 2007.

The National Agricultural Sample Census (NASC) 2006/08 is imperative to the strengthening of the weak agricultural data in Nigeria. The project is phased into three sub-projects for ease of implementation; the Pilot Survey, Modern Agricultural Holding and the Main Census. It commenced in the third quarter of 2006 and to terminate in the first quarter of 2008. The pilot survey was implemented collaboratively by National Bureau of Statistics.

The Stakeholders workshop held at Kaduna on 21st-23rd May 2007 was one of the initial bench marks for the take off of the Pilot Survey. The Pilot Survey implementation started with the first level training (Training of Trainers) at the NBS Headquarters between 13th - 15th June 2007. The second level training for all levels of field personnels was implemented at Headquarters of the twelve (12) concerned states between 2nd - 6th July 2007. The field work of the Pilot Survey commenced on the 9th July and ended on the 13th of July 07.
 The CSpro and SPSS were the statistical packages used to develop the data entry programme. The results of the survey are presented in chapter three of this report.

The owner-like possession was the most common system nationwide with a figure of 2,083,503 (holding) followed by family land 962,233 (holding) while squatter was the least system used 40,473 (holding). Distribution of holding by type of land showed that three types of land-upland, lowland and irrigated were mostly used with irrigated land being the highest 5,825,531 holding followed by lowland 5,320,782 holding and upland 3,070,911 holdings with the highest holding within the age group of 25-44 years. In all states, 2,392,725 males were involved in crop farming while 540,070 females were also paticipating.
Out of the 11 major crops reported, cassava recorded the highest number of farms 2,649,098 farms, next was maize 2,199,352 and yam 2,042,440 farms while the least was cotton 46,287 farms. Other crops were Beans, Cocoyam, Groundnut, Guinea corn, melon, Millet and Rice.

Kind of Data	Census/enumeration data [cen]
Unit of Analysis	Household crop farmers

Scope & Coverage
Scope Survey was designed to collect data on private farm crop grown in the household. Holding identification Holding Characteristics Access to Land Access to Credit and Funds Used Production input utilization; quantity and cost Sources of inputs/equipment Area Harvested. Agric Machinery. Production. Farm Expenditure. Processing Facilities. Storage Facilities. Employment in Agric. Farm Expenditure. Sales. Consumption. Market Channels.

Topics	consumption/consumer behaviour [1.1], rural economics [1.6], agricultural, forestry and rural industry [2.1], business/industrial management and organisation [2.2], employment [3.1], working conditions [3.6], basic skills education [6.1], vocational education [6.7], environmental degradation/pollution and protection [9.1], natural landscapes [9.2], plant and animal distribution [9.4], land use and planning [10.2], TRANSPORT, TRAVEL AND MOBILITY [11], gender and gender roles [12.6], community, urban and rural life [13.1], information technology [16.2]
Geographic Coverage State	
Universe Crop Farming Household	

Producers & Sponsors	
Primary Investigator(s)	National Bureau of Statistics(NBS), Federal Government of Nigeria(FGN)

Other Acknowledgment(s)	Depertment of Agriculture , Technical support , Nigeria Univercity Farmers assocation , Technical support , Nigeria farmers

Sampling	- 4 -

Sampling Procedure
12 states were purposely selected in the country.
 2 states from each of the 6 geo-political zones.
 2 LGAs per selected state were studied.
 2 Rural EAs per LGA were covered and
 4 Crop farming Housing Units were systematically selected and canvassed .

Deviations from Sample Design
No deviation

Response Rate
The response rate at EA level was 100 percent while 98.44 was achieved at crop farming housing units level

Weighting
This survey is pilot so we did not attach weight to the data set.
Note that our tables on the report were weighted .

Data Collection

Data Collection Dates	5 Days: start 2007-07-09 5 Days: end 2007-07-14
Data Collection Mode	Face-to-face [f2f]

Data Collection Notes
Four Enumeration areas were canvassed in each state for data collection.

The period of data collection was for five days by four teams made of two enumerators and one supervisor per team. Eight enumerators and four supervisors will do the work in each state selected .Data to be canvassed are household data namely listing, holding questionnaires, (crop, livestock/poultry and fisheries).

The objective measurement of the farm using the Global Positioning System was also done. Also the use of our traditional survey FORMS FS1, FS2and YCE was also carried out. This was the National Integrated Survey of Household aspect of the survey.

A team made up of two enumerators and one supervisor was responsible for data collection. The duration of data collection was five days.

Questionnaires
The questionnaire for the Private Farmers (Holding) is a structured questionnaire based on household characteristics with some modifications and additions.
The questionnaire contains the following sections.
Holding identification
Holding Characteristics
Access to Land
Access to Credit and Funds Used
Production input utilization; quantity and cost
Sources of inputs/equipment
Area Harvested.
Agric Machinery.
Production.
Farm Expenditure.

Processing Facilities.
Storage Facilities.
Employment in Agric.
Farm Expenditure.
Sales.
Consumption.
Market Channels.
Livestock Farming.
Fish Farming.

Supervision

The headquarters staff and state officer accompanied one team per day to supervise both the interviewers and supervisors on daily basis. Apart from the daily supervision by the headquarters staff and state officer, they also skim checked all the completed questionnaires.
The zonal controllers also monitored the field work in their respective zones.

Two officers were trained in the state. The training was scheduled to last for five days. The Coordinators and Consultants also participated in the training.

After the training one officer was retained to carry out spot/skim check of records while the other officers returned to Headquarters. Those responsible to do this assignment were staff of NBS and FMA&WR .

The monitoring and quality check exercise was to last for five days also. Coordinators and Consultants fro the Headquarters participated in the monitoring and quality checks work

Data Processing & Appraisal

Data Editing

The data processing and analysis plan involved five main stages: training of data processing staff; manual editing and coding.

Development of data entry programme; data entry and editing and tabulation. Census and Surveys Processing System (CSPro) software were used for data entry, Statistical Package for Social Sciences (SPSS) and Census and Surveys Processing System (CSPro) for editing and a combination of SPSS, Statistical Analysis Software (SAS) and EXCEL for table generation.

 The subject-matter specialists and computer personnel from the NBS and CBN implemented the data processing work. Tabulation Plans were equally developed by these officers for their areas and topics covered in the three-survey system used for the exercise.
The data editing is in 2 phases namely manual editing before the data entry were done. This involved using editors at the various zones to manually edit and ensure consistency in the information on the questionnaire. The second editing is the computer editing, this is the cleaning of the already enterd data.

The completed questionnaires were collated and edited manually
(a) Office editing and coding were done by the editor using visual control of the questionnaire before data entry
(b) Cspro was used to design the data entry template provided as external resource
(c) Ten operator plus two suppervissor and two progammer were used
(d) Ten machines were used for data entry
(e) After data entry data entry supervisor runs fequency on each section to see that all the questionnaire were enterd

Other Processing

Data entry was done at the HQ since it was a pilot.
Data were processed in clusters, with each cluster being processed as a complete unit through each stage of data processing. Each cluster goes through the following steps:

1) Questionnaire reception
2) Office editing and coding
3) Data entry
4) Structure and completeness checking
5) Verification entry
6) Comparison of verification data
7) Back up of raw data
8) Secondary editing
9) Edited data back up
After all clusters are processed, all data is concatenated together and then the following steps are completed for all data files:
10) Export to SPSS in 4 files
11) Recoding of variables needed for analysis
12) Adding of sample weights
13) Structural checking of SPSS files
16) Production of analysis tabulations

Estimates of Sampling Error
No computation of sampling error

Other Forms of Data Appraisal
The Quality Control measures were carried out during the survey, essentially to ensure quality of data.
There were two levels of supervision involving the supervisors at the first level, NBS State Officers and Zonal Controllers at second level and finally the NBS Headquarters staff constituting the second level supervision.

Confidentiality
The confidentiality of the individual respondent is protected by law (Statistical Act 2007)
This is published in the Official Gazette of the Federal republic of Nigeria No. 60 vol. 94 of 11th June 2007. See section 26 para.2. Punitive measures for breeches of confidentiality are outlined in section 28 of the same Act.

Access Conditions

A comprehensive data access policy is been developed by NBS, however section 27 of the Statistical Act 2007outlines the data access obligation of data producers which includes the realease of properly anonymized micro data.

Variables Description

Dataset contains561 variable(s)

File Holding-Infromation

#1 State: State code	
Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	State Name Code
Frequency table not shown (37 Modalities)	

#2 Lga: Local govt. Area	
Information	[Type= continuous] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	LGA Name Code

#3 Sector: Sector urban or rural			
Information	[Type= discrete] [Format=numeric] [Missing=*]		
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]		
Literal question	Sector Name Code		
Value	Label	Cases	Percentage
1	Urban	5	2.6%
2	Rural	184	97.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#4 Ea: Enumeration area	
Information	[Type= continuous] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	E.A Name Code

#5 Ric: Replicate identification code	
Information	[Type= continuous] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	RIC Name Code

#6 Hu_no: Housing unit serial no	
Information	[Type= continuous] [Format=numeric] [Missing=*]

File Holding-Infromation (cont.)

#6 Hu_no: Housing unit serial no (cont.)

Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	HU serial No Name Code

#7 Hh_no: House hold serial no

Information	[Type= continuous] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	HH serial No Name Code

#8 Mshh_no: Master sample house hold no

Information	[Type= continuous] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	Master sample household No

#9 Nh_hh: No of holders in house hold

Information	[Type= continuous] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	No. of holders in H/H

#10 S_no: Serial no of this holding

Information	[Type= continuous] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	Serial No of this holding

#11 Sex: Sex of holder

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	Sex of holder

Value	Label	Cases	Percentage
1	Male	157	83.1%
2	Female	32	16.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

File Holding-Infromation (cont.)

#12 Age: Age of holder	
Information	[Type= continuous] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-] [Mean=49.254 /-] [StdDev=14.139 /-]
Literal question	Age of holder

#13 Educ: Highest level education attained	
Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	Highest level of education attained

Value	Label	Cases	Percentage
0	NEVER	74	39.2%
1	PRIMARY	70	37.0%
2	SECONDARY	25	13.2%
3	TERTIARY	20	10.6%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#14 Rel: Relationship to head of hh	
Information	[Type= discrete] [Format=numeric] [Range= 1-7] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	Relationship to the head of HH

Value	Label	Cases	Percentage
1	Head	185	97.9%
2	Spouse	4	2.1%
3	Child	0	0.0%
4	Relation	0	0.0%
5	Parents	0	0.0%
6	Maid/servants	0	0.0%
7	Others	0	0.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#15 Hh_size: Size of holder's house hold	
Information	[Type= continuous] [Format=numeric] [Range= 1-30] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-] [Mean=5.746 /-] [StdDev=3.396 /-]
Literal question	Size of holder's HH

File Holding-Infromation (cont.)

#16 No_farms: No of farms operated

Information	[Type= continuous] [Format=numeric] [Range= 1-9] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-] [Mean=2.788 /-] [StdDev=1.447 /-]
Literal question	No. of farms operated

#17 Agegrp: Age grouping in years

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Recoding and Derivation	The age gruoping in years.

Value	Label	Cases	Percentage
1	Less than 25	2	1.1%
2	25 - 44	75	39.7%
3	45 - 59	58	30.7%
4	60 and above	54	28.6%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#18 Id: Identification

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=0 /-] [Invalid=189 /-]
Recoding and Derivation	The identification computed.
Frequency table not shown (190 Modalities)	

File Holding-Membership

#1 State: State code

Information	[Type= discrete] [Format=numeric] [Range= 1-37] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	State Name Code
Frequency table not shown (37 Modalities)	

#2 Lga: Local govt. Area

Information	[Type= continuous] [Format=numeric] [Range= 1-44] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]

File Holding-Membership (cont.)

#2 Lga: Local govt. Area (cont.)

Literal question	LGA Name Code

#3 Sector: Sector urban or rural

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	Sector Name Code

Value	Label	Cases	Percentage
1	Urban	5	2.6%
2	Rural	184	97.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#4 Ea: Enumeration area

Information	[Type= continuous] [Format=numeric] [Range= 1-1090] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	E.A Name Code

#5 Ric: Replicate identification code

Information	[Type= continuous] [Format=numeric] [Range= 1-3790] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	RIC Name Code

#6 Hu_no: Housing unit serial no

Information	[Type= continuous] [Format=numeric] [Range= 1-200] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	HU serial No Name Code

#7 Hh_no: House hold serial no

Information	[Type= continuous] [Format=numeric] [Range= 1-200] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	HH serial No Name Code

#8 S1q1: Are you a member of any agric cooperative society?

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]

File Holding-Membership (cont.)

#8 S1q1: Are you a member of any agric cooperative society? (cont.)

Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	Are you a member of any Agric Cooperative Society?

Value	Label	Cases	Percentage
1	Yes	27	14.3%
2	No	162	85.7%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#9 S1q2: Is holding owned by holder

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	Is holding owned by holder

Value	Label	Cases	Percentage
1	Yes	183	96.8%
2	No	6	3.2%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#10 S1q2a: As an individual

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Pre-question	Is holding owned by holder
Literal question	As an individual

Value	Label	Cases	Percentage
1	Yes	175	92.6%
2	No	14	7.4%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#11 S1q2b: Jointly with another member of his household?

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Pre-question	Is holding owned by holder
Literal question	Jointly with another member of his household

Value	Label	Cases	Percentage
1	Yes	12	6.3%
2	No	177	93.7%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

File Holding-Membership (cont.)

#12 S1q2c: Jointly with members of other household?

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Pre-question	Is holding owned by holder
Literal question	Jointly with members of other households

Value	Label	Cases	Percentage
1	Yes	0	0.0%
2	No	189	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#13 S1q3: Legal form of ownership

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=189 /-] [Invalid=0 /-]
Literal question	Legal form of ownership, registered or not Registered

Value	Label	Cases	Percentage
1	Yes	0	0.0%
2	No	189	100.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#14 S1q4: If registered what is the cost of registration?

Information	[Type= discrete] [Format=numeric] [Range= 1-2] [Missing=*]
Statistics [NW/ W]	[Valid=0 /-] [Invalid=189 /-]
Pre-question	If registered,
Literal question	What is the cost of registration

Value	Label	Cases	Percentage
1	Yes	0	
2	No	0	
Sysmiss		189	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#15 S1q5: What is the other major economic activity of the holder?

Information	[Type= discrete] [Format=character] [Missing=*]
Statistics [NW/ W]	[Valid=53 /-] [Invalid=0 /-]
Literal question	What is the other major economic activity of the holder

Value	Label	Cases	Percentage

#34 Q30b: Lack of fund(money)

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	What problems do you encounter during your production process
Literal question	b. Lack of fund (money)

Value	Label	Cases	Percentage
1	Yes	163	86.7%
2	No	25	13.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#35 Q30c: Far distance

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	What problems do you encounter during your production process
Literal question	c. Far distance

Value	Label	Cases	Percentage
1	Yes	84	44.7%
2	No	104	55.3%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#36 Q30d: Lack of infrastructure/frequent outage of electricity

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	What problems do you encounter during your production process
Literal question	d. Lack of infrastructure/frequent outage of electricity

Value	Label	Cases	Percentage
1	Yes	106	56.4%
2	No	82	43.6%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

File Problem Suggestion way and It (cont.)

#37 Q30e: Ineffective and inadequate extention services

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	What problems do you encounter during your production process
Literal question	e. Ineffective and inadequate extension services

Value	Label	Cases	Percentage
1	Yes	98	52.1%
2	No	90	47.9%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#38 Q30f: Lack of encouragement from government

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	What problems do you encounter during your production process
Literal question	f. Lack of encouragement from government

Value	Label	Cases	Percentage
1	Yes	147	78.2%
2	No	41	21.8%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#39 Q30g: Others

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=184 /-] [Invalid=4 /-]
Pre-question	What problems do you encounter during your production process
Literal question	g. Others (please specify)

Value	Label	Cases	Percentage
1	Yes	10	5.4%
2	No	174	94.6%
Sysmiss		4	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#40 Q31a: Theft

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	What problems do you have during storage
Literal question	a. Theft

File Problem Suggestion way and It (cont.)

#40 Q31a: Theft (cont.)

Value	Label	Cases	Percentage	
1	Yes	56		29.8%
2	No	132		70.2%
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.				

#41 Q31b: Pests

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=187 /-] [Invalid=1 /-]
Pre-question	What problems do you have during storage
Literal question	b. pests

Value	Label	Cases	Percentage	
1	Yes	124		66.3%
2	No	63	33.7%	
Sysmiss		1		
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.				

#42 Q31c: Lack of modern storage facilities

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	What problems do you have during storage
Literal question	c. Lack of modern storage facilities

Value	Label	Cases	Percentage	
1	Yes	122		64.9%
2	No	66	35.1%	
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.				

#43 Q31d: Inadequate market

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=187 /-] [Invalid=1 /-]
Pre-question	What problems do you have during storage
Literal question	d. Inadequate market

Value	Label	Cases	Percentage	
1	Yes	76	40.6%	
2	No	111		59.4%
Sysmiss		1		
Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.				

File Problem Suggestion way and It (cont.)

#44 Q31e: Others

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=185 /-] [Invalid=3 /-]
Pre-question	What problems do you have during storage
Literal question	e. Others (please specify)

Value	Label	Cases	Percentage
1	Yes	5	2.7%
2	No	180	97.3%
Sysmiss		3	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#45 Q32a: Poor price

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	Do you encounter any Marketing problem
Literal question	a. Poor price

Value	Label	Cases	Percentage
1	Yes	156	83.0%
2	No	32	17.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#46 Q32b: Poor access road

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	Do you encounter any Marketing problem
Literal question	b. poor access road

Value	Label	Cases	Percentage
1	Yes	126	67.0%
2	No	62	33.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#47 Q32c: High cost of transport

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=177 /-] [Invalid=11 /-]
Pre-question	Do you encounter any Marketing problem
Literal question	c. high cost of transport

File Problem Suggestion way and It (cont.)

#47 Q32c: High cost of transport (cont.)

Value	Label	Cases	Percentage
1	Yes	131	74.0%
2	No	46	26.0%
Sysmiss		11	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#48 Q32d: Far distance to market

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	Do you encounter any Marketing problem
Literal question	d. far distances to market

Value	Label	Cases	Percentage
1	Yes	109	58.0%
2	No	79	42.0%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#49 Q32e: Others

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=184 /-] [Invalid=4 /-]
Pre-question	Do you encounter any Marketing problem
Literal question	e. Others (please specify)

Value	Label	Cases	Percentage
1	Yes	24	13.0%
2	No	160	87.0%
Sysmiss		4	

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

#50 Q33a: Improved credit facility

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]
Pre-question	Give any suggestion which you consider, might be helpful in improving crop farming activities in the Country?
Literal question	a. Improved credit facilities

Value	Label	Cases	Percentage
1	Yes	186	98.9%
2	No	2	1.1%

Warning: these figures indicate the number of cases found in the data file. They cannot be interpreted as summary statistics of the population of interest.

File Problem Suggestion way and It (cont.)

#51 Q33b: Improved storage facilities

Information	[Type= discrete] [Format=numeric] [Missing=*]
Statistics [NW/ W]	[Valid=188 /-] [Invalid=0 /-]

National Agricultural Sample Cencuse (Private Farmer)-NASC-Pilot Report-2007, NASC Crop Report, National Bureau of Statistics (NBS), October 2009, Nigeria [nga], English [eng], "DOCU-CROPNASC-2007\NASC CROP REPORT.pdf"

Description

The report of nasc pilot survey on crop production a Collaboration between National Bureau of Statistics/Federal Ministry of Agriculture and Water Resources

Abstract

The National Agricultural Sample Census (NASC) 2006/08 is imperative to the strengthening of the weak agricultural data in Nigeria. The project is phased into three sub-projects for ease of implementation; the Pilot Survey, Modern Agricultural Holding and the Main Census. It commenced in the third quarter of 2006 and to terminate in the first quarter of 2008. The pilot survey was implemented collaboratively by National Bureau of Statistics.
