Executive Summary	xxii-xxxii

### CHAPTER ONE

1.0	<b>SURVEY DESIGN</b>	1
1.1	<b>Introduction</b>	1
1.2	<b>Objectives of the Survey</b>	2
1.3	<b>Scope and Coverage</b>	2
	National Integrated Survey of Household	2
	National Integrated Survey of Establishment	2
	System of Administrative Statistics	2
1.4	<b>SURVEY INSTRUMENTS</b>	3
	National Integrated Survey of Household	3
	National Integrated Survey of Establishment	3
	System of Administrative Statistics	3
1.5	<b>SAMPLE DESIGN</b>	4
	NISH Sample Design	4
	NISE Sample Design	4
	SAS Sample Design	4
1.6	<b>TRAINING</b>	5
1.7	<b>DATA COLLECTION ARRANGEMENT</b>	5
1.8	<b>QUALITY CONTROL AND RETRIEVAL OF RECORDS</b>	5
1.9	<b>DATA PROCESSING/ANALYSIS PLAN</b>	6
1.10	<b>REPORT WRITING ARRANGEMENT</b>	6
1.11	<b>WORK PROGRAMME</b>	6

### CHAPTER TWO

2.0	<b>NATIONAL INTEGRATED SURVEY OF HOUSEHOLDS</b>	7
2.1	<b>General Household Survey:</b>	7
2.1.1	<b>Population Composition</b>	7
2.1.2	<b>Household Characteristics</b>	7
	Distribution of Population by Age Group and Gender	7
	Distribution of Household by Headship and Household Size	8
	Marital Status	9
2.1.3	<b>WATER AND SANITATION:</b>	9
	Safe and Unsafe Drinking Water	9
	Distribution of Household by Distance to Source of Water	11
	Distribution of Household by Type of Refuse Disposal	11
	Distribution of Household by Toilet Facilities	12
	Distribution of Household by Distance of Toilet Facilities to Dwelling	13
	Distribution of Household by Type of Housing Unit	14

	Distribution of Household by Source of Fuel	....	14
	Distribution of Household by Electricity Supply	....	14
	Distribution of Household by Tenure Pattern	....	14
2.1.4	<b>HOUSEHOLD INCOME AND EXPENDITURE</b>		15
	Distribution of Household Income	....	15
	Distribution of Household Expenditure	....	15
2.1.5	<b>EDUCATION</b>		
	Youth Literacy Rate	....	16
	Adult Literacy Rate	....	16
2.1.6	<b>EMPLOYMENT</b>	....	16
	Unemployment Rate	....	16
	Distribution of Employment Persons by Hours of Work	....	17
	Distribution of Employed Persons by Industry	....	17
	Distribution of Persons Engaged in Voluntary or Social work	....	17
2.1.7	<b>FEMALE CONTRACEPTIVE</b>		18
	Distribution of Pregnant Women by Clinic Registration and Anti-Tetanus Reception	....	18
	Distribution of Women by Family Planning Method	....	18
2.1.8	<b>HEALTH</b>		
	Birth in the last 12 months	....	18
	Birth Weight of Children	....	19
	Children Immunization	....	19
	Children Breastfeeding	....	19
	Death in the Last 12 Months	....	20
2.1.9	<b>HOUSING PROJECT</b>		20
	Building Project Embark upon	....	20
	Stage of Completion of Building	....	20
2.1.10	<b>INFORMATION AND COMMUNICATION TECHNOLOGY</b>		
	Distribution of ICT (Radio) by Household....	....	20
	Distribution of ICT (Television) by Household	....	21
	Distribution of ICT (Fixed Telephone) by Household	....	21
	Distribution of ICT (Mobile Telephone) by Household	....	21
	Distribution of ICT (Personal Computer) by Household	....	22
	Distribution of ICT (Internet Service) by Household	....	22
	Distribution of ICT (Radio) by Persons	....	23
	Distribution of ICT (Television) by Persons	....	23
	Distribution of ICT (Fixed Telephone) by Persons	....	23
	Distribution of ICT (Mobile Telephone) by Persons	....	24
	Distribution of ICT (Personal Computer) by Persons	....	24
	Distribution of ICT (Internet Service) by Persons	....	24
	Distribution of Television Viewers by Station of First Preference	....	25
	Distribution of Television viewers by most preferred station	....	25
	Distribution of ICT Equipments Owned	....	26
	Distribution of owners of ICT Equipments by number owned and state	....	26
	Distribution of persons who had Access to ICT Equipments by source	....	27
	Distribution of Daily Income Generated by ICT umbrella and Business centre of Access	....	27

2.2	<b>PRIVATE FARMERS</b>	....	....	27
2.2.1.1	Number of persons Engaged in Agriculture			27
2.2.2.2	Area and Production Major crops	....	....	....
2.2.2.3	Farm gate prices (Major Crops)	....	....	29
2.2.2.4	Distribution (absolute) of crop farmers by market channel and state 2006			29
2.2.2.5	Distribution (absolute) of crop farmers by problems encountered during savage and by state (2006)	....	....	29
2.2.2.6	Distribution (absolute) of crop farmers by problems encountered during production process and state 2006			30
2.2.2.7(a)	Distribution of crop farm by access to any ICT facility by state 2006			30
2.2.2.7(b)	Distribution of crop farmers by possession of any ICT facility by state, 2006			30
<b>CHAPTER THREE</b>				
<b>3.0 NATIONAL INTEGRATED SURVEY OF ESTABLISHMENTS</b>				
<b>3.1</b>	<b>Wholesale and Retail Trade</b>	....	....	79
	Number of Person Engaged	....	....	80
	Emolument of employees	....	....	80
	Cost of goods sold	....	....	80
	Value of Sales	....	....	80
	Gross Margin	....	....	80
	Cost of operations	....	....	80
	Total Working Capital	....	....	80
<b>3.2</b>	<b>Hotel and Restaurants</b>	....	....	81
	Employment	....	....	82
	Emolument	....	....	82
	Income from Accommodation: Nigerian Guests.	....	....	82
	Income from Accommodation: Non-Nigerian Guests	....	....	82
	Capacity Utilization	....	....	82
	Number of Lodger Nights	....	....	82
	Number of Lodger Rooms	....	....	82
	Number of Lodger Beds	....	....	82
	Number of Lodger Tourists	....	....	82
<b>3.3</b>	<b>Building and Construction</b>	....	....	83
	Number of Persons Engaged	....	....	84
	Emolument of Employees	....	....	84
	Value of Work Done	....	....	84
	Total Working Capital	....	....	84
<b>3.4</b>	<b>Manufacturing Industry</b>	....	....	85
	Employment	....	....	86
	Emolument of Employees	....	....	86
	Value of Sales	....	....	86
	Operating Cost	....	....	86
	Capital Expenditure	....	....	86
	Capacity Utilization	....	....	86

<b>3.5</b>	<b>Mining and Quarrying</b>	....	....	87
	Employment	....	....	88
	Operatives	....	....	88
	Emolument of Employees	....	....	88
	Mineral Production	....	....	88
	Cost of Production	....	....	88
<b>3.6</b>	<b>Private Professional Services</b>	....	....	89
	Employment	....	....	90
	Emolument of Employees	....	....	90
	Operating Expenses	....	....	90
	Total receipts	....	....	90
	Total Working Capital	....	....	90
<b>3.7</b>	<b>Organized Road Transport Operators</b>			
	Employment	....	....	91
	Emolument	....	....	92
	Gross Addition to Fixed Assets	....	....	92
	Operating Cost	....	....	92
	Total Receipts	....	....	92
	Total Fleet	....	....	92
<b>3.8</b>	<b>Balance of Payments</b>	....	....	93
	Total Receipts and Payments	....	....	93
<b>3.9</b>	<b>Corporate Non-Financial</b>		....	94
	Agriculture, Mining and Quarrying	....	....	95
	Building and Construction	....	....	95
	Manufacturing and Processing	....	....	95
	Trading and Business Services	....	....	95
	Transport and Communication	....	....	95
<b>3.10</b>	<b>Modern Agricultural Holdings</b>	....	....	96
	Area and Production of Crops	....	....	96
	Number of Livestock by Type and Sex	....	....	97
<b>3.11</b>	<b>Information and Communication Technology (ICT)</b>		....	98
	Manufacturing Sector	....	....	98
	Building and Construction	....	....	98
	Organised Road Transport Operations	....	....	98
	Private Professional Services	....	....	98
	Wholesale and Retail Trade	....	....	98
	<b>CHAPTER FOUR</b>	....	....	99
<b>4.0</b>	<b>SYSTEM OF ADMINISTRATIVE STATISTICS</b>		....	99
<b>4.1</b>	<b>Water Board Statistics</b>	....	....	99
	Total Volume of Available Water by Use	....	....	99
	Tariffs and State Government Allocations to Water Board	....	....	100
<b>4.2</b>	<b>Water Resources</b>	....	....	100
	Local Government	....	....	100
	Tax Revenue	....	....	100
	Statutory Allocations	....	....	100

	Recurrent Expenditure	....	....	100
	Capital Expenditure	....	....	101
<b>4.3</b>	<b>Fiscal Operation of Sub-National Governments</b>		....	101
<b>A.</b>	<b>State Governments</b>		....	101
	Internally-Generated Revenue		....	101
	Statutory Allocations		....	101
	Capital Expenditure		....	102
	Recurrent Expenditure		....	102
	Summary of Recurrent Expenditure		....	102
<b>4.4</b>	<b>Cooperative Societies</b>		....	103
	Types and Numbers of Agricultural Cooperatives		....	103
	Internally Generated Fund			
<b>4.5</b>	<b>Housing Statistics</b>		....	103
	Housing Statistics			
	Land Allocation by purpose sex		....	103
<b>4.6</b>	<b>Health Statistics</b>		....	104
4.6.1	Number of Hospitals by Type		....	104
4.6.2	Beds by Hospital Type		....	105
4.6.3	Patient by Hospital Type		....	105
4.6.4	Health Personnel by sex		....	105
<b>4.7.</b>	<b>Education Statistics</b>		....	
4.7.1	Education Institutions by ownership			106
4.7.2	Teaching Staff in Educational Institutions			106
4.7.3	Pupils/Students in Public and Private Schools			106
<b>4.8</b>	<b>Vehicle Registration</b>		....	106
4.8.1	Vehicle Registration by ownership		....	107
4.8.2	Vehicle Registration by Type		....	107
4.8.2.1	Commercial vehicle		....	107
4.8.2.2	Private vehicles			107
4.8.2.3	Government vehicles		....	107
4.8.3	<b>Access and Use of Information and Communication (ICT) Facilities</b>			108
<b>4.10</b>	<b>Unemployment Statistics</b>			
	Professionals and Executives		....	108
	Lower Grade		....	108
	Trade Dispute		....	109
	Unemployment (Cost of operations)		....	109
	Unemployment (ICT)			109
<b>4.11</b>	<b>Research Institute</b>			109
	Sources of Fund		....	109
	Employment		....	109
	Information and Communication Technology		....	110

<b>4.12</b>	<b>National Directorate of Employment</b>			
	New Beneficiaries	....	....	110
	Amount spent on Loan			
	Loan Recovery	....	....	110
	<b>CHAPTER FIVE</b>	....	....	
<b>5.0</b>	<b>TRADE</b>	....	....	112
	Merchandise Trade	....	....	112
	Balance of Trade	....	....	112
	<b>IMPORT</b>	....	....	112
<b>5.3</b>	<b>EXPORT</b>	....	....	
<b>5.4</b>	<b>DIRECTION OF CRUDE OIL EXPORTS</b>	....	....	
<b>5.6</b>	<b>TERMS OF TRADE INDEX</b>	....	....	112
	All Commodity Index	....	....	113
	<b>CHAPTER SIX</b>	....	....	
<b>6.0</b>	<b>PRODUCER PRICE INDEX</b>	....	....	114
	Producer Price Index Concepts	....	....	114
	Product Weight	....	....	115
	Classification Adopted	....	....	115
	Problem of Calculation	....	....	115
	January to December 2006 Survey	....	....	115
	Comparing the Price changes in the PPI and CPI	....	....	116
	<b>CHAPTER SEVEN</b>			
<b>7.0</b>	<b>NATIONAL ACCOUNTS</b>	....	....	118
	Quarterly Gross Domestic Product (GDP)		....	118
	Sources of Data	....	....	118
	Producing the Estimate	....	....	119
	Quarterly GDP Estimates at both Current and Constant (1990) Prices			
	<b>CHAPTER EIGHT</b>			
<b>8.1</b>	<b>Overall Assessment</b>	....	....	123
	<b>APPENDICES</b>			
	<b>Appendix I:</b> Statistical Tables	....	....	124
	<b>Appendix II</b> NISH Sample Design	....	....	381
	<b>Appendix III:</b> NISE Sample Design	....	....	383
	<b>Appendix IV:</b> NISH Definition and Concepts`	....	....	386
	<b>Appendix V:</b> NISE Definition and Concepts	....	....	

## LIST OF TABLES

TABLE	TITLE	PAGES
<b>CHAPTER I: SURVEY DESIGN</b>		
1.1	List of Questionnaire by Type and Reference Number.....	124
1.2	Stratification of FHUs into Crop Farming C), Livestock Keeping (L) And Fishing (F) Housing Units .....	125
1.3	2006 Status Returns on Economic Surveys Summary .....	126
1.4	Status Returns of Economic Survey .....	127- 132
1.5	Status of Returns on System of Administrative Statistics (SAS) .....	133- 135
1.6	Retrieval Status of GHS Records .....	137
1.7	Retrieval Status of Agricultural Survey of Private Farmers.....	138
1.8	Status of Returns on System of Administrative Statistics as at May 2007	139
1.9	Work Programme: NBS/CBN/NCC Collaborative Surveys.....	140
 <b>CHAPTER II: SOCIO-DEMOGRAPHIC STATISTICS</b>		
2.1.2.1	Percentage Distribution of Persons by State, Gender and Age Group (June 2006).....	141
2.1.2.2	Percentage Distribution of Household Head by State, Gender and Household Size, (June 2006).....	142
2.1.2.3	Percentage Distribution of Persons by Marital Status, State, Sector and Gender, (June 2006) .....	143
2.1.3.1	Percentage Distribution of Households by Major Source of Water for Drinking and Cooking, State and Sector, (June 2006).....	144
2.1.3.2	Percentage Distribution of Households by Distance to Source of Water, State and Sector, (June 2006).....	145
2.1.3.3	Percentage Distribution of Households by Type of Refuse Disposal, State and Sector, (June 2006).....	146
2.1.3.4	Percentage Distribution of Households by Type of toilet Facilities to and State (June 2006).....	147
2.1.3.5	Percentage Distribution of Households by Distance of Toilet Facilities to Dwelling and State (June 2006).....	148
2.1.3.6	Percentage Distribution of Households by Type of Housing Unit, State and Sector (June 2006).....	149
2.1.3.7	Percentage Distribution of Households by Type of Fuel used for cooking, State and Sector (June 2006).....	150
2.1.3.8	Percentage Distribution of Households by Electricity Supply, State and Sector (June 2006) .....	151

2.1.3.9	Percentage Distribution of Households by Type of Housing Tenure, State and Sector (June 2006).....	152
2.1.4.1	Percentage Distribution of Households by Income/Allowances, State and Sector (June 2006).....	153
2.1.4.2	Percentage Distribution of Households by Item and Expenditure (June 2006)	154
2.1.5.1	Youth Literacy Rate in Any Language by state, sector and Gender for persons 15-24 years (June 2006).....	155
2.1.5.2	Adult Literacy Rate in any Language by state, sector and Gender for persons 15-24 years (June 2006).....	156
2.1.6.1	Unemployment Rates by State (June 2006).....	157
2.1.6.2	Distribution of Employed Persons by Hours of work by Sector and Gender (June 2006).....	158
2.1.6.3	Distribution of Employed Persons by Industry, Sector and Gender (June 2006) .....	159
2.1.6.4	Distribution of Employed Persons by Engagement in Voluntary on Social Work, Hours of Work, Sector and Gender (June 2006).....	160
2.1.7.1	Percentage Distribution of Pregnant Women by State, Registration with Clinic, Received Anti-tetanus and Number of monthly Visit to Clinic (June 2006) .....	161
2.1.7.2	Percentage Distribution of Women aged 15-49 year by Method of Family Planning used and sector (June 2006).....	162
2.1.8.1.	Percentage Distribution of Births in the last 12 months by state, sector and Gender (June 2006).....	163
2.1.8.2	Percentage Distribution of Births by state, zone, weight and Gender in Kg (June 2006).....	164
2.1.8.3	Percentage Distribution of Children (one year or less) by State and Immunization status and Gender (June 2006).....	165
2.1.8.4	Percentage Distribution of Children (less than 1 year) by State and Reason for not getting Colostrums (first yellow milk) (June 2006).....	166
2.1.8.5	Percentage Distribution of Deaths in the last 12 month's by state, sector and Gender/2006 .....	167
2.1.9.1	Percentage Distribution of Persons by Type of Building embarked upon, State and Sectors (June 2006).....	168
2.1.9.2	Percentage Distribution of Persons by stage of completion of building, state as sector June 2006	169

2.1.10.1	Percentage Distribution of Household Ownership and Access to ICT (Radio) by State and Sector (June 2006).....	170
2.1.10.2	Percentage Distribution of Household Ownership and Access to ICT (Television) by State and Sector (June 2006).....	171
2.1.10.3	Percentage Distribution of Household Ownership and Access to ICT (Fixed Telephone) by State and Sector (June 2006).....	172
2.1.10.4	Percentage Distribution of Household Ownership and Access to ICT (Telephone) Mobile by State and Sector (June 2006).....	173
2.1.10.5	Percentage Distribution of Household Ownership and Access to ICT (Personal Computer) by State and Sector (June 2006).....	174
2.1.10.6	Percentage Distribution of Household Ownership and Access to ICT (Internet Service) by State and Sector (June 2006).....	175
2.1.10.7	Distribution of Individual Ownership and Access to ICT (Radio) by State and Sector (June 2006).....	176
2.1.10.8	Distribution of Individual Ownership and Access to ICT (Television) by State and Sector (June 2006).....	177
2.1.10.9	Distribution of Individual Ownership and Access to ICT (Fixed Telephone) by State and Sector (June 2006).....	178
2.1.10.10	Distribution of Individual Ownership and Access to ICT (Mobile Telephone) by State and Sector (June 2006).....	179
2.1.10.11	Distribution of Individual Ownership and Access to ICT (Personal Computer) by State and Sector (June 2006).....	180
2.1.10.12	Percentage Distribution of Individual Ownership and Access to ICT (Internet) by State and Sector (June 2006).....	181
2.1.10.13	Distribution of Television Viewers by First Preference Station.....	182
2.1.10.14	Distribution of Television Viewers by most Preferred Station.....	183
2.1.10.15	Distribution of Persons by Type of ICT Equipments Owned and State (June 2006).....	184
2.1.10.16	Percentage Distribution of ICT Equipments by Number Owned (June 2006).....	185
2.1.10.17	Percentage Distribution of Persons by Source of Access to ICT Equipments (June 2006).....	186
2.2.1.1	Number of Persons Engaged in Crop Farming by Type and Sex (in thousand) 2006.....	187
2.2.1.3	Farm gate prices in Naira per kilogram	188

2.2.1.4	Distribution of crop farmers by market channel and state 2006	189
2.2.1.5	Distribution (absolute) of crop farmers by problems encountered during storage and by state 2006	190
2.2.1.6.	Distribution (absolute) of crop farmers by problems encountered during production process and by state, 2006	191
2.2.1.7a	Distribution (absolute) of crop farmers by access to any ICT facility by State 2006	192-194
2.2.1.7b	Distribution (absolute) of crop farmers by possession of any ICT facility by state by State 2006	195-197
2.2..1.8a	Area Planted of Major Crops by State 2006	198
2.2.1.8b	Production of Major Crops by State	199
2.2.2..1	Distribution of livestock farmers by source and type of input, 2006	200
2.2.2.2	Number of persons Engaged in Livestock farming by sex 2006	201-202
2.2.2.3	Stocks and changes in stocks of Livestock by type 2006	203
2.2.2.4	Diary product: Quantity and value by type 2006	203
2.2.2.5	Prices of livestock, product by type 2006	204
2.2.2.6	Funds committed to livestock farming by source 2006	205
2.2.2.7	Number of livestock processing facilities by type and capacity 2006	206
2.2.2.8	Distribution of Livestock Farmers by Market Channel, 2006	206
2.2.2.9	Comparison of Livestock Farming Season between 2006 and 2005	207
2.2.2.10	Livestock Farmers Expectations for 2007 Season by factor	207
2.2.2.11	Distribution of Livestock Farmers by “Problems Encountered in Purchasing Livestock inputs.....	208
2.2.2.12	Distribution of Livestock farmers by “government assistance required”2006	209
2.2.2.13	Distribution of Livestock farmers by ways that can improve livestock Activities, 2006.....	209
2.2.2.14	Distribution of livestock farmers by problem encountered during marketing	209
2.2.2.15a	Distribution of Livestock Farmers by Possession of any Information And Communication Technology Facility.....	210
2.2.2.15b	Distribution of Livestock Farmers by Possession of any Information and Communication Technology Facility.....	212

2.2.3.1	Distribution of Households by Type of fishing sites	214
2.2.3.2	Number of Persons Engaged in fish farming by sex, 2006.....	215
2.2.3.3	Distribution of Household by Pond Capacity 2006.....	215
2.2.3.4	Quarterly Fish Production by Type, 2006.....	216
2.2.3.5	Distribution of Fish Holdings by Source of Input, 2006.....	216
2.2.3.6	Quantity of Fish sold by Type and Quarters, 2006.....	217
2.2.3.7	Expenditure by Type Quantity and Value, 2006.....	217
2.2.3.8	Available funds by source, 2006.....	218
2.2.3.9	Fish Processing Facilities by Capacity, 2006.....	218
2.2.3.10	Fish Storage Facilities by Capacity, 2006.....	218
2.2.3.11	Distribution of fish farmers by market channel, 2006.....	218
2.2.3.12	Comparison of 2005 Fishing season with 2006.....	219
2.2.3.13	Fish Farmers expectation in 2006 fishing season.....	219
2.2.3.14	Distribution of Fish farmers by “desired government assistance”, 2006	219
2.2.3.15	Distribution of Fish Farmers by Problems Encountered when Purchasing Fishing Tools, 2006.....	220
2.2.3.16	Distribution of Holders by Problems Encountered During Production Process, 2006.....	220
2.2.3.17	Distribution of Holders by Problems Encountered During Process, 2006.....	220
2.2.3.18	Distribution of Holders by Problems Encountered During Marketing, 2006.....	221
2.2.3.19a	Distribution of Holders by Access to Information and Communication Technology Facility, 2006.....	222
2.2.3.19b	Distribution of Household by Possession of Information and Communication Technology Facility, 2006.....	224-227
2.2.3.20	Summary of Data on ICT Access and Ownership.....	228
 <b>CHAPTER III: NISE</b>		
3.1.1	Whole sale and Retails Trade.....	229
3.2.1	Hotels and Restaurants.....	230
3.3.1	Building and Construction.....	231
3.4.1	Manufacturing .....	232

3.4.2	Capacity Utilization.....	233
3.5.1	Mining and Quarrying.....	234
3.6.1	Private Professional Services.....	235
3.7.1	Organized Private Road Transport Operators.....	236
3.8.1	Petroleum Sector (Oil and Gas).....	237
3.9.1	Corporate non-financial Sector (Non-Oil).....	238
3.9.2	Corporate non-financial Sector (Foreign Private).....	239
3.10.1	Area Cultivated and Production by Crop.....	240
3.10.2	Livestock by Type of Modern Agricultural Holding.....	241
3.11.1	ICT Indicator (NISE).....	242

#### **CHAPTER IV: SAS**

4.1.1.	Volume of water available for domestic industrial and other purpose.	243
4.1.2.	Water board tariffs	246
4.1.3.	State govt. allocation to water board	247
4.1.4.	Employment	248
4.1.5.	Cost of operation	249-257
4.1.6.	State water board (ICT)	258-259
4.2.1	Value of contracts by project	260-268
4.2.2	Amount spent on projects by type	265-268
4.2.3	Percentage of completion by project type	269-272
4.2.4	Employment size	273
4.2.5	Capital expenditure by type	274
4.2.6	Water resources (ICT)	276
4.3.1	Opening/Closing balances	277
4.3.1	Internally generated revenue by source	278-280

## **GOODWILL MESSAGE**

## FOREWORD

I am happy with the consistence and sustenance of the Statistical Report of the annual collaborative survey of Socio-Economic Activities. It is now institutionalized as one of the key modular surveys of National Bureau of Statistics and providing quarterly and annual main indicators of the socio-economic characteristics of Nigeria. These array of indicators produced annually through collaboration had been able to address the weaknesses in provision of indicators and statistics for policy formulation, monitoring and evaluation of government programmes and policies at both national and sub-national level.

The 2006 Annual collaborative survey of Socio-Economic Activities Report in Nigeria is the third edition consequent on the collaboration between three key agencies: National Bureau of Statistics (NBS), Central Bank of Nigeria (CBN) and the Nigerian Communications Commission (NCC). The collaboration had enhanced production of credible, quality and useable data because of high level of professionalism involved, good statistical practices and integrated statistical outputs so generated for public and private use. The National Bureau of Statistics, is already building confidence on the quality and credibility of her products and already making plans to raise the bar or standard higher. A lot of improvements had been incorporated into survey instruments in terms of converting them into scannable formats to enhance quick data processing and analysis. The standard of ICT had improved tremendously in the system which further helped data processing and report writing capability, documentation and archiving of statistical and outputs.

The findings and results of the survey are presented based on the three survey infrastructures of NBS namely, National Integrated Survey of Establishments (NISE) and System of Administrative Statistics (SAS). The presentation is however organized into eight (8) chapters while the executive summary discussed the commentary of key findings.

I wish to appreciate the strengthening of the collaborative relationship of the three agencies and hopefully in future it will be extended to other Ministries, Departments and Agencies (MDAs) for the good of the Nigerian Statistical System. I profusely thank the Governor, Professor Charles Soludo of Central Bank of Nigeria for his continued support in advancing the cause of better statistics in Nigeria in terms of technical and funding support. I also want to recognize the Director of Research and Statistics (Mr. Mordi), Messrs C. M. Anayanwu and C. M. Okafor all of Central Bank of Nigeria. The management of Nigerian Communications Commission and her team officers are also commended.

The following key officers who are my members of my staff are also appreciated for the able way they managed the project: Messrs G. O. Adewoye (Director, Censuses and Surveys) G. C. Nweze (Director, Social and Economic Analysis), F. B. Ladejobi (Deputy Director, Field Services and Methodology) and Mrs. A. N. Adewinmbi (Deputy Director, Computer Management and Information Services).

The report presented two volumes provide more enriching information for better analysis of the economy and also address the weaknesses in the previous two reports. Your comments for further enrichment of future surveys will be highly appreciated.

Dr. V. O. Akinyosoye,  
Director-General/Chief Executive Officer  
National Bureau of Statistics,  
Abuja.

July, 2007

## ACKNOWLEDGEMENTS

# PREFACE

# EXECUTIVE SUMMARY

## 1.0 INTRODUCTION

The 2006 annual collaborative Survey of Socio-Economic Activities in Nigeria is a follow-up of the 2005. The survey was a further improvement over the previous round in that the scope was enlarged to meet more mandates of the three agencies. The survey was jointly implemented by the National Bureau of Statistics, the Central Bank of Nigeria and the Nigerian Communication Commissions between February to June 2007.

The survey which cut across the three survey infrastructures of NBS had enabled the three collaborating agencies fulfilled their key mandates in the production of current, timely and credible statistics to monitor and evaluate the current status of the economy and various government programmes, such as the National Economic Empowerment and Development Strategy (NEEDS) and the Millennium Development Goals (MDGs).

The project produced series of socio-economic data through households and establishments, and also through the compilation of administrative data sets from public and private institutions. The results and findings from the survey were adequate, credible and current for meaningful monitoring and evaluation of programmes and policies and also for policy formulation at national and sub-national levels.

### 1.1 Socio-Demographic Statistics

The General Household Survey was designed to provide Statistical Information on socio-demographic conditions of the members of households in Nigeria. The results revealed, the following key findings on distribution and disparity patterns of the surveyed households.

#### **Household Population Composition and Demography:**

The weighted population of households covered was 30,542,246.

The Characteristics of household respondent showed that male headed households constituted 83.5 percent, while female heads 16.5 percent.

#### **Population Distribution:**

Persons aged 5-14 years had the highest population of 28.2 percent.

Economically active persons in age group 15-59 years constituted 52.1 percent.

Elders in age group 60 years and above constituted 6.5 percent of the national figure.

Average persons per household was 4.6

#### **Marital Status:**

The results indicated that 63.4 percent of the4 covered populations were married while 29.2 percent were never married.

### **Water and Sanitation**

Major source of Water for Drinking and Cooking: The study showed that 46.4 percent of the covered households had access to safe water.

### **Refuse Disposal:**

The results showed that 6.5 percent of all households had access to satisfactory refuse Disposal System.

### **Toilet Facility**

About 47.0 percent of the households used conventional toilets, while unconventional toilets constituted 53.1 percent.

### **Type of fuel used for cooking:**

Eighty two percent of the households used firewood for cooking, while 0.5 percent used gas cooker and kerosene (15.0 percent)

### **Type of Electricity Supply:**

Only 42 percent of the households had access to electricity supply by Power Holding Commission of Nigeria (PHCN).

### **Household ownership and Access to Information and Communications Technology (ICT).**

The results showed that 77.1 percent of the households in Nigeria owned radio set, while 84.0 percent had only access to radio.

Twenty seven percent of the households owned Television, while 40.0 percent only had access to it.

About 1.0 percent owned fixed Telephone, while 4.9 percent had access to the facility.

The results also showed that 24.9 percent of the households owned Mobile Telephone, while 18.9 percent had access to it.

About 1.0 percent of the households owned personal Computer, while 5.2 percent had just access to it.

Only 0.1 percent owned Internet Service, while 4.0 percent had access to it.

## **1.2 AGRICULTURAL STATISTICS**

Private farmers are farmers who employ traditional methods in their farming activities. They are grouped into three mainly: Crop, Livestock and fishing.

Private farmers are household based and differ from modern agricultural holders who are registered with the Corporate Affairs Commission, keep records and use modern agricultural equipment.

### **CROP FARMING:**

Maize had the highest land area cultivated among the major crops grown in Nigeria with a figure of 4,670 thousand hectares. This was closely followed by Guinea Corn 4,578 thousand hectares and Millet 4,270 thousand hectares.

Cassava had the highest crop production in 2006, with production figures of 38,041 thousand tonnes, yam 28,280 thousand tonnes and melon had the least figure of 357 thousand tonnes.

Thirty seven percent of the total persons engaged in farming activities are female. 23 percent are working proprietors, 47 percent unpaid family member 28 percent paid employee and a mere 2 percent were apprentices.

About 99,138 thousand tonnes was the total production of eleven major crops in 2006. Cassava constituted 38.37 percent, Yam 28.53 percent and least was melon 0.40 percent.

Farmgate prices were available for the eleven major crops. Average price per kilogram was highest for Melon N39.68 and cotton N33.44 while Rice was N25.84.

Most farmers solo their product through open market. The major problems confronting crop farmers are lack of funds, better infrastructure such as roads, seedling (improved) and good weather.

### **LIVESTOCK FARMING:**

A total of thirty Seven million (67.15 percent) were males engaged in livestock farming as against Eighteen million females (32.85 percent). Total livestock population increased from 64 million to 83 million. Goats constituted about 56.31 percent increase, followed by sheep N5,205. A crate of egg solo for N362 and chicken price was N700.00

Funds available for livestock farming in 2006 to totaled N79 billion "Own Funds" constituted the highest proportion of 90.46 percent.

Most farmers solo their livestock in the open market only a few animals were sent direct to Industry 0.8 percent.

### **FISH FARMING:**

Of the total fish farmers in Nigeria, 92,562 farmers fished in ponds, 1,038,042 or 47 percent fished in Rivers while 126,135 (13 percent) fished in the Ocean. Quarterly fish production rose from 4 million kilogram in the first quarter to 25 million kilogram at the end of the fourth quarter of 2006. Total value of fish sold rose from N373 million in the 1<sup>st</sup> quarter to N458 million in the third quarter.

The total amount of funds from all sources was N39.19 Billion "Own funds" accounted for the highest with N28 billion and other sources accounted for N648 million.

### 1.3 ECONOMIC STATISTICS

The summary below reflects the key findings in the establishment based component of the survey across the various economic sectors covered in the country.

#### **Wholesale and Retail Trade**

In the wholesale and Retail Trade sector a total of 1,939,076 persons were engaged in the first – half of 2006 which later increased to 1,981,389. This reflected an increase of 2.2 percent.

On emolument, ~~N~~9.4 billion was paid in the first half of the year; which rose to ~~N~~9.6 billion in the second half showing an increase of 2.1 percent during the year. The gross margin in the first half was ~~N~~89.9 million against ~~N~~83.7 billion in the second half.

On the other hand, the total working capital in the first half was ~~N~~29.8 billion whereas in the second half it was ~~N~~29.2 billion.

However, the cost of operation rose from ~~N~~88.1 billion in the first half to ~~N~~93 billion in the second half.

#### **Hotels and Restaurant**

On employment the number of people engaged in the Hotels and Restaurant Sector rose from 61468 in the first half of 2006 to 67,874 in the second half; yielding an increase of 10.42 percent.

The emolument figures similarly rose from ~~N~~4.7 billion to ~~N~~5.6 billion in the first and second halves respectively; giving an increase of 18.82 percent.

Receipt from accommodation were ~~N~~30.4 billion in the first half while in the second half it was ~~N~~32.5 billion, also increasing by 6.9 percent.

On capacity utilization, no changes were observed for both first and second halves as the value remained constant at 59 percent. However, on lodger nights the first half value 4,035,844 which later rose to 4,066,614 in the second half of the year. The number of lodger rooms increases from 6,801,737 to 6,864,201 in the first and second halves respectively.

#### **Building and Construction**

The number of persons engaged in the year 2006 in this sector was 766,866 for the first half which later decreased to 746,210 in the second half; a fall of 2.7 percent.

The total emolument for the paid for the first half was ~~N~~119.6 billion for the first half of 2006 while in the second half it fell to ~~N~~117.2 billion; a decrease of 19.85 percent.

#### **Manufacturing Industry**

Our findings in the manufacturing sector shows that the number of persons engaged in the first half of 2006 were 382,717 and 387,964 in the second half.

The total emolument paid in the first half was ₦253 billion rising to ₦266.8 billion in the second half of the year.

Cost of operation in the sector for the first half was ₦771.0 billion while in the second half it rose to ₦914.4 billion; a rise of 18.59 percent. The sales value in the first half of 2006 was ₦1081.7 billion while in the second half it was ₦1,954.8 billion giving a rise of 8.5 percent.

The installed capacity utilized in the first half was 54 percent. This later rose to 55 percent in the second half (one percent). The capital investment on capital formation in the first half was ₦730.26 billion against ₦761.2 billion in the second half; a rise of 4.2 percent.

### **Mining and Quarry**

Workers engaged in this sector decreased from 11,152 in the first half of the year 2006 to 10,762 percent. The total emolument paid to workers for the first half of the year was ₦736.5 billion rising to ₦36.55 billion in the second half a minor increase of 0.19 percent. However, the volume of mineral produced was 1,602,548 metric tones and 1,563,013 metric tones in the first and second halves of the year respectively.

### **Private Professional Service**

This sector had a total employment of 14,573 in the first half of the year against 16,041 in the second half; having 10.07 percent increase.

Receipts from services recorded ₦22.4 billion in the first half of 2006 increasing 6.9 percent to ₦24 billion approximately.

### **Organised Road Transport**

Our findings showed total employment in this sector of 61,386 persons in the first half of the year while 65,602 were engaged in the second half; an increase of 6.87 percent.

The fleet of vehicles recorded in the first half was 19,146 against 19,364 in the second half; a slight increase of 1.04 percent.

### **Balance of Payments**

A total of \$5.73 billion was received in the financial sector in the first half of 2006 while a total of \$4.98 billion was received while \$4.26 billion was paid out giving a surplus of \$0.72 billion.

### **Corporate Non-Financial**

The total value of assets internally was ₦6.7 billion and ₦521 million in foreign private investment.

The highest internal in asset base was in the Manufacturing Sector but least in Agriculture, Mining and Quarrying of ₦34 million. Manufacturing also had the highest in foreign private invest of ₦8.1 billion.

## 1.4 SYSTEM OF ADMINISTRATIVE STATISTICS

### **Water Board:**

Total volume of water available for various activities in 2006 was 40.3billion cubic liters

About half of the total water utilization was on domestic issues while the rest was on industrial and other activities in 2006.

### **LGA Statistics**

Tax Revenue - the aggregate tax revenue by the local government was ₦4.12billion over half of these tariffs were accrued from the community.

### **Non-Tax Revenue**

The total amount of money accrued from the Local Government as non-tax revenue was ₦19.96billion.

### **Statutory Allocations**

In 2006, the total statutory allocation to the Local Governments was about ₦563billion. 87 percent of this came from the Federation Accounts

### **Recurrent Expenditure**

The total amount disbursed as recurrent expenditure to the Local Governments in 2006 was ₦492billion.

### **Capital Expenditure**

In 2006, the total capital expenditure released to the Local Governments was ₦135.9billion. General administration had the highest share with 14.6 percent from the total.

### **Fiscal Operation of State Government**

**State Governments:** in the year 2006 a total sum of ₦122.7billion was generated as revenue by the State Governments.

**Statutory Allocations:** in 2006, a total sum of ₦189.8billion was allocated to the State Governments.

### **Capital Expenditure:**

The amount expended in the economic sector was the highest as compared to other sectors, 43.6 percent in 2006.

### **Recurrent Expenditure**

Administrative sector accounted for 44.3 percent with the sum of ₦166.5billion from the total disbursement as compound with other sectors.

## **Co-operative Societies**

Type and membership of cooperative societies:

Among the membership of registered and unregistered cooperative societies, 106297 farmers multipurpose while 3,027,781 were unregistered in between 2005 and 2006. Other societies with fewer members were livestock, credit and thrift as well as informal sectors.

## **Internally Generated Fund**

The total internally generated fund in co-operative society increased as quarter rolled by with highest fund in the fourth quarter standing at ₦17.3billion. The paid-up shares had uniform pattern in 2006.

## **Housing Statistics**

### **Land Allocation by purpose and sex:**

The number of applications for residential was 11,418, as the highest representing (86.1 percent) compared with that of commercial, industrial and other purposes. See table 4.5.1 in Appendix.

### **Building by Ownership**

Application, Approvals and actual allocations were more for private owners than for corporate, government NGO, and other unclassified bodies.

## **Health Statistics**

### **Hospital Type**

The table revealed health care facilities established by type in the states, with particular reference to Ebonyi state which increased on maternity hospitals from 25 to 39 between third and fourth quarters in 2006.

### **Beds by Hospital by Type**

The number of hospital beds rose between quarters in the General Hospitals with 8.06 percent while the maternity had an increase of 12.6 percent in the year 2006.

### **Patients by Hospital Type**

**In-Patients:** There was unsteady movement of both in-patient and out-patient in the General Hospitals between first to the last quarters we had the same pattern in the Maternity Hospitals.

### **Health Personnel by Sex**

It was reported that health manpower personnel cut across all the medical profession and by sex. On the average about 71 percent of the manpower personnel comprises of medical Doctors and environmental health staff were males in 2006.

## **Education Statistics**

The public schools institutions and teachers ahead of private ones despite the proliferation of private schools between 2005 and 2006.

Pupils/Students in Public and Private Schools.

The report shows that the population of primary school pupils was higher in 2006 as compared to the previous year.

### **Vehicle Registration**

The total number of vehicles registration was 5,091,459. While the private vehicles topped with 68.3 Percent among others in 2006.

### **Communication**

#### **Access and use of Information and Communication (ICT) Facilities**

It was revealed that access to internet facilities was as low as 12.6 percent coverage within the states Inland Revenue Agencies.

In 2006, 283 computers were in use while Lagos State topped the list with 91 from 29 establishments that had access to these facilities.

### **Unemployment Statistics**

#### **Unemployment (Professional/ Executives)**

The total of 150 vacancies was declared across the Nation in 2006, apart from 47,872 as old registration, 1,296 were registered as fresh unemployed, out of which 6311 were males.

#### **Unemployment (Low Grades)**

The total number of vacancies declared in 2006, was 517 while 272 was on placements made up of 161 males and 111 females.

#### **Unemployment (Trade Disputes)**

In 2006, a total number of 46 disputes were recorded resulting to 112 work stoppages involving 85,342 workers and 2,446,085 man-day lost.

#### **Unemployment (Cost of Operation)**

More than six times the amount on other benefits stood at (N73.6million) or 76.37% percent was spent on wages and salaries.

#### **Unemployment (ICT)**

The website and Local Area Network (LAN) recorded 5.6 percent in 2006.

### **Research Institutes (2006)**

#### **Source of Fund:**

The Federal Government topped the list of sources of fund with N4.957billion among others.

### **Employment**

The employment of Nigerians out- numbered the non-Nigerians in the research institutes.

### **Information and Communication Technology**

On access to information technology, website topped the list with 81.8 percent.

## **National Directorate of Employment (2006)**

### **New Beneficiaries**

The total non- graduate beneficiaries were higher than their graduate counterparts.

### **Amount Spent on Loan**

The amount disbursed as loan from capital was (₦7, 988) for females and (₦7, 397) for males in 2006.

### **Loan Recovery**

The total amount of loan granted was ₦209.6million while ₦22.3million was recovered.

### **Reported Road Accident (2006)**

A total number of 9114 cases were reported in 2006. Serious cases topped with 5,556 representing 60.9 percent of the total.

### **Value of Properties Lost**

About N165.6million worth of properties were reported lost due to road accident.

## **1.5 PRICES AND TRADE**

The Foreign Trade Price Indices were computed with January 2005 as the price reference month while the weighting system was based on the trade values for the year 2005. The import Price Index recorded changes between 1.89 percent and 12.3 percent when compared with the price reference month over the period under consideration. Similarly, the Export price Index showed changes of – 18 percent and 0 percent over the same period.

The year-on-year rate of change in the Producer Price Index (PPI) was 3.1 percent in January 2006. A rate of 4.9 percent was recorded in February but went down to 3.1 percent in March 2006. It did not exceed 5 percent throughout the year 2006 except for the month of September that was 5.2 percent.

The level of the PPI in October 2006 was 5.0 percent above the corresponding level in October 2005. Thereafter, the year-on-year rate showed increase of 2.9 and 3.2 percent above the corresponding levels in November and December 2005 respectively.

## **1.6 NATIONAL ACCOUNTS ESTIMATION OF QUARTERLY GROSS DOMESTIC PRODUCT (GDP)**

### **INTRODUCTION:**

Quarterly estimates of GDP offer short and high frequency indicators thereby yielding timely information about the current economic situation as well as changes within any economy on short-term bases. The procedures used for quarterly estimation of GDP for 2006 is based on the production approach to

estimation of GDP which internationally is guided by the blue print of the United Nations' 1993 System of National Accounts (SNA '93).

### **Gross Domestic Product At Current Prices**

The economy in 2006 recorded an overall GDP growth at current prices of 27.40 percent as against 27.70 percent recorded in 2005.

The quarterly GDP estimates at current basic prices rose from a level of ₦3,169.6 billion, ₦3,399.4 billion, ₦3,924.8 billion, ₦4,078.5 billion, in 2005 to ₦3,986.3 billion, ₦4,426.1 billion, ₦4,986.5 billion, and ₦5,165.7 billion, respectively in 2006 representing quarterly growth rate of 25.77 percent, 30.20 percent, 27.05 percent and 26.66 percent respectively for the four quarters in 2006.

### **Gross Domestic Product At Constant (1990) Prices**

The GDP constant at (1990) Prices increased from a level of ₦561.9 billion in 2005 to ₦595.8 billion in 2006 showing an annual growth rate of 6.03 percent as against 6.51 percent recorded in 2005.

The quarterly GDP estimates at constant prices rose from the levels of ₦120.0 billion, ₦128.8 billion, ₦153.9 billion, and ₦159.2 billion, in 2005 to ₦128.6 billion, ₦135.4 billion, ₦162.5 billion, and ₦169.3 billion, respectively in 2006 representing a quarterly growth of 7.11 percent, 5.19 percent, 5.56 percent and 6.35 percent respectively in 2006.

### **Crude Petroleum and Natural Gas (Real)**

The Crude Petroleum and Natural Gas sector fell slightly from a level of ₦136.3 billion in 2005 to ₦130.2 billion in 2006 representing an annual growth of -4.51 percent in 2006 against 0.50 percent recorded in 2005. This sector accounted for 24.26 percent of the GDP at Constant prices in 2005 and 21.85 percent in 2006.

### **Non-Oil Sector (Real & Nominal)**

The non-oil GDP in nominal terms increased from a level of ₦8,907.4 billion in 2005 to ₦11,581.7 billion in 2006 representing a growth of 30.02 percent in 2006 as against 24.35 percent in 2005. Its contribution to the overall GDP in 2005 and 2006 stood at 61.13 percent and 62.39 percent respectively.

The real GDP rose from a level of ₦425.6 billion in 2005 to ₦465.6 billion in 2006 representing a growth rate of 9.41 percent as against 8.59 percent recorded in 2005.

## *Chapter One*

### *SURVEY DESIGN*

#### **1.0 INTRODUCTION**

The National Bureau of Statistics (NBS) in collaboration with the Central Bank of Nigeria (CBN) and the Nigerian Communications Commission (NCC) in 2006 carried out a survey on the socio-economic activities in Nigeria for the year 2006. The main reason for conducting the survey was to enable the collaborating agencies fulfill their mandates in the production of current and credible statistics to monitor and evaluate the status of the economy and the various government programmes such as the National Economic Empowerment and Development Strategy (NEEDS) and the Millennium Development Goals (MDGs).

The National Bureau of Statistics and Central Bank of Nigeria had often collaborated effectively to conduct surveys geared towards the production of external trade statistics; rebasing of consumer price index; Decomposition of Annual Gross Domestic Product (GDP) into quarterly GDP series; the Survey of Informal Sector, 2004 National Export Commodities Survey in Nigeria and the 2005 Collaborative Survey on Socio-economic Activities in Nigeria.

The present survey was implemented between 25<sup>th</sup> February and 30<sup>th</sup> June, 2007 by a combination of staff of NBS, CBN and NCC as well as outsourced personnels from the qualified members of the public who were screened and tested before final selection.

The NBS and CBN collaborative surveys had always enjoy enhanced technical coordination through adherence to professionalism, ethical and international standards which also allowed for optimal use of scarce resources the same is applicable in the current exercise.

Since it was not the first time that the three agencies came together to jointly conduct a multipurpose survey, the 2006 collaborative survey unlike the previous one had been improved in terms of innovation and scope. As such, the total requirements of these agencies were met.

The broaden of the scope of the collaborative survey cuts across the production of socio-economic data series through the households, the production of economic data series through the establishments and compilation of administrative data series obtained from the public and private institutions.

This collaborative survey also assured the elimination of conflicts in data generated by the different agencies and ensured a reliable, authentic national statistics for the country.

## 1.2 OBJECTIVES OF THE SURVEY

The key objectives of the survey include:

- i. Collection of relevant statistics to facilitate the production of GDP.
- ii. Production of data to aid economic analysis on non-oil outputs such as Manufacturing, Agriculture and Services.
- iii. Production of State and Local Government Finance Statistics, Producer Price Index (PPI), Oil Sector Statistics and Flow of Funds,
- iv. Collection of current socio-economic statistics in Nigeria to assist in policy formulation and aid the monitoring and evaluation of various government programmes at National and sub-national levels.

## 1.3 COVERAGE AND SCOPE

### Coverage

The survey covers all the 36 states of the federation including the Federal Capital Territory (FCT), Abuja. The target population canvassed includes Households, Private Establishments and Public Establishments/Agencies/Parastatals at federal, state and local government levels.

### Scope

#### (i) **National Integrated Survey of Households (NISH)**

The scope covered under the National Integrated Survey of Households include topics and subjects like: Household Composition; Household Amenities, Health, Education, Employment, Female Contraceptive Prevalence, Births and Deaths in last 12 months, Child Immunization and Child Malnutrition, Ownership and Access to Information and Communication Technology (ICT), Voluntary or social work (Non-profit Institutions), operation of ICT business outfit, Housing project, Crop Production, Livestock Production, Poultry Keeping, Farming Inputs and Processing and Storage Facilities.

#### (ii) **National Integrated Survey of Establishments (NISE)**

Ten (10) sectors and sub-sectors were covered under the National Integrated Survey of Establishments. These were Agriculture including Hunting and Forestry, Fishing, Mining and Quarrying, Manufacturing, Building & Construction, Wholesale and Retail Trade, Hotel and Restaurant, Organized Road Transport, Financial Intermediation and Private Professional Services. Subject areas covered include kind of activity; legal form of ownership, persons engaged, paid employees, wages and salaries, description of products, installed production capacity, production and cost of production/operation etc.

(iii) **System of Administrative Statistics (SAS)**

The System of Administrative Statistics covered subjects and topics which cut across many sectors in establishments and institutions in such areas as Education, Health, Housing, Utilities and finance sub-sectors.

#### **1.4 SURVEY INSTRUMENTS**

The main instruments developed for the collaborative survey were the questionnaires and the manuals. The instruction manuals were developed to facilitate the completion of the questionnaires. The questionnaires were designed in line with the set objectives of the various surveys implemented under the NBS three Survey Systems, namely, the National Integrated Survey of Households (NISH), the National Integrated Survey of Establishments (NISE) and the System of Administrative Statistics (SAS) (Table 1.1).

##### **The National Integrated Survey of Households (NISH)**

Four types of questionnaires were developed including the General Household Survey (GHS) questionnaire, Crop Farmers, Livestock and Fishery questionnaires. All the questionnaires under the NISH module made use of Scannable questionnaires.

##### **The National Integrated Survey of Establishment (NISE)**

Twelve types of questionnaires were designed to capture the relevant information canvassed from the 10 sectors of the economy, namely, Agriculture including Hunting and Forestry, Fishing, Mining and Quarrying, Manufacturing, Building & Construction, Wholesale and Retail Trade, Hotel and Restaurant, Organized Road Transport, Financial Intermediations, and Private Professional Services. Scannable questionnaires were used for collecting data on all the sectors in the NISE module.

##### **The System of Administrative Statistics (SAS)**

Twenty-six types of questionnaires were designed to collect information through administrative records from institutions and establishments in social and economic sectors covering; Education, Health, Housing, Utilities and finance sub-sectors. Analogue questionnaires were used for all the sectors and sub-sectors.

#### **1.5 SAMPLE DESIGN**

The multi-subject socio-economic survey employed the National Bureau of Statistics (NBS) NISH and NISE Sample designs.

##### **1.5.1 National Integrated Survey of Household Sample Design**

The General Household Survey and the National Agricultural Sample Survey designs derived from NBS 2005/07 NISH sample design. The 2005/07 NISH sample design is a 2-stage, replicated and rotated cluster sample design with Enumeration Areas (E.As) as first stage sampling units or Primary Sampling Units (PSUs) while Housing Units constituted the second stage units

(secondary sampling units). The housing units were the Ultimate Sampling Units for the multi-subject survey.

Generally, the NISH Master Sample in each state is made up of 120 EAs drawn in 12 replicates. A replicate consists of 10 E.As. Subsets of the Master Sample are studied for modules of the NISH.

### **General Household Survey**

The GHS was implemented as a NISH module. Six replicates were studied per state while three replicates were studied in the FCT, Abuja. With a fixed-take of 10 HUs systematically selected per EA, 600 HUs thus were selected for interview per state and 300 for FCT, Abuja. Hence, nationally, a total of 21,900 HUs drawn from the 2,190 EAs were selected for interview for the GHS. The selected EAs (and hence the HUs) cut across the rural and urban sectors.

### **Private Farmers Survey**

Total sample sizes of 32,850 Farming Housing Units (FHUs) were drawn from 2,190 EAs. In each state, 900 FHUs drawn from 60 EAs were studied. Four hundred and fifty (450) FHUs from 30 EAs were studied in (FCT), Abuja. The listings of housing units in the selected EAs were updated before they were stratified into farming and non-farming housing units. The farming housing units were further stratified into Crop Farming Housing Units (CFHU), Livestock Farming Housing Units (LFHU) and Fishing Farming Housing Units (FFHUs). In each EA, 5 FHUs were studied for crop farming, 5 FHUs were covered for livestock and 5 FHUs for fishery. At each level of selection, housing units were systematically selected using different random start. Table 1.2 reflects the stratification procedure prior to selection within each sub-population.

All households in the HUs that qualified as farming households were served with relevant private farmers questionnaires.

## **1.5.2 National Integrated Survey of Establishments Sample Design**

A national frame of 15,556 establishments employing 10 persons and above was used for the survey. Table 1.3 showed the breakdown by type of establishments as well as sample size allocated for each sector. A combination of parameters was factored into the selection and allocation of establishments to the sectors and states. The parameters were contribution of each sector to the GDP, number of establishments in each employment band by sector and purposive or a-priori knowledge of performance of the sectors to the economy. Table 1.4 showed the number of establishments by state and by sector.

## **1.5.3 System of Administrative Statistics Design**

The design for the SAS involved complete coverage of the listed institutions and establishments. The questionnaires for the SAS operations covered all relevant agencies/ institutions at the National, State and Local Government

Area Levels. Table 1.5 depicted the retrieval position on system of Administrative Statistics.

## **1.6 TRAINING**

The training for the survey was conducted at two levels. The first level was the Training of Trainers (TOT) which included senior officers from NBS, CBN and NCC. The training at this level lasted for 5 days. The second level training was for the field personnel comprising the Enumerators, Supervisors, State Officers and Zonal Controllers from NBS and CBN. The training took place at the state offices and lasted for 5 days. The trainers were the trainees at the first level.

The training sessions included classroom teaching, demonstration, mock interviews, role playing, field practices and home exercises. The two level trainings were comprehensive and were designed to ensure collection of good quality data.

## **1.7 FIELDWORK ARRANGEMENT**

The field work arrangement for the survey followed two approaches as contained in the NISH and NISE survey systems that is: NISH for household based and NISE/SAS for establishments/institutions/agencies based respectively.

### **Household Component**

In each state, 3 teams were used comprising 3 supervisors and 12 enumerators. A team was made up of one supervisor and four enumerators. Each team covered 20 Enumeration Areas for a period of 22 days. A pair of enumerators in a team covered 10 EAs. This translated to covering an Enumeration Area for an average of 4 days for the different statistical operations. Each team moved in a roving manner.

### **Establishment Component:**

The second approach involved lodgment and retrieval of NISE and SAS questionnaires. The number of staff per state varied in line with the total establishments studied. On the average, two officers covered the operation in each state. A combination of NBS and CBN officers covered the operation in each state for a period of 26 days.

## **1.8 QUALITY CONTROL AND RETRIEVAL OF RECORD**

The Quality Control measures were carried out during the survey, essentially to ensure quality of data. There were three levels of supervision involving the supervisors at the first level, CBN staff, NBS State Officers and Zonal Controllers at second level and finally the NBS/NCC Headquarter staff constituting the third level supervision.

Field monitoring and quality check exercises were also carried out during the period of data collection as part of the quality control measures.

Retrieval of records was carried out in two stages. The first stage retrieval was implemented by CBN Headquarter Staff during the monitoring visit to the states and zones. The second retrieval was done during the monitoring visit of NBS Headquarter staff. A mop-up exercise was carried out by the NBS state officers and Zonal controllers for 10 days after the scheduled period for data collection and sent to NBS headquarters. Table 1.6 showed the retrieval status of GHS records while Table 1.7 depicted the retrieval position of Private farmers survey. Table 1.8 showed the status returns on PPI questionnaires.

## **1.9 DATA PROCESSING/ANALYSIS**

The data processing analysis involved six main stages: development of data entry program; training of data processing staff; manual editing and coding; data entry and scanning; computer editing, verification and conversion and table generation.

Integrated Microcomputer Processing Systems (IMPS) was one of the specialized Statistical packages used to develop the data entry program. The Disk Operating System (DOS) version of the software can support multiple screens required to capture data from the various survey instruments. With the introduction of scannable questionnaires for General Household and Modern Agricultural Holding, another new software package called Teleform was used.

The indicators on household surveys were obtained using the Statistical Package for Social Scientists (SPSS) while the indicators on establishment surveys were obtained using MS-ACCESS and MS-EXCEL. Others indicators on Prices, Trade, National Accounts and Agricultural Survey made use of MS-Office (Access and Excel).

The tabulation and analysis of the three survey systems were implemented by diligent and capable staff of the collaborative agencies.

## **1.10 REPORT WRITING**

A core team of senior officers from the subject matter divisions in the NBS and CBN worked together to produce the draft report for finalization. The report was presented in two volumes. Volume I in the Statistical Report with an executive summary. Volume II contained the detailed Statistical Tables.

## **1.11 WORK PROGRAMME**

A joint Time-line or Work Programme detailing the scheduling of the activities was developed (Table 1.9). The Time-line served as a monitoring guide for the survey. It also helped in programme discipline at each level of activity and was flexible enough to accommodate delays in the retrieval of completed records in the field. The survey was well managed by the three collaborating agencies in order to ensure effective statistical delivery.

## Chapter Two

### **2.0 NATIONAL INTERGRATED SURVEY OF HOUSEHOLDS (NISH)**

#### **2.1 General Household Survey**

This section deals with the characteristics of the socio-economic data of Nigerian population, such as demography, education, employment, health, housing condition, fertility, mortality etc. Demographic factors are both determinants and consequences of economic and social development. It has been shown that the study of demographic variables yield important information on the inventories of human resources that are needed for effective development planning.

##### **2.1.1 Population Composition**

Dependency ratio is defined as the number of household members aged 0-14 years as well as those who are 65 years and above to the number of members aged 15-64 years. The result showed dependency ratio of 1.2, indicating that one person was dependent on each economically active person. The weighted total number of households covered in the survey is 30,542,246. (See Table 2.1.3.1 in the Apendix).

##### **2.1.2 Household Characteristics**

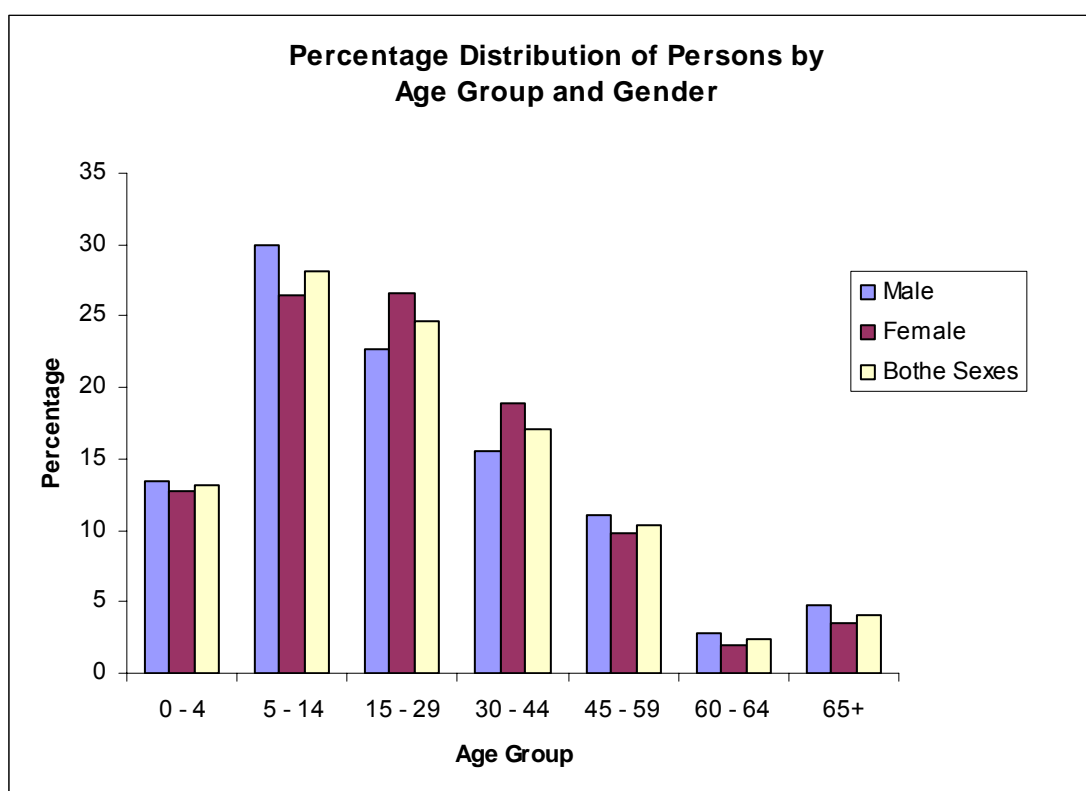

The impact of demographic variables is usually reflected in the size, rate of growth, age structure, headship and geographical zones distribution of a population. These could be influenced by socio-economic development through health, education, economic and welfare programmes.

###### **2.1.2.1 Distribution of Population by Age Group and Gender**

At the national level, 28.2 per cent of the persons aged 5-14 years accounted for the highest population. This was followed by persons aged 15-29 years which made up 24.6 per cent of the population. Elders in age group 50-64 years as well as those that are 65 years and above recorded 2.4 per cent and 4.1 per cent respectively. Gender disaggregation showed that among the male population, those in age group 5-14 years, similar to the previous surveys, recorded the highest figure of 29.9 per cent, while the older age group (60-64 years) recorded the lowest (2.8 per cent). The same pattern of distribution was recorded for the female population (See Table 1 and Table 2.1.2.1 in the appendix).

**Table 1: Percentage Distribution of Persons by Age Group and Gender (National)**

Age Group	Male	Female	Both Sexes
0-4	13.4	12.8	13.1
5-14	29.9	26.5	28.2
15-29	22.7	26.6	24.6
30-44	15.5	18.9	17.1
45-59	11.0	9.8	10.4
60-64	2.8	1.9	2.4
65+	4.7	3.5	4.1

### 2.1.2.2 Distribution of Household by Headship and Household Size

At the national level, the households headed by males constituted 83.5 per cent, while the female heads constituted 16.5 per cent. All the states showed similar pattern of distribution. Average household size in Nigeria was 4.6 persons. Kano states recorded the highest household size (6.4 persons), while Ogun had the lowest household size (2.6 persons). (See Table 2.1.2.2 in the Appendix).

### 2.1.2.3 Marital Status

At the national level, more people that were never married during the last survey have been now married, indicating that 63.4 percent are married, while those that were never married dropped from 40.9 per cent to 29.2 per cent. The result also showed that 1.7 per cent of the people were separated and 0.9 per cent divorced.

Distribution of the widow to states showed that Enugu had the highest figure of 17.6 per cent, followed by Ogun (14.8 per cent), Abia (14.0 per cent) and Anambra (11.2 per cent). The states with lowest widow cases include Kano (0.9 per cent) and Zamfara (1.0 per cent). In all the states, over 44 per cent were married. Highest numbers of married population were recorded in Zamfara (83.4 per cent), Kebbi (80.9 per cent) and Sokoto (80.0 per cent).

Sector-wise, it was shown that more people in the rural areas were married (65.4 per cent) than those in the urban areas (56.1 per cent). Cases of widowhood (5.1 per cent). Separation (2.3 per cent) and divorce (1.0 per cent) were more in the urban areas than in the rural areas (see Table 2 and Table 2.1.2.3 in the appendix).

**Table 2 Percentage Distribution of Persons by Marital Status and Sector (National)**

<b>Marital Status</b>	<b>Urban</b>	<b>Rural</b>	<b>Total</b>
Married	56.1	65.4	63.4
Divorced	1.0	0.9	0.9
Separated	2.3	1.6	1.7
Widowed	5.1	4.7	4.8
Never married	35.5	27.4	29.2

### 2.1.3.0 Water and Sanitation

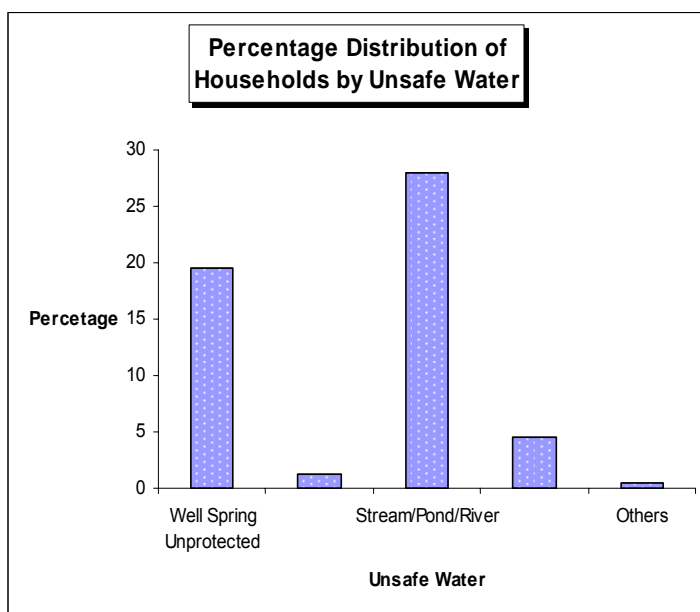

#### 2.1.3.1 Safe and Unsafe Drinking Water

Safe or unpolluted drinking water is a basic necessity of good health, while unsafe or polluted water is a veritable source of water borne diseases, such as diarrhea, cholera, typhoid, guinea worm and schistosomiasis . The population of persons who use safe water is constituted by those who use piped treated water, piped untreated water, borehole with hand pump and well/spring protected water. The results in Table 3 revealed that majority of households (53.6 per cent) were still using unsafe water for cooking and drinking.

**Table 3: Percentage Distribution of Households by safe and unsafe water source (National)**

Safe Water	Percentage	Unsafe Water	Percentage
Pipe water (treated)	7.7	Well spring (unprotected)	19.5
Pipe water (untreated)	1.6	Rain Water	1.2
Borehole/hand pump	20.7	Stream/Pond/River	28.0
Well spring (protected)	16.4	Tanker Truck Vendor	4.4
		Others	0.4
<b>TOTAL</b>	<b>46.4</b>	<b>TOTAL</b>	<b>53.6</b>

At the state level, table 4 below showed the six states with highest status of use of safe water and these states include Yobe (77.2 per cent), Oyo (70.5 per cent), Lagos (73.6 per cent), Kwara (70.5 per cent), Ogun (64.7 per cent) and FCT (62.3 per cent).

**Table 4: Percentage Distribution of Households by Safe Water for 6 States with Highest Use**

State	Piped Water (Treated)	Piped Water (Untreated)	Borehole/ Hand Pump	Well Spring (Protected)	Total
Yobe	3.4	0.5	34.4	38.9	77.2
Oyo	11.6	0.4	30.8	32.9	75.7
Lagos	16.4	12.1	37.4	7.7	73.6
Kwara	14.9	0.7	31.6	23.3	70.5
Ogun	10.7	3.5	35.9	14.6	64.7
FCT (Abuja)	25.6	3.1	23.9	9.7	62.3

On the other hand, the six states with lowest safe water status include Taraba (10.4 per cent), Bauchi (19.6 per cent), Enugu (21.8 per cent), Nassarawa (23.4 per cent), Bayelsa (23.7 per cent) and Benue (28.9 per cent). (See Table 2.1.3.1. in the Appendix).

### 2.1.3.2 Distribution of Household by Distance to source of water

More than five in every ten households (53.6 per cent) got water within 500 meters from the household, while it took 6.3 per cent of households 1 km or more to get water.

Disaggregating to states showed that in most of the states, more than half of the households fetched water within 500m from the household. States with highest percentage of households that had access to water within the dwelling include Kaduna (58.5 per cent), Zamfara (48.6 per cent), Kano (42.5 per cent), Katsina (38.0 per cent) and FCT (31.6 per cent). (See Table 2.1.3.2 in the Appendix).

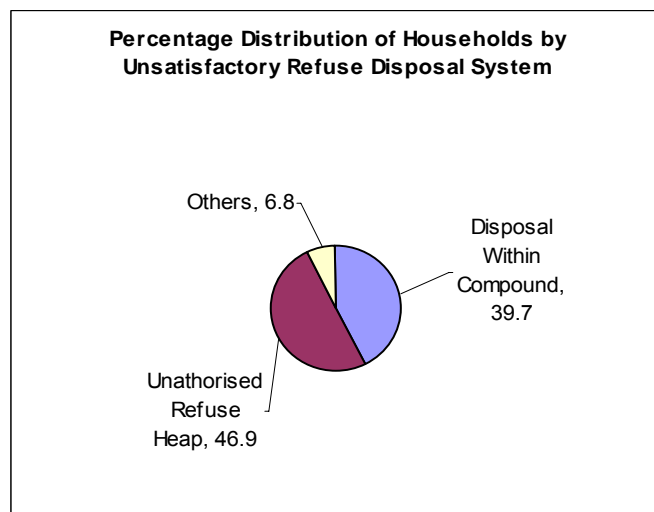

### 2.1.3.3 Distribution of Household by type of Refuse Disposal

Improper disposal of refuse generated by the households, apart from being aesthetically displeasing, can constitute health risks to human life which is in other words referred to as unsafe sanitation. Table 5 showed that 6.5 per cent of households used satisfactory refuse disposal method, while majority of the households (93.4 per cent) adopted unsatisfactory system to dispose their refuse.

Disaggregating to states showed that the six states that indicated highest use of household bin collected by government include Lagos (22.5 per cent), Cross River (14.5 per cent), FCT (9.9 per cent), Enugu (8.6 per cent), Sokoto (6.2 per cent) and Rivers (5.4 per cent). The five states that indicated highest use of unauthorized refuse heap include Ekiti (79.6 per cent), Niger (79.1 per cent), Adamawa (75.6 per cent), Taraba (73.8 per cent) and Osun (71.8 per cent). The five states that recorded highest disposal of solid waste within compound include Enugu (74.5 per cent), Katsina (73.5 per cent), Kebbi (72.7 per cent), Zamfara (68.8 per cent) and Sokoto (65.7 per cent) (See Table 2.1.3.3 in the Appendix).

**Table 5: Percentage Distribution of Refuse Disposal Method (National)**

<b>Satisfactory Refuse Disposal System</b>	<b>Percentage</b>	<b>Unsatisfactory Refuse Disposal System</b>	<b>Percentage</b>
Bin collected by government	2.2	Disposal Within compound	39.7
Bin collected by private agency	2.9	Unauthorized Refuse heap	46.9
Government bin/shed	1.4	Others	6.8
<b>Total</b>	<b>6.5</b>	<b>Total</b>	<b>93.4</b>

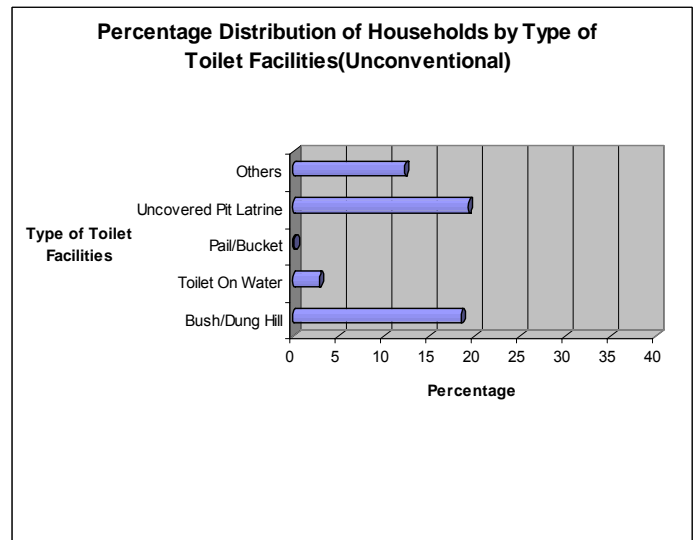

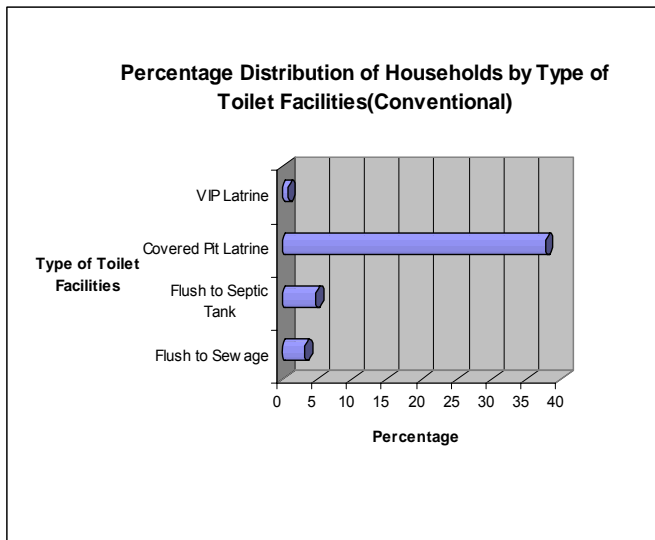

#### 2.1.3.4 Distribution of Household by Toilet Facilities

Conventional means of liquid waste disposal are the use of flush to sewage, flush to septic tank, covered pit latrine and VIP latrine. While the use toilet on water, pail/bucket, uncovered pit latrine and bush/dung hill constitute improper means. None availability of toilet facility in the household leads to the use of bush/dung hill.

Table 6 showed an improvement in the sanitation etiquette of Nigerians, compared to last survey year. More so, households that reported 'others' and were not definite on the use of toilet facilities recorded as much as 12.3 per cent. Majority of the households have adopted the use of covered pit latrine (37.8 percent). Distribution by states revealed that five states with highest use of covered pit latrine include Imo (64.5 per cent), Zamfara (58.6 per cent), Akwa Ibom (57.2 per cent), Anambra (54.1 per cent) and both Abia and Adamawa recording the same 52.7 per cent. Lagos reported highest sanitation discipline with 24.4 per cent of households using flush to sewage and 34.7 per cent of households using flush to septic tank. (See Table 2.1.3.4 in the Appendix.)

**Table 6: Percentage Distribution of Household by type of Toilet Facilities (National)**

Conventional Toilet	Percentage	Unconventional Toilet	Percentage
Flush to sewage	3.3	Bush/Dung hill	18.5
Flush to Septic Tank	4.9	Toilet on water	2.9
Covered Pit Latrine	37.8	Pail/Bucket	0.2
VIP Latrine	0.9	Uncovered Pit Latrine	19.3
		Others	12.3
<b>Total</b>	<b>46.9</b>	<b>Total</b>	<b>53.2</b>

### 2.1.3.5 Distribution of Household by Distance of Toilet Facilities to Dwelling

At the national level, majority of the households (40.9 per cent) still need to move within 500 metres before they could access toilet facilities and 37.4 per cent of the households reported that their toilet facilities were situated within dwelling.

Disaggregating to states showed that, states with highest percentage of access to toilet facilities in their place of dwelling were Kano (77.1 per cent), Katsina (83.3 per cent) Lagos (86.9 per cent), Kebbi (69.6 per cent), Niger (62.8 per cent) Anambra (56.6 per cent) and Imo (51.4 per cent). Five highest states with access to toilet facilities within 500 meters include Edo (85.5 per cent), Bayelsa (82.0 per cent), Akwa Ibom (81.3 per cent), Ebonyi (75.3 per cent) and Abia (70.6 per cent). Similarly, five highest states with households that moved as far as between 500m – 1km to access toilet facilities include Bauchi (69.7 per cent), Zamfara (62.7 per cent), Sokoto (62.3.per cent), Taraba (51.1 percent) and Kaduna (49.5 per cent). Benue state had the highest households (4.7 per cent) that needed to travel more than 1km before they could access toilet facilities. (See Table 2.1.3.5) in the Appendix).

### **2.1.3.6 Distribution of Household by Type of Housing Unit**

At the national level, majority of households (70.0 per cent) reported similar situation with that of last survey year that they live in single room. Twenty four per cent of households claimed to be living in whole building and only 0.4 per cent reported that they lived in duplex.

Disaggregating to states showed that the five highest states with households living in single room include Kebbi (97.5 per cent), Katsina (96.9 per cent), Plateau (93.3 per cent), Osun (89.9 per cent) and Kaduna (89.1 per cent). The states that reported highest residence in flat include FCT (23.4 per cent), Delta (16.0 per cent) and Lagos (15.9 per cent). On the households living in whole building, the five highest states include Ebonyi (79.6 per cent), Imo (77.6 per cent), Zamfara (70.6 per cent), Enugu (68.0 per cent) and Akwa Ibom (58.3 per cent). (See Table 2.1.3.6 in the Appendix).

### **2.1.3.7 Distribution of Household By Source of Fuel**

Fuel for cooking has an impact on environment with regards to pollution and a forestation. Table 2.1.3.7 revealed that more than four in every five households (82.3 per cent) resorted to the use of firewood for cooking at the national level, indicating similar pattern as with the last survey year. Almost fifteen per cent of households were using kerosene, while 0.5 per cent reported the use of gas cooker.

States disaggregation showed similar pattern of distribution, that the households in all the states were depending majorly on firewood for cooking, with the exception of Lagos that recorded the highest use of kerosene (88.6 per cent). Sector wise, similar pattern of use of gas cooker, kerosene and firewood were recorded for both rural and urban areas.

### **2.1.3.8 Distribution of Household Electricity Supply.**

Effective and efficient energy is the bedrock of economic and industrial development. Hence, government pays a lot of premium on its improvement. At the national level, 41.5 per cent of the households were using only electricity supplied by PHCN, 2.7 per cent were combining the use to energy supplied by PHCN with the use of generator. The state with highest use of combination of rural electrification and generator was Bayelsa. (See Table 2.1.3.8 in the Appendix).

### **2.1.3.9 Distribution of Household by Tenure Pattern**

At the national level, Table 2.1.3.9 revealed that at the majority of the households (41.2 per cent) lived in rented accommodation, followed by those who were residing in their own houses (38.8 per cent), while 13.7 per cent were living in their houses free of charge.

State-wise, the same pattern of distribution was shown. The five states with highest households living in rented accommodation were Bayelsa (59.6 per cent), Lagos (58.5 per cent), Niger (58.3 per cent), Abia (55.6 per cent) and Rivers (53.8 per cent). Similarly, the five states with highest households residing in owner occupier houses include Gombe (66.4 per cent), Akwa Ibom (66.3 per cent), Anambra (57.6 per cent), Imo (54.1 per cent) and Adamawa (53.3 per cent).

## **2.1.4 Household Income and Expenditure**

### **2.1.4.1 Distribution of Household Income**

At the national level, 31.7 per cent of the households earned income of between ₦10,000 and 19,999 in a month, while 30.1 per cent earned income of ₦5,000 to ₦9,999. Only 1.0 per cent of households earned income above ₦80,000 per month.

The states showed similar pattern of distribution. Five states with households that earned the highest percentage of monthly income between ₦10,000 and ₦19,999 include Gombe (50.5 per cent), Anambra (48.7 per cent), Akwa Ibom (44.7 per cent), Niger (40.8 per cent) and Sokoto (40.6 per cent). States with highest percentage of households that lived on less than ₦1,000 include Kebbi (25.4 per cent), Kwara (23.1 per cent), Benue (8.6 per cent), Nassarawa (7.9 per cent), Sokoto (7.7 per cent) and Bauchi (7.3 per cent). (See Table 2.1.4.1 in the Appendix).

### **2.1.4.2 Distribution of Household Expenditure**

Majority of the households spent less than N1,000 in the last one month before the survey on the various items listed on food. Of the total number of households surveyed, 52.7 per cent expended between N1,000.00 and N4,999.00 on food. The households that expended less than N1,000 in the last one month before the survey include school fees (53 per cent), medical expenses (73.9 per cent) House expenses (45.3 per cent), remittances (74.0 per cent), clothing (46.2 per cent), transport (53.8 per cent), food (7.2 per cent) and other expenses (58.9 per cent). Similarly, the households that expended between N10,000 and N19,999 in the last one month before the survey include school fees (3.6 per cent), medical expenses (1.0 per cent), house expenses (1.5 per cent), remittances (1.2 per cent), clothing (1.9 per cent), transport (1.0 per cent), feeding (10.0 per cent) and other expenses (4.1 per cent). (See Table 2.1.4.2 in the Appendix).

## **2.1.5 Education**

Government recognizes the rights of Nigerians to education and in particular, the child right to education, hence, the policy on Universal Basic Education (UBE). Education is an effective tool for combating poverty, empowering women, protecting children from hazardous and exploitative labour and sexual exploitation, promoting democracy, protecting the environment and influencing population growth.

### **2.1.5.1 Youth Literacy rate**

Youth literacy rate is defined as persons aged 15 to 24 years who can read and write in any language. Table 2.1.5.1 showed that 76.1 per cent of Nigerian youths are literate, males were more literate (81.3 per cent) than the females (70.7 per cent).

States with highest youth literacy rates include Lagos (96.7 per cent), Ekiti (96.3 per cent), Osun (95.8 per cent), Akwa Ibom (95.7 per cent) and Abia (95.5 per cent). Similarly, the states with low rates include Zamfara (19.8 per cent), Bauchi (42.0 per cent), Sokoto (42.8 per cent), Katsina (45.3 per cent) and Niger (48.4 per cent).

### **2.1.5.2 Adult Literacy Rate**

Adult literacy rate is defined as persons aged 15 years and above who can read and write in any language. The national figure showed adult literacy rate of 57.2 per cent. The result reflected more adult literate males (65.7 per cent) than females (24.3 per cent).

Disaggregating to states revealed that the states with highest literacy rate include Lagos (90.1 per cent), Akwa Ibom (84.5 per cent), Rivers (83.7 per cent), Bayelsa (81.0 per cent) and Gombe (80.1 per cent). Similarly, the states with lowest rate include Zamfara (17.5 per cent), Kebbi (19.6 per cent) and Katsina (23.1 per cent). (See Table 2.1.5.2 in the Appendix).

### **2.1.6 Employment**

Labour force is made up of all persons aged 15-64 years, excluding students, home keepers and persons who are incapacitated to work or not interested in work. Unemployment (ILO Version) is therefore defined as the proportion of Labour Force, available for work but did not do any work in the week proceeding the survey period for at least one hour. On the other hand, unemployment (Nigerian version) is defined as the proportion of Labour Force available for work but did not work in the week proceeding the survey period for at least 40 hours.

#### **2.1.6.1 Unemployment Rates**

The result of the survey showed that the national unemployment rate (ILO version) is 7.7, while that Nigerian version is 14.8

State wise, unemployment rate (Nigerian version) was highest in Rivers (66.4), FCT (47.8), Cross River (32.8), Imo (28.3) and Abia (25.1). The ILO version of unemployment rate was highest in Rivers (62.5), FCT (43.3), Cross River (24.7), Abia (19.5) and Kwara (14.1). (See Table 2.1.6.1 in the Appendix).

### **2.1.6.2 Distribution of Employed Persons by Hours of Work**

At the national level, table 2.1.6.2 showed that over 3 million out of the employed persons work for more than 56 hours per week, while more than 1 million persons work for between 48 and 56 hours in a week.

Sector wise, similar pattern was shown for both urban and rural areas. In the urban areas, 449,392 working persons put in above 56 hours per week, while 4,967 persons worked for 1- 15 hours per week. Rural areas showed similar features of distribution.

### **2.1.6.3 Distribution of Employed Persons by Industry, Sector and Gender**

The result of the survey showed that 5,586,397 persons were employed. Employment was highest in Agriculture, hunting and forestry (3,310,679 persons), followed by Wholesale and Retail trade (726,322 persons) while manufacturing had the least employment (3,418 persons).

Disaggregating to sector, employment in the rural areas were more (4,968,204 persons) as compared to the urban areas (618,194 persons).

Distributing to gender, more males (4,049,616 persons) were employed, while females employed were (1,536,782 persons). (See table 2.1.6.3 in the Appendix)

### **2.1.6.4 Distribution of Employed Persons in Voluntary or Social Work**

The result of the survey showed that 4,457, 690 persons were engaged in voluntary or social work which is in other words called Non-profit Institution. Engagement was highest in Religious Social work (1,666,390 persons), followed by those engaged in Development and Housing (1,069,553 persons). International Voluntary work engaged the least (1,596) number of persons.

Distributing to place of residence revealed that voluntary or social workers were engaged more in the rural areas (3,652,407 persons) than in the urban areas (805,283 persons).

Disaggregating to gender, more males (104,601 persons) were engaged in non-profit institution than females (21,536 persons).

Distributing to hours of work, highest number of voluntary workers (2,613,516 persons) put in below 15 Hours, followed by those who work for between 15 to 39 Hours (676,887 persons). (See able 2.1.6.4 in the Appendix).

### **2.1.7. Female Contraceptive**

Effort of the government is geared toward the attainment of the millennium development goals (MDG), one of which is the reduction of female mortality rate.

#### **2.1.7.1 Distribution of Pregnant Women by Clinic Registration and Anti-Tetanus Reception**

At the national level, 43.2 per cent of the pregnant women were registered at the clinic and 52.2 per cent of them received anti-tetanus injection. Apart from that, 12.5 per cent of the pregnant women that were registered did not visit the clinic in a month, while 37.4 per cent visited the clinic twice in a month.

Distribution to states showed that Kogi had the highest record of pregnant women (96.2 per cent) that were registered at the clinic. Among the registered pregnant women, Ekiti had the highest figure (85.7 per cent) of those that received anti-tetanus injection. (See Table 2.1.7.1 in the Appendix).

#### **2.1.7.2 Distribution of Women by Family Planning Method**

Table 2.1.7.2 showed that among the women who were in their productive age (15-49 years) that claimed to be currently using family planning, condom is the most popular method used. In the urban areas, 1.3 per cent of the women were using pill, while 2.6 per cent abstained from sexual intercourse to plan their family. Similarly, in the rural areas, 0.5 per cent of the women used withdrawal method to plan their family, while 2.1 per cent abstained from sexual intercourse. Gender distributions also follow the same pattern, but males were more than females using pill, while 2.6 per cent abstained from sexual intercourse to plan their family. Similarly, in the rural areas, 0.5 per cent of the women used withdrawal method to plan their family, while 2.1 per cent abstained from sexual intercourse

### **2.1.8 Health**

#### **2.1.8.1 Birth in the last 12 months**

During the last 12 months in Nigeria, distribution of birth showed that more male children were born (52.7 per cent) than female (47.3 per cent), indicating a similar pattern with last year's distribution.

State disaggregation showed that the five states that reported highest percentage of male live birth include Delta (80.1 per cent), Cross River (75.0 per cent), Jigawa (68.6 per cent), Gombe (68.2 per cent) and Taraba (65.7 per cent). On the other hand, the states which reported highest per centage of female live birth include Bayelsa (72.1 per cent), Kebbi (69.8 per cent), Ondo

(64.6 per cent), Benue (60.9 per cent) and Yobe (59.8 per cent). See Table 2.1.8.1 in the Appendix.

#### **2.1.8.2 Birth Weight of Children**

Weight at birth of a child is a function of diet and nutrition of the mother. Table 8 showed that at the national level, among the live birth, children that weighed between 3kg and 3.99kg were highest (53.5 per cent), followed by those that weighed between 2kg and 2.99kg at birth (22.2 per cent).

State distribution showed similar pattern, except for a few. The states with more children weighing 1kg – 1.99 kg include Adamawa (56.9 per cent), Bauchi (56.7 per cent), Borno (44.4 per cent), Imo (69.8 per cent), Katsina (58.8 per cent), Niger (69.1 per cent), and Rivers (61.2 per cent).

Disaggregation of weight at birth to zones showed that in North Central, Children that weighed between 2kg and 2.99kg were more (40.1 per cent). Children that weighed between 1kg and 1.99kg were more in the North East (41.1 per cent), while in North West, South East, South-South and South West, the children that weighed between 3kg and 3.99kg recorded highest figures. (See Table 2.1.8.2 in the Appendix).

#### **2.1.8.3 Children Immunization**

The immunization status showed that at the national level, 35.1 per cent of the children aged one year or less received Measles vaccination and 13.6 per cent of the children received BCG Vaccination. The result revealed that 6.0 per cent of the children had received at least one of the DPT Vaccinations and 13.1 per cent of the children had received at least one of the OPV Vaccinations. Children that had yellow fever vaccination recorded 2.3 per cent, 1.5 per cent had received MMR and 28.3 per cent of the children had received Vitamin A supplement.

Gender distribution showed similar pattern. (See Table 2.1.8.3 in the Appendix).

#### **2.1.8.4 Children Breast feeding**

Table 2.1.8.4 revealed that among Nigerian children who are less than one year old that had ever been breast fed, 31.4 per cent did not get colostrums (first yellow milk) because of the belief that the milk is bad, 34.2 per cent of the children did not get the milk because of the illness or weakness of the mothers, 0.3 per cent of the denial was due to the nipple or breast problem which the mothers had and 0.4 per cent was due to the fact that the mothers did not produce milk.

Disaggregation to states showed that large percentage of the children that did not received colostrums attributed the reasons to bad milk, mother illness or weakness and child illness or weakness.

#### **2.1.8.5 Death in the last 12 Months**

During the last 12 months in Nigeria, the result showed more male death (57.9 per cent) than female death (42.1 per cent).

Distributing to states, the result showed similar pattern of distribution for both males and females. (see Table 2.1.8.5 in the Appendix).

#### **2.1.9 Housing Project**

##### **2.1.9.1 Building Project Embark Upon**

At the national level, 96.3 per cent of the building projects started during last year (2006) were residential buildings, 1.7 per cent of the projects were for commercial purposes, while 1.9 per cent were for other purposes.

The same pattern of distribution was shown for the states. (See Table 2.1.9.1 in the Appendix).

##### **2.1.9.2 Distribution of persons by stage of completion of Building**

At the national level, highest figure of persons who started building projects reported the projects had reached window level (32.3 per cent), followed by lintel level (30.4 per cent), and foundation level (29.7 per cent). The result showed that 3.6 per cent of the people had completed the projects by the end of the year, while 4.0 per cent claimed that the projects had reached roofing level.

Distributing to states, the pattern of distribution was similar. The highest state with completion of projects includes plateau (42.0 per cent), Kebbi (38.5 per cent), Gombe (35.2 per cent), Kaduna (32.6 per cent) and Benue (30.1 per cent).

Disaggregating to place of residence revealed similar pattern of distribution for both urban and rural areas. (see Table 2.1.9.2 in the Appendix)

##### **2.1.10 Information and Communication Technology**

Information and communication technology play powerful and vital role in socio-economic development. Hence, the government policy on improved communication to further drive the privatization programmes.

#### **2.1.10.1 Distribution of ICT (Radio) by Household**

About 84.0 per cent of the households in Nigeria had access to radio among the households, 77.1 per cent had access through ownership, while 15.5 per cent of the households had no access at all.

Distributing to states revealed that households in Anambra had highest access to radio (92.5 per cent) and the states with next higher access include Niger (90.6 per cent), Gombe (88.7 per cent), Kebbi (88.2 per cent), Kaduna (87.1 per cent) and Bayelsa (86.5 per cent).

Sector disaggregation showed that urban households had higher access to radio (89.3 per cent) than those in the rural areas (83.0 per cent). Similar pattern of distribution was shown for ownership only and access only. (see Table 2.1.10.1 in the Appendix).

#### **2.1.10.2 Distribution of ICT (Television) by Household**

About 40.0 per cent of households in Nigeria had access to television, out of which 13.2 per cent only had access without necessarily owning them, while 27.2 actually owned the facilities.

State distribution showed that the five states that had highest household access to television include Lagos (90.2 per cent), Anambra (85.0 per cent), Bayelsa (79.4 per cent), Oyo (61.8 per cent) and FCT (75.3 per cent). Sector-wise, it was revealed that urban households had higher access to television (73.6 per cent) than those in the rural areas (30.3 per cent). The same pattern of distribution was shown for both ownership and access only (see Table 2.1.10.2 in the Appendix).

#### **2.1.10.3 Distribution of ICT (Fixed Telephone) by Household**

At the national level, 94.3 per cent of the households neither owned nor had access to fixed telephone, while 5.6 per cent had access. Among the households which had access, 4.9 per cent only had access without necessarily owning the facilities, while 0.7 actually owned them.

State distribution showed that Lagos had the highest access (59.5 per cent), followed by Anambra (23.4 per cent), FCT (23.1 per cent), Edo (17.0 per cent), Cross River (13.9 per cent) and Delta (13.5 per cent).

Sector disaggregation revealed that Urban households had higher access (16.6 per cent) than the rural households (2.4 per cent). The same feature was shown for ownership only and access only, indicating similar pattern with the previous year. (See Table 2.1.10.3 in the Appendix).

#### **2.1.10.4 Distribution of ICT (Mobile Telephone) by Household**

At the national level the result showed that 43.8 per cent of the households had access to mobile telephone. Among the households, 18.9 only had access to the facilities without necessarily owning them, while 24.9 per cent actually owned them.

State-wise, it was revealed, that Lagos had the highest access (91.8 per cent) to mobile telephone. The states which also had higher access include Anambra (90.3 per cent), FCT (73.2 per cent), Osun (75.5 per cent), Ekiti (72.6 per cent) and Bayelsa (69.8 per cent).

Sector distribution showed that the urban households had higher access (74.9 per cent) than their rural counterparts (34.4 per cent). Similar pattern of distribution was shown for ownership only and households which only had access without necessarily owning the equipments. (See Table 2.1.10.4 in the Appendix).

#### **2.1.10.5 Distribution of ICT (Personal Computer) by Household**

Nine in every ten households in Nigeria neither owned nor had access to personal computer, while 5.2 per cent had access. Among the households which had access, 4.6 per cent only had access without necessarily owning the equipments, while 0.6 actually owned them.

Disaggregating to states, FCT reported the highest access (30.7 per cent), followed by Lagos (30.6 per cent), Anambra (23.8 per cent), Cross River (17.6 per cent), Edo (14.1 per cent) and Delta (11.0 per cent).

Distributing to sector showed that urban households had higher access (14.7 per cent) to the equipments than rural households (2.4 per cent). Similar pattern of distribution was show for ownership only and access only. (See Table 2.1.10.5 in the Appendix).

#### **2.1.10.6 Distribution of ICT (Internet Service) by Household**

At the national level, 95.9 per cent of the households in Nigeria neither owned nor had access to internet services, while 4.0 per cent had access. Among the households which had access, 0.1 per cent actually owned the facilities, while 3.9 per cent only had access without necessarily owing them.

State-wise, Lagos had the highest access (23.1 per cent) to internet services, followed by Anambra (19.4 per cent), FCT (16.9 per cent), Cross River (16.3 per cent), Edo (14.1 per cent) and Delta (10.0 per cent).

Disaggregating to sector showed that urban households had higher access (12,1 per cent) than the rural households (1.6 per cent). Similar feature was shown for the household which only owned the facilities and those which has

access only without necessarily owning them. (See Table 2.1.10.6 in the Appendix).

#### **2.1.10.7 Distribution of ICT (Radio) by persons**

Nine in every ten persons (92.0 per cent) in Nigeria had access to radio, while 8.0 per cent neither had access nor owned the equipments. Among the population who had the access, 55.8 per cent actually owned, while 36.2 only had the access to the equipments without owning them.

Disaggregating to states showed that at least eight in every ten persons had access to radio. The states with the highest access include Lagos (98.1 per cent), Kaduna (97.9 per cent), Anambra (97.8 per cent), FCT (97.3 per cent) and Bayelsa (96.7 per cent).

Sector – wise, the result showed that the urban population had higher access (95.5 per cent) than those in the rural areas (91.1 per cent). Similar pattern was shown for those who actually owned radio. But among the population who only had access to the equipments without necessarily owning them, the rural residents had higher access (36.6 per cent) than those in the urban areas (34.7 per cent). (See Table 2.1.10.7 in the Appendix).

#### **2.1.10.8 Distribution of ICT (Television) by Persons**

In Nigeria 71.6 per cent of the persons had access to television, while 28.4 per cent do not have access or own them. Among the population who had access to television, 57.3 actually owned them, while 14.3 only had access but do not own them.

Distributing to states, it was shown that Lagos residents had access most (96.7 per cent) to television, followed by Anambra (94.9 per cent), Rivers (91.4 per cent), FCT (88.7 per cent) and Kaduna (88.5 per cent).

Disaggregating to place of resident showed that the urban population had higher access (88.5 per cent). Similar feature was shown for those who only had access but did not necessarily own the equipments and those who actually owned them. (See Table 2.1.10.8 in the Appendix).

#### **2.1.10.9 Distribution of ICT (Fixed Telephone) by persons**

Five in every ten Nigerians had access to fixed telephone. Among the population which had access, 18.1 per cent of the people actually owned the equipments, while 34.6 per cent only had access without necessarily owing them.

States disaggregation showed that Rivers residents had access most (87.1 per cent) to fixed telephone. The states with the next higher access include Katsina (81.0 per cent), Kaduna (79.2 per cent), Lagos (75.0 per cent), Ebonyi (72.5 per cent) and Zamfara (68.9 per cent).

Sector – wise, the result showed that the urban residents had higher access (55.6 per cent). Than those in the rural areas (52.0 per cent). Similar feature was shown for the population which actually owned the equipments and those who had access but do not really own them. (See Table 2.1.10.9 in the Appendix).

#### **2.1.10.10 Distribution of ICT (Mobile Telephone) by persons**

At least, seven persons in every ten Nigerians had access to mobile telephone. Among the population which had access, 50.1 per cent actually owned the equipments, while 22.0 only had access but do not really own them.

Distributing to states revealed showed that Lagos residents had access most to mobile telephone, followed by Anambra (95.2 per cent), Rivers (91.7 per cent), Osun (89.4 per cent), Kaduna (88.4 per cent) and Edo (88.2 per cent).

Disaggregation to place of resident showed that the urban residents had higher access (87.9 per cent) to mobile telephone than those in the rural areas (68.1 per cent). Similar feature was shown for those who had access without necessarily owning the equipments, while for those who actually own them, rural residents had higher access (50.8 per cent) than those in the urban areas (47.6 per cent). (See Table 2.1.10.11 in the Appendix).

#### **2.1.10.11 Distribution of ICT (Personal Computer) by persons**

At the notional level, 52.5 per cent of Nigerians had access to Personal Computers, while 47.5 per cent neither owned nor had access to them. Among the population that had access, 35.7 per cent do not necessarily own them, while 16.8 per cent actually owned the equipments.

Disaggregating to states. Abuja residents had the highest access (61.7 per cent) to personal computer, followed by Lagos (55.9 per cent), Anambra (54.7 per cent), Plateau (53.8 per cent), Gombe (53.2 per cent) and Benue (52.3 per cent).

Distributing to place of residence, urban residents had higher access to personal computers (54.3 per cent) than those in the rural areas, (52.0 per cent). Similar pattern of distribution was shown for those who had access but do not necessarily own the equipment. Rural residents had higher access through ownership (17.0 per cent) than those in the urban areas (15.9 per cent). (See Table 2.1.10.11) in the Appendix.

#### **2.1.10.12 Distribution of ICT (Internet Service) by Persons**

At the national level, 98.1 per cent of persons neither own nor had access to internet service, which 1.9 per cent of persons had access. Among the population which had access, 0.9 only had access without necessary owning them, while 1.0 per cent actually owned them.

Distributing to states, the states which had highest access include Lagos (15.0 per cent), Anambra (11.7 per cent), Delta (7.9 per cent) Edo (8.2 per cent) and Osun and FCT (Abuja) which both recorded 5.1 per cent.

**2.1.10.13 Distribution of Television Viewers by First Preference Station**

The result of the survey showed that at the national level, National Television Authority (NTA) was the highest first preferred station to the television views (48.9 per cent), followed by the state TV (22.4 per cent), AIT (7.5 per cent) and the other private stations.

Disaggregating to place of residence showed similar pattern of distribution for both urban and rural areas. Among the viewers who chose NTA as their first preferred station, the result showed that there were more viewers in the rural areas than those in the urban areas. Similar scenario was shown for the various State TV, and for those who viewed other stations not categorized. However, television viewers who watch the private own stations were more in the urban areas than in the rural areas. (See Table 2.1.10.13 in the Appendix).

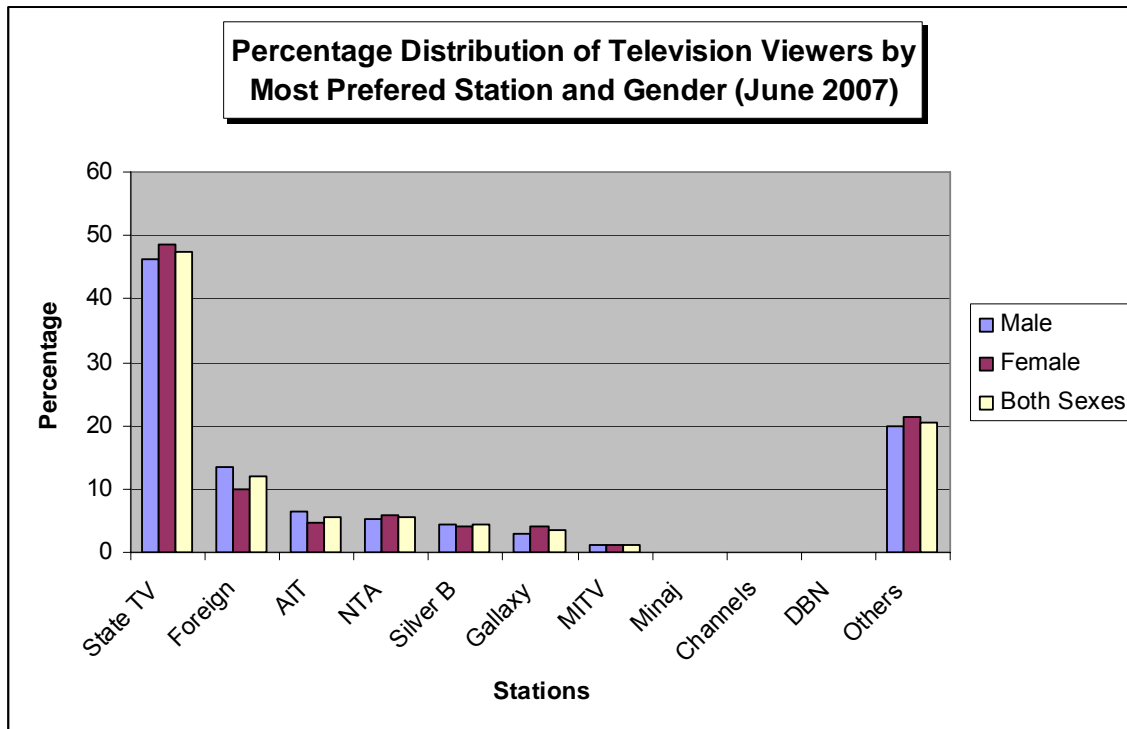

**Distribution of Television Viewers by Most Preferred Station**

The result of the survey showed that at the national level, television viewers preferred the state TV stations most (47.29 per cent), followed by other stations (20.57 per cent), foreign stations (11.89 per cent), AIT (5.6 per cent) and NTA (5.58 per cent)

Disaggregating to gender showed similar pattern of distribution. The most preferred television station by both male and female viewers was state TV, followed by others and foreign. (See Table 2.1.10.14 in the Appendix).

#### 2.1.10.14 Distribution of Number of ICT Equipments Owned

At the national level, the estimated numbers of ICT equipments owned by Nigerians were radio (9,666,207), Television (12,448,076), mobile telephone (799,130), fixed telephone (786,852), personal computer (627,934) and Internet-service (92,131).

Distribution to states, ownership of radio was highest in Lagos (1,402,642). Similar highest ownership in Lagos was recorded for television (2,625,424), mobile phone (123,523), fixed telephone (91,858), personal computer (27,577) and Internet service (5,465).

#### 2.1.10.15 Distribution of Owners of ICT Equipments by Number Owned and State.

At the national level, the estimated number of persons who owned ICT equipments were Radio (15,109,054), Television (12,448,076), Mobile phone (10,002,710), fixed phone (7.86,852), Personal Computer (627,934) and Internet Service (92,131). Majority of the owners of he equipments owned only are: Radio (97.5 per cent), Television (96.2 per cent), Mobile Phone

(94.7 per cent), fixed Phone (92.9 per cent), Personal Computer (87.6 per cent) and Internet Service (93.7 per cent). Lagos recorded the highest distribution to states, ownership of virtually all the equipments, followed by Oyo State. (See Tables 2.1.10.15 and 2.1.10.16) in the Appendix).

#### **2.1.10.16 Distribution of Persons who had Access to ICT Equipments by Source of Access**

The result of the survey showed the distribution of persons that had access radio (42,725,292), television (31,485,209), Mobile Phone (30,786,519), Fixed Phone (9,722,973), Personal Computer (5,336,858) and Internet Service (4,939,630). Access to Radio showed that majority of the persons (62.9 per cent) and (53.8 per cent) had access to radio and television respectively through family member of friend or neighbour. Access was highest to mobile telephone (32.5 per cent) through ownership and fixed telephone (23.3 per cent) through umbrella center. (See Table 2.1.10.17 in the Appendix).

### **2.2 PRIVATE FARMERS**

Private farmers are peasant farmers who use traditional methods in agricultural production. They are grouped into three namely: Crop, Livestock and Fish Farmers.

#### **2.2.1.1.1 Number of Persons Engaged in Agriculture**

Expectedly table 1 revealed that more persons are involved in farming activities during the second quarter of the year than any other quarter. Less farming activities took place in the fourth quarter.

In the first quarter of the year, about 37 per cent of the total persons engaged in farming activities are female, and they worked on the average of five days while their male counterpart who constituted 73 per cent worked for 6 days.. Of the total persons engaged in farming activities in this quarter, 23 per cent are working proprietors. 47 per cent are unpaid family members, a mere 2 per cent are apprentices while the remaining 28 percent are paid employees.

In the second quarter the percentage of female participation in agricultural I

about force dropped to 28 percent of the total persons engaged in agricultural activities.. The average number of days worked was five days for both male and female. The working proprietors in this quarter constituted 24 percent of

the total workforce. Unpaid family members were 39 percent while apprentice and paid employee constituted 4 and 33 percent respectively.

The trend in the third quarter is not radically different when compared with the immediate past quarter. The table recorded 32 percent of the workforce in the third quarter to be female, and the average number of days worked was five days for both male and female. The table also revealed that 23.8 percent are working proprietor, 42 percent are unpaid family workers, about 3 percent are apprentice while 31 percent constitute paid employee.

The fourth quarter result showed that 33 percent of the entire workforce in agricultural sector was female. The remaining 73 percent who are male, worked for seven days on the average during this period while their female counterpart worked for 5 days on the average. The working proprietors constituted 26 percent of the total work force in agricultural sector, 49 per cent are unpaid family members and 3 percent are apprentices. Paid employees were 22 percent.

On the whole, table 1 revealed that unpaid family member constituted the largest portion of agricultural workforce while very little number were apprentice.

### 2.2.1.2: Area and Production of Major Crops

The following crops are classified as major crops grown in Nigeria; Maize, Cassava, Rice, Melon, Cocoyam, Millet, Guinea Corn, Groundnut, Beans, Yam and Cotton.

Table 2.2.1.2 depicts that out of the major crops grown in Nigeria, maize had the largest land area cultivated with a figure of 4,670 thousand hectares followed by Guinea Corn 4,578 thousand hectares and Millet 4,270 thousand hectares while land area cultivated for Cotton 222 thousand hectares and Melon 200 thousand hectares.

In terms of production, Cassava topped with 38,041 metric tons next was Yam 28,280 metric tons while Melon was at the bottom of the ladder with 371 metric tons and Cotton 516 metric tons.

**Table 2.2.1.2: Area and Production of Major Crops (National) 2006**

Crop	Area (‘000’ hectare)	Production (‘000’ tonnes)
	2006	2006
Millet	4,270	5,940
Guinea Corn	4,578	6,474
Ground Nut	1,666	3,062

Beans	3,098	3,770
Yam	1,696	28,280
Cotton	222	516
Maize	4,670	7,023
Cassava	2,659	38,041
Rice	1,526	3,333
Melon	200	371
Cocoyam	513	2,220

**Table 2.2.1.3 Farm gate prices (Major crops).**

Table 2.2.1.3 showed the farm gate prices of major crop grown in the country for 2006/2007 survey year. It revealed that Beans stood at ₦22.26 per kg, Cassava (₦ 20.01per kg), Cocoyam (₦ 16.71 per kg), Ground nut at ₦ 24.09 per kg and Millet at ₦ 19.79 per kg.

**NOTE**

Table 2.2.1.2: Area and Production of Major Crops (National) 2006 and

Table 2.2.1.3 Farm gate prices (Major crops) were not generated from the survey result.

**2.2.1.4: Distribution (absolute) of Crop farmers by Market channel and state 2006.**

The survey result indicated that most crop farmers disposed their farm products (produces) through open market with a total figure of 6,964,721holders, followed by “On the farm” (1,196,269) and “direct to industry” accounted for 112,513holders.

For open market, Kano state (622,456) topped the list, followed by Benue state (432,736) and Bayelsa state (28,949) was the least number.

**2.2.1.5: Distribution (absolute) of Crop farmers by Problems encountered during storage and by state, 2006.**

It was shown that 5,220,611holders indicated termites and insects as the problem encountered during storage; lack of modern method of storage was 5,191,883 holders, 3,880,591 holders indicated inadequate storage facilities and 2,553,568 holders mentioned stealing as a problem.

For lack of modern method of storage, Kano state accounted for 441,136 holders, followed by Bauchi state (325,316) and Lagos state (3,091) was the least figure.

**2.2.1.6: Distribution (absolute) of Crop farmers by Problems encountered during**

**production process and by state, 2006.**

Table 2.2.1.6 showed that five problems in production process were commonly enumerated by crop farmers: lack of funds (7,014,060 holders); lack of credit facilities (6,191,704); lack of encouragement from government

(5,735,857); lack of modern methods/equipment (5,699,853) and lack of infrastructure (5,119,706).

For lack of funds, Kano state (593,217 holders) led the list, followed by Kastina state (428,856), Bunue state (411,478) and Bayelsa state (29,393) was the lowest.

**2.2.1.7(a): Distribution of crop farm by access to any ICT facility by state, 2006.**

In this era of IT awareness crop farmers are not left behind in the quest for use of this laudable technology. The table showed that many farmers have access to the use of most of the covered IT equipment from radio to even the use of website. The table revealed that 7,893,248 (58.82%) of Nigerian farmers had access to radio, followed by farmers that had access to telephone (mobile) with 2,702,264 (20%). The total of 2,373,273 (17.69%) had access to television. Farmers that had access to personal computer were 140,391 (1.0%). Those that had access to internet were 95,095 (0.7 %).

**2.2.1.7(b): Distribution of crop farmers by possession of any ICT facility by State, 2006.**

The table showed that 7,353,507 (72.71 %) of crop farmers possessed their own radio. Also 1,454,247 (14.38 %) of crop farmers had Television. It showed that 1,130,928 (11.2 %) of crop farmers had Telephone (mobile). Only 66,020 (0.7 %) had fixed Telephone. Farmers who possessed personal computers were 52,274 (0.52 %).

**Table 2.2.2.1 Distribution of Livestock Farmers By Source And Type of Input, 2006**

ITEM	MINISTRY EXTENTION		AGRO-SERVICE CENTER		FARM-SERVICE CENTER	
	Number	%	Number	%	Number	%
LIVESTOCK FEEDS	105,730	28.9	31,270	22.6	53,984	24.6

**Table 2.2.2.1 Distribution of Livestock Farmers By Source And Type of Input, 2006 (Contd)**

ITEM	COOPERATIVE SOCIETY		LOCAL MARKET		OTHERS	
	Number	%	Number	%	Number	%
LIVESTOCK FEEDS	36,682	14.0	4,046,027	51.4	1,591,276	59.7
PULLET MASH	27,791	10.6	789,158	10.0	216,339	8.1
GROWERS MASH	25,791	9.8	776,573	9.9	202,352	7.6
LAYERS MASH	35,169	13.4	692,987	8.8	163,369	6.1
BROILERS MASH	39,909	15.2	373,090	4.7	82,320	3.1
OTHER POULTRY FEEDS	41,981	16.0	670,663	8.5	296,934	11.1
DAY OLD CHICKS	29,110	11.1	300,704	3.8	72,551	2.7
ELECTRICITY/STOVE	25,463	9.7	222,920	2.8	39,892	1.5

About 59.7 per cent of livestock farmers sourced their input from other services as against 51.4 per cent who sourced from local market. Only 14.0 per cent got their input from Cooperative Society.

Farm service Centre supplied 22 per cent of pullet mash required by farmers, Agro-service Centre supplied 17.2 per cent, while 16 per cent was from Ministry/Extension Services.

11.1 per cent of Day-old chicks was sourced from Cooperative Society; 7.2 per cent from Agro-service Centres and 5.4 per cent from Ministry/Extension. See Table 2.2.2.1 for more details.

**Table 2.2.2.3. NUMBER OF PERSONS ENGAGED IN LIVESTOCK FARMING BY SEX AND TYPE 2006**

PERSONS ENGAGED	MALE		FEMALE		TOTAL
	NUMBER	%	NUMBER	%	NUMBER
WORKING PROPRIETORS	15,280,013	80.86	3,615,854	19.14	18,895,867
UNPAID FAMILY MEMBERS	17,755,742	58.16	12,772,368	41.84	30,528,110
PAID EMPLOYEES	3,068,255	72.12	1,186,067	27.88	4,254,322
APPRENTICES	753,137	62.20	457,687	37.80	1,210,824
<b>TOTAL</b>	<b>36,857,147</b>	<b>67.15</b>	<b>18,031,976</b>	<b>32.85</b>	<b>54,889,123</b>

A total of 54 million persons were engaged in livestock farming in 2006. 36 million were males (67.15 per cent) and 18 million (32.85 per cent) females. Majority of people working on livestock keeping are working proprietors (80.86 per cent), this was closely followed by paid employees (72.12 per cent). About forty-two per cent females working on livestock are unpaid family members, 37.80 per cent were apprentices, while working proprietors was 19.14 per cent

Wages as a variable was not adequately captured by the questionnaire. Hence it was left out in the final tabulation.

#### 2.2.2.4

The survey result revealed an initial Livestock population of 64 million which rose to 83 million (77.35 per cent) increase and Poultry (All Birds) also increased from 65 million to 82 million (78.56) at the end of 2006 Agricultural season. Goats constituted about 56.31 per cent of all livestock, followed by sheep 24.34 per cent and cattle 15.17 per cent. Net addition rates among livestock were as follows cattle 22 per 100,000, Goat 361 per 100,000 and sheep 156 per 100,000. The corresponding rates for poultry were: Chicken 474 per 100,000, Guinea fowl 38 per 100,000 and Duck 20 per 100,000.

**Table 2.2.2.4 Stocks and changes in stocks of livestock by type, 2006**

<b>LIVESTOCK/POULTRY DESCRPTION</b>	<b>Initial population</b>	<b>Number born</b>	<b>Number bought</b>	<b>Number slaughtered</b>	<b>Number dead</b>	<b>Number sold</b>	<b>BALANCE</b>

**Table 2.2.2.5 Dairy Products: Quantity and Value by type 2006**

<b>DAIRY PRODUCTS</b>	<b>QUANTITY PRODUCED</b>	<b>VALUE OF PRODUCT ₦</b>
EGGS (CRATES)	10,694,534	3,071,171,681
MILK (LITRES)	8,068,053	437,157,468
CHEESE (KG)	516,671	226,159,127
BUTTER (KG)	1,633,750	97,931,885
OTHER DAIRIES	14,947	1,186,265
<b>TOTAL</b>		<b>3,833,606,426</b>

Output of eggs for the 2006 Agricultural year was 10,694,534 crates valued at ₦3,071,171,681. The corresponding figures for other product were milk (Litres) 8,068,053, Butter (kg) 1,633,750 with ₦437,157,468 and ₦97,931,885 as values respectively. The total value of all Dairy product was ₦3,833,606,426.

**Table 2.2.2.6. Prices of Livestock by Type 2006**

	<b>APRIL – JUNE 2006 1<sup>ST</sup> QUARTER</b>	<b>JULY – SEPT 2006 2<sup>ND</sup> QUARTER</b>	<b>OCT-DEC 2006 3<sup>RD</sup> QUARTER</b>	<b>JAN-DEC 2007 4<sup>TH</sup> QUARTER</b>
	<b>₦'000</b>	<b>₦'000</b>	<b>₦'000</b>	<b>₦'000</b>
Cattle (No)	35,172.29	33,063.53	38,364.56	36,164.77
Goat (No)	4,210.50	4,247.75	4,684.41	4,706.13
Sheep (No)	5,205.35	5,499.96	5,783.87	5,617.30
Pig (No)	6,087.17	6,712.02	6,993.61	5,806.09
Camel (No)	15,670.58	13,977.80	18,503.62	21,889.75
Other Animals	1,969.34	846.56	1,403.30	2,335.97
Chicken (No)	700.94	636.52	810.23	723.53
Guinea Fowl (No)	908.85	897.03	1,255.78	1,126.31
Duck (No)	1,022.37	1,496.02	1,488.44	1,582.17
Turkey (No)	7,152.68	5,812.94	4,152.08	2,080.87
Other Birds (No)	554.55	332.05	350.00	
Eggs (crate)	362.82	342.25	369.34	405.24
Milk (Litre)	424.27	389.66	370.80	438.61
Cheese (Kg)	337.80	422.69	371.03	252.71
Butter (Kg)	390.25	266.51	361.87	388.19
Other Dairies	312.22	248.73	460.63	

The table 2.2.2.6 shows that an average cattle was sold for N35,000 in the first quarter which dropped to N33,000 in the second quarter and rose to N38,364 in the third quarter and drop to N36,000 in the fourth quarter prices of Goat for the four quarters was N4,210, N4,247, N4,684 and N4,706 respectively.

A chicken sold for N700, N636, N810 and N723 respectively for the four quarters. For more details (See table 2.2.2.6.)

**Table 2.2.2.7 Funds Committed to Livestock Farming by Source 2006**

Source	Amount	%
Own Funds	79,485,964,111	90.46
Retained Profit	4,804,717,516	5.47
Short Term Private Loan	261,338,403	0.30
NACRDB	365,285,044	0.42
Banks	196,737,531	0.22
Others	2,753,821,249	3.13
<b>Total Funds</b>	<b>87,867,763,854</b>	<b>100</b>

About N79 billion was committed to Livestock Keeping, this represents 90.46 per cent of the total funds. Kano State topped the list of Livestock Keepers who committed their own funds to Livestock Keeping N18.5billion. Funds from all sources for Livestock Keeping in 2006 was N87.9 billion. (See Appendix for more details.

<b>Table 2.2.2. 8 Number Of Livestock Processing Facilities By Type And Capacity,2006</b>		
	<b>AVAILABLE CAPACITY</b>	<b>UTILIZED CAPACITY</b>
	536527.2682	439937.9194
Refrigerators	102711.9534	89835.52168
Smoking kiln	211333.7716	155867.2832
Dairies	32205.84938	23598.52857
Others	112731.0665	89044.87152
<b>Total</b>	<b>995509.9091</b>	<b>798284.1244</b>

The total number of livestock processing facilities was 9.9 million of which Abattoirs Refrigerators, Smoking Kiln, Dairies and others represent 53.9, 10.3, 21.2, 3.2 and 11.3 per cent respectively. Based on the available capacity and utilized capacity figures of the various livestock processing facilities, refrigerators recorded the highest capacity utilization rate of 82.0 per cent followed by abattoirs (82.0 per cent). While dairies recorded the lowest of 73.3 per cent. The average capacity utilization rate for all the livestock processing facilities stood at 79.1 per cent.

**Table 2.2.2.9 Distribution Of Livestock Farmers By Market Channel, 2006**

<b>WHERE DO YOU SELL YOUR LIVESTOCK PRODUCE</b>		<b>%</b>
In the farm	558,090	6.8
In the neighbourhood	1,667,083	20.4
In the Open market	5,518,488	67.4
In the cooperative society	113,797	1.4
Direct to the industry	68,352	0.8
Others	262,049	3.2
<b>Total</b>	<b>8,187,859</b>	<b>100</b>

Table 2.2.2.9 showed that out of the total farmers surveyed 67.4 per cent of the farmers sold their livestock products in the open market while 20.4, 6.8, 1.4, 0.8 and 3.2 per cent sold in the neighborhood, farm, cooperative society, to the industry and others, respectively. The corresponding figures for the market channels are 558,090 (Farm), neighborhood (1,667,083) 5,518,488 (Open Market), 113, 797 (cooperative Society) 68,352 (Industry) and 262,049 (others).

**Table 2.2.2.12: Distribution of Livestock Farmers by Problems Encountered in Purchasing livestock inputs, 2006**

<b>PROBLEMS</b>	<b>NUMER</b>	<b>%</b>
Too costly/High cost	3,582,431	23.0
Lack of Fund (Money)	4,443,854	28.5
Don't know where to obtain	1,320,429	8.5
Not available	1,209,240	7.7
Scarce	816,467	5.2
Lack of Transport	1,596,891	10.2
Bad road	1,809,512	11.6
Others	828,374	5.3

Lack of funds (money) constituted 28.5 per cent of the major problem of livestock farmers in purchasing livestock input. This was closely followed by high cost of inputs 23.0 per cent and bad road 11.6 per cent. Lack of transport also constituted problems faced by livestock farmers.

**Table 2.2.2.13: Distribution of Livestock Farmers By Government Assistance Required 2006**

<b>ASSISTANCE REQUIRED</b>	<b>NUMBER</b>	<b>%</b>
Credit	6,693,335	31.8
Grazing Land	3,329,218	15.4
Input	4,279,866	20.4
Infrastructure	4,359,084	20.7
Others	2,452,841	11.7
<b>Total</b>	<b>21,024,345</b>	<b>100</b>

A total of 6 million farmers (31.8 per cent) required Credit (Loan) from Government to assist them in livestock farming, 20.7 per cent or 4.4 million required Infrastructure such as roads, water, transport and equipment while 20.4 per cent or 4.3 million required Government to assist them in livestock input. A sum of ₦21million was the total assistance needed by livestock farmers from Government.

**Table 2.2.2.14: Distribution of Livestock Farmers by Ways that can Improve Livestock Activities 2006**

<b>SUGGESTION</b>	<b>NUMBER</b>	<b>%</b>
Improved Credit facilities	3,373,351	25.9
Improved Storage facilities	2,340,911	18.0
Improved Processing facilities	2,505,748	19.3
Good price policy	2,540,327	19.5
Damming	1,297,182	10.0
Others	958,837	7.4
<b>Total</b>	<b>13,016,357</b>	<b>100</b>

To further improve livestock farming activities, 25.9 per cent or 3.3 million farmers suggested improved credit facilities, 19.5 per cent or 2.54 million wanted good price policy while 19.3 per cent or 2.5 million would like improved processing facilities. A total of 13 million farmers responded.

**Table 2.2.2.15: Distribution of Livestock Farmers by Problems Encountered During Marketing**

<b>PROBLEM</b>	<b>NUMBER</b>	<b>%</b>
Far distance	3,159,300	13.6
Transportation cost	4,855,012	21.0
Bad road	4,831,827	20.9
Low price	4,891,637	21.1
Scarcity of Transport	3,484,814	15.0
Others	1,950,664	8.4
Total	23,173,320	100

Low price was the major problem faced by livestock farmers for which 21.1 per cent responded positively (4.9 million people); next to that was transportation cost which accounted for 21 per cent or (4.8 million people) while bad road was the problem faced by 20.9 per cent of livestock farmers (4.8 million people). The Table 2.2.2.15 shows details.

**Table 2.2.2.16a Distribution of Livestock Farmers by Access and Ownership of Information and Communication Technology Facilities**

STATE	ACCESS TO RADIO					
	ACCESS	OWNER SHIP	TOTAL	NO ACCESS	NO OWNERSHIP	TOTAL

**No of Fish Farmers: 92,562 or 4.96%**

**No of Fish Hunters: 1,775,174 or 95.04%**

There are two categories of fishermen, the fish farmers and the fish hunters. The fish farmers are those who cultivate fish in ponds, tanks etc. They spend their resources in fish cultivation. The survey revealed that out of a total of 1,867,736 fishermen interviewed, 92,562 or 4.96 per cent practiced fish cultivation while 1, 775,174 or 95.04 per cent are fish hunters. These are fishermen who hunt for fish in the stream, River, Lake, Ocean or others.

Fish cultivation is more prevalence in Ondo State with a total of 37,268(40.26 per cent) fish cultivators, closely followed by Yobe State 31,661 (34.23 per cent) and Jigawa State 9614 (10.39 per cent).

Edo State hunts fish more in stream, 191,596 (55.2 per cent) and River State 247,432 (23.8 per cent) as against Akwa-Ibom State who does fishing in the ocean 60,886 (48.3 per cent). Kogi State had interest in fishing in the Lake 68533 (26.4 per cent)

### 2.2.3.2: Number of Persons Engaged in Fish Farming by Sex, 2006

The number of Males engaged in fish farming in 2006, showed a quarterly increase from 443,857 to 507,457 in the second quarter with a drop to 451,285 in the third quarter and rose to 490,519 in the fourth quarter.

The same pattern featured in the number of women engaged in fish farming, from 99,013 in the first quarter to 123,709 in the second quarter and a slight drop to 122,830 in the third quarter with a steady growth to 141,046 in the fourth quarter.

### 2.2.3.3 Distribution of Household by POND Capacity 2006

The figures showed a decline from 53,244,937 to 35,442,617 (66.56%) and others from 654,751 to 486,256 (74.26%).

**Table 2.2.3.3 Distribution of Household by POND Capacity 2006**

ITEM	AVAILABLE CAPACITY	UTILIZED CAPACITY
Fresh Fish	53244937	35442617
Shrimps	0	0
Other	654751	486256

### 2.2.3.4 Quarterly Fish Production by Type

Inland Rivers and Lakes were the major source of fish production that was popular. They accounted for 257,386,211 in the first quarter, 211,628,506 in the second quarter, 195,332,184 in the third quarter with a higher production of 548,025,669 in the fourth quarter. This was closely followed by Coastal and Brackish water.

**Table 2.2.3.4 Quarterly fish production by type**

ITEM	Qtr1	Qtr2	Qtr3	Qtr4

### 2.2.3.5: Distribution of Fish Holdings by Source of Input

Majority of fish cultivators collect their input from Ministry and extension services 21780 (50.0 per cent) and Local Markets 107068 (25.8 per cent). Fish feeds are also sourced from Ministry and Extension Services 21780 (50.0 per cent) and others 47,131(45.6 per cent).

Fertilizer were sought from service centre 14,0761 (80.5 per cent) while water treatment chemical and poultry droppings are from the Local Market 3256 (8 per cent) respectively.

**Table 2.2.3.5: Distribution of Fish Holdings by Source of Input**

### 2.2.3.6 Quantity of Fish Sold by Type and Quarters With Value

Fresh fish accounted for the highest sale of fish produced in 2006. The quantity increased from the first to fourth quarter, while value also increased marginally except for the second quarter when the value decreased from N12,843,476,097 to N11,118,417,766. See table for details.

**Table 2.2.3.6. Quantity of Fish Sold by Type and Quarters with Value**

Canoes	3,601,155	159,547,009,370
Others	532,922	613,166,994

\*Quantity is in number unless otherwise stated.

Table 2.2.3.7 shows the total expenditure on each item of fish production and their quantity. Fishing net accounted for N71, 341,402,478 which was the highest. A total sum of N14, 026,981,998 was expended on outboard engines as against ₦11, 267,863,613 spent on purchase of lead sheets. The survey result also showed that ₦159, 547,009,370 was the amount of canoes bought (3,601,155).

### 2.2.3.8. Sources of Funds

**Table 2.2.3.8. Sources of Funds, 2006**

ITEM	AMOUNT ₦
Own Funds	28,336,555,514
Retained Profit	7,315,652,685
Short-Term Private Loan	1,732,028,670
NACRDB	158,838,439
Other Banks	0
Social Capital	1,006,340,193
Others	648,797,285
Total	39,198,212,785

The total amount of funds from all sources of ₦39.19 billion.

Own funds accounted for highest source of funds in fishing production N28,336,555,514 (72.29%) which was followed by retained profit N7,315,652,685 (18.66 per cent) and short-term private loan N1,732,028,670 (4.42 per cent). NACRDB contribution to Agricultural funds was N158,834,439 (0.41 per cent). Funds were not available from other banks.

**Table 2.2.3.9. Fish Processing Facilities Available and Utilized Capacity (KG) 2006**

ITEM	AVAILABLE CAPACITY	UTILIZED CAPACITY	% UTILIZATION
Smoking Kiln	6564924	5171077	78.77
Canning	46619	29109	62.44
Ice Block Plants	126788	65606	51.67
Others	533780	428220	80.22

Based on the table, Others had the highest capacity utilization (80.22 per cent) this was closely followed by smoking kiln 78.77 per cent and canning 62.44 per cent.

**Table 2.2.3.10: Storage Facility: Available and Utilized Capacity (KG) 2006**

Refrigerator	20,054	17,205	85.79
Warehouse	184,464	82,663	44.81
Store	671,726,572	2,185,260	0.33
Others	417,463	363,014	86.96

Refrigerators were highly used for fish storage 85.79 per cent. Capacity utilization was also high for others storage facilities 86.96% as warehouse utilization was 44.81 per cent.

**Table 2.2.3.11 Distribution of Fish Farmers by Market Channel 2006**

	<b>NUMBER</b>	<b>%</b>
At the Fish sites	1,238,902	19.9
In the open Market	1,248,475	20.0%
In the Cooperative Society	1,248,475	20.0%
Direct to the Industry	1,256,807	20.1%
Others	1,248,475	20.0%

Fish are usually sold direct to industry (20.1 per cent). It was observed that sale of fish in the open market, to cooperative society and others are relatively stable at 20.0 per cent respectively.

**Table 2.2.3.12 Comparison of 2006 and 2005 Fishing Seasons, 2006**

<b>ITEM</b>	<b>BETTER</b>	<b>SAME</b>	<b>WORST</b>	<b>DON'T KNOW</b>
Weather	750,118	246,681	56,635	230,315
Production/Output	791,856	193,631	101,648	196,311
Income	727,145	335,742	148,399	83,929
Price	685,551	435,968	69,612	42,884

The survey showed that production/output was better in 2006 than 2005. Also the weather was favourable for Agricultural production In 2006.

**Table 2.2.3.13: Expectation for the Next Fishing Season, 2006**

<b>ITEM</b>	<b>BETTER</b>	<b>SAME</b>	<b>WORST</b>	<b>DON'T KNOW</b>
Weather	930669	70,455	6,402	724,064
Production/Output	978812	96,045	4,326	678,063
Income	996782	225,451	63,328	478,863
Price	977951	219,654	47,144	524,411

Farmers are expecting increase in income and production in the next season. They also anticipate a rise in the prices of their commodity with a favourable weather.

**Table 2.2.3.14: Distribution of Household by Way of Suggestion to Improve Fishing Activities in the Country, 2006**

ITEM	NUMBER	%
Credit	1,214,269	40.6
Input	636,102	21.3
Infrastructure	845,796	28.3
Others	292,297	9.8

About 40.6 per cent households on fish farming requires credits to improve fishing activities, 28.3 per cent wants better infrastructure while 21.3 per cent wants input.

**Table 2.2.3.15: Distribution of Problems Encountered when Purchasing Fishing Tools, 2006**

ITEM	NUMBER	%
High Cost	930,912	37.6
Scarcity	281,740	11.4
Lack of Transportation	411,134	16.6
Far Distance	630,042	25.5
Others	221,458	8.9

From the table, it is obvious that fishermen had problem of high cost of fishing tools in 2006, this is closely followed by distance 25.5 per cent and lack of transportation (16.6 per cent)).

**Table 2.2.3.15a: Distribution of Households by Problems Encountered During Production Process 2006.**

ITEM	NUMBER	%
Lack of Transport	581,178	21.4
Needs on the Sea	728,989	26.9
Too much Rain	443,944	16.4
Distance to Site	619,490	22.9
Others	335,854	12.4

About twenty seven per cent Households encountered weeds on the sea as problems in 2006 during production process. Distance to site, lack of transport and rain affected production process.

**Table 2.2.3.16 Distribution of Household by Problems Encountered During storage Process 2006**

Item	Number	%
Obsolete Equipment	508,907	21.3
Lack of Electricity	648,266	27.1
Lack of Funds	893,565	37.4
PESTS	164,276	6.9
Others	173,754	7.3

Lack of funds (37.4 per cent), electricity (27.1 per cent) and obsolete equipment (21.3 per cent) are the problems encountered during storage process in 2006.

**Table 2.2.3.17 Distribution of Household by Problems Encountered During Marketing 2006**

Item	Number	%
Distance to Market	609,244	17.2
Poor road Network	664,435	18.8
High Cost of Transport	798,986	22.6
Poor Pricing Policy	535,629	15.1
No Government Support	662,139	18.7
Others	269,035	7.6

High cost of transport (22.6 per cent), no Government support (18.7 per cent) and poor road network (18.8 per cent) were problems encountered by households when marketing Agricultural produce.

The table shows that 76.8 per cent of those interviewed had access to Radio with majority of the farmers having access to ICT. It was observed that a new trend of people using ICT facilities has increased tremendously, this is a welcome development.

Only in Niger State that we had positive response of those who have access to Intranet and Website. Many of those interviewed owned one form of ICT or more. The degree of ownership of ICT facilities has improved greatly among the People. Ownership of Intranet, Website and Personal Computers were reported in Niger State only. For further details see appendix.

## Chapter Three

### NATIONAL INTEGRATED SURVEY OF ESTABLISHMENTS

#### 3.1 WHOLESALE AND RETAIL TRADE

**Table 3.1 Wholesale and Retail Trade**

Item	1 <sup>st</sup> Half 2006	2 <sup>nd</sup> Half 2006
No. of Persons Engaged	1,939,076	1,981,389
No. of Operatives	17,389	18,162
Emolument of Employees (N'000)	9,412,065	9,609,840
Cost of Goods Sold (N'000)	85,231,031	108,434,029
Value of Sales (N'000)	175,146,003	194,099,680
Gross Margin (N'000)	89,914,972	85,665,660
Cost of Operation (N'000)	88,114,172	93,020,435
Total Working Capital (N'000)	29,823,335	29,176,783

#### MONETARY ITEMS ON WHOLESALE AND RETAIL TRADE

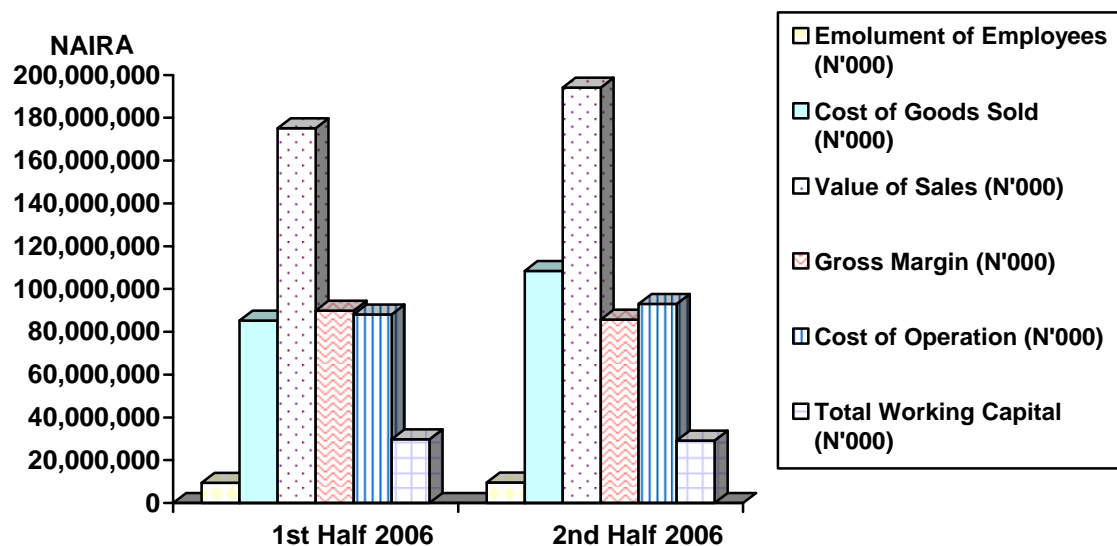

Figure 3.1

### 3.1.1 **Number of Persons Engaged**

Table 3.1 shows that the number of persons engaged (1,939,076) in first half 2006 increased marginally by 2.18 per cent in the second half 2006, to 1,981,389 persons.

The number of operatives also recorded a marginal increase of 4.45 per cent from 17,389 in the first half 2006 to 18,162 operatives in the second half of the same year.

### 3.1.2 **Emolument of Employees**

A total amount of about N9.41 billion for first half 2006 as against N9.61 billion for second half of the same year was paid to employees. This indicates that there was 2.13 per cent increase in the emolument of employees from first half to the second half of the same year.

### 3.1.3 **Cost of Goods Sold**

In Table 3.1 above, the cost of good sold in the first half of 2006 was about N85.23 billion while that of the Second half 2006 was about N108.43 billion, indicating an increase of about 27.22 per cent in the same year.

### 3.1.4 **Value of Sales**

The value of sales in the first half and Second half of 2006 were N175.14 billion and N194.10 billion respectively. This indicates an increase of 10.83 per cent.

### 3.1.5 **Gross Margin**

In Table 3.1 above N89.9 billion was recorded in the first half of 2006 as gross margin while that of Second half 2006 was N85.67 billion. This indicates a decrease of 4.72 per cent.

### 3.1.6 **Cost of Operation**

The cost of operation was ~~N~~88.11 billion for first half of 2006 and ~~N~~93.02 billion for the second half of the same year. This indicates a percentage increase of 5.57 per cent.

### 3.1.7 **Total Working Capital**

The working capital decreased, marginally from ~~N~~29.82 billion in the first half to ~~N~~29.18 billion in the second half of the same year. This shows a percentage decrease of 2.15 per cent.

## 3.2 HOTELS AND RESTAURANTS

Table 3.2: Hotels and Restaurants

Item	1st Half 2006	2nd Half 2006
Employment	61,468	67,874
Emolument (₦'000)	4,731,934	5,621,890
Income from Accommodation: Nigerian Guests (₦ '000)	30,439,178	32,542,373
Income from Accommodation: Non-Nigerian Guests (₦'000)	307,653	319,017
Capacity Utilized by percentage	59	59
Number of Lodger Nights	4,035,844	4,066,614
Number of Lodger Rooms	6,801,737	6,864,201
Number of Lodger Beds	6,419,622	6,383,319
Number of Lodger Tourists	82,616	89,289

### MONETARY ITEMS ON HOTELS AND RESTAURANTS

Figure 3.2

### 3.2.1 **Employment**

With reference to Table 3.2, the number of persons employed in the Hotels and Restaurants Industry rose from 61468 in first half 2006 to 67,874 in second half of the same year, indicating an increase of 10.42 per cent.

### 3.2.2 **Emolument**

About ~~N~~4.73 billion and ~~N~~5.62 billion for first half and second half of 2006 respectively were paid to workers as emolument. This shows an increase of 18.82 per cent.

### 3.2.3 **Income from Accommodation: Nigerian Guests**

The total income from Nigerian Guests on Accommodation in the first half 2006 was about N30.44 billion while that of the second half of the same year was about ~~N~~32.54 billion. This indicates an increase of 6.90 per cent.

### 3.2.4 **Income from Accommodation: Non Nigerian Guests**

The total income on accommodation from Non-Nigerian Guests rose from about N307.65 million in the first half 2006 to about ~~N~~319.11 million in the Second half 2006, indicating an increase of 3.73 per cent.

### 3.2.5 **Capacity Utilized by Percentage**

The capacity utilized by the Hotels and Restaurants Industry remained constant at 59 per cent for first half and second half of year 2006.

### 3.2.6 **No. of Lodger Nights**

The number of lodger nights increased marginally from 4,035,844 in the first half of the year to 4,066,614 in the second half of the same year. This shows a marginal increase of 0.8 per cent.

### 3.2.7 **No. of Lodger Rooms**

The number of lodger rooms increased from 6,801,737 in the first half to 6,864,201 in the second half of the year 2006 indicating a marginal increase of 0.9 percent.

### 3.2.8 **No. of Lodger Beds**

The number of lodger beds decreased by 0.56 per cent (36,703), from 6,419,622 in the first half to 6,383,319 lodger beds in the second half of the year.

### 3.2.9 **No. of Lodger Tourists**

The number of lodger tourists increased by 8.1 per cent from 82,616 in the first half to 89,289 in the second half of the year 2006.

### 3.3 BUILDING AND CONSTRUCTION

Table 3.3 Building and Construction

Item	1st Half 2006	2nd Half 2006
Number of Persons Engaged	766,866	746,210
Number of Artisans	10,922	12,633
Emolument (N'000)	2,461,241	2,981,299
Value of Work Done (N'000)	119,572,992	117,199,674
Total Working Capital (N'000)	51,133,693	47,419,946

MONETARY ITEMS ON BUILDING AND CONSTRUCTION

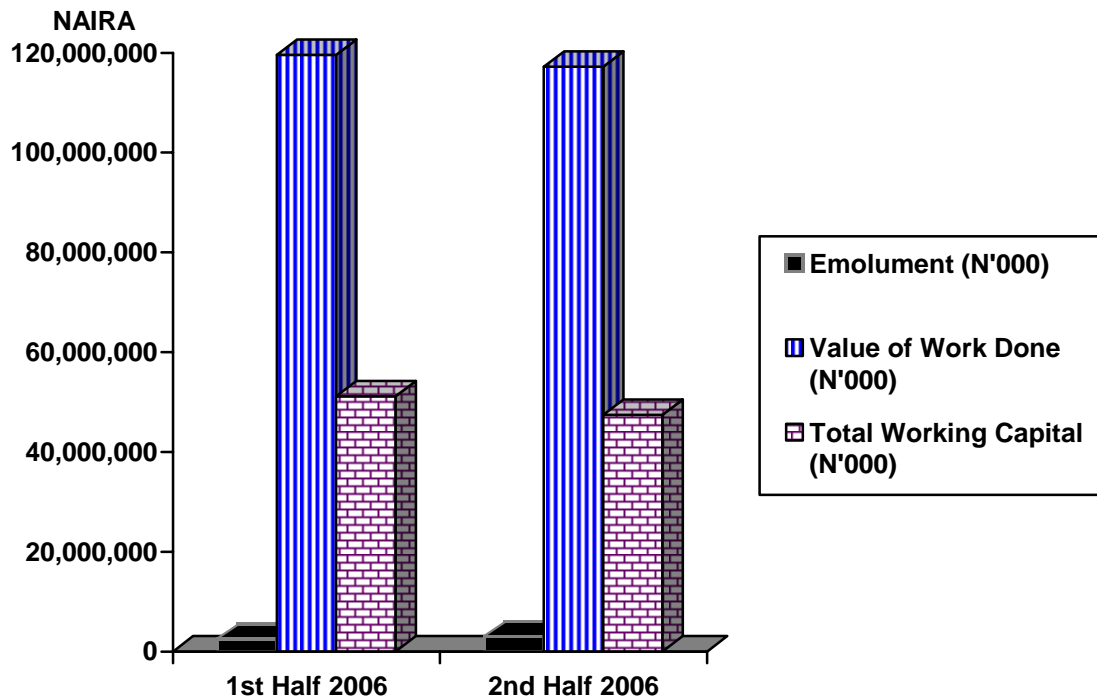

Figure 3.3

### 3.3.1 Number of Persons Engaged

In table 3.3 above, the number of persons engaged in building and construction industry in the first half of 2006, was 766, 866 and it decreased to 746, 210 in the second half of the same year. The fall represents 2.70 per cent.

Of the number of persons engaged in the first half of year 2006; 10,922 persons were Artisans. The number rose to 12,633 in the second half of the same year, in spite of the drop in the number of persons engaged in the second half.

### 3.3.2 Emolument

The total emolument paid to workers in the sector was ~~N~~2.46 billion in the first half of 2006. It increased by 21.13 per cent to ~~N~~2.98 billion in the second half of the same year. This might have been as a result of engaging more professionals in that sector, who earned robust salaries and other benefits.

### 3.3.3. Value of work done

The value of work done in the first half of 2006 was ~~N~~119.57 billion, while in the second half of the same year, the value of work done dropped to ~~N~~117.20 billion with 19.85 per cent fall.

### 3.3.4 Total Working Capital

The total working capital for the first half of 2006 was ~~N~~ 51.13 billion, while the second half of the same year was ~~N~~47.42 billion. This shows a drop of ~~N~~3.71 billion (representing 7.26 percent).

### 3.4 MANUFACTURING INDUSTRY

**Table 3.4 Manufacturing Industry**

ITEM	1st Half 2006	2 <sup>nd</sup> Half 2006
Number of Persons Engaged	382,717	387,964
Number of Paid Employees	287,176	289,239
Emolument of Employees (₦'000)	253,033,359	266,746,977
Value of Sales (₦'000)	1,801,739,912	1,954,766,423
Operating Cost (₦'000)	771,032,543	914,395,282
Total Capital Expenditure (₦'000)	730,264,448	761,185,490
Capacity Utilization (%)	54	55

#### MONETARY ITEMS ON MANUFACTURING

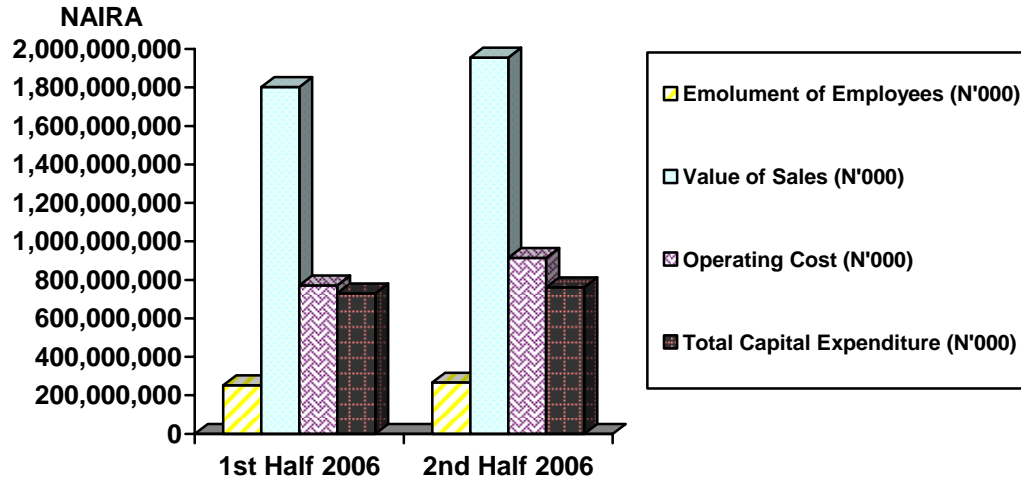

Figure 3.4

#### **3.4.1 Number of Persons Engaged:**

In manufacturing sector, 382,717 persons were engaged in the first half of 2006, while 387,964 persons were engaged in the second half of the same year. This shows an increase of 1.37 per cent.

Of the number of persons engaged in the first half of year 2006, 287,176 persons were paid employees. The number of paid employees for the second half was 289,239, showing an increase of 0.72 per cent.

#### **3.4.2 Emolument of Employees**

A total of ₦253.03 billion was paid to employees in the first half of year 2006, while in the second half of the same year; ₦266.75 billion was paid to workers. This shows an increase of ₦13.72 billion (representing 5.42 per cent).

#### **3.4.3 Value of Sales**

The total value of sales in the first half of the year 2006 was ₦1,801.74 billion, while the value of sales for the second half of the same year was ₦1,954.77 billion, showing a rise of 8.49 per cent.

#### **3.4.4 Operating Cost**

The manufacturing industry spent ₦771.03 billion on running cost in the first half of 2006 and approximately ₦914.40 billion in the second half of the same year. The rise on running cost represents 18.59 per cent.

#### **3.4.5 Total Capital Expenditure**

The sector invested ₦730.26 billion on capital formation in the first half of 2006, while ₦761.19 billion was expended in the second half of the same year. This shows a rise of 4.24 per cent.

#### **3.4.6 Capacity Utilization**

The installed capacity utilized by the sector was 54 per cent in the first half of 2006 and it increased to 55 per cent in the second half of the same year, showing one percentage point increase.

### 3.5 MINING AND QUARRYING

**Table 3.5 Mining and Quarrying**

Item	1st Half 2006	2nd Half 2006
Number of Persons Engaged	11,152	10,760
Number of Operatives	5,916	6,164
Emolument (N'000)	36,481,638	36,547,128
Mineral Production (M/Tonnes)	1,602,548	1,563,013
Cost of Production ((N'000)	35,885,061	36,173,138

**MONETARY ITEMS ON MINING ANG QUARRYING**

**Figure 3.5**

### **3.5.1 Number of Persons Engaged**

Table 3.5 above shows that, the number of persons engaged decreased from 11,152 in first half 2006 to 10,760 workers in the second half of the same year, showing a decrease of 3.52 per cent.

### **3.5.2 Number of Operatives**

The number of operatives which was 5,916 in first half rose to 6,164 in the second year of 2006, showing a percentage increase of 4.20 (248 operatives).

### **3.5.3 Emolument**

A total emolument of about ₦36.48 billion was paid to workers in the first half 2006. While that of the second half of the same year was about ₦36.55 billion, indicating a slight increase of 0.19 per cent.

### **3.5.4 Mineral Production**

The volume of mineral produced in the first half of 2006 was 1,602,548 Metric Tonnes while that of the Second half 2006 was 1,563,013 Metric Tonnes. This represents a decrease of about 2.5 per cent (39 535 Metric Tonnes)

### **3.5.5 Cost of Production**

The cost of production (₦36.17 billion) as shown in Table 3.5 above for second half 2006, indicates a marginal increase of 0.80 percent over that of the first half 2006 which was ₦35.89 billion.

### 3.6 PRIVATE PROFESSIONAL SERVICES

**Table 3.6: Private Professional Services**

ITEM	First Half 2006	Second Half 2006
Employment	14,573	16,041
Emolument (N'000)	1,979,515	2,447,635
Operating Expenses (N'000)	3,771,459	4,543,756
Total Receipt (N'000)	22,440,449	23,992,712
Total Working Capital (N'000)	21,271,471	22,064,087

**MONETARY ITEMS ON PRIVATE PROFESSIONAL SERVICES**

Figure 3.6

### 3.6.1 **Employment**

In Table 3.6 above, the total number of persons employed in the first half of 2006 was 14,573 while that of the second half of the same year was 16,041 workers, indicating an increase of 10.07 per cent (1,468 workers).

### 3.6.2 **Emolument**

With reference to Table 3.6, the total wages and salaries and supplementary benefits earned by workers in the first half of 2006, was about ₦1.98 billion while that of the second half was about ₦2.45 billion, representing an increase of about 23.65 per cent.

### 3.6.3 **Operating Expenses**

The total operating expenses in the first half of 2006, was ₦3.77 billion and this increased by 20.42 per cent to ₦4.54 billion in the second half of the same year.

### 3.6.4 **Total Receipt**

The total receipt in Table 3.6 was ₦22.44 billion recorded for first half 2006, while about ₦23.99 billion accrued to the sector in the second half of the same year, indicating an increase of about 6.91 per cent.

### 3.6.5 **Total Working Capital**

A total working capital of ₦21.27 billion was recorded in the first half of 2006 and increased by 3.71 per cent to ₦22.06 billion in the second half of the same year.

### 3.7 ORGANISED ROAD TRANSPORT OPERATORS

Table 3.7 Organized Road Transport Operators

ITEM	First Half 2006	Second Half 2006
Number of Persons Engaged	61,386	65,602
Number of Operatives	34,646	32,929
Emolument (N'000)	5,743,544	6,938,341
Gross Addition to Fixed Assets (N'000)	3,517,331	3,311,193
Operating Cost (N'000)	7,272,441	8,030,557
Total Receipts (N'000)	38,009,963	41,750,616
Total Fleet	19,164	19,364

MONETARY ITEMS ON ORGANISED ROAD TRANSPORT OPERATORS

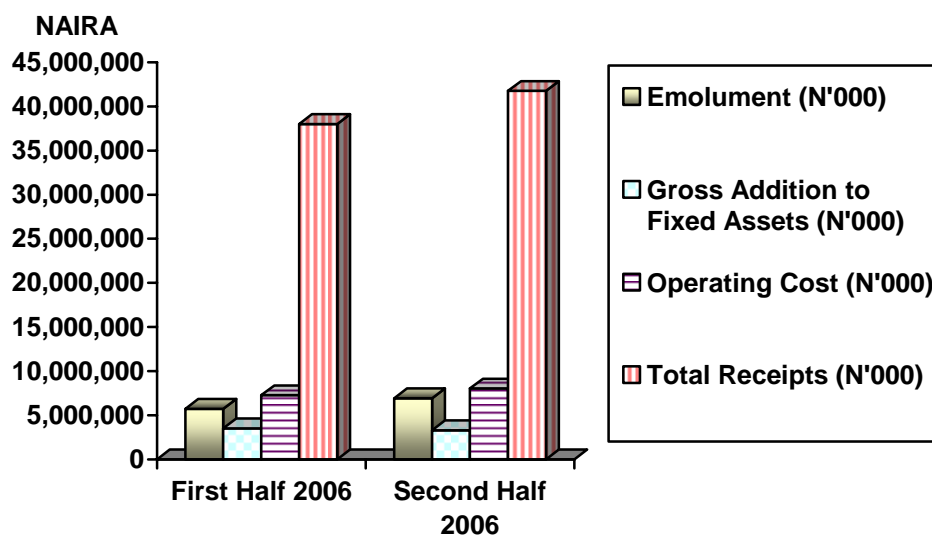

Figure 3.7

### **3.7.1 Number of Persons Engaged**

The organized road transport operators in the first half of 2006 engaged 61,386 persons. Of which 34,646 (56.44 percent) persons were operatives. While 65,602 persons were engaged in the second half of the same year; showing an increase of 6.87 per cent. 32,929 operatives were engaged in the second half of year 2006.

### **3.7.2 Emolument**

A total emolument of ₦5.74 billion was paid to workers in the first half of 2006, while ₦6.93 billion was paid to employees in second half of the same year; showing an increase of ₦1.19 billion, representing 20.73 percent.

### **3.7.3 Gross Addition to Fixed Assets**

The organized road transport operators invested ₦3.52 billion on fixed assets in the first half of 2006, while ₦3.31 billion was expended in second half of the same year.

### **3.7.4 Operating Cost**

A total of ₦7.27 billion was spent on running cost of the sector in the first half of 2006, while the operating cost increased by 10.45 per cent in second half of the year.

### **3.7.5 Total Receipts**

A total income of ₦38.01 billion was generated in the first half of 2006, while the revenue accrued to the sector in second half of the year amounted to ₦45.75 billion. This result shows an increase of ₦7.74 billion, representing 20.36 percent.

### **3.7.6 Total Fleet:**

The number of vehicles in the fleet was 19,164 in the first half of 2006. In the second half of the year, the number of vehicles was 19,364, showing slight increase of 1.04 per cent.

### 3.8 BALANCE OF PAYMENTS

Table 3.8 Balance of Payments

Item	First Half 2006	Second Half 2006
Total Receipts (\$'000)	5,734,810	4,979,966
Total Payments (\$'000)	4,265,451	4,258,429

#### MONETARY ITEMS ON BALANCE OF PAYMENTS

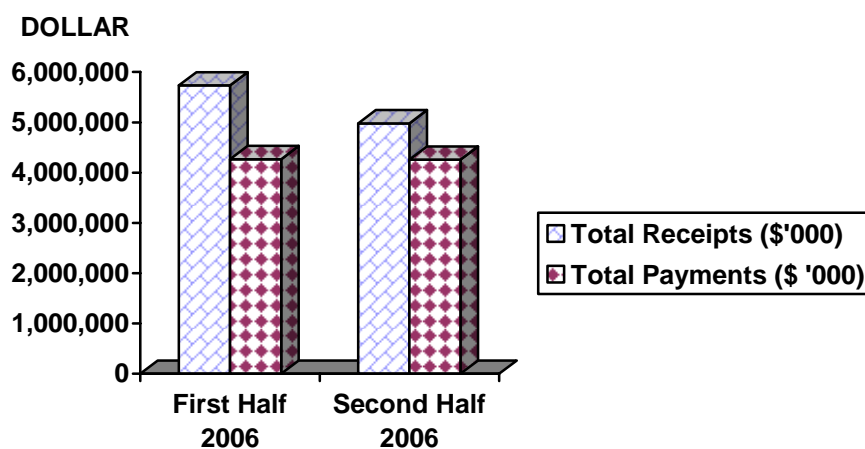

Figure 3.8

#### 3.8.1 Total Receipts and Payments

A total of \$5.73 billion was received by the financial sector in the first half of 2006. While a total of \$4.27 billion was paid in the same first half of the year. This indicates a surplus of \$1.46 billion, representing 25.48 percent.

Similarly, \$4.98 billion was received in the second half of 2006 and a total of \$4.26 was paid in the same second half of the year, leaving a surplus of \$0.72 billion.

In overall assessment, balance of payments was not in deficits in banking and finance sector of the economy in the year 2006.

### 3.9 CORPORATE NON-FINANCIAL

Figure 3.9

**3.9.1 Agriculture, Mining and Quarrying:**

The total value of assets of Agriculture, Mining and Quarrying in Nigeria was ₦34.38 million as at 31<sup>st</sup> December 2006. While foreign private investment in the sector in the same period was ₦6.87 million.

**3.9.2 Building and Construction:**

The total assets value of building and construction sector in Nigeria was ₦1.66 billion as at 31<sup>st</sup> December 2006; while foreign private investment in the industry in the same period was ₦46.26 million.

**3.9.3 Manufacturing and Processing:**

The total assets value in manufacturing sector in Nigeria was ₦19.50 billion as at 31<sup>st</sup> December 2006. Similarly, in the same period, the foreign private investment in the industry was ₦8.13 billion.

**3.9.4 Trading and Business Services:**

The total assets value in Trading and Business Services in Nigeria was ₦103.06 million as at 31<sup>st</sup> December 2006, while foreign private investment assets was ₦6.62 billion in the same year.

**3.9.5 Transport and Communication:**

The total assets value of transport and communication in Nigeria was ₦1.08 billion as at 31<sup>st</sup> December 2006. While total value of other assets in Nigeria was ₦6.72 billion as at 31<sup>st</sup> December 2006 and similarly, other foreign private investment assets over the same period was ₦521.44 million.

### 3.10.1 MODERN AGRICULTURAL HOLDINGS

**Table 3.10.1 Area Cultivated and Production of Crops**

S/N	CROP	AREA CULTIVATED (HECTARES)	PRODUCTION (TONNES)
1	Millet	1,802	1,148
2	Guinea Corn (Sorghum)	5,046	4,066
3	Groundnut (Peanut)	5,684	5,815
4	Beans (Cowpeas)	2,051	1,322
5	Yam	2,022	17,426
6	Maize	5,303	5,047
7	Cassava	1,025	8,264
8	Rice	2,168	1,473
9	Melon	1,612	1,129
10	Soya Beans	1,612	1,452
11	Onions	8	10
12	Banana	73	10
13	Guava	29	163
14	Rubber	5,860	72,677
15	Plantain	88	309
16	Mango	366	848
17	Oil Palm	6,123	3,575
18	Pineapple	15	161
19	Vegetable	249	123
20	Cocoa	258	67
21	Bambara Nut	176	137
22	Beniseed	395	54
23	Cashew	587	403
<b>Total</b>		<b>42,552</b>	<b>125,679</b>

#### 3.10.1(a) Area Cultivated

The first 10 crops as shown in Table 3.10.1 belong to the group of "Major Crops". The area cultivated for these crops ranges between 1025 hectares for cassava and 5684 hectares for Groundnuts (Peanut). The total areas cultivated for production of the 23 crops above in the year 2006 was 42,552 hectares.

#### 3.10.1(b) Production

The total quantity produced of the 23 crops in Table 3.10.1 in year 2006 was 125,679 Tonnes. Rubber production ranked the highest with 72,677 tonnes while onions and banana ranked lowest with the production of 10 tonnes each.

**Table 3.10.2 Number of Livestock by Type and Sex**

Type of Livestock	Number of Livestock			Number of Females	
	Total	Male	Female	Producing Milk	Not Producing Milk
Cattle	22966	5453	17514	2836	14678
Sheep	3113	799	2314	0	0
Goat	5233	771	4461	0	0
Camel	0	0	0	0	0
Donkey	0	0	0	0	0
Pigs	1323	551	771	0	0
Others	385	165	220	0	0
<b>TOTAL</b>	<b>33019</b>	<b>7739</b>	<b>25,280</b>	<b>2836</b>	<b>14,678</b>

**3.10.2(a) Number of Livestock**

The total male livestock in year 2006 was 7,739 (23.44 per cent) while that of the female was 25,280 (76.56 per cent) of the total livestock of 33019. The livestock with highest number was cattle with 22966 (69.55 per cent) and the lowest was "Others" (i.e. livestock not named) which constitutes 1.17 per cent of the total livestock

**3.10.2(b) Number of Female Livestock Producing/Not Producing Milk**

The total number of female livestock producing milk in year 2006 was 2836 while 14678 livestock were not producing milk in the same year.

### 3.11 INFORMATION AND COMMUNICATION TECHNOLOGY (ICT) IN ESTABLISHMENTS

**Table 3.11: Information and Communication Technology (ICT) in Establishments**

SECTOR	Amount invested in ICT (n'000)	Number of Employees using pc	Number of Employees having access to internet
Manufacturing	4,392,983	154,452	56,715
Wholesale and Retail Trade	9,105	9,950	217,174
Organised Road Transport Operators	159,005	1,228	8,270
Hotels and Restaurants	25,041	5,921	6,867
Mining and Quarrying	496	562	1,946
Private Professional Services	530	39,069	7,276
Building and Construction	367,849	2,555	41,795
Total	4,955,000	213,737	340,033

- 3.11.1 The manufacturing sector was ranked highest investor (about ₦4.39 billion, representing 88.60 per cent) in Information and Communication Technology (ICT) in 2006, with corresponding number 154,452 employees (representing 72.26 per cent) using Personal Computers (PCs). Although, the sector was ranked third in the series of employees having access to internet (precisely 56,715 employees, representing 16.68 per cent).
- 3.11.2 Building and Construction Industry ranked second with ₦367.84 million, (representing 7.42 per cent) invested on information and Communication Technology (ICT); ranked fifth with 2,555 employees (representing 1.20 per cent) using personal computers and ranked third with 41,795 employees (representing 12.29 percent), having access to internet.
- 3.11.3 Organized road transport operators ranked third with ₦159.01 million (representing 3.21 percent) invested in Information and Communication Technology (ICT), ranked sixth with 1,228 employees (representing 3.21 per cent) using personal computers and ranked fourth with 8,270 employees (representing 2.43 per cent) having access to internet.
- 3.11.4 Private Professional Services ranked second with 39,069 employees (representing 11.49 per cent) using personal computers (PCs); and ranked fifth with 7,276 employees (representing 2.14 percent) having access to internet and invested ₦530million in Information and Communication Technology (ICT) in 2006.
- 3.11.5 Wholesale and Retail Trade ranked highest with 217,164 employees (representing 63.87 percent) having access to internet; ranked third with 9,950 employees (representing 4.66 per cent) using Personal Computers (PCs) and ranked fifth investor with ₦9.11 million in information and communication technology (ICT) in 2006.

# Chapter Four

## SYSTEM OF ADMINISTRATIVE STATISTICS

### 4.1 Water Board Statistics

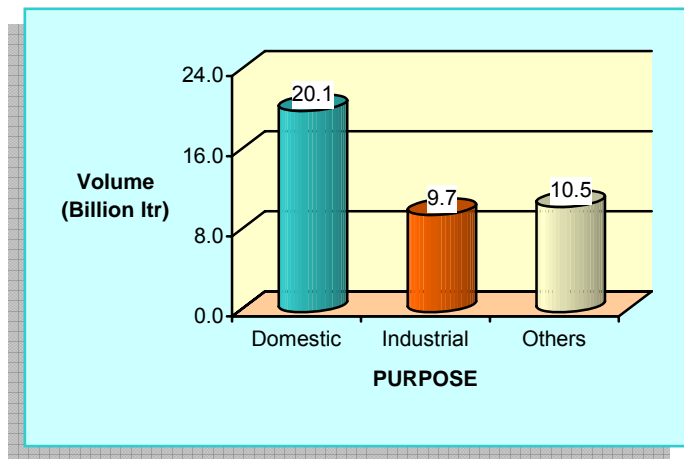

#### 4.1.1 Total Volume of Available Water by Use

The State Governments embarked on various water projects, which are handled or co-ordinated by the Water Board. The aims and objective are to make water available for the various activities which include domestic, industrial, agricultural and other purposes.

Data on the activities of the States Water Board were obtained from 30 administrative units of government, which include 29 states and the Federal Capital Territory. Hence all tables in this section are with respect to the states and FCT.

**Fig. 4.1.1** Volume of Water Available by Purpose (2006)

Table 4.1.1 shows that the total volume of water available in 2006 was 40.3 billion cubic litres. About half of the total volume of water available (20.1 billion litres) was used for domestic purpose while 24.1 percent (9.7 billion litres) was used for industrial purposes. The balance of 10.5 billion litres which represent 26 percent of the total volume was used for all other purposes.

**Fig. 4.1.2**

**Trend of Volume of Water Available by Quarter (2006)**

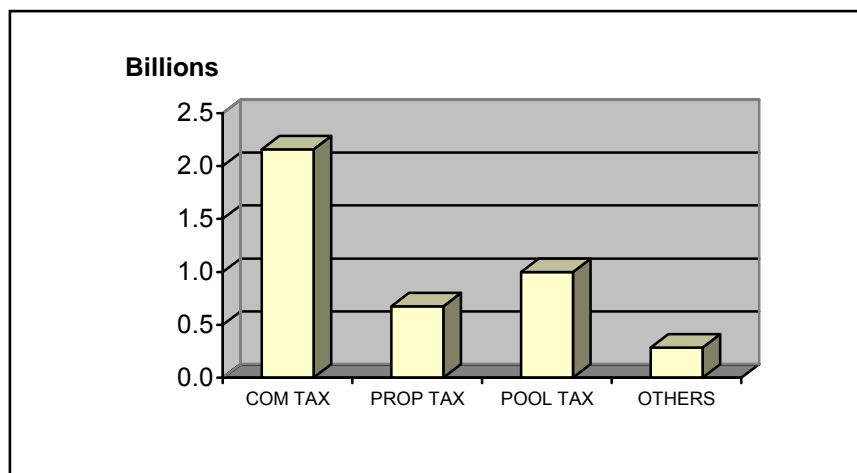

The pattern was the same in terms of the downward trend of water availability by quarter. In all cases, water was more available in the first quarter while the downward trend is observed towards the fourth quarter. (See table 4.1.1 in Appendix)

## B. LOCAL GOVERNMENT

### 4.2.1 Tax Revenue

The aggregate tax revenue by of the Local Governments in year 2006 was ₦4.12 billion. Community tax topped the sources with ₦2.16 billion, representing 52.4% of all tax revenue. Pool Tax followed with 1.0 billion naira representing 4.3% of the total. Property and Others taxes contributed the balance of 23.3%. (See Table 4.1.4 in Appendix).

Fig. 4.2 Local Government Tax Revenue (2006)

### 4.2.2 Non-Tax Revenue

The amount of money that came to the Local Governments as non-tax revenue in year 2006 was higher than the tax revenue. The total non-tax revenue was ₦19.96 billion. Interest Repayment and Dividend contributed the highest amount to the tune of ₦7.4 billion. Licences and Earnings from Sales contributed ₦3.1 billion each. Rent on Local Government Property contributed the smallest amount of ₦1.4 billion. (See Table 4.1.4 in Appendix).

### 4.2.3 Statutory Allocations

The total statutory allocation to the Local Governments was about ₦563 billion in year 2006. This includes ₦492 billion from the Federation Account, ₦55.8 billion from Value Added Tax and ₦15.2 billion from Stabilization Fund and General Ecology. The allocation from the federation account constitutes about 87% of the total statutory allocation. The allocation from value added tax and stabilization fund respectively constitutes about 10% and 3% of the total statutory allocation. (See Table 4.1.4 in Appendix).

### 4.2.4 Recurrent Expenditure

The Local Governments' recurrent expenditure totalled ₦294.4 billion in the year 2006. Of this amount ₦162.0 billion (55.0%) was personnel cost while ₦113.8 (38.7%) was overhead cost. Pension and gratuity gulped ₦8.3 billion (2.8%), interest on loan ₦0.3 billion. ₦9.9 billion, which represents 3.4% of the total recurrent, was spent under other recurrent sub-heads.

**Fig. 4.3 Capital Expenditure of the Local Government**

#### 4.2.5 Capital Expenditure

The total capital expenditure of Local Governments in 2006 stood at ₦135.9 billion. Road and bridge construction took the lion share of ₦25.2 billion representing 18.5% of the total. General administration took ₦19.9 billion (14.6%), education; health and water supply respectively took 9.1%, 9.2% and 5.9%.

### 4.3 FISCAL OPERATION OF SUB-NATIONAL GOVERNMENTS

#### B. STATE GOVERNMENT

##### 4.3.1 Internally-Generated Revenue

One of the major sources of finance for the State Governments is the internally generated revenue. In the year 2006, all the state governments generated a total sum of ₦122.7 billion. The amount of money generated was almost uniform across the quarters but with a slight higher amount in the second quarter. This was the pattern of distribution for all the items under the sub-head. Of the total sum generated internally, Taxes accounts for ₦74.6 billion representing 60.8% of the total. This was followed by the combine revenue from Interest, Repayment and Dividend, which recorded a total sum of ₦11.9 billion or 9.7%. Fees and fines, which attracted ₦10.8 billion was 8.8% of the total internally-generated revenue of the state governments.

##### 4.3.2 Statutory Allocations

Derivation from the Federation Account, Value Added Tax (VAT) and share of the excess crude oil sales form the bulk of the statutory allocations to the State Governments. The pattern of distribution is similar to that of internally generated revenue by the state governments. Statutory allocation was almost uniform across the quarters with a higher amount in the second quarter. In all, ₦189.8 billion was allocated to the state government in 2006. There was an appreciable increase in the overall allocations in the second quarter compared with the figure for the first quarter in 2006. Shared Reserved Fund (52.5%) and Shared Excess Crude Oil (38.6%) constitute the two largest proportion of the Statutory Allocation to State Governments (See Table 4.8.1 in Appendix).

### 4.3.3 Capital Expenditure

Capital expenditure of the state governments is captured under four major sub-heads. These are Administration, Economic Sector, Social Services and Transfers. In 2006, the sum of ₦105.4 billion was spent under Administration and represents 20% of the total capital expenditure in 2006. More than double the amount on Administration (₦228.9 billion) or 43.6% was spent on the Economic Sector. The trend of the capital expenditure under Economic Sector was upwards from first quarter to the fourth quarter in 2005. Expenditure under Social Services was ₦127.7 billion or 24.3%. About 12.1% or ₦63.7 billion was spent on Transfers, which include Public Debt, Pension and Gratuity, and Other Transfers (See table 4.8.3 in the Appendix).

**Fig. 4.5** Capital and Recurrent Expenditures of the State Governments (2005)

### 4.3.4 Recurrent Expenditure

The recurrent expenditure of the state governments is captured under the same sub-heads like the capital expenditure except 'Transfers', which is not an item under recurrent expenditure. The breakdown of the total expenditure shows that 2006, Administration gulped 44.3% with the sum of ₦166.5 billion. Expenditure under Economic Sector was ₦91.9 billion or 24.5% of the total. The expenditure on Social Services was ₦117.3 billion or 31.2% (See table 4.8.4 in the Appendix)

### 4.3.5 Summary of Recurrent Expenditure

The summary of recurrent expenditure captures such items as Personnel Cost, Overhead Cost, CRF Charges, Grants, Transfers, Debt Charges, Pensions and other unclassified recurrent expenditures. Table 4.8.5 in Appendix shows that the bulk of recurrent expenditure was made on Personnel 29.2% and Overhead 28.7%. The amount expended under the two items was ₦183 billion and ₦179.4 billion, respectively. Recurrent Grants gulped ₦93.6 billion or 15.0% while CRF Charges and Transfer to other Funds gulped ₦59.7 and ₦58.2 billion, respectively.

#### 4.4. COOPERATIVE SOCIETIES

##### 4.4.1 Type and Membership of Cooperative Societies

In assessing the progress made, it is reasonable to reckon with number and membership of registered and unregistered Cooperative Societies. Even though the number of various registered societies almost remained constant when compared with previous years, membership was very much on the increase across the various types of cooperative societies. For farmer's multipurpose cooperative societies, 106,297 registered and unregistered societies produced 3,027,781 members. This translates to about 28 members per cooperative society. There was a downward trend in the number of cooperative societies like Livestock, Credit and Thrift, as well as Informal Sector.

TYPE OF AGRIC COOPERATIVES	NUMBER					
	REGISTERED		UNREGISTERED		MEMBERSHIP	
	2005	2006	2005	2006	2005	2006
Farmers Multipurpose	150719	100444	7337	5853	1695444	3027781
Group Farming	91498	12702	1956	1640	326970	308611
Farm Settlements	25803	4011	23	5	61679	22895
Fishery	15030	6496	1926	118	67505	108093
Livestock	29149	14373	151	1086	36838	98218
Credit and Thrift	35970	45195	107	579	270491	2834485
Informal Sector	26185	23119	358	136	87326	113641
Others	30753	17165	211	118	392968	560242

##### 4.4.2 Internally Generated Fund

In the table, we observed that the total internally generated fund in Cooperative Society increases as the quarter progresses. This was confirmed in the fourth quarter of the year as the increase became obvious with ₦17.3 billion for the quarter compared to ₦14.6 billion in the third quarter. Again, we also observed that savings and deposit of fund decreases in the first quarter of the year, and this could be ascribed to season preceded the quarter and many people had spent their money for celebration. In the same table, the paid-up shares had uniform pattern for the whole quarters of the year. This could be as a result of the cooperative having uniform pattern of profit for the year, 2006.

#### HOUSING STATISTICS

##### 4.5 Housing Statistics:

Housing statistics plays a very significant role in measuring the standard of living of people. They also give clear comparisons of the levels of development among the countries of the world. They constitute some of the inputs for GDP computation.

##### 4.5.1 Land Allocation by Purpose and by Sex:

Table 4.5.1 shows allocation of land by purpose for which they were used. The table also indicates the number of applications made as compared to number of applications approved. In all cases, applications coming from the male persons out-numbered those of their female counterpart. In the year 2006, the number of applications for residential purpose was 11,418 representing 86.1 percent of all applications for land. Total number of applications received for commercial purposes (899) constitutes 6.8 percent. Number of applications for land for industrial use (168) was comparatively too low. However, there were a reasonable number of applications for other purposes (773). See table 4.5.1 in Appendix.

## LAND ALLOCATION AND APPROVAL BY PURPOSE AND SEX

Type of Allocation	NUMBER OF APPLICATION		NUMBER OF APPROVAL	
	Number	%	Number	%
RESIDENTIAL	11418	86.12	5334	80.22
COMMERCIAL	899	6.78	679	10.21
INDUSTRIAL	168	1.27	67	1.01
OTHERS	773	5.83	569	8.56
Total	13258	100	6649	100

In all, about half of all applications received were approved. However, the rate of approval of applications differed for various purposes. Whereas about 75 percent of application for land for commercial purpose received approval, it was below 50 percent for residential and industrial purpose respectively.

### 4.3.2 Building by Ownership:

Table 4.5.2 shows the distribution of building by ownership. It indicates the number of applications made to acquire buildings; number of approvals and allocations made by various owners (individuals, corporate organizations, governments and NGOs and other unclassified bodies). Application, approvals and actual allocations were more for private owners than for corporate, government and NGOs. Analysis by time series shows that a greater number of applications were received during the first and second quarters than the two other quarters. Table 4.5.2 also gives the breakdown of the applications, approval and allocation by state.

## 4.6 HEALTH STATISTICS

### 4.6.1 HOSPITAL TYPE

This table shows the number of hospitals by type General Hospital, Maternity for Women, Maternity for Children, Infectious diseases, Orthopedic and others across the nation in 2006. Apart from maternity hospitals, which showed a slight increase in fourth quarter (1,070) compared with 1,054 maternity hospitals in the third quarter, there was little or no increase in number of hospitals from first quarter to the fourth quarter. This increase was actually noticed in Ebonyi State which rose from 25 maternity hospitals in third quarter to 39 in the fourth quarter.

#### 4.6.2 BEDS BY HOSPITAL TYPE

Though, hospital beds in various types of hospitals remained the same from one quarter to another, Maternity and General Hospitals showed little increases from the third to fourth. General Hospitals rose from 43,351 beds in the third quarter to 46,848 beds in fourth quarter. Beds in Maternity Hospital also increased from 7,295 in the third quarter to 8,215 in fourth quarters.

#### HOSPITAL BY TYPE

TYPE	BEDS
General Hospital	46848
Maternity	8215
Children	105
Infectious Diseases	819
Orthopaedic	0
Psychiatric	1699
Specialist	5872
Teaching	4378
Community Health Centre	34999

#### 4.6.3 PATIENTS BY HOSPITAL TYPE

This shows the figures of in-patients and out-patients by type of hospital in 2006. In general hospital in-patients rose from 29,588 in the first quarter to 139,082 patients in second quarter but declined both in third (116,699) and fourth quarters (909,415). Same flow was observed with maternity hospitals, which rose to 5,804 patients in second quarter from 5,087 patients in first quarter and declined thereafter to 5,469 patients in fourth quarter.

#### 4.6.4 HEALTH PERSONNEL BY SEX

This table gives the data of health personnel by professionalism and gender. Males were more predominant as medical doctors, dentists, pharmacists and environmental health officers; it was the other way round for nurses and midwives for which most personnel were females. Sixty one percent of the nurses were females. Equal

distribution between both sexes was observed with pharmacy staffs. On the average, for medical doctors and environmental health staff, male recorded about 71% leaving 29% for female.

## **4.7 EDUCATION STATISTICS**

Education plays a very important role in the development of a nation. The improvement in the education sector could be measured by input and output from such educational institutions.

In Nigeria, educational institution can be owned by public, private for commercial or private for other purposes like religion or foundation. The ownership is classified into two broad categories; public and private. The presentations in this section compare educational institutions owned by the public with those privately owned.

### **4.7.1 Educational Institutions by Ownership:**

Table 4.7.1 shows number of educational institutions classified by ownership comparing years 2005 and 2006. The table shows that even though there was an upward trend in the number of private schools, the public institutions are still ahead of the in terms of numbers. And for both public and private, the number of institutions was on the increase from year 2005 to year 2005.

### **4.7.1 Teaching Staff in Educational Institutions:**

Table 4.7.2 gives the data on number of teachers in both public and privately owned schools in various types of educational institutions, comparing year 2005 with 2006. The table also shows that the public institutions are still ahead of private ones in terms of number of primary school teachers. In both public and private owned schools, the number of teachers increased in 2006. Some level of increase was also noticed for teachers in publicly owned technical and vocational schools.

### **4.7.3 Pupils/Students in Public and Private Schools**

Table 4.7.3 shows the number of pupils/students in public and private schools, comparing 2005 and 2006. The analysis by year shows that the population of primary school pupils was higher in 2006 than in year 2005 in both public and private schools. The same increase was still noticeable with respect to students' population in higher institutions. However the growth rate was higher for private secondary vocational schools.

## **4.8 VEHICLE REGISTRATION:**

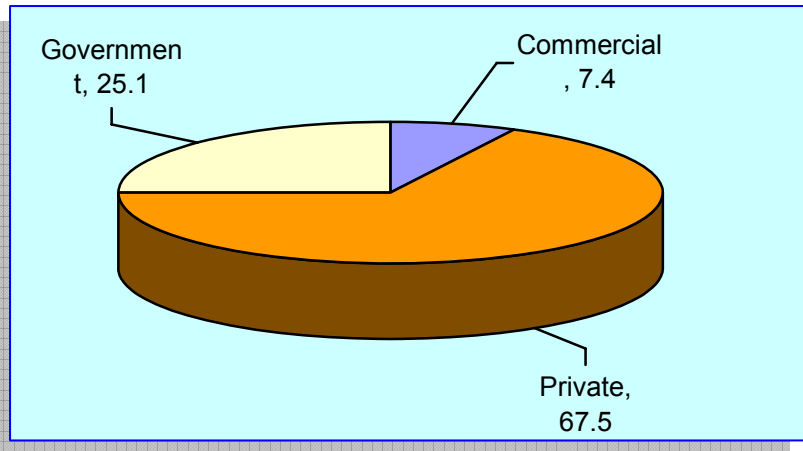

Official I registration is compulsory for all vehicles to be used in the country for various purposes. The statutory power for the registration of vehicles is vested on States Inland Revenue in State Ministry of Finance and Economic Development. Registration is categorized by type of vehicle under various ownership; Government, Private and Commercial.

Though questionnaires were sent to all states and FCT for the collection of the records on vehicle registration activities, response was obtained from 28 states and the Federal Capital Territory. Hence all tables in this section are with respect to the responding states and FCT.

#### 4.8.1. Vehicle Registration by Ownership:

**Fig 4.8.1: Vehicle Registration by Ownership:**

An impressive increase was observed in year 2006 in comparison to year 2005. During the year 2006, the total number of vehicles registered was 5,091,459. Of the total, 68.3 percent were private vehicles, 25.4 percent were government owned while 6.3 percent were registered for commercial purposes.

#### 4.8.2. Vehicle Registration by Type:

##### 4.8.2.1 Commercial Vehicles:

A total of 314,634 vehicles were registered by the responding states in 2006. The most registered type of vehicles was motorcycle with 65.7 percent of total vehicles registered for commercial purpose. This was followed by cars and buses with 10.3 percent and 9.7 percent respectively. Tricycles which constitute 1.8 percent were the least among vehicles registered for commercial purpose.

##### 4.8.2.2 Private Vehicles:

Vehicles owned privately, which constitute 68.3 percent of all vehicles registered, was the most registered in 2006. Out of a total of 5,091,459 vehicles registered in 2006, 3,477,500 were privately owned. Similar to the registration of commercial vehicles, motorcycles were the most registered with 57.8 percent of vehicles registered for private use. This was also followed by cars with 40.7 percent. The number of other type of vehicles registered for private use was negligible.

##### 4.8.2.3 Government Vehicles:

During the year 2006, Government owned vehicles registered were 1,293,481. This constitute one quarter of all vehicles registered during the year. Motorcycles topped the list of registered government vehicles. Ninety percent of government owned vehicles were motorcycles. Unlike the vehicles used privately or for commercial purpose, tractors (9%) were the second most registered government vehicles. Other type of government vehicles was less than 1 percent.

### Percentage Distribution of Registered Vehicles by Type (2006)

TYPE OF VEHICLE	COMMERCIAL	PRIVATE	GOVERNMENT
MOTOR CYCLES	65.71	57.84	90.28
CARS	10.25	40.66	0.53
BUSES	9.69	0.68	0.09
PICK UP VANS	4.36	0.38	0.07
LORRIES	3.96	0.35	0.03
TIPPERS	2.39	0.02	0.01
TRI CYCLES	1.82	0.04	0.00
TRAILERS	1.21	0.03	0.01
TRACTORS	0.61	0.01	8.98
TOTAL	100.0	100.0	100.0

#### 4.8.3. Access and Use of Information and Communication (ICT) Facilities:

Access and utilization of internet facilities was still low within the states Inland Revenue agencies. However, when compared to other similar government agencies, the states Inland Revenue had better access. As at December 2006, 12.9 percent of the establishments owned internet facilities, and those having website and Local Area Networks (LAN) were 9.7 percent respectively.

In the 29 establishments, 283 computers were available for use, resulting to an average of 10 computers per establishment. Analysis of computer availability by state shows that Lagos State topped the list with 91 computers while Ogun State followed with 44. Nasarawa and Ebonyi States had one computer each. Eleven out of the states Inland Revenue did not own computer in 2006.

#### 4.10 UNEMPLOYMENT STATISTICS

##### 4.10.1 Unemployment (Professional/Executives)

The total of 150 vacancies was declared across the nation in 2006, out which male recorded 90 vacancies and female 60 vacancies. For old registration, 47,872 registrations were made, with male registering 34,308 (71.7%) and the remaining 28.3% for Female. 1,296 Fresh registrations were made in 2006, out of which male representing 63.11% of the total. Re-registration had total of 330 registrations, Oyo State representing 54.85 per cent (male 64 and female 117 Re-registrations).

##### 4.10.2 Unemployment (Lower Grades)

In 2006, old registrations were 160, 837, with male representing 81.8%, leaving the remaining 18.2% for female (29,259). Fresh registration had a total of 26,733 registrations, with the first quarter representing 96.96% (male 71.36% and female 28.64%). The total number of vacancies declared for 2006 stood at 517 (64.22%

for male and 35.78% for female), from which 272 placements were made for 161 males and 111 females.

#### **4.10.3. Unemployment (Trade Disputes)**

This table gives Trade dispute statistics by quarters. A total of 46 disputes was recorded in 2006 which resulted in 112 work stoppages and 85,342 workers being involved with 2,446,085 man-day lost. The second quarter topped the trade dispute list with 39.13 per cent (18), resulting in 25.89 per cent (29) work stoppages which involved 54.05 per cent (46,130) workers and 55.89 per cent (1,367,119) man-day lost.

#### **4.10.4. Unemployment (Cost of Operation)**

Cost of operation is captured under six major sub-heads. These are Electricity, Repairs and maintenance, Consumables, Wages and Salaries, other benefits and other costs. In 2006 the sum of ₦10.6 million was spent on other benefits and represents 11.01% of the total cost of operation in 2006. More than six times the amount on other benefits (73.6 million) or 76.37 per cent was spent on wages and salaries. Cost of repairs and maintenance was ₦1.40 million or 1.45 per cent, while 0.79 per cent or ₦0.76 million was spent on electricity supply.

#### **4.10.5. Unemployment (ICT)**

Establishments having website and Local Area Network (LAN) facilities recoded 5.6 per cent each. The total number of computers in organisations was 48 computers in 2006, out of which Ekiti State represents 52.08 per cent (25 computers).

### **4.11 RESEARCH INSTITUTES (2006)**

#### **4.11.1 Sources of Fund**

This table shows various sources of fund for research institutes such as Federal Government, State Government, World Bank, DFID and Internal Generated Funds. Among the various sources of fund for research institutes between the year 2005 and 2006 topped on the list of donors was federal government with ₦4.957 billion and ₦4.259 billion for 2005 and 2006 respectively. This was followed by state government donation with ₦141.3 million and ₦157.4 million for 2005 and 2006 respectively while the least was World Bank with nothing in year 2005 while 2006 was ₦10 million.

#### **4.11.2 Employment**

This table shows total number of employment by sex for both Nigerians and non-Nigerians in Research Institutes. Some research institutes did not provide information on number of employment and it was associated with non-response. Expectedly the analysis showed that employment of Nigerians very much out numbered non-Nigerians. It should be appreciate, however, that this sector employed more non-Nigerians than other sectors.

### 4.11.3 Information and Communications Technology

This table shows the percentage number of Establishment using information technology. In the table there was uniform pattern of Establishment with access to information technology topped on the list was Establishment having Website with 81.8 per cent and followed by Establishment owning internet facilities, Establishment receiving orders through the internet and Establishment having internets with 63.6 per cent each, while the least was Establishments having local Area Networks (LAN) with 36.4 per cent. In the same table also, analysis showed that the acquisition and access to information technology was evenly distributed in almost all the research institutes (see table 4.11.3 in the Appendix).

## 4.12 NATIONAL DIRECTORATE OF EMPLOYMENT (2006)

### 4.12.1 NEW BENEFICIARIES

This table shows total number of graduates and non-graduates beneficiaries on loans granted as well as the amount of loan spent for both sexes. However, some states did not have information and this was ascribed to non-response during the survey year. For both graduates and non-graduates, there were more male beneficiaries than female ones. It was also observed from the table that the total number non-graduates new beneficiaries were higher than their graduate counterparts.

#### 4.12.2. AMOUNT SPENT ON LOAN

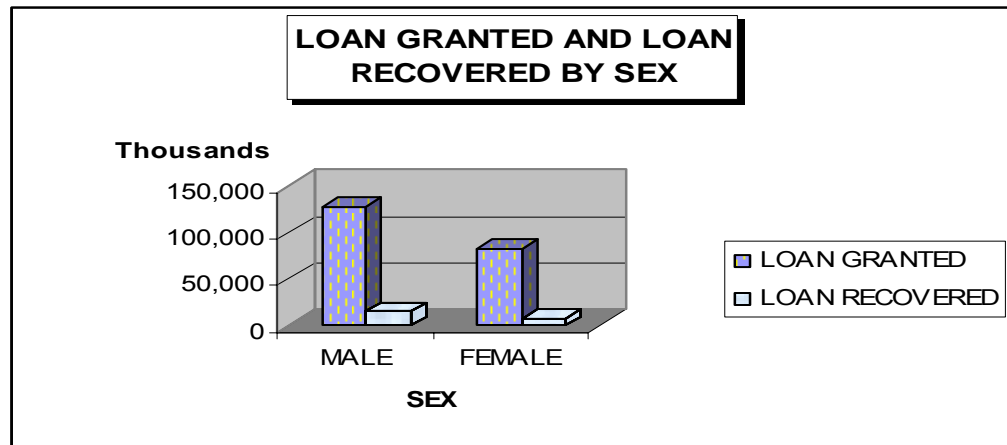

Even though, the amount spent on loan for male (N53.3 million) was higher in value than that which as spent for females (N29.4 million), the amount spent on loan per capital for females (N7, 988) was higher than that for males (N7, 397).

#### 4.12.2. LOAN RECOVERY

This table shows the total number of beneficiaries on loan, total amount granted and total amount recovered. In the table, the total amount granted was N209.6 million while the total amount recovered was N22.3 million representing 10.6% of the amount granted.

#### LOAN GRANTED VERSUS LOAN RECOVERED

SEX	LOAN GRANTED	LOAN RECOVERED
MALE	127,500,689	15,132,582
FEMALE	82,127,347	7,134,992
<b>TOTAL</b>	<b>209,628,036</b>	<b>22,267,574</b>

#### 4.13 REPORTED ROAD ACCIDENT (2006)

The reported road accident statistics captures data on reported cases of road accidents by type of accident, resultant effects and total value of property lost due to accident.

##### 4.13.1 Reported Cases:

This table shows the distribution of reported cases of road accidents such as fatal, serious and minor for all the states of the federation including FCT. In all, a total of 9,114 cases were topped in 2006. In the table, serious cases topped the list with 5,550 representing 60.9% and followed by fatal cases with 2,600 representing 28.5 % while minor cases of accident reported were 964 representing 10.6%. At the state level, Lagos state with 2,806 recorded the highest number of road accidents, while Ondo State followed with 1,102. The least number of accidents was recorded for Anambra State with 40 cases in year 2006.

##### 4.13.2 Value of Property Lost:

Only eleven out of 36 states provided total value of property lost due to accident. About ₦165.6 million worth of properties were reported lost due to road accidents in from the responding eleven states.

## Chapter Five

### 5.0 TRADE

#### 5.1 TRADE PRICE INDICES:

It should be noted that because of very low response rate recorded during the survey index figures were constructed from trade data for the year 2006. The weights derived from the 2005 survey were maintained. Indices were computed at two digits level (section) with their respective weights. Exports data were combination of trade data base and that of Cobalt International were integrated. The following Laspayers Index formula was adopted:

#### INDEX CALCULATION :

$$Li = (100 * \frac{\sum Q_o P_i}{\sum Q_o P_o})$$

Where:  $P_o$  is the Import(CIF) or Export(FOB) values

$P_i$  is the current unit price

$Q_o$  is the base year Quantities

$P_o$  is the base year Unit prices

##### 5.1.1 Imports:

Trade Indices was computed with January 2005 as base month (see the attached tables). One of the ways of calculating trade price indices is the use of Laspeyres Index formula on the section code which is two digits, viz 01, 02,----- 21 and 22. All sections products for imports fluctuated between 98.11 per cents and 112.29 per cents through the months of January, 2005 to December, 2006, (see table 5.1.1)

##### 5.1.2 Exports:

The export trade indices also fluctuated between 82.0 per cent and 100 per cent during the same period, (see table 5.1.2)

#### 5.2 Terms of Trade:

Terms of Trade are just a ratio. It is the rate at which Exports exchange for imports. If the prices of a country's exports go up suddenly more than the prices of imports, the terms of trade has worsened. This means that imports have become relatively dearer than exports and if the country maintains the same levels of exports and imports, its real income will fall.

**NB The larger the number, the more "favourable" terms of Trade.**

Mathematically by the following formula:

$$\frac{\text{Index of export prices}}{\text{Index of import prices}} \times \frac{100}{1}$$

#### 5.3 All commodity Index:

This implies the general Price movement across all the commodities. The out put indicated in the tables 5.1.3 and 5.1.4 respectively.

**5.4 Year on Year:**

Import year on year indicated positive percentages unlike export values. Exports recorded a minimum of 16.9 per cent in the month of March 2006, while imports with a maximum of 7.7 per cent in the month of may 2006. See tables 5.1.3 and 5.1.4.

## Chapter Six

### PRODUCER PRICE INDEX

#### 6.0 PRODUCER PRICE INDEX CONCEPTS

The PPI measures the change over time in the prices received by domestic producers of goods and services. It is the inflation indicator for the business sector of the economy. Its coverage encompasses all marketed goods and services produced by business enterprises.

It is therefore one of the nation's most important economic indicators. The Consumer Price Index and the Producer Price Index form the core price movement information on which many business and government policies are based. Besides supporting business and governmental decision making, PPI data are critical inputs into the development of other sensitive economic indicators, including estimates of Gross Domestic Product (GDP), industrial productivity and wages.

The output based price index measures the average price change of all covered goods and services produced in the economy and sold in the domestic and export markets. In constructing a family of output PPI, export prices are usually collected from a separate source to produce a separate export price index. The prices are actual transaction prices, which are directly recorded. Inter-company transfer prices should not be used. The price should be recorded at the time when the transaction occurs (moment of contract), rather than when the goods are dispatched, which in certain cases can be significantly later.

Input price index measures the change in the prices of all intermediate inputs used in production by a specified sector of the economy. Intermediate inputs are inputs into the production process of an establishment that are produced elsewhere in the economy or are imported. Thus an input PPI measures changes in the cost of the basket of purchases required as inputs into the production process, but these inputs must not be primary inputs like land, labour or capital. Producer input prices should exclude deductible taxes on products (that is, VAT) but include the retail or wholesale margins of the supplier, since they measure the actual cost of the good or service to the producer. In constructing a family of input PPI, import prices are usually collected from a separate source to produce a separate import price index.

The PPI can be produced on two different weighting concepts – gross or net of inter-sector sales. The concept can be more clearly explained by an example. The aggregate weight for gross sector output of the motor vehicles industry would include both the sales of the parts and the sales of the finished cars, even though the value of the parts are included in the value of the finished cars. The net sector output of the motor vehicles industry would measure only the sales of motor vehicles to other sectors of the economy and would exclude the sales of parts. It is desirable to produce aggregated PPI on a net sector basis. When using gross sector indices, there is a problem with multiple counting of price change as products flow through the different production processes. This occurs where the output of one industry is used as an input into another industry

### **Product Weight**

As an index number, the PPI is computed as an average of the price relatives of the many products for which prices are collected. The average is weighted to reflect the importance of each priced product in terms of its share of the total output of the establishment. The PPI is calculated from many prices collected from all types of establishments, covering the selected economic activities and products. The collected prices are first combined to compile indices for each individual product.

As some products have higher production or sales than others, each product is given a “weight” to represent its importance in total output or sales during the reference (base) period.

### **Index Calculation**

In concept, the Producer Price Index is calculated according to a modified Laspeyres formula:

$$I_i = [\Sigma Q_o P_i / \Sigma Q_o P_o] \times 100$$

### **Where**

$P_o$  is the price of a commodity in the comparison period.

$P_i$  is its price currently; and

$Q_o$  represents the quantity shipped during the weight-based period

An alternative formula more closely approximates the actual computation procedure:

$$I_i = [\Sigma (Q_o P_o / \Sigma Q_o P_o) (P_i / P_o)] \times 100$$

In this form, the index is the weighted average of price relatives, that is, price ratios for each item ( $P_i/P_o$ ). The expression  $(Q_o P_o) / \Sigma Q_o P_o$  represents the weights in value form.

### **Classification Adopted**

The PPI is classified by International Standard Industrial Classification ISIC0. This scheme classified producer units according to their major kind of activity based mainly on the principal class of goods produced or services rendered. The indices are available from the 4-digit level.

The PPI is also classified by the Central Product Classification (CPC). The CPC extends the Harmonized Commodity Description and Coding System (HS) used in the classification of traded goods to cover services and non traded goods. For the PPI, the CPC is adopted at the lowest level to classify the specific products.

## **6.1 January – December 2006 Survey**

PPI questionnaires were lodged into 425 Establishments for the NBS/CBN/NCC Survey. The response rate was about 4.5 percent i.e. 94 out of 425 questionnaires; this indicates that more efforts should be made to improve the retrieval position of such questionnaires to improve its response rate at any future surveys.

The PPI table showed the PPI series on monthly basis from January 2004 to December 2006. However, the period of the survey was January 2006 to December 2006. The year-on-year rate of change in the Producer Price Index (PPI) was 3.1 percent in January 2006. A rate of 4.9 percent was recorded in February but went down to 3.1 percent in March 2006. It did not exceed 5 percent throughout the year 2006 except for the month of September that was 5.2 percent.

The level of the PPI in October 2006 was 5.0 percent above the corresponding level in October 2005. Thereafter, the year – on – year rate showed increase and rates of 2.9 and 3.2 percent above the corresponding levels in November and December 2005 respectively. The highest increase in the year – on – year change of 5.2 percent occurred in September 2006.

## **6.2 Comparing the Price Changes in the PPI and The CPI**

CPI is based on the baskets of goods and services consumed by the households called consumer goods and services while the PPI on the other hand comprises of goods at farm gate prices or Ex-factory.

Most of the goods if not all at this level pass through the middle men called the distributors and wholesalers before the retailers from whom the households make direct purchases. That is to say, that there is a lag that exists between the price changes as indicated by the PPI and also the change shown by the CPI.

For the period under review (year 2006), the year-on-year change recorded by the CPI was 8.5 percent while the corresponding change for the PPI was 3.3, that is, at the month that ends each year (December).

The average price changes for CPI and PPI in 2006 were 8.4 and 3.95 percent, respectively.

### PRODUCER PRICE INDEX

## Chapter Seven

### 7.0 NATIONAL ACCOUNTS ESTIMATION OF QUARTERLY GROSS DOMESTIC PRODUCT (GDP)

#### 7.1 Introduction:

Quarterly GDP estimates are the basic components of quarterly national accounts. In Principle, the accounts covers the full set of integrated economic accounts and balanced sheet as stated in the United Nation's system of National Accounts (SNA 93).

Quarterly estimates of GDP offer short and high frequency indicators thereby yielding timely information about the current economic situation as well as changes within any economy on short-term bases. The procedures used for quarterly estimation of GDP for 2006 is based on the production approach to estimation of GDP which internationally is guided by the blue print of the United Nations' 1993 System of National Accounts (SNA '93). This full set of accounts is subdivided into two parts. These are;

1. Production Accounts
2. Expenditure Accounts

The survey was targeted towards collecting socio-economic data series for 2006 necessary for the production of quarterly GDP series.

#### 7.2 Sources of Data:

The analysis derived its data from three main sources, namely:

- (i) Survey on major economic indicators conducted jointly by the National Bureau of Statistics (NBS), Central Bank of Nigeria (CBN) and National Communication Commission (NCC) .
- (ii) Administrative Statistics data earlier collected prior to the survey by the National Accounts Division of NBS. This was used in filling up some existing data gaps.
- (iii) Input-output relations established from the previous quarterly GDP analysis/estimation by the National Accounts Division of the NBS.

#### 7.3 Producing the Estimates

Actual quarterly aggregates were generated for 2006. Current price estimates of GDP were derived while the value added at current prices was deflated using established 1990 implicit price deflators to obtain value added at 1990 constant prices.

The gross domestic product for each quarter is produced by aggregating the value added for all the industries for the particular quarter. The overall annual GDP is derived by summing the aforementioned value added for the four quarters.

The estimate of intermediate consumption, compensation of employees, capital consumption allowance, indirect taxes and subsidies were independently produced from the survey results. Operating surplus is derived by netting off compensation of employees, capital consumption from the value added at basic prices. By adding indirect taxes and removing subsidies from the estimates of value added at basic prices, the current price estimate for value added at producers price is obtained. All other variables in National Accounts were derived by either adding the components derived above or as residuals.

#### 7.4 **Quarterly GDP Estimates at both Current and Constant (1990) Prices:**

The economy in 2006 recorded an overall GDP at current basic price growth of 27.40 percent over that of 2005. The GDP at current basic price second half yearly growth of 2006 over 2005 stood at 26.85 percent. (See table 7.4.1)

The quarterly GDP estimates at current basic prices rose from a level of ₦3,169.6 billion, ₦3,399.4 billion, ₦3,924.8 billion, ₦4,078.5 billion, in 2005 to ₦3,986.3 billion, ₦4,426.1 billion, ₦4,986.5 billion, and ₦5,165.7 billion, respectively in 2006. This shows an overall quarterly growth rate in 2006 levels over the levels of 2005 to be 25.77 percent, 30.20 percent, 27.05 percent and 26.66 percent respectively (See table 7.4.6).

The primary sector consisting of crop production, livestock, forestry and fishing accounted for about 32.76 percent of the overall GDP at current basic prices in 2005 and 32.00 percent in 2006. Also 27.64 percent, 32.96 percent, 36.55 percent, 32.91 percent represent the primary sector quarterly GDP share at current prices in 2005 and 27.16 percent, 31.36 percent, 36.01 percent and 32.40 percent in 2006 respectively.

The GDP for the Crude Petroleum and Natural Gas sector at current basic price rose from a level of ₦5,664.9 billion in 2005 to ₦6,982.9 billion in 2006 representing an annual growth of 23.27 percent. The quarterly GDP levels stood at ₦1,348.2 billion, ₦1,382.2 billion, ₦1,450.2 billion, and ₦1,484.2 billion in 2005 and ₦1,752.7 billion, ₦1,627.0 billion, ₦1,745.7 billion, and ₦1,857.5 billion respectively in 2006. This sector accounted for 38.87 percent of the GDP at Current prices in 2005 and 37.61 percent in 2006 (see Table 7.4.6).

On the other hand, the Gross Domestic Product at 1990 Basic Price increased from a level of ₦561.9 billion in 2005 to ₦595.8 billion in 2006 (See table 7.4.2) showing an annual growth rate of 6.03 percent. (See table 7.4.7).

The second half yearly growth rate of GDP at constant 1990 prices for 2006 over 2005 stood at 5.96 percent. The quarterly GDP estimates at constant prices rose from the levels of ₦120.0 billion, ₦128.8 billion, ₦153.9 billion, and ₦159.2 billion, in 2005 to ₦128.6 billion, ₦135.4 billion, ₦162.5 billion, and ₦169.3 billion, respectively in 2006. This shows an overall corresponding quarterly growth rate in 2006 as 7.11 percent, 5.19 percent, 5.56 percent and 6.35 percent respectively (See Table 7.4.7). The primary sector consisting of crop production, livestock, forestry and fishing accounted for about 41.19 percent of the overall GDP at constant prices in 2005 and 41.72 percent in 2006. Also 35.58 percent,

42.24 percent, 45.07 percent, 40.82 percent represents the primary sector quarterly GDP share at constant prices in 2005 and 35.61 percent, 43.14 percent, 45.80 percent and 41.32 percent in 2006 respectively (See Table 7.4.7).

The GDP for the Crude Petroleum and Natural Gas sector at constant prices (See table 7.4.7) fell slightly from a level of ₦136.3 billion in 2005 to ₦130.2 billion in 2006 representing an annual growth of -4.51 percent. This sector accounted for 24.26 percent of the GDP at Constant prices in 2005 and 21.85 percent in 2006.

The implicit deflator of the gross domestic product (See table 7.4.3) rose from a level of 2,593.24 in 2005 to 3,115.80 in 2006 resulting in a growth of 20.15 percent.

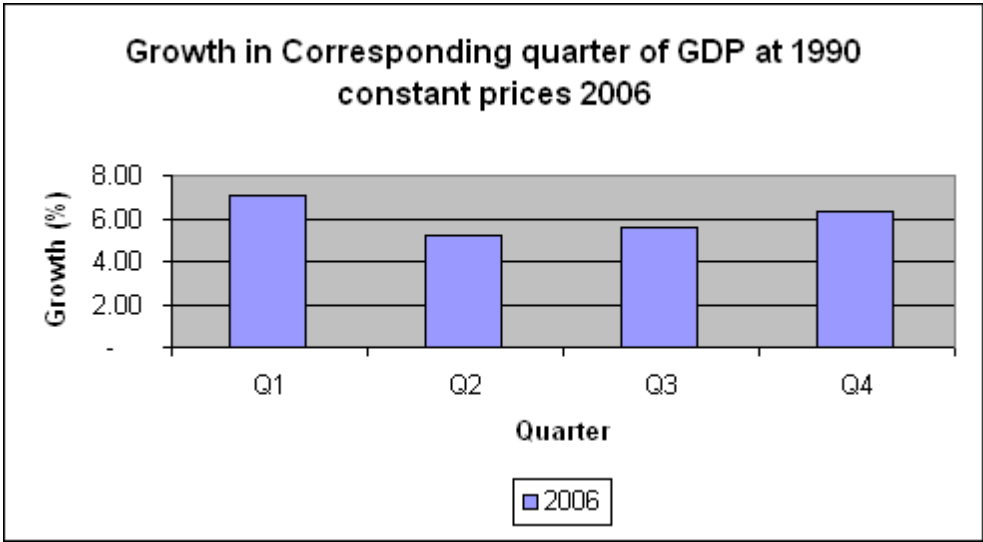

The economy recorded an overall increase of 0.50 percent in the output of the oil sector at constant prices in 2005 and an overall decrease of -4.51 percent in 2006.

The non-oil GDP in nominal terms (See table 7.4.6) increased from a level of ₦8,907.4 billion in 2005 to ₦11,581.7 billion in 2006 representing a growth of 30.02 percent in 2006. The non oil sector share of the overall GDP in 2005 and 2006 stood at 61.13 percent and 62.39 percent respectively. Though the economy recorded a decrease in oil production in 2006, the overall increase in the value added of crude petroleum and natural gas in 2006 was as a result of the steady increases in world oil prices.

The non-oil sector real GDP (See table 7.4.7) rose from a level of ₦425.6 billion in 2005 to ₦465.6 billion in 2006 resulting to a growth rate of 9.41 percent.

## Chapter Eight

### 8.1 **OVERALL ASSESSMENT**

The joint implementation of the survey led to a number of gains and benefits in the production of official statistics at national and sub-national levels.

- Production of comprehensive national and sub-national statistics thereby meeting the demands of the agencies.
- Elimination of non-conflicting results/findings on the various sectors of the economy
- Ensurance of credibility and acceptability of the findings of the collaborative survey, thereby building confidence of the various levels of users on the resulting statistics.
- Establishment of best statistical practices in the conduct of surveys among the MDAs in the national statistical system in the best interest of the country.
- Production of Integrated Statistical outputs for the various levels of users
- Ensurance of provision of high professional services thereby building capacity in the various agencies and production of quality results/findings
- Provision of single source of official statistics in Nigerian through the National Bureau of Statistics.
- Reduction in the funding of the surveys because of the joint implementation
- Ensurance cross-fertilization of ideas and enhanced knowledge of the various subjects by the agencies.

These gains will eventually lead to improved statistical technical coordination in Nigeria thereby raising the standard of quality of resulting official statistics in Nigeria.

### 8.2 **RECOMMENDATION**

The followings were recommended for future collaboration.

- There is need for improved planning and preparation for future surveys in terms of commencement and implementation strategies
- The new technology on the data collection instruments should be improved upon and perfected for future rounds, especially the use of scannable questionnaires. The technology is good in that it enhanced timeliness in data processing and analysis
- The lateness in provision of funds for the project affected timely statistical delivery of the survey
- There is strong need for further capacity building on data processing, analytical capability and especially report writing.
- The frames of NISH and NISE should be reviewed as a matter of urgency before the commencement of the next round in order to improve the quality and credibility of the results.

In general, the collaboration is in line with NBS vision and mission and it is being planned by the Chief Executives Officer and Director-General of NBS to extend this collaboration to all MDA's at national and sub-national levels including the LGA level.

## Appendix I

**TABLE 1.1**

### 2006 COLLABORATIVE SURVEY ON SOCIO-ECONOMIC ACTIVITIES LIST OF QUESTIONNAIRES BY TYPE AND BY REFERENCE NUMBERS

S/NO	SURVEY SYSTEM	NAME OF SURVEY	QUEST REF. NO.
1.	<b>NISH</b>	GHS	NBS/CBN/NCC/06/NISH-01

**TABLE 5.1.1 IMPORT PRICE INDEX (BASE: JAN 2005 =100) AT 10-DIGIT LEVEL OF HS CODE**

Descriptions	Jan_05	Feb_05	Mar_05	Apr_05	May_05	Jun_05
<b>Live animals; animals products</b>						
Frozen herrings (excl. livers and roes)	100	94.3	97.7	107.9	77.4	107.9
Frozen mackerel	100	46.8	75.5	55.3	94.9	76.2
Frozen fish, nes	100	110.3	89.7	131.0	243.3	373.4
Flours meals and pellets of fish,fit for human consumption	100	92.8	70.7	45.8	55.4	55.4
Smoked fish (excl. salmon and herrings)	100	100.0	100.0	171.1	81.2	95.0
Dried fish, not smoked (excl. cod)	100	191.8	160.2	110.1	121.8	153.3
Milk/cream of >1% but=<6% fat, not concent.or sweetened	100	68.0	50.5	72.8	59.4	60.9
Milk and cream in solid forms of >1.5% fat, unsweetened	100	100.0	100.1	99.9	100.2	99.5
<b>Live trees &amp; other plant, Blb, Root, Cut flowers etc</b>						
Products offish, etc; dead animals of chapter 3	100	122.3	74.1	98.8	98.4	134.5
Spelt, common wheat and meslin	100	82.0	91.0	86.5	238.2	59.4
Semi-milled or wholly milled rice	100	100.0	100.0	48.0	79.5	67.7
Maize (corn) starch	100	33.3	44.4	100.0	222.8	65.7
<b>Animals and vegetable fats and oil and other cleavage products</b>						
Fats/bovine ani./sheep/goats,raw/rendered,(excl.that of 1503)	100	100.3	99.5	100.6	100.0	100.3
Margarine (excl. liquid)	100	52.5	108.3	84.5	84.0	118.5
Edible preparations of fats and oils, nes	100	100.0	66.7	88.9	100.0	100.0
<b>Prepared of meat, fish or Crustaceans, Molluses etc</b>						
Cane or beet sugar, in solid form, nes	100	83.3	101.9	114.8	110.8	80.1
Glucose syrup	100	41.1	16.6	6.7	100.0	100.0
Preparations for infant use, for retail sale, of flour, etc	100	168.9	28.5	71.3	100.0	25.4
Food prep's of goods of hdgs 0401-0404/of flour,meal,etc not	100	89.0	104.6	88.1	107.3	71.5
Tomatoes, preserved otherwise than by vinegar/acetic acid, nes	100	85.3	80.0	55.3	53.1	100.0
<b>Mineral Products</b>						
Bituminous mixt.based on nat.asphalt,bitumen..(eg. cut-backs)	100	100.0	100.0	100.0	100.0	100.0
<b>Inorganic chem.; composts of prec met radioact elements etc</b>						
Calcium carbonate	100	100.0	66.3	88.8	85.0	80.0
Other cyclic hydrocarbons, nes	100	100.0	170.8	100.0	100.0	53.0
Dichloromethane (methylene chloride)	100	78.0	77.1	78.9	77.1	80.6
Dichlorodifluoromethane	100	140.4	84.1	108.1	31.4	7.6
Oth. Halog.deriv.of acyclic hydrocarbons nes contg.>=2 halogen	100	95.2	65.1	83.7	81.4	76.7
Chlorobenzene, o-dichlorobenzene and p-dichlorobenzene	100	73.4	38.8	48.8	53.7	47.1
Methanol (methyl alcohol)	100	100.0	100.0	100.0	100.0	100.0
Dodecan-1-ol, hexadecan-1-ol and octadecan-1-ol	100	53.4	67.5	18.8	46.6	116.1
Reactive dyes and preparations based thereon	100	91.8	95.9	95.9	87.1	103.5
Pigments and preparations based thereon	100	100.0	69.5	100.0	63.7	44.9
Mixt./with bas./odorifer's subs.incl.alc.sol's for food/drnk	100	129.6	76.5	102.0	73.6	84.1
Mixt.with basis of odorifer's subs.inc.alc.sol's for ind. Nes	100	138.8	79.6	106.1	48.9	100.0
Products put up as glues or adhesives for retail sale, =<1kg	100	52.4	46.5	49.4	47.9	75.1
Adhesives based on rubber or plastic (incl. artificial resins)	100	73.5	63.1	57.5	100.0	100.0
Agricultural insecticides	100	60.9	73.0	78.0	70.6	79.4
<b>Plastics and articles thereof</b>						
Polyvinyl chloride, not mixed with oth. subs., in pry. Forms	100	93.3	122.3	84.4	73.2	106.0
Acrylic polymers prepared,in primary forms, nes	100	71.9	14.1	149.3	52.5	19.0
Other polyethers, in primary forms, nes	100	100.0	100.0	100.0	100.0	100.0
Unsaturated polyesters, in primary forms, nes	100	97.3	97.3	97.3	97.3	97.3
Polyester chips	100	50.0	75.0	41.1	58.1	49.6
Other cellular plates, strips..., of plastics, nes	100	227.6	187.6	106.0	192.3	221.4
Boxes, cases, crates and similar articles of plastics	100	33.3	67.9	47.0	100.0	33.5
Sacks and bags (incl. cones) of polymers of ethylene	100	94.9	94.9	94.9	94.9	97.9
Stoppers, lids, caps and other closures of plastics	100	102.9	67.6	156.6	63.7	96.0
Tubes..., of vulcanized rubb., not reinforced, without fitts.	100	110.5	94.8	94.8	141.8	47.7
Tubes..., of vul. rubber, reinforced with mat., no fittings	100	107.2	69.1	98.6	91.6	140.7
Inner tubes, of rubber of a kind used on bicycles	100	83.8	91.5	91.6	91.3	91.9
Of a kind used on motor cycles	100	95.6	65.2	87.0	82.6	100.0
Articles of vulcanized rubber, nes	100	189.1	93.6	64.6	87.4	128.7

<b>Pulp of wood or of other fibrous cellulosic materials; waste etc</b>						
Paper... (excl. mech. fibres), weighing $\geq 40\text{g/m}^2$ but $\leq 150\text{g/m}^2$	100	62.2	99.0	53.7	84.2	73.1
Paper... (excl. mechanical fibres), weighing $> 150\text{g/m}^2$	100	100.0	68.4	89.5	21.1	59.7
Unbleached kraftliner, uncoated, in rolls or sheets	100	82.2	113.4	98.5	98.0	103.3
Kraftliner, uncoated (excl. unbleached), in rolls or sheets	100	114.7	85.3	85.3	90.2	95.1
Paper..., coated with kaolin, etc, weighing $\leq 150\text{g/m}^2$	100	55.6	33.3	51.9	55.6	61.7
Paper..., coated with kaolin, etc, weighing $> 150\text{g/m}^2$	100	40.1	46.7	62.3	49.7	83.6
Other printed matter, nes	100	99.9	100.1	99.6	100.7	98.4
<b>Textiles and Textiles Articles</b>						
Textile fabrics impregnated... with plastics, nes	100	56.0	58.5	52.4	57.2	66.0
<b>Footwear, Headgear, Umbrellas, Sunshades, Whips etc</b>						
Footwear, nes, not covering the ankle, of rubber or plastics	100	87.1	87.4	89.5	84.4	88.3
Outer soles and heels of rubber or plastics	100	49.2	49.7	66.3	100.0	32.4
<b>Art of stone, plaster, cement, abestos, mica or similar materials</b>						
Worked granite	100	90.7	102.4	106.9	62.7	164.0
Millstones, etc, of oth. agglomerated abrasives or of ceramics	100	48.8	54.6	48.8	92.9	78.5
Boards..., of plaster or compositions based on plaster, nes	100	100.0	66.7	88.9	100.0	85.2
Glazed ceramic flags and paving, hearth or wall tiles, etc, nes	100	90.2	134.0	75.9	60.6	127.9
Tableware and kitchenware, of porcelain or china	100	33.3	62.7	65.4	24.7	38.0
Ceramic tableware... oth household art.(excl.porcelain/china)	100	111.9	88.2	73.5	77.4	69.6
<b>Iron and steel</b>						
F/hotrolled/steel, not coils, width $\geq 600\text{mm}$ , $\geq 4.75\text{mm}$ but $\leq 10\text{mm}$ thick	100	33.3	44.1	61.5	85.5	95.9
F/cold-rolled i/steel, coils, width $\geq 600\text{mm}$ , $< 0.5\text{mm}$ thick	100	33.3	44.4	59.3	45.7	49.8
Doors, window-frames and thresholds for doors of iron or steel	100	65.9	51.3	54.7	34.6	64.5
Equip.for scaffolding,shuttering,propping/pitpropping i/steel	100	65.9	56.5	56.5	48.1	56.5
Structures and parts of structures, nes, of iron or steel	100	109.7	90.3	90.3	90.3	90.3
Reservoirs,tanks...(excl.for gas)of iron/steel, $\geq 300\text{l}$	100	82.7	75.0	51.2	82.7	75.0
Aluminium foil, $\leq 0.2\text{mm}$ thick, not backed (excl. rolled)	100	100.0	100.0	96.9	99.0	98.6
Aluminium foil, $\leq 0.2\text{mm}$ thick, backed with paper, plastics...	100	79.0	75.5	81.6	79.9	65.0
Hand-operated spanners and wrenches, non-adjustable	100	29.3	38.7	34.0	36.4	35.2
<b>Nuclear reactors boilers mchy &amp; appliance, parts</b>						
Spark-ignition reciprocating piston eng. for veh., $> 1000\text{cc}$	100	100.0	100.0	100.0	100.0	100.0
Spark-ignition recipro./rotary internal combustion eng., nes	100	78.3	100.0	83.7	51.1	100.0
For internal combustion engines for motor vehicles	100	92.7	100.0	73.9	104.1	155.5
Mach., apparatus & equipment for type-setting/composing, nes	100	135.8	82.1	82.1	84.5	79.6
Ac motors, single-phase	100	85.3	92.7	89.0	90.8	89.9
Generating sets with compression-ignition engines, $\leq 75\text{kva}$	100	100.0	100.0	100.0	100.0	100.0
Gen sets with compression-ignition engines, $> 75\text{kva}$ - $\leq 375\text{kva}$	100	139.5	98.7	112.7	117.0	129.3
<b>Rail, tramw locom; rolling stock &amp; parts thereof</b>						
Ckd engine capacity $\leq 1000\text{cc}$ imported by others	100	100.0	100.0	100.0	100.0	100.0
Vehicles engine capacity $1000\text{-}1500\text{cc}$ of less than 8 years	100	279.6	47.6	74.8	141.5	100.5
Vehicles engine capacity $1000\text{-}1500\text{cc}$ of more than 8 years	100	73.3	108.7	74.0	73.3	56.7
<b>Descriptions</b>						
	<b>Jul_05</b>	<b>Aug_05</b>	<b>Sep_05</b>	<b>Oct_05</b>	<b>Nov_05</b>	<b>Dec_05</b>
<b>Live animals; animals products</b>						
Frozen herrings (excl. livers and roes)	100.4	114.4	107.9	100.4	107.9	107.9
Frozen mackerel	51.3	157.3	46.9	70.0	104.9	104.9
Frozen fish, nes	113.2	186.4	47.5	325.3	316.1	116.2
Flours meals and pellets of fish, fit for human consumption	56.5	57.3	70.2	75.2	54.4	55.1
Smoked fish (excl. salmon and herrings)	68.1	131.3	98.1	98.8	109.4	104.6
Dried fish, not smoked (excl. cod)	83.9	116.5	89.8	100.0	151.1	112.5
Milk/cream of $> 1\%$ but $\leq 6\%$ fat, not concent.or sweetened	44.3	61.2	55.5	55.4	30.1	84.8
Milk and cream in solid forms of $> 1.5\%$ fat, unsweetened	101.0	97.9	99.9	100.2	99.5	99.6
<b>Live trees &amp; other plant, Blb, Root, Cut flowers etc</b>						
Products offish, etc; dead animals of chapter 3	135.6	90.3	45.0	90.3	75.2	108.5

## Appendix II

### NATIONAL BUREAU OF STATISTICS (NBS), CENTRAL BANK OF NIGERIA (CBN) AND NATIONAL COMMUNICATION COMMISSION (NCC) COLLABORATIVE SURVEY ON SOCIO-ECONOMIC ACTIVITIES IN NIGERIA 2006

#### 2.0 SAMPLE DESIGN FOR GHS AND NASS (PRIVATE FARMERS)

##### Introduction:

The sample design for the survey is based on the National Integrated Survey of Household (NISH) developed by National Bureau of Statistics (NBS). The NISH design employed a replicated sampling design that is technique by which many sample (replicates) were selected independently from a population such that each replicate sample represents the population.

Essentially, the NISH sample design is a 2-stage replicated and rotated cluster sample design with Enumeration Areas (EAs) as first stage sampling unit or Primary Sampling Unit (PSU) and Housing Units the second stage sampling units (secondary sampling units). Generally, for each state of the Federation, the NISH Master Sample is made up of 120 EAs drawn in 12 replicates. A replicate consists of 10 EAs.

##### Selection Procedures:

The EAs demarcated by the National Population Commission (NpopC) for the 1991 Population Census served as the primary Sample Frame for the design.

##### First Stage Selection:

Sixty EAs were selected with equal probability from the list of EAs in each state of the federation and 30 EAs for FCT, Abuja. The selected EAs cuts across rural and urban sectors. The study EAs for the collaborative survey were drawn from replicates 7,8,9,10,11 and 12 of the master sample of each state.

##### Second Stage Selection:

In each selected EA, a listing of housing units was carried out. The result provided the frame for the second stage selection. Ten housing units were selected systematically in each EA after the completion of the listing exercise. Thereafter, all the households within the selected HUs were interviewed using GHS questionnaire.

In the NASS (Private Farmers), a total of 32,850 Farming Housing Units (FHUs) drawn from 2,190 EAs were selected for interview for this survey. In each state, 900 farming housing units drawn from 60 EAs, were selected for studies. Four hundred and fifty farming housing units from 30 EAs were selected for study in FCT, Abuja. In each EA, 5 FHUs were studied for crop farming, 5 FHUs were covered for livestock and 5 FHUs for fishery

##### Estimation Procedures:

Let the probability of selecting the EA be  $f_j$  and the probability of selecting the housing unit be  $f_k$ . Then the product  $f = f_j f_k = \frac{1}{W_{jk}}$  where  $f_j = \frac{n}{N}$  and  $f_k = \frac{h}{H}$ .

**For GHS:**

$$\begin{aligned} \hat{Y}_i &= \frac{N}{n} \sum_{j=1}^n \frac{H}{h} \sum_{k=1}^h X_{ijk} \\ &= \frac{N}{n} \frac{H}{h} \sum_{j=1}^n \sum_{k=1}^h X_{ijk} \\ &= W_{ijk} \sum_{j=1}^n \sum_{k=1}^h X_{ijk} \quad (\text{Note: } W_{ijk} = \frac{N \cdot H}{n \cdot h}) \end{aligned}$$

Where:

- $\hat{Y}_i$  = Estimate for states
- $N$  = Total Number of EAs in  $i^{\text{th}}$  state
- $n$  = Selected number of EAs in state
- $H$  = Total number of Housing Units listed in the  $j^{\text{th}}$  EA
- $h$  = Selected number of Housing Units in the  $j^{\text{th}}$  EA.
- $X_{ijk}$  = Value of the element in the  $k^{\text{th}}$  housing unit of  $j^{\text{th}}$  EA in  $i^{\text{th}}$  state.
- $W_{ijk}$  = Weight of the element in  $k^{\text{th}}$  housing unit of the  $j^{\text{th}}$  EA in  $i^{\text{th}}$  state.

**For NASS (Private Farmers)**

$$\begin{aligned} \hat{Y}_i &= \frac{N}{n} \sum_{j=1}^n \frac{FH}{m} \sum_{k=1}^m X_{ijk} \\ &= \frac{N}{n} \frac{FH}{m} \sum_{j=1}^n \sum_{k=1}^m X_{ijk} \\ &= W_{ijk} \sum_{j=1}^n \sum_{k=1}^m X_{ijk} \end{aligned}$$

**Where**

- $\hat{Y}_i$  = Estimate for states
- $N$  = Total number of EAs in the  $i^{\text{th}}$  State
- $n$  = Selected number of EAs in the  $i^{\text{th}}$  State
- $FH$  = Total number of farming housing units listed.
- $m$  = Selected number of farming housing units
- $X_{ijk}$  = Value of the element in the  $k^{\text{th}}$  housing unit of  $j^{\text{th}}$  EA in the  $i^{\text{th}}$  state.
- $W_{ijk}$  = Weight of the element in  $k^{\text{th}}$  housing unit of the  $j^{\text{th}}$  EA in the  $i^{\text{th}}$  state.

**National Estimate:**

$$\hat{Y}_N = \sum_{i=1}^{37} \hat{Y}_i$$

where  $\hat{Y}_N$  is the National Estimate and  $\hat{Y}_i$  is the Estimate for states .

### Variance Estimate (Jackknife Method)

Estimating variances using the Jackknife method will require forming replicate from the full sample by randomly eliminating one sample cluster [Enumeration Area (EA) at a time from a state containing k EAs, k replicated estimates are formed by eliminating one of these, at a time, and increasing the weight of the remaining (k-1) EAs by a factor of k/(k-1). This process is repeated for each EA.

For a given state or reporting domain, the estimate of the variance of a rate, r, is given by

$$\text{Var}(r) = (\text{Se})^2 = \frac{1}{k(k-1)} \sum_{i=1}^k (r_i - r)^2$$

where (Se) is the standard error,

k is the number of EAs in the state or reporting domain.

r is the weighted estimate calculated from the entire sample of EAs in the state or reporting domain.

$r_i = kr - (k - 1)r_{(i)}$ , where

$r_{(i)}$  is the re-weighted estimate calculated from the reduced sample of k-1 EAs.

To obtain an estimate of the variance at a higher level, say, at the national level, the process is repeated over all states, with k redefined to refer to the total number of EAs (as opposed to the number in the states).

## Appendix III

### 3.0 SAMPLE DESIGN FOR NATIONAL INTEGRATED SURVEY OF ESTABLISHMENT

#### **Introduction:**

Designing an efficient sample for establishment surveys requires a broad understanding of the sectors in the economy and practical experience in sampling techniques. The final sample selection for this collaborative survey is arrived at through combinations of experiences in establishment surveys by both the Central Bank of Nigeria (CBN), National Communication Commission (NCC) and the National Bureau of Statistics (NBS).

#### **The Establishment frame used for the selection:**

In order to have a broad-based list of business and industrial establishments, the establishment frames from the Central Bank of Nigeria and National Bureau of Statistics were merged together. The merged frame was cleaned and validated. The cleaned and validation of the frame involve the following:

- (i) Elimination of duplications
- (ii) Removing death or moribund establishments from the frame
- (iii) Filling in missing information where feasible.

This exercise is made possible through the combined efforts of the Economic Survey and Census Division, the National Accounts Division and the Methodology Division of NBS.

Samples of 2,750 were selected from a frame of 15,556 from 14 sectors of the economy namely:

- (i) Agriculture, Hunting and Forestry (163)
- (ii) Fishing (10)
- (iii) Mining and Quarrying (75)
- (iv) Manufacturing including Petroleum Oil and Gas (769)
- (v) Building & Construction (137)
- (vi) Wholesale and Retail Trade (450)
- (vii) Hotel and Restaurants; (155)
- (viii) Organized Road Transport, (200)
- (ix) Financial Intermediation (233)
- (x) Private Professional Services (558)

#### **Selection Parameters:**

The following parameters are considered in the allocation of establishments to each sector and state.

- (i) Contribution of each sector to the Gross Domestic Products (GDP)
- (ii) Number of establishment in each sector by state.
- (iii) A prior knowledge of sectoral performance in the economy.

#### **Selection Procedure:**

Basically, the sample design used for this survey was a two-level Probability Proportion to size (PPs) in which the contribution of each sector to the GDP formed the basis of allocation at the first level while the basis of allocation at the second level was the number of establishments in each sector. A priori (purposive) allocation was also used to complement and boost the efficiency of the design.

**Overall Sample Size:**

The overall sample of establishments selected for this collaborative survey was 2,750. In arriving at this sample size, account was taken of the constraints imposed by limitation of resources, the need to ensure a manageable and controllable sample structure and the three important levels at which data are required for planning purposes, viz National, Zonal and state levels but basically, the estimates would be at national level.

**Estimation Procedure:**

If the sample of 'n' establishments is allocated to each sector with probabilities proportional to their sizes (contribution to GDP), say

$$P_i = \frac{M_i}{M_0} \text{ and } M_0 = \sum M_i$$

then the unbiased estimate of population (all establishments) total is given by:

$$\hat{y}_{pps} = \frac{1}{n} \sum_{i=1}^n \frac{y_i}{P_i}$$

and the estimate of the variance is given by:

$$\hat{V}(y_{pps}) = \frac{1}{n} \sum_{i=1}^n P_i \left[ \frac{y_i}{P_i} - \hat{y}_{pps} \right]^2$$

The unbiased estimator of the variance of the above estimator is given by:

$$\hat{V}(y_{pps}) = \frac{1}{n(n-1)} \left[ \sum_{i=1}^n \left( \frac{y_i}{P_i} \right)^2 - n \hat{y}_{pps}^2 \right]$$

## Appendix IV

### 4.0 LIST OF CONCEPTS AND DEFINITIONS ON NATIONAL INTEGRATED SURVEY OF HOUSEHOLD (NISH)

- (i) **Household Facilities:**  
These are the facilities available in the dwelling, such as toilets and kitchen, etc. Major source of lighting, drinking water and fuel most commonly used for cooking, are also included.
- (ii) **Household**  
A household consists of a person or a group of persons who live together in the same house or compound sharing the same house keeping arrangements and catered for as one unit.
- (iii) **Housing Unit**  
A housing unit is a unit of accommodation, which is occupied by one or more households.
- (iv) **House Keeping**  
These are activities which a person engages in within the household and which does not attract any payment or any payment or any form of remuneration.
- (v) **Literacy**  
A person is literate if he can read and write in any language, and can carry out simple activities such as writing letters or engage in simple conversation in a language.
- (vi) **Economy Activity**  
This is a form of work of services rendered by a person in order to contribute to the national accounts and are a component of the gross domestic product (GDP).
- (vii) **Occupation**  
This refers to the type of work, trade or profession that a person does to earn a living. Examples are:
  - (a) **Executive, Managers, Senior Officials** including those who decide policies or plan, direct and coordinate the policies and activities of enterprises/establishments or their internal departments or sections.
  - (b) **Professionals** which require high level of professional knowledge and experience in the field of physical and life sciences or social sciences and humanities. E.g. computer programmer, engineer, doctor, teacher, etc.
  - (c) **Technicians and Associate Professionals** are those who carry out technical work requiring technical knowledge and experience in the same fields as professionals, but at a lower skill level.
  - (d) **Clerks** are those whose main task require the knowledge and experience necessary to organize, store, compute and retrieve information. E.g. Office Secretary, Library Clerk, Cashier, Telephone Operators, etc.

- (e) **Service Workers/Shop and Market Sales Workers** are those people who provide services related to travel, house-keeping, catering, personal care, protection of individuals and property, services related to maintaining law and order, or selling goods in shops or at market. E.g. travel guide, cook, child-care workers, police officer, shop assistant, security guard etc.
  - (f) **Skilled Agriculture and Fishery Workers** are those whose task require the knowledge and experience necessary to produce farm, forestry and fishery products. E.g. Poultry Producers, markets gardeners, loggers, fishery workers, subsistence farmers etc.
  - (g) **Craft and Related Trade Workers** are those whose task requires the knowledge and experience of skilled traders or handicrafts, including an understanding of materials and tools to be used and of all stages of the production process. E.g. miner, carpenter, painter, welder, electrical mechanic, glassmaker, handcraft worker, baker, butcher, tailor etc.
  - (h) **Plant machine Operators and Assemblers** are those whose task requires the knowledge and experience to operate and monitor large scale and often highly automated industrial machinery and equipment. E.g. wood processing plant operator, printing machine operator, electronic equipment assembler, and bus driver crane operator etc.
  - (i) **Elementary Occupations** involve, mostly simple and routine task using hand-held tools and in some cases considerable physical strength. E.g. janitor, messenger, labourer, garbage collector etc.
- (viii) **Status in Employment**  
This gives an indication of the nature of a person's working situation.
- (a) **Employees**  
These are workers with employment contracts (explicit or implicit, written or oral), which give them a basic remuneration in cash (in form of wages, salaries, bonuses, commission from sales, piece rates etc) or in kind (in form of food, fuel, housing or training). These include paid apprentices and paid trainees, casual and seasonal workers, employees of producers' cooperative, etc. whether in the private or public sector.
  - (b) **Employers**  
These include those who work on their own account or with one or a few partners and they may engage, on a continuous or regular basis, one or more persons to work for them in their business as employees. Their business may be a corporation or a household or unincorporated enterprise.
  - (c) **Own-Account Workers**  
These include those who work on their own account or with one or more partners and do not engage any employee on a continuous or regular basis. However, they may engage employees as long as it is not on a regular or continuous basis and they may work with the help of (unpaid) contributing family workers.

- (d) **Members of Producers' Cooperatives**  
These are those who work in a cooperative environment, producing goods and services, in which each member takes part on an equal footing with other members in determining the organization of production, sales and other work, etc.
- (e) **Contributing Family Workers**  
These are those who work in a market-oriented establishment operated by a relation living in the same household who is not a partner in the business. They include young persons who work without pay in a business operated by a relation (e.g. Uncle, grandmother) and do not necessarily live in the same household.
- (f) **Others**  
This is the residual category of workers who could not be classified under any of the previously mentioned groups.

## Appendix V

### 5.0 LIST OF CONCEPTS AND DEFINITIONS FOR NATIONAL INTEGRATED SURVEY OF ESTABLISHMENT (NISE)

#### 1.0 HOTELS AND RESTAURANTS

- (i) **Number of Persons Engaged:**  
Include working proprietors and active partners, managers and directors of corporation working for pay, unpaid family workers, apprentices and others who work in the establishment for at least one-third of the normal work time without regular pay as well as paid employees.
- (ii) **Number of Paid Employees (Total Employment)**  
Include persons working in the establishment and receiving pay, as well as persons working away from the establishment who are paid by and under the control of the establishment) excluding home workers). These include all workers whether part-time, on paid sick leave or training.

Lodgers are paying guests lodging for the night in the hotel.  
Lodger-nights are number of night spent by lodgers in the hotel in a time period. For Example, if a hotel has 20 beds and lodgers occupied 18 beds in a night, the lodger-night for this day is 18.  
The same calculation must be carried out for each day in a month.
- (v) **Income from Accommodation:**  
This is the income received from room accommodation.
- (vi) **Cost of Goods Sold:**  
The total value of all goods for which ownership has been changed to others.
- (vii) **Stock/Inventories:**  
These comprise the value of all stocks owned by the company and held by or under the control of the establishment. Excluded are materials owned by others but held by the establishment for processing. Stocks acquired from others should be valued at "Purchaser's prices". (Book values are acceptable). Give details of the value of stocks/inventors at the end of each quarter.

#### MANUFACTURING

- (i) **Kind of Activity**  
This is to show the type of activity e.g. Manufacturing or industrial activity.
- (ii) **LEVEL OF EMPLOYMENT**
  - (a) **Number of Persons Engaged:**  
Include working proprietors and active partners, managers and directors of corporation working for pay, unpaid family workers, apprentices and other who work in the establishment for at least one-third of the normal work time regular pay as well as paid employees.

- (b) **Number of Paid Employees (Total Employment):**  
Include persons working in the establishment and receiving pay, as well as persons working away from the establishment who are paid by and under the control of the establishment (excluding home workers). These include all workers whether part-time, on paid sick leave or training.
- (c) **Wages and Salaries and Supplementary Benefits:**  
Include compensation paid top workers.

- (iii) **Operatives:**  
These relates to employees who are directly engaged in production in contrast to overhead activities of the establishment e.g. persons engaged in fabricating, processing or assembling, warehouse-men, truck drivers, maintenance workers etc.
- (iv) **Cost of Operation:**  
This is the total cost of materials, parts, components, containers, suppliers etc. purchased; purchased fuels, cost of contract and commission work done for you by others; electricity generated for own use and other operating expenses.  
Cost of production should not include Compensation of Employees.
- (v) **Production:**  
Quarterly output of principal product is requested under this item.

**Description of Product:**

List important goods, which were produced during the quarter. This refers to unit of measurement of Quantity which should be in standard form, e.g. metric tons, litres, metres, kilogram, etc.

**Output Value:** Enter value of goods produced during the quarter.

Validation should be at ex-factory price excluding charges for transportation or delivery and any discounts, rebates allowed to the buyer, but including such taxes as excise duty and sales tax.

- (vi) **Installed Production Capacity:**  
Enter installed or rated capacity of your plant and machinery (per quarter) for each principal product. This is expected to be above, or equal to, your quarterly output, the latter, if you are producing to capacity and the former if you are producing below capacity.
- (vii) **Stock/Inventories:**  
These comprise the value of all stocks owned by the company and held by or under the control of the establishment. Excluded are materials owned by others but held by the establishment for processing. Stocks acquired from others should be valued at "purchaser's prices". (Book value are acceptable).  
Give details of the value of stocks/investors at the end of each quarter.

## PRIVATE PROFESSIONAL SERVICES

1. **Kind of Professional Activity:**  
This is a specialised kind of vocation such as “legal profession”, “medical profession”, “Real Estate Profession”, etc.
2. **Professional Employees:**  
Include employees whose qualifications are registered with a government recognised professional association such as:
  - (a) Nigeria Bar Association
  - (b) Nigeria Medical Association
  - (c) COREN
3. **Sub-Professional Employees:**  
Include employees who have completed studies beyond the secondary level or above but who are not qualified to be listed as professionals.
4. **Clerks and other Workers:**  
Include employees whose work support that of professionals and sub-professional employees.
5. **Wages and Salaries and Supplementary Benefits:**  
Include wages and salaries and supplementary benefits paid to workers.
6. **Stock/Inventories:**  
These comprise the value of all stocks owned by the company and held by or under the control of the establishment. Excluded are materials owned by others but held by the establishment for processing. Stocks acquired from others should be valued at “purchaser’s prices”. (Book values are acceptable).  
Give details of the value of stocks/investors at the end of each quarter.

## MINING & QUARRYING

1. **Kind of Activity:**  
This is to show the type of activity e.g. Mining, Milling, Quarrying.
2. **Number of Persons Engaged:**  
Include working proprietors and active partners, managers and directors of corporation working for pay, unpaid family workers, apprentices and others who work in the establishment for at least one-third of the normal working time without regular pay as well as paid employees.
3. **Number of Paid Employees (Total Employment):**  
Include persons working in the establishment and receiving pay, as well as persons working away from the establishment who are paid and under the control of the establishment (excluding home workers). These include all workers, part-time, on paid sick leave or training.
4. **Wages and Salaries and Supplementary Benefits:**  
Include wages and salaries and supplementary benefits paid to workers.

5. **Operatives:**  
This relates to employees who are directly engaged in production in contrast to overhead activities of the establishment e.g. persons engaged in fabricating, processing or assembling, warehouse-men, truck drivers, maintenance workers, etc.
6. **Cost of Production:**  
This is the total cost of materials, parts, components, containers, suppliers, etc. purchased fuels, cost of contract and commission work done for you by others; electricity generated for own use and other operating of expenses.
7. **Production:**  
Monthly output of principal product is requested under this item.  
  
**Description of Product:** List important goods, which were produced during the quarter. This refers to unit of measurement of Quantity which should be in standard form, e.g. metric tons, litres, metres, kilogram, etc.  
  
**Output Value:** Enter value of goods produced during the quarter. Validation should be at ex-factory price excluding charges forB transportation or delivery and any discounts, rebates allowed to the buyer, but including such indirect taxes as excise duty and sales tax.
8. **Stock/Inventories:**  
These comprise the value of all stocks owned by the company and held by or under the control of the establishment. Excluded are materials owned by others but held by the establishment for processing. Stocks acquired from others should be valued at "purchaser's prices". (Book values are acceptable).  
Give details of the value of stocks/investors at the end of each quarter.

#### **ROAD TRANSPORT OPERATORS**

1. **Kind of activity:**  
This includes road transportation of goods and passengers.
2. **Number of Persons Engaged:**  
This include working proprietors and active partners, managers and directors of corporation working for pay, unpaid family workers, apprentices and others who work in the establishment for at least one-third of the normal work time without regular pay as well as paid employees.
3. **Number of Paid Employees (Total Employment):**  
Include persons working in the establishment and receiving pay, as well as persons working away from the establishment who are paid by and under the control of the establishment (excluding home workers). These include all workers whether part-time, on paid sick leave or training.
4. **Operatives (Labour & Service Workers):**  
This relates to employees who are directly engaged in transportation in contrast to overhead activities of the establishment e.g. drivers, mechanic, conductors, etc.
5. **Wages and Salaries and Supplementary Benefits:**  
Include wages and salaries and supplementary benefits.

6. **Stock/Inventories:**  
 These comprise the value of all stocks owned by the company and held by or under the control of the establishment. Excluded are materials owned by others but held by the establishment for processing. Stocks acquired from others should be valued at “purchaser’s prices”. (Book values are acceptable).  
 Give details of the value of stock/investors at the end of each quarter.

#### **WHOLESALE & RETAIL**

1. **Number of Persons Engaged:**  
 This include working proprietors and active partners, managers and directors of corporation working for pay, unpaid family workers, apprentices and others who work in the establishment for at least one-third of the normal work time without regular pay as well as paid employees.
2. **Number of Paid Employees (Total Employment):**  
 Include persons working in the establishment and receiving pay, as well as persons working away from the establishment who are paid by and under the control of the establishment (excluding home workers). These include all workers whether part-time, on paid sick leave or training.
3. **Operatives:**  
 These are shop assistants, sales attendants, driver(s) etc.
4. These wages and salaries and supplementary benefits.
5. (i) **Sales:** These are the total receipts.
- (ii) **Other Incomes:** These include discount granted, bonuses, etc
- ((iii) **Cost of Goods Sold:**These include total payment for all goods bought for resale.
- (iv) **Other Costs:** These include total payment for rent, electricity transportation, rates, etc

These should not include Compensation of Employees

6. **Stock/Inventories:**  
 These comprise the value of all stock owned by the company and held by or under the control of the establishment. Excluded are materials owned by others but held by the establishment for processing. Stocks acquired from others should be valued at “purchaser’s prices”. (Book values are acceptable). Give details of the value of stocks/investors at the end of each quarter.

#### **BUILDING & CONSTRUCTION**

1. **Kind of Activity:**  
 This is to show the type of activity e.g. Building, Civil Engineering or other Construction.
2. **Number of Persons Engaged:**  
 This include working proprietors and active partners, managers and directors of corporation working for pay, unpaid family workers,

apprentices and others who work in the establishment for at least one-third of the normal work time without regular pay as well as paid employees.

3. **Number of Paid Employees (Total Employment):**  
Include persons working in the establishment and receiving pay, as well as persons working away from the establishment who are paid by and under the control of the establishment (excluding home workers). These include all workers whether part-time, on paid sick leave or training.
4. **Artisans:** These are skilled workers
5. **Wages and Salaries and Supplementary Benefits:**  
Include wages and salaries and supplementary benefits paid to workers
6. **Number of Construction Work Started and Number Completed:**
  - (i) A building is deemed to have started if in addition to site preparation, the foundation of the building is laid.
  - (ii) Other projects are roads, bridges, ports and harbours, inland waterways, canals, railways, airway, stadia, etc.
  - (iii) If buildings and other projects are started or completed in other states besides the state in which the firm is located, details of the states and the number of buildings or projects started or completed should be shown in a separate list, and attached to the questionnaire.
7. **Value of Work Done (GROSS):**  
Include receipts from all construction activities done for an independent owner, investor and the value of construction on your own account. This is the total value of work done during the quarter(s).
8. **Other Income Received:**  
Include receipt from hire of plants and machinery, sales of plants in the same condition as purchased, fixed assets and other receipt excluding receipts from construction work.
9. **Cost of Materials, Supplies, etc:**  
Include materials that are physically incorporated in the construction work, etc. such as Wall and Decking materials, timber and wood, bitumen, laterite, granites, etc. used in construction work. Others include petrol and other fields for vehicles, cost of electricity purchased during the quarter from NEPA, etc.
10. **Stock/Inventories:**  
These comprise the value of all stocks owned by the company and held by or under the control of the establishment. Excluded are materials owned by others but held by the establishment for processing. Stocks acquired from others should be value at "purchaser's prices". (Book values are acceptable). Give details of the value of stocks/investors at the end of each quarter.
