Overview

ABSTRACT
The National Bureau of Statistics (NBS) has enhanced its methodology of collecting labour market data through the Nigeria Labour Force Survey (NLFS) in line with International Labour Organisation (ILO) guidelines.The data collection for the revised NLFS is based on a sample of 35,520 households nationwide of which 8,880 were selected quarterly. It is conducted continuously throughout the year, with national-level results produced quarterly and state-level results at the end of a full year.

about three-quarter of working-age Nigerians were employed - 76.7% in Q1 2023.This shows that most people were engaged in some type of jobs for at least one hour in a week, for pay or profit.About one-third (33.2% in Q1 2023) of employed persons worked less than 40 hours per week in this quarter. This was most common among women, individuals with lower levels of education, young people, and those living in rural areas.Underemployment rate which is a share of employed people working less than 40 hours per week and declaring themselves willing and available to work more was 12.2% in Q1 2023.The share of wage employment was 11.8% in Q1 2023 .Most Nigerians operate their own businesses or engaged in farming activities with 75.4% in Q1 2023.

Furthermore, 10.6% in Q1 2023 were engaged helping (without pay or profit) in a household businesses. In Q1 2023, 2.2% were engaged as Apprentices/Interns.Unemployment stood at 5.3% in Q1 2023 and this aligns with the rates in other developing countries where work, even if only for a few hours and in low-productivity jobs, is essential to make ends meet, particularly in the absence of any social protection for the unemployed.20.1% of the working age population were out of labour force in Q1 2023 while the rate of informal employment among the employed Nigerians was 92.6%.
